(8) The Secretary may approve guarantees for obligations secured by a delivered or redelivered vessel and issued to finance the construction, reconstruction or reconditioning of a vessel or to finance facilities or equipment pertaining to marine operations. Such facilities or equipment must be of a specialized nature, used principally for servicing vessels and in handling waterborne cargo in the close proximity of the vessel berthing area, excluding over the road equipment (other than chassis and containers), permanent or semi permanent structures and real estate (§ 298.22).

(9) The interest rate of each obligation of a stated maturity must be determined by the Secretary to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the Secretary.

(10) The Secretary will not issue guarantees unless satisfied that the documentation provides adequate security for the guarantees. Most important is the execution and delivery to the Secretary of a performed mortgage on one or more vessels (§ 298.31). Required assignments of rights and covenants from the obligor to the Secretary are specified (§ 298.32).

(11) With respect to the escrow fund, authorized and described in section 1108 of the Act, specific requirements are given concerning deposits to, disbursements from and investment of the fund (§ 298.33). By application of a formula, there may be a requirement of a deposit of proceeds from the sale of obligations in a construction fund (§ 298.34). The escrow and construction funds are security for the Secretary.

(12) As further security to the Secretary, provision is made for the creation of a fund (reserve fund) to which deposits may be required by a company from income attributable (by use of a formula) to the operation of one or more vessels financed with the assistance of the guarantees (§ 298.35). So long as the guarantees are in effect, a company must make annual deposits to a special joint depository account unless, as of the close of its accounting year, it is subject to and is in compliance with the primary financial requirements at closing, or the amount in the reserve fund is at least 50 percent of the principal amount of outstanding obligations. Detailed rules are provided concerning the computation of the annual deposit, withdrawals from and investment of the fund.

(13) An annual fee (guarantee fee) is charged by the Secretary to the obligor at a rate applied to the average principal amount of obligations outstanding during the annual period. The range of rates is ¼ to ½ of 1 percent before delivery or redelivery and ½ to 1 percent thereafter. Generally, within those ranges, the actual rate charged varies inversely with the ratio of the equity to long term debt of the participant in the financing considered by the Secretary to be the primary source of credit in the transaction (credit source).

Although the promulgation of regulations regarding the Title XI program is exempt from the notice requirements of 5 U.S.C. 553, the Maritime Administration is publishing the regulations in proposed form. Comments from interested persons are invited with respect to the proposed revision of Part 298, and may be submitted to the Secretary, Maritime Administration, Washington, D.C. 20230. All material received on or before November 30, 1976, will be considered. All comments in response to the proposed revision will be available for public inspection during normal business hours in Room 3900–B, Department of Commerce.

The proposed revision of Part 298 has been reviewed pursuant to E.O. 11821 and OMB Circular A–107, and it has been determined to have no major inflationary impact.

Part 298 of Title 46, Code of Federal Regulations, is proposed to read as follows:

PART 298—OBLIGATION GUARANTEES

Subpart A—Introduction

Sec.
298.1 Purpose.
298.2 Definitions.
293.3 Applications.

Subpart B—Eligibility

298.10 Citizenship.
298.11 Vessel requirements.
298.12 Operating qualifications.
298.13 Financial requirements.
298.14 Economic soundness.
298.15 Investigation fee.
298.16 Substitution of participants.

Subpart C—Guarantees

Sec.
298.20 Term of guarantees.
298.21 Limits.
298.22 Amortization of obligations.
298.23 Refinancing.
298.24 Facilities and equipment related to marine operations.
298.25 Financing repayment of construction-differential subsidy.
298.26 Excess interest or other consideration.
298.27 Lease rates.

Subpart D—Documentation

298.30 Nature and content of obligations.
298.31 Mortgage.
298.32 Required provisions.
298.33 Escrow fund.
298.34 Construction Fund.
298.35 Reserve fund and financial agreement.
298.36 Annual guarantee fee.
298.37 Examination and audit.

Subpart E—Defaults, Reporting Requirements, Applicability of Regulations

298.40 Defaults.
298.41 Remedies after default.
298.42 Reporting requirements-financial statement.
298.43 Applicability of regulations.

AUTHORITY: Sec. 204(b) and 1109, Merchant Marine Act, 1936, as amended (46 U.S.C. 1114(b), 1279(b), Reorganization Plans No. 21 of 1950 (64 Stat. 1273), and No. 7 of 1961 (75 Stat. 840), as amended by Pub. L. 91–469 (84 Stat. 1036), and Department of Commerce Organization 10–8 (38 FR 19707, July 23, 1973).

Subpart A—Introduction

§ 298.1 Purpose.

This part prescribes regulations implementing the provisions of Title XI of the Merchant Marine Act, 1936, as amended by Public Law 92–507 (46 U.S.C. 1271–1279), governing Federal ship financing assistance.

§ 298.2 Definitions.

For the purpose of this part—

(a) "Act" means the Merchant Marine Act, 1936, as amended (46 U.S.C. 1101–1294).

(b) "Actual Cost" of a Vessel means, as of any specified date, the aggregate, as determined by the Secretary, of all amounts paid by or for the account of the Obligor on or before that date and all amounts which the Obligor is then obligated to pay thereafter, for the construction, reconstruction or reconditioning of such vessel.

(c) "Affiliate" or "Affiliated" means any Person directly or indirectly controlling, controlled by or under common control with another Person.

(d) "Authenticating Agent" means a bank or other financial institution which, pursuant to an agreement with the Secretary, is authorized to endorse the Guarantee of the United States on each Obligation (authentication), and where there is a divisible single Obligation, is responsible for making proper demand, on behalf of the Obligees, for payment under the Guarantees if a default occurs.

(e) "Closing" means a meeting of various participants or their representatives in a Title XI financing, at which a commitment to issue Guarantees is executed, all or part of the Obligations are authenticated and issued and the proceeds are made available for a purpose set forth in section 1104(a) of the Act, or which occurs when a Vessel is delivered and a Preferred Mortgage is executed as security to the Secretary.

(f) "Depository" means a bank or other financial institution organized and doing business under the laws of the United States, any State or territory thereof or the District of Columbia, which is authorized under such laws to exercise corporate trust powers, is a member of the Federal Deposit Insurance Corporation and accepts deposits for purposes of implementing the program authorized by Title XI of the Act.

(g) "Documentation" means all or any part of the agreements relating to an entire Title XI financing, subject to the approval of the Secretary, irrespective of whether the Secretary is a party to each agreement.

(h) "Guarantee" means the contractual commitment of the United States of America, represented by the Secretary, endorsed on the face of each Obligation, to make payment to the Obligee or an agent, upon demand, of the unpaid interest on, and the unpaid balance of the principal of such Obligation, including interest accruing between the date of default (described in § 298.40 of this part) and the date of payment.

(i) "Guarantee Fee" means the annual fee payable to the Secretary in consideration for the continuing Guarantees.

(j) "Indenture Trustee" means a bank with corporate trust powers or a trust company, approved by the Secretary,

V41 1977 OCT 8 76 UMI

with a combined capital and surplus of at least $3,000,000, which has duties under the terms of a Trust Indenture, entered into with the Obligor that include issuing and registering the ownership and transfer of Obligations, holding funds in trust and disbursing such funds to redeem and make payments of interest and principal with respect to Obligations, making demand for payment under the Guarantees in the event of default and remitting payments received to Obligees, and which shall also endorse the Guarantees, pursuant to a specific authorization of the Secretary.

(k) "Letter Commitment" means a letter from the Secretary to an applicant for Guarantees, setting forth specific determinations made by the Secretary with respect to the applicant's proposed project, as required by the Act and regulations of this part, and stating the Secretary's commitment to execute Guarantees, subject to compliance by the applicant with any conditions specified therein.

(l) "Maritime Administration" means that agency created within the Department of Commerce by Reorganization Plan No. 21 of 1950 (64 Stat. 1273), amended by Reorganization Plan No. 7 of 1961 (75 Stat. 840), as amended by Pub. L. 91-469 (84 Stat. 1036).

(m) "Mortgage" includes a Preferred Mortgage as defined in the Ship Mortgage Act, 1920, as amended, on any Vessel of the United States (other than a towboat, barge, scow, lighter, car float, canal boat, or tank Vessel of less than twenty-five gross tons), and a mortgage on such a Vessel which will become a Preferred Mortgage when recorded and endorsed as required by the Ship Mortgage Act, 1920, as amended.

(n) "Obligation" means any note, bond, debenture, or other evidence of indebtedness, as defined in section 1101 (c) of the Act, issued for one of the purposes specified in section 1104(a) of the Act.

(o) "Obligee" means the holder of an Obligation.

(p) "Obligor" means any party primarily liable for payment of principal of or interest on any Obligation.

(q) "Paying Agent" means any Person appointed by the Obligor to pay the principal of or interest on the Obligations on behalf of the Obligor.

(r) "Person" means any individual, estate, foundation, corporation, partnership, limited partnership, joint venture, association, joint-stock company, trust, unincorporated organization, government, or any agency or political subdivision thereof.

(s) "Preferred Mortgage" means a Mortgage which is recorded, endorsed and otherwise in compliance with the requirements of the Ship Mortgage Act, 1920, as amended (46 U.S.C. 911-984).

(t) "Secretary" means the Secretary of Commerce, acting by and through the Assistant Secretary of Commerce for Maritime Affairs, the Maritime Administrator or any official of the Maritime Administration to whom is duly delegated the authority, from time to time, to perform the functions of the Secretary or the Maritime Administrator.

(u) "Secretary's Note" means a promissory note from the Obligor to the Secretary in an amount equal to the aggregate amount of the Obligations, which is issued simultaneously with the Guarantees.

(v) "Security Agreement" means the primary contract between the Obligor and the Secretary, providing for the transfer to the Secretary by the Obligor of all right, title and interest of the Obligor in property (including rights under contracts in existence or to be entered into), and containing other provisions relating to representations and responsibilities of the Obligor to the Secretary as security for the issuance of Guarantees.

(w) "Vessel" means all types of vessels, whether in existence or under construction, including passenger, cargo and combination passenger-cargo carrying Vessels, tankers, tugs, towboats, barges and dredges which are or will be documented under the laws of the United States, floating drydocks which have a capacity of at least thirty-five thousand or more lifting tons and a beam of one hundred and twenty-five feet or more between the wing walls, and oceanographic research or instruction or pollution treatment, abatement or control Vessels which are owned by citizens of the United States.

§ 298.3 Applications.

(a) *Form and time of filing.* Each application for a commitment to execute Guarantees shall be made on Form MA 163 to the Secretary, Maritime Administration, United States Department of Commerce, Washington, D.C. 20230, and be certified in the manner prescribed on said form. All required information shall be included on the form or in exhibits and schedules submitted with the application. Each exhibit and schedule shall contain a statement, on the first page thereof, clearly identifying the document as an attachment to an application for Obligation Guarantees, stating the name of the applicant and the date of the application. The applicant shall not satisfy requirements to furnish specific information by making reference on the application, or on any attachment, to any document that the applicant has previously submitted to the Maritime Administration with respect to any other matter. The Secretary will not process the application until the applicant has submitted all required information. Each completed application shall be filed with the Maritime Administration at least 120 days prior to the anticipated date by which the applicant requires a Letter Commitment. An applicant to whom a Letter Commitment has been issued shall comply with the guidelines for Documentation, a copy of which is attached to Form MA 163.

(b) *Filing Fee.* Each application must be accompanied by a filing fee in the amount of $1,000, which will be nonrefundable, irrespective of whether the Secretary subsequently issues a Letter Commitment.

(c) *Confidential information.* If the application, including attachments thereto, contains information which the applicant considers to be trade secrets and commercial or financial information and privileged or confidential, or otherwise exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552), the applicant shall assert a claim of exemption at the time of application. If no claim of exemption is made when the application is filed, the Maritime Administration shall not oppose any request subsequently made for disclosure, pursuant to the Freedom of Information Act, of any information contained in the application. Any claim of exemption shall be made in a memorandum or letter contained in a sealed envelope marked "Confidential Information", addressed to the Secretary, Maritime Administration, and shall be subscribed by the applicant, or with respect to a corporate applicant, a responsible corporate officer of the applicant. The applicant shall specifically and separately designate each part of the application, including attachments thereto, to which exemption from disclosure is claimed by noting "Confidential Information" thereon, and shall place each page in the sealed envelope. The applicant shall state in the memorandum or letter the bases, in detail, for each assertion of exemption, including but not limited to statutory and decisional authority. The Secretary, Maritime Administration, shall make a determination as to each assertion made by the applicant, and shall advise the applicant in writing of these determinations. If the Secretary, Maritime Administration, makes a determination favorable to the applicant as to any item of information in the application, the applicant will be advised that the Maritime Administration will honor that determination in the event of any request for production of such information made pursuant to the Freedom of Information Act. If a determination unfavorable to the applicant is made as to any item of information in the application, the applicant will be advised that unless a request for return of such information is made by registered mail to the Secretary, Maritime Administration, postmarked within 30 days of the date of the letter advising the applicant of the unfavorable determination, the information shall be associated with the balance of the application for processing, and shall be subject to disclosure by the Maritime Administration upon receipt of any request for disclosure under the Freedom of Information Act. If a request for return of information is made, the Maritime Administration will retain no copies of such information, and will process the application based only on the information that has not been returned.

Subpart B—Eligibility

§ 298.10 Citizenship.

(a) *Initial qualification.* The applicant and any other Person who is or will be

the legal or beneficial owner of a vessel being financed under Title XI of the Act, or who will have any interest in the Vessel, including, but not limited to, settlors, owner trustees, bareboat charterers, time or other charterers (including, without limitation, those under drilling contracts and contracts of affreightment), or Persons having any fiduciary relationship therein, and shipbuilders who retain title to a Vessel during the period of construction, shall be citizens of the United States, within the meaning of section 2 of the Shipping Act, 1916 (1916 Act), as amended (46 U.S.C. 801-842), sections 37 and 38 of the Merchant Marine Act, 1920, as amended (46 U.S.C. 861-889), and, as applicable, section 905(c) of the Act, unless the Secretary approves a noncitizen participation under the authority of sections 9, 37 and 41 of the 1916 Act.

(b) *Proof.* The applicant and any Person identified in the application who has or will have an interest in the Vessel shall, prior to the issuance of the Letter Commitment, establish United States citizenship in the form and manner prescribed in 46 CFR Part 355.

(c) *After letter commitment.* Any Person who has become identified with the project after the issuance of the Letter Commitment promptly shall establish in accordance with the guidelines for Documentation, United States citizenship in the form and manner prescribed in 46 CFR Part 355.

(d) *Supplemental proof.* At least 10 days prior to the Closing, all persons identified with the project who have established United States citizenship shall submit pro forma supplemental affidavits of citizenship or any other form of proof of citizenship acceptable to the Secretary, and on the date of such closing shall submit to the Secretary on forms approved by the Secretary, executed proof of continuing citizenship, bearing the date of Closing.

§ 298.11 Vessel requirements.

Each Vessel that is to be security for Guarantees shall meet the following criteria:

(a) *United States construction.* Be constructed, reconstructed or reconditioned entirely in a shipyard or shipyards of the United States, within the meaning of section 505 of the Act, and where practicable, only from articles, materials and supplies of the growth, production or manufacture of the United States, as defined in section 1401(h) of the Tariff Act of 1930 (19 U.S.C. 1401(h)). If an applicant for Guarantees elects to use foreign-source materials or components in the Vessel, the cost thereof shall not be included in the Actual Cost of the Vessel used as the basis for determining the amount of Guarantees, as set forth in § 298.21, except if the Secretary shall approve an application for waiver upon determining that:

(1) The article, material or supply is not customarily grown, produced or manufactured in the United States; or

(2) With respect to other than major components of the hull or superstructure, and any material used in the construction thereof, compliance with the United States origin requirement of this section would unreasonably delay completion of a Vessel beyond its contract delivery date, provided that the applicant submits evidence satisfactory to the Secretary that due diligence was employed to obtain materials of United States origin.

(b) *Competitive bids.* Be constructed, reconstructed, or reconditioned after solicitation of competitive bids for the work shown in the contract specifications, except if:

(1) It can be shown to the satisfaction of the Secretary that there are compelling reasons for not soliciting competitive bids, including, but not limited to, time factors, cost considerations and prior experience of the shipbuilder with respect to performance of similar projects; or

(2) Negotiation is permitted under Title V of the Act. Regardless of the basis for the contract award, the applicant's estimated construction contract price must be determined to be fair and reasonable by the Secretary. The Secretary will make this determination by means of an independent estimate of the cost of the Vessel, as described in the contract specifications, based upon existing average cost levels of material, labor and overhead expense for that type of Vessel. The estimate may include escalation (excluding material costs and other costs not expected to escalate) for the anticipated construction period of the Vessel, based upon considerations more fully described in § 298.21(e).

(c) *Class, condition and operation.* Be constructed, maintained and operated so as to meet the highest classification, certification, rating and inspection standards for vessels of the same age and type imposed by the American Bureau of Shipping (ABS), or such other standards as may be approved by the Secretary, and comply with all applicable laws, rules and regulations as to condition and operation, including, but not limited to, those administered by the United States Coast Guard, Environmental Protection Agency, Federal Communication Commission, Public Health Service, or their respective successors, and all applicable treaties and conventions to which the United States is signatory, including, but not limited to the International Convention for Safety of Life at Sea. All Vessels (including tugs, tug/supply Vessels, supply Vessels and crew boats) whether for hire or not, shall be inspected by the United States Coast Guard.

(d) *Reconstruction or reconditioning.* Be reconstructed or reconditioned in the opinion of the Secretary, to increase the useful life of the Vessel by at least five years. Repairs necessary for the Vessel to meet the classification standards approved by the Secretary, or any regulatory body, or because of previous inadequate maintenance and repair, shall not constitute reconstruction or reconditioning within the meaning of this paragraph. An applicant for Guarantees secured by a Vessel to be reconstructed or reconditioned shall make the Vessel available at a time and place acceptable to the Secretary for a condition survey to be conducted by representatives of the Secretary. The applicant shall pay the cost of the condition survey. The scope and extent of the condition survey shall not be less effective than that required by the last ABS special Survey completed (if the Vessel is classified), next due or overdue, whichever date is nearest in accordance with the Vessel's age. The Vessel shall meet the standard of the survey necessary for retention of Class (if the Vessel is classified) and the operating records of the Vessel shall reflect normal operation of the Vessel's main propulsion and other machinery and equipment consistent with accepted commercial experience and practice.

§ 298.12 Operator's qualifications.

No Letter Commitment shall be issued by the Secretary without a prior determination that the applicant, the bareboat charterer, or other Person identified in the application as the operator of the Vessel, possesses the necessary experience, ability and other qualifications to properly operate and maintain the Vessel or Vessels which serve as security for the Guarantees, and otherwise to comply with all requirements of this part.

§ 298.13 Financial requirements.

(a) *In general.* To be eligible for Guarantees, the applicant and other participants in the project must submit at the time of application, and as subsequently required by the Secretary, financial information satisfactory to the Secretary that financial resources are or will be available to support the project which is the subject of the Title XI application.

(b) *Financial definitions.* For the purpose of this part—

(1) "Company" means any Person subject to financial requirements imposed under paragraphs (d) and (e) of this section and paragraphs (b) and (c) of § 298.35.

(2) "Working Capital" means the difference between current assets and current liabilities, both determined in accordance with generally accepted accounting principles, adjusted as follows:

(i) Current assets shall be reduced with respect to:

(A) Amounts in or required to be set aside in any reserve fund that is being maintained pursuant to an agreement covering a Vessel owned or leased by the Company and financed with the assistance of insurance or Guarantees by the Secretary, or in another similar fund required under any other mortgage, indenture or other agreement to which the Company is a party;

(B) Any securities, or other instruments of indebtedness of an Affiliate of the Company or of any stockholder, director, officer or employee (or any member of the family) of the Company or of such Affiliate, except reasonable advances to Agents required for the normal current operation of the Company's Vessels and receivables outstanding for

V 41 N 197 OCT 8 76 UM

not more than 60 days, arising out of the ordinary course of business; and

(C) An amount equal to any excess of unterminated voyage revenue over unterminated voyage expense.

(ii) Current liabilities shall be increased by the amounts of Rentals payable within the next twelve months.

(3) "Equity" (net worth) means, as of any date, the total of paid-in-capital stock, paid-in-capital, retained earnings and all other amounts that would be included in Equity in accordance with generally accepted accounting principles, but exclusive of (i) any receivables from an Affiliate of the Company or any stockholder, director, officer, or employee (or any member of the employee's family) of the Company, or of an Affiliate of the Company (other than current receivables arising out of the ordinary course of business and not outstanding for more than 60 days) and (ii) any increment resulting from the reappraisal of assets.

(4) "Rentals" means, as of any date, that portion of non-capitalized and noncancellable leases, charters and other similar commitments relating to Vessels, equipment or facilities leased, chartered or otherwise to be used by the Company for a term of more than one year, and shall be determined as the greater of the following:

(i) The amount included in Long Term Debt as determined under generally accepted accounting principles; or

(ii) The aggregate present values of the minimum Rentals, relating to major categories of properties, e.g., real estate, Vessels and equipment. Present values shall be computed by discounting net Rentals (after subtracting, if practicable, estimated or actual amounts, if any, applicable to taxes, insurance, maintenance and other operating expenses) at an interest rate implicit in the term of each Rental at the time of entering into the Rental. If the interest rate is unknown, either the weighted average interest rate (based on present value), range of rates or specific interest rates shall be utilized.

(5) "Long Term Debt" means, as of any date, the total notes, bonds, debentures, equipment obligations and other evidence of indebtedness that would be included in Long Term Debt in accordance with generally accepted accounting principles, less the balance of Escrow Fund deposits attributable to the principal of Obligations sold, where deposits are required in accordance with § 298.33. There shall also be included any Rentals and any guarantee or other liability for the debt of any other Person (except fees and expenses of an Indenture Trustee or Authenticating Agent and endorsements for deposits of checks and other negotiable instruments acquired in the ordinary course of business). Deferred income taxes shall not be included in Long Term Debt.

(6) "Capitalizable Cost" means the aggregate of the Actual Cost of the Vessel and those other items which customarily would be capitalized as Vessel costs under generally accepted accounting principles.

(7) "Depreciated Capitalizable Cost" means the Capitalizable Cost of a Vessel, depreciated on a straight line basis over the same useful life of the Vessel as determined by the Secretary for Actual Cost, and depreciated as required by § 298.21(g).

(c) *Applicability.* The financial resources shall be adequate to meet the Equity requirements in the project and existing Working Capital requirements, as set forth in paragraphs (d) and (e) of this section.

(1) The various financial requirements shall be met by the owner of the Vessel or Vessels to be security to the Secretary for the Guarantees, except that if the owner is not the operator, the overall financial requirements shall be allocated among the owner, the operator and other parties as determined by the Secretary.

(2) The Company shall satisfy the applicable financial requirements, in addition to any other financial requirements already imposed or which may be imposed upon it in connection with other Vessels financed under the Title XI program.

(3) A determination as to whether the Company has satisfied all financial requirements shall be based on the assumption that the projected financing has been completed. Accordingly, a pro forma balance sheet shall be submitted at the time of the application, reflecting any adjustment made pursuant to paragraph (d)(1)(i) of this section, and a revised pro forma balance sheet, reflecting the completion of the projected financing, shall be submitted at least five business days before the initial Closing.

(d) *Primary financial requirements at Closing.* Where the primary minimum financial requirements at Closing are satisfied and the Company is required to enter into a Title XI Reserve Fund and Financial Agreement, the financial covenants in § 298.35(b) are applicable. Primary financial requirements can apply to one or more Companies, and are determined as follows:

(1) *Owner as operator.* Where the owner is to be the Vessel operator, minimum requirements at Closing usually are as follows:

(i) *Working Capital.* The Company's Working Capital shall not be less than one dollar. This Working Capital requirement is based on the premise that the Company engages in a service-type activity with only normal Vessel inventory. If Working Capital includes other inventory, in addition to such normal Vessel inventory, the Secretary may adjust the requirement as considered appropriate. Also, if the Secretary determines that the Company's Working Capital includes accounts receivable that it reasonably could not expect to collect within one year, the Secretary may make adjustments to the Working Capital requirements.

(ii) *Long Term Debt.* The Company's Long Term Debt, which must include the Obligations (less the current portion thereof), shall not be greater than twice its Equity.

(iii) *Equity (net worth).* The Company's Equity shall be the greater of (A) 50 percent of its Long Term Debt or (B) 90 percent of its Equity as shown on the last audited balance sheet, dated not earlier than six months before the date of issuance of the Letter Commitment.

(2) *Lessee of charterer as operator.* Where a lessee or charterer is to be the Vessel operator, minimum requirements at Closing usually are as follows:

(i) *Working Capital.* The operator's Working Capital requirement shall be the same as that imposed on the owner as operator under paragraph (d)(1)(i) of this section and based on the same premise stated therein.

(ii) *Long Term Debt.* The operator's Long Term Debt shall not be greater than twice its Equity.

(iii) *Equity (net worth).* Different Equity requirements shall be imposed on the owner and operator of the Vessel, respectively, as follows:

(A) The owner's Equity shall at least be equal to the difference between the Capitalizable Cost or Depreciated Capitalizable Cost of the Vessel (whichever is applicable) and the total amount of the Guarantees.

(B) The operator's Equity shall be the same as that which is required of the owner as operator under paragraph (d)(1)(iii) of this section.

(e) *Alternative financial requirements at Closing.* If the applicant is unable to demonstrate to the satisfaction of the Secretary that there is or will be compliance with the primary financial requirements at Closing set forth in paragraph (d) of this section, eligibility for Guarantees shall be based upon satisfaction of alternatives minimum financial requirements, in which the financial covenants imposed and the requirements for maintenance of a Title XI Reserve Fund shall be as provided for in § 298.35(c). Alternative financial requirements are as follows:

(1) *Owner as operator.* Where the owner is to be the Vessel operator, the alternative requirements at Closing usually are as follows:

(i) *Working Capital.* The Company's Working Capital, which may be adjusted by the Secretary in accordance with the provisions set forth in paragraph (d)(1)(i) of this section, shall be an amount at least equal to the sum of the following (less the current portion of the Obligations):

(A) Eight percent of the estimated Capitalizable Cost of a Vessel to be financed upon delivery (redelivery in the case of a reconstructed or reconditioned Vessel), or eight percent of the estimated Depreciated Capitalizable Cost of a Vessel to be financed or refinanced after delivery. With respect to a reconstructed or reconditioned Vessel, the estimated Capitalizable Cost or Depreciated Capitalizable Cost, whichever is applicable (depending upon when financing occurs), shall be that related only to the cost of work performed in the reconstruction or reconditioning;

(B) One year's premium for Vessel insurance including Hull, Machinery, Protection and Idemnity, and War Risk coverage; and

(C) One year's Guarantee Fee.

(ii) *Equity (net worth).* The Company's Equity shall be at least equal to 90 percent of the Equity as shown on the last audited balance sheet dated not earlier than six months before the issuance of the Letter Commitment, but not less than the sum of the following:

(A) The difference between (1) the estimated Capitalizable Cost of a new Vessel to be financed upon delivery, the estimated Capitalizable Cost of the work to be performed in reconstructing or reconditioning a Vessel, the Depreciated Capitalizable Cost of an existing Vessel to be refinanced or the Depreciated Capitalizable Cost of a new Vessel to be financed after delivery, and (2) the amount of the Guarantees; and

(B) The amount of Working Capital as determined in accordance with the provisions of paragraph (e)(1)(i) of this section.

(2) *Lessee or charterer as operator.* Where the lessee or charterer is the Vessel operator, the alternative financial requirements at Closing usually are as follows:

(i) *Working Capital.* The Company shall have Working Capital in an amount determined in accordance with the provisions of paragraph (e)(1)(i) of this section, applicable where the owner is the operator.

(ii) *Equity (net worth).* Different Equity requirements shall be imposed on the operator and the owner, respectively as follows:

(A) The operator shall have Equity at least equal to 90 percent of the Equity shown on the last audited balance sheet dated not earlier than six months before the issuance of the Letter Commitment, but no less than its Working Capital requirement.

(B) The owner shall have Equity in an amount determined in accordance with the provisions of paragraph (e)(1)(ii)(A) of this section.

(f) *Adjustments to financial requirements at Closing.* If the owner, although not operating a Vessel, assumes any of the operating responsibilities, the Secretary may adjust the respective Working Capital and Equity requirements of the owner and operator, otherwise applicable under paragraphs (d) and (e) of this section, by increasing the requirements of the owner and decreasing those of the operator by the same amount.

(g) *Subordinated debt considered to be equity.* With the consent of the Secretary, all or part of the Equity requirements applicable under paragraphs (d) and (e) of this section, except any part representing the difference between the Capitalizable Cost of the Vessel and the amount of the Obligations, may be satisfied by debt, fully subordinated as to the payment of principal and interest on the Secretary's Note and any claims secured as provided for in the Security Agreement or the Mortgage. Repayment of subordinated debt may be made only from funds available for payment of dividends or for other distributions, in accordance with requirements of the Reserve Fund and Financial Agreement (described in § 298.35). Such subordinated debt shall not be secured by any interest in property that is security for Guarantees or Mortgage insurance under Title XI, unless the Obligor and the lender enter into a written agreement, satisfactory to the Secretary, providing, among other things, that if any Title XI financing or advance by the Secretary to the Obligor shall occur in the future, such security interest of the lender shall become subordinated to any indebtedness incurred by the Obligor and any security interest obtained by the Secretary in that property, or other property, with respect to the subsequent indebtedness.

(h) *Modified requirements.* The Secretary may waive or modify the financial requirements otherwise applicable under the provisions of paragraph (d) and (e) of this section, upon determining that there is substantial security for the Guarantees in addition to that usually required in the Security Agreement, e.g., guarantees of payment on the Secretary's Note by another Person or a long term charter by the Company to a Person considered by the Secretary to be in excellent financial condition, or may impose similar financial requirements on the Person providing the additional security for the Guarantees.

§ 298.14 Economic soundness.

No Letter Commitment for Guarantees shall be given by the Secretary without finding that the proposed project, with respect to which the Vessel or Vessels are to be financed under Title XI, will be economically sound. In making the economic soundness finding, the Secretary shall consider, together with other factors, the market potential for the employment of the Vessel or Vessels over the life of the Guarantees, projected revenues and expenses of the operation, the length of the Guarantee period and any charters, contracts of affreightment, transportation agreements or similar agreements which will assure the employment of the Vessel or Vessels.

§ 298.15 Investigation fee.

(a) *In general.* Within 30 days after the date of the Letter Commitment the applicant shall pay an Investigation Fee, computed as hereinafter provided, to the Secretary in the amount stated in the Letter Commitment. The Secretary may cancel the Letter Commitment if timely payment of the fee is not received. This fee is imposed to pay for the investigation of the project described in the application and the participants in the project, the appraisal of properties offered as security, Vessel inspection during construction, reconstruction or reconditioning (where applicable), and other administrative expenses. If, for any reason, the Secretary shall subsequently disapprove the application, one-half of the Investigation Fee shall be due and payable.

(b) *Maximum.* The Investigation Fee, including any amount imposed pursuant to paragraph (d) of this section, shall not exceed one-half of one percent of the aggregate amount of Obligations to be issued. The $1,000 filing fee previously paid upon filing the original application (described in § 298.3) shall be credited against the Investigation Fee.

(c) *Base fee.* The base fee shall be as follows:

(1) *After Vessel completion.*—If Guarantees are issued after construction, reconstruction or reconditioning of the Vessel or Vessels that serve as security for the Guarantees, the fee shall be $1,000 for the first $300,000 of Obligations plus one-eighth of one percent of the balance of the Obligations.

(2) *Before Vessel completion.*—If Guarantees are issued before completion of the project, the base fee shall be 110 percent of that charged with respect to a completed project.

(d) *Amendment of application.*—An amendment may be made to an application for a commitment to execute Guarantees by written notice to the Secretary, Maritime Administration, United States Department of Commerce, Washington, D.C. 20230. To be effective, an amendment must contain a statement on the first page thereof clearly identifying the document as an amendment to an application for Obligation Guarantees, stating the name of the applicant and the date of the original application. The applicant shall sign, date and certify the amendment at the end thereof. Additions to the base fee shall be imposed under the following circumstances:

(1) *Before Documentation reviewed.* There shall be an additional charge of $3,000 to pay the cost of processing an amendment made after the Letter Commitment has been issued, but before review of the Documentation by the Maritime Administration, if the Secretary determines that the amendment represents a substantial change in the application. A substantial change would include, but not be limited to, a change from an ownership to a sale and leaseback arrangement, drastic alteration of Vessel design, large cost increases or other changes that affect the basic economics of the project.

(2) *After Documentation reviewed.* If an amendment is made after review of the Documentation and prior to the sale of any Obligation, and the Secretary determines that the amendment represents a substantial change in the Documentation, there shall be an additional charge of one-half of the Investigation Fee charged pursuant ot paragraph (c) of this section, but not more than $50,000. A substantial change would include, but not necessarily be limited to, a basic change in the structure of the financing, such as a change from an ownership to a sale and leaseback arrangement, or

V 41 197 OCT 8 76 UM

a substitution of parties resulting in a basic change affecting the credit risk of the financing. Ordinary changes in the Documentation such as cost changes, assignments, simple substitutions of parties, not affecting the basic credit or structure of the transaction, and other similar changes shall not be construed to be a substantial change.

§ 298.16 Substitution of participants.

Application may be made to the Maritime Administration for permission to substitute participants to a Mortgage and/or Security Agreement in a financing that is receiving assistance authorized by Title XI of the Act, both prior and subsequent to amendment by Pub. L. 92–507. A non-refundable fee shall be imposed, payable at the time of application. This fee shall be in addition to the Annual Guarantee Fee or annual premium charge for Mortgage insurance, whichever is applicable, as follows:

(a) *Mortgage assignment.* A mortgagee applying for permission to assign an insured Mortgage to another Person shall pay a fee of $1,500 to defray the costs of processing and reviewing the application.

(b) *Mortgage assumption.* Payment of a $3,000 fee shall be required to defray all costs of processing and reviewing a joint application by a mortgagor and/or Obligor and a proposed transferee of a Vessel, which is security for Title XI debt, if the proposed transferee is to assume the Mortgage and/or the Security Agreement.

Subpart C—Guarantees

§ 298.20 Term of Guarantees.

(a) *In general.* To be eligible for Guarantees, Obligations shall have a maturity date satisfactory to the Secretary, but in no event to occur later than:

(1) Twenty-five years from the date of delivery from the shipbuilder of a new Vessel which is to be security for Guarantees;

(2) Twenty-five years from the date of delivery from the shipyard of the last of multiple Vessels which are to be security for the Guarantees, if the applicant agrees to reduce the amount of Obligations to be issued to an amount less than the maximum Guarantees allowable under section 1103(c) of the Act. If such agreement does not exist, a maturity date for all the Obligations will be determined by the Secretary by taking a weighted average of the remaining useful lives of all the vessels which are to be security for the Guarantees; or

(3) Twenty-five years from the date of delivery of a reconstructed or reconditioned Vessel which is to be security for the Guarantees, or at the expiration of the remaining useful life of the Vessel, as determined by the Secretary.

(b) *Required redemptions.* Where multiple Vessels are to be used as security for the Guarantees, as set forth in paragraph (a) of this section, the Secretary may require payments of principal prior to maturity (redemptions) with respect to all related Obligations, as may be deemed necesary to maintain adequate security for the Guarantees.

(c) *Interest rate.* The interest rate of each Obligation of a stated maturity must be determied by the Secretary to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the Secretary.

§ 298.21 Limits.

(a) *Actual cost basis.* Obligations may not be in an amount greater than 75 percent or 87½ percent, whichever is applicable under the provisions of section 1104(b)(2) of the Act, of the Actual Cost of the Vessel or Vessels. Where existing debt is being refinanced, as provided for in section 1104(a)(4) of the Act, the amount of new Obligations may not exceed the lesser of:

(1) The amount of outstanding debt being refinanced (whether or not receiving assistance under Title XI); or

(2) 75 or 87½ percent, whichever is applicable, of the Depreciated Actual Cost of the Vessel concerned (described in paragraph (g) of this section).

(b) *Actual Cost items.* Actual Cost is comprised of those items which would customarily be capitalized as Vessel construction costs under generally accepted accounting principles, such as designing, engineering, constructing (including performance bond premiums approved by the Secretary), inspecting, outfitting and equipping. There shall be included those cost items usually specified in Vessel construction contracts, e.g., changes and extras, cost of owner furnished equipment, and commitment fees and interest on the Obligations or other borrowings during the construction period (excluding interest paid or subordinated debt considered to be Equity, and incurred during the construction period), and less income realized from investment of Escrow Fund deposits during the construction period. Actual Cost items must also be determined by the Secretary to be fair and reasonable. In determining a fair and reasonable Actual Cost, the Secretary will consider all pertinent factors, weighing each factor according to importance under the particular circumstances, including, but not limited to the following:

(1) Contractor's cost of material;

(2) Contractor's cost of labor;

(3) Contractor's cost of overhead, including allocation of facilities used or acquired;

(4) Geographical location of construction and projected area of planned operations;

(5) Risk to the contractor;

(6) Competition and availability of alternate contractors;

(7) Anticipated profit; and

(8) Delivery date.

(c) *Items excludible from Actual Cost.* Actual Cost shall not include any other costs such as the following:

(1) Legal fees or expenses;

(2) Accounting fees or expenses;

(3) Commitment fees or interest other than those specifically allowed;

(4) Fees, commissions or charges for granting or arranging for financing;

(5) Fees or charges for preparing, printing and filing an application for Title XI Guarantees and supporting documents, for services rendered to obtain approval of the application and for preparing, printing and processing documents relating to the application for Guarantees;

(6) Underwriting or trustee's fees;

(7) Federal documenary tax stamps;

(8) Investigation Fee determined in accordance with section 1104(f) of the Act and § 298.15 of this part;

(9) Guarantee Fees determined in accordance with the provisions of section 1104(e) of the Act and § 298.36;

(10) Predelivery Vessel operating expenses, Vessel insurance premiums and other items which may not be properly capitalized by the owner as costs of the Vessel under generally accepted accounting principles;

(11) The cost of the condition survey required by § 298.11(e) of this part and all work necessary to meet the standards set forth therein;

(12) The cost of all items of material installed in the Vessel which are of foreign origin unless the Secretary has granted a waiver, as provided for in § 298.11(a);

(13) Any amount payable to the shipyard for early delivery of the Vessel; and

(14) The cost to the shipowner of a Vessel which is to be reconstructed or reconditioned, e.g. cost of acquisition or repair work.

(d) *Substantiation of Actual Cost.* Prior to payment from the Escrow Fund or Construction Fund (described in § 298.33 and 298.34, and prior to the final Actual Cost determination for each Vessel, the applicant shall submit to the Secretary documents substantiating all claimed costs. These documents may include, but need not be limited to copies of invoices, change orders, subcontracts and, where required by the Secretary, statements from independent certified or independent licensed public accountants that the costs for which payment or reimbursement is sought were actually paid or are payable with respect to the construction of a Vessel. These documents must be summarized, indexed and arranged according to cost categories, pursuant to directions contained in forms prescribed by the Secretary.

(e) *Escalation as part of Actual Cost.* Escalation clauses in construction contracts shall be subject to approval by the Secretary. After a review of the base contract price and the escalation clauses, the Secretary shall, in order to estimate the Actual Cost amount to be stated in the Letter Commitment, add to the base contract price the amount of escalation estimated by the applicant. The Secretary will determine if the amount of escalation claimed by the applicant as Actual Cost is fair and reasonable, by the application of selected Bureau of Labor Statistics indices, or other indices considered to be appropriate, and a method of calculation as follows:

(1) *Information required.* (i) Contract or base date from which escalation is to be calculated; and

(ii) Base dollar amounts for material and fully allocated labor costs to which escalation will be applied.

(2) *Examples of indices to be used.* (i) *Steel.*—Bureau of Labor Statistics Wholesale Indices for Carbon Steel, Type A–36, 1013–0246.01;

(ii) *Outfit and machinery.*—Bureau of Labor Statistics Index of Wholesale Prices—Industrial Commodities; and

(iii) *Labor.*—Bureau of Labor Statistics Index for Labor for Steel Vessels (Base: 1962–100).

(3) *Method of calculation.* The monthly figures based on use of the above indices will be averaged by calendar quarters. The increase will be computed for each calendar quarter in which material or equipment shipments are made or in which labor hours are expended on the contract Vessel, based on construction schedules approved by the Secretary, by dividing the calendar index average by the contract base date index figure and subtracting 1.0. The resultant decimal factor will be multiplied by the amount of material shipped or the amount of labor expended in each calendar quarter to determine the allowable escalation for that quarter. The total of such quarterly figures for all quarters during the construction period will determine the total allowable escalation.

(4) *Disagreement with Secretary's determination.* Should an applicant disagree with the above indices or method of calculation and present a claim for escalation cost based upon other indices and methods of calculation which are considered to be more appropriate by the applicant, the Secretary shall review such claim, and may modify the amount of allowable escalation, if considered appropriate.

(f) *Moneys received in respect of construction of the Vessels.* If the Obligor or any Person acting in behalf of the Obligor shall from time to time receive moneys due in respect of construction of the Vessel (described in the Security Agreement) from the shipbuilder, guarantors, surety or other Person, the Obligor shall give written notice of such fact to the Secretary. The Obligor or other recipient shall promptly make deposit of these moneys in a Depository with a written notice that the Depository shall hold such moneys on deposit until it receives written instructions from the Secretary as to their disposition. The Secretary shall determine the extent to which Actual Cost is to be reduced with respect to these moneys. In no event shall Actual Cost be reduced with respect to payments by the shipyard to the Vessel owner of liquidated damages for late delivery of the Vessel.

(g) *Depreciated Actual Cost.* After a Vessel has been delivered or redelivered (in the case of reconstruction or reconditioning), the limitation on the amount of Guarantees shall be 75 or 87½ percent, whichever is applicable, of the Depreciated Actual Cost of the Vessel. This means the Actual Cost of the Vessel, as defined in § 298.2(b) (less a residual value of 2½ percent of United States shipyard construction cost), depreciated on a straight line basis over the useful life of the Vessel as determined by the Secretary, not to exceed twenty-five years from the date the Vessel was delivered by the shipbuilder or, if the Vessel has been reconstructed or reconditioned, the Actual Cost of the Vessel depreciated on a straightline basis from the date the Vessel was delivered by the shipbuilder to the date of such reconstruction or reconditioning, on the basis of the original useful life of the Vessel, and from the date of said reconstruction on a straightline basis and on the basis of a useful life of the Vessel determined by the Secretary, plus all amounts paid or obligated to be paid for the reconstruction or reconditioning, depreciated on a straightline basis and on the basis of a useful life of the Vessel determined by the Secretary.

§ 298.22 Amortization of obligations.

Generally, after Vessel delivery, and until maturity of the Obligations, the Obligor shall be required by provision of the Trust Indenture or other part of the Documentation to make periodic payment of interest on and principal of the Obligations. Usually, the payment of principal (amortization) shall be made semi-annually, but in no event, less frequently than on an annual basis, and in either case shall be in equal parts (straightline basis), unless the Secretary consents to the periodic payment of a constant aggregate amount, comprised of both interest and principal components which are variable in amount (level debt basis). No other proposed method of amortization will be allowed which would reduce the amount of periodic amortization below that determined under the straightline or level debt basis at any time prior to maturity of the Obligations, except where:

(a) The Obligor can demonstrate to the satisfaction of the Secretary that there will be adequate funds to discharge the Obligations at maturity; or

(b) The Obligor establishes a fund acceptable to the Secretary in which the Obligor deposits an equal annual amount necessary to redeem the outstanding Obligations at maturity.

§ 298.23 Refinancing.

(a) *In General.* The Secretary may approve Guarantees with respect to Obligations to be secured by one or more Vessels and issued to refinance existing debt, whether or not covered by Mortgage insurance or Guarantees, as long as the existing debt had been issued for one of the purposes set forth in section 1104(a)(1)–(3) of the Act. In accordance with the provision in section 1104(a)(1), the refinancing of debt that was incurred more than one year after delivery of the Vessel will be permitted only if:

(1) Any security lien on the Vessel is discharged immediately prior to the placing of a Mortgage on the Vessel by the Secretary; and

(2) The debt being refinanced was incurred in financing the cost of construction, reconstruction or reconditioning of other vessels or of facilities or equipment pertaining to marine operations (described in § 298.24).

The applicant must satisfy all the eligibility requirements set forth in Subpart B of this part. The limitation on the amount of Guarantees is governed by § 298.21. The maturity date of the Obligations shall not be later than the expiration of the remaining useful life of the Vessel, as determined by the Secretary.

(b) *Reduced interest payment.* The Secretary shall approve an application for refinancing only if the applicant demonstrates to the satisfaction of the Secretary that the average annual payment of interest to maturity on the Obligations to be issued will be at least 20 percent less than the average annual payment of interest to maturity on the debt that the applicant proposes to refinance.

§ 298.24 Financing facilities and equipment related to marine operations.

The Secretary may approve Guarantees secured by one or more Vessels and issued to finance the construction, reconstruction or reconditioning of facilities or equipment pertaining to marine operations. Such facilities or equipment shall be of a specialized nature, used principally for servicing Vessels and in handling waterborne cargo in the close proximity of the Vessel berthing area, excluding over the road equipment (other than chassis and containers), permanent or semipermanent structures and real estate.

§ 298.25 Financing repayment of construction-differential subsidy.

The Secretary may approve Guarantees with respect to Obligations secured by one or more Vessels and issued to finance the repayment to the United States of the whole or any part of construction-differential subsidy (CDS) which has been paid under the provisions of Title V of the Act. The repayment of CDS may be related to Vessel operation in the domestic trade, within the meaning of section 506 of the Act, or any other purpose authorized by the Secretary.

§ 298.26 Excess interest or other consideration.

The Secretary shall not execute Guarantees if any agreement in the Documentation directly or indirectly provides for the payment to an Obligee of any consideration other than interest at the rate approved, or grants security, in addition to the Guarantees, to any Person.

§ 298.27 Lease payments.

If the project receiving Title XI assistance involves the use of a lease, any lease payments shall be subject to the approval of the Secretary.

V41N197 OCT 8 76 UM

Subpart D—Documentation

§ 298.30 Nature and content of Obligations.

An Obligation, whether issued in the form of a note, bond of any type or other debt instrument, shall include on its face, if the Obligation is engraved, printed or lithographed, the name of the Obligor, the principal sum, the rate of interest, the date of maturity, and the Guarantee of the United States, authenticated by the Indenture Trustee or other Authenticating Agent. If the Obligation is typewritten, the Guarantee of the United States and the authentication certificate of the Indenture Trustee or other Authenticating Agent may appear at the end of the typewritten Obligation. The instrument which is evidence of indebtedness shall also contain all information necessary to apprise the Obligees of their rights and responsibilities with respect thereto, including, but not limited to time and manner for payment of principal and interest, redemptions, default procedure and notification (in case of registered Obligations) of sale or other transfer of the instruments.

§ 298.31 Mortgage.

(a) *In general.* Under normal circumstances, a Guarantee shall not be endorsed on any Obligation until the Secretary receives satisfactory evidence of a security interest in one or more Vessels, in favor of the Secretary. During construction of a new Vessel, the security interest may be perfected by a filing under the Uniform Commercial Code or by the recording of any form of mortgage in a jurisdiction where the Uniform Commercial Code has not been enacted. The Security Agreement shall provide that upon delivery of the new Vessel, or at the time Guarantees are issued with respect to an existing Vessel, a Preferred Mortgage shall be executed in favor of the Secretary. The Preferred Mortgage shall be recorded with the United States Coast Guard at the Vessel's home port, endorsed upon the Vessel's document (or provision made for said endorsement) and delivered to the Secretary.

(b) *Mortgage secured by multiple Vessels.* When two or more Vessels are to be security for Guarantees, the Security Agreement may provide that one Mortgage relating to all the Vessels (Fleet Mortgage) shall be executed, perfected and delivered to the Secretary by the Obligor. If the Fleet Mortgage relates to undelivered Vessels, the Fleet Mortgage shall be executed upon delivery of the first Vessel. At the time of each subsequent Vessel delivery, the Obligor shall execute a supplement to the Fleet Mortgage which makes that Vessel subject to the Secretary's Mortgage lien. The Fleet Mortgage shall provide that payment by the Obligor of the entire amount of Obligations covered or to be covered by Guarantees shall be required to discharge the Fleet Mortgage, regardless of the amount of the Secretary's Note or Notes issued and outstanding at the time of execution and delivery of the Fleet Mortgage or the number of Vessels covered by the Fleet Mortgage. The discharge date of the Fleet Mortgage shall be the maturity date of the Secretary's Note. The Secretary may require, as authorized by section 1104(c)(2) of the Act, such payments of principal prior to maturity (redemptions), with respect to all related Obligations, as deemed necessary to maintain adequate security for the Guarantees. Each Fleet Mortgage shall provide that in the event of constructive total loss, requisition of title or sale of any Vessel covered by the Fleet Mortgage, indebtedness represented by the Obligations shall be paid and the Vessel shall be discharged from the Mortgage lien. The Fleet Mortgage shall also contain a provision, satisfactory to the Secretary, for discharge of any property, other than a Vessel, which may be subject to the Fleet Mortgage.

§ 298.32 Required provisions, in documentation.

(a) *Performance under shipyard and related contracts.* Generally, shipyard and related contracts shall contain provisions for:

(1) Furnishing by the shipyard of satisfactory insurance and a satisfactory performance bond where Obligations are issued during the construction period, except that if the shipyard demonstrates to the satisfaction of the Secretary that it has sufficient financial resources and operational capacity to complete the project, posting of a bond will not be required;

(2) Allowing access to the Vessel and to all related work projects being performed by the contractor and subcontractors, to a representative of the Secretary, at all reasonable times, to inspect performance of the work and to observe trials and other tests for the purpose of determining that the Vessel is being constructed, reconstructed or reconditioned in accordance with contract plans and specifications approved by the Secretary;

(3) Submitting to the Secretary, upon request, one set of selected microfilm of shipyard plans for the Vessel as built;

(4) Making periodic payments for the work in accordance with an agreed schedule, submitted by the shipyard in a form acceptable to the Secretary, based on percentage of completion, after such percentage and satisfactory performance are certified by the Obligor, shipyard and a representative of the Secretary as to each payment. For Vessels of 2500 gross tons or less, the shipyard may substitute a schedule of events, satisfactory to the Secretary, in lieu of the schedule of percentage of completion;

(5) Prohibiting the use of proceeds from the sale of Obligations for the payment of work performed outside the shipyard, unless the Secretary consents in writing to such use; and

(6) Requiring the use in Vessel construction of only articles, materials and supplies of the growth, production of manufacture of the United States, as defined in section 1401(h) of the Tariff Act of 1930 (19 U.S.C. 1401(h)).

(b) *Assignments and general covenants from Obligor to Secretary.* The Obligor shall assign rights and covenant with the Secretary, as required by the Secretary, including, but not limited to the following:

(1) Assignment of all right, title and interest under the construction contract and related contracts, except those rights expressly reserved therein by the Obligor relating to such things as patent infringement and liquidated damages;

(2) Assignment of rights to receive all moneys which from time to time become due with respect to Vessel construction;

(3) Assignment, where applicable, of the bareboat charter, time charter, contracts of affreightment or other agreements relating to the use of the Vessel and all hire payable to the Obligor, and delivery to the Secretary of required consents by appropriate parties to any such assignments;

(4) Covenants relating to satisfactory evidence of continuing United States citizenship, in accordance with 46 CFR Part 335; warranty of Vessel title free from all liens other than those specifically excepted; maintaining United States registry of the Vessel; compliance with the provisions of the Ship Mortgage Act of 1920; Notice of Mortgage; payment of all taxes (except if being contested in good faith); annual financial statements audited by independent certified or independent licensed public accountants; prohibition of sale, mortgage, demise charter or transfer of the Vessel without the Secretary's prior written consent; Vessel condition and maintenance; material changes in the Vessel; access to Vessel cargo and papers; annual No Default Certificate; and further security filings; and

(5) Covenants to keep records of construction costs paid by or for the Obligor's account and to furnish to the Secretary a detailed statement of those costs, distinguishing between:

(i) Items paid or obligated to be paid, attested to by independent certified or independent licensed public accountants; and

(ii) Costs of American and foreign materials (including services).

(6) Covenants to maintain Marine and War Risk Hull and Machinery insurance on the vessel in an amount equal to 110% of the outstanding Obligations or up to the full commercial value of the Vessel, whichever is greater; Marine and War Risk Protection and Indemnity insurance; Interim War Risk Binders for Hull and Machinery and Protection and Indemnity coverages underwritten by the Maritime Administration as authorized by Title XII of the Act; and such additional insurance as may be required by the Secretary. All insurance required to be maintained shall be placed with the United States Government and American and/or British (and/or other foreign, if permitted by the Secretary by prior written notice) insurance companies, underwriters' associations or underwriting funds approved by the Secretary through maritime insurance brokers and/or underwriting agents approved by the Secretary. All insurance required to be maintained shall be placed under the latest (at the time of issue) forms of American Institute of Marine Underwriters policies approved by the Secretary and/or under such other forms of policies which the Secretary may approve in writing and/or policies issued by or for the Maritime Administration insuring the Vessel against the usual risks provided for under such forms, including such amounts of increased value and other forms of "total loss only" insurance permitted by the Hull and Machinery insurance policies.

§ 298.33 Escrow fund.

(a) *Circumstances requiring deposits.* The Obligor may be required to establish a fund with the Secretary (Escrow Fund) in accordance with section 1108 (a) of the Act and the Security Agreement.

(b) *First sale of obligations.* The deposit with the Secretary of cash or Federal Reserve Bank funds shall consist of the sum of:

(1) The aggregate principal amount of the Obligations sold less 75 or 87½ percent (whichever is applicable under section 1104(b)(2) of the Act) of the amount of Actual Cost or Depreciated Actual Cost determined by the Secretary to have been paid, as of the date of the deposit, by or for the account of the Obligor for construction, reconstruction or reconditioning of the Vessel; and

(2) Interest on this aggregate principal amount, computed at the same rate borne by the Obligations, for one interest payment period, unless the Secretary shall accept other consideration from the Obligor as security in lieu of the interest deposit. If the Obligations issued and sold bear more than one rate of interest, the amount of interest required to be deposited shall be based upon the weighted average of such interest rates.

(c) *Subsequent sales of obligations.* A deposit shall be made in the same manner as for the first sale of Obligations in the sum of:

(1) The aggregate principal amount of the Obligations sold less 75 or 87½ percent (whichever is applicable under section 1104(b)(2) of the Act) of the amount of Actual Cost or Depreciated Actual Cost determined by the Secretary to have been paid, as of the date of the deposit, by or for the account of the Obligor for construction, reconstruction or reconditioning of the Vessel; and

(2) Interest on this aggregate principal amount, computed at the same rate borne by the Obligations, for one interest payment period, unless the Secretary shall accept other consideration from the Obligor as security in lieu of the interest deposit. If the Obligations issued and sold bear more than one rate of interest, the amount of interest required to be deposited shall be based upon the weighed average of such interest rates.

(d) *Principal deposit—Multiple vessels.* If multiple Vessels are security for the Guarantees at the time of a sale of Obligations, the aggregate deposit of principal amount in the Escrow Fund will be computed on an individual Vessel basis by prorating the proceeds of the sale of Obligations, within the meaning of the proviso in section 1108(a) of the Act, based on the ratio of the Vessel's Actual Cost or Depreciated Actual Cost, to the total Actual Cost and Depreciated Actual Cost of all Vessels which are security for the Guarantees.

(e) *Disbursements prior to termination date.* Unless the Guarantees shall become payable prior to the Termination Date (described in paragraph (h) of this section) of the Escrow Fund, the Secretary shall, subject to the satisfaction of any applicable conditions contained in the Security Agreement, and within a reasonable time after written request from the Obligor, make disbursements from the fund directly to the Indenture Trustee or any Paying Agent for the payment of interest on the Obligations, for periods prior to Vessel delivery or redelivery and to the shipbuilder, the Obligor or to any other Person entitled thereto, with respect to costs included in Actual Cost. Also, the Secretary may disburse to the Obligor, upon request made at least 10 business days prior to, and no earlier than 30 days after the date on which the payment of interest on the Obligations is due, any excess, as determined by the Secretary, of required interest on deposit in the Escrow Fund on the date of disbursement. However, no payment or reimbursement shall be made from the Escrow Fund to any Person until:

(1) The Construction Fund (described in § 298.34) where provided for in the Security Agreement, has been exhausted;

(2) At least 12½ or 25 percent (whichever is applicable) of the Actual Cost or Depreciated Actual Cost has been paid by or for the account of the Obligor from sources other than the proceeds of the Obligations, provided, however, that where the Obligor is required to pay in 25 percent of the Actual Cost or Depreciated Actual Cost, and demonstrates to the Secretary's satisfaction the ability to pay in such 25 percent, after the Obligor has paid 12½ percent of the Actual Cost or Depreciated Actual Cost, the Obligor may be permitted to withdraw moneys from the Escrow Fund, up to 50 percent of such Actual Cost or Depreciated Actual Cost, and withdraw the remainder of the Escrow Fund moneys after paying in the next 12½ percent of Actual Cost or Depreciated Actual Cost; and

(3) The Secretary has determined that the Actual Cost items are fair and reasonable and that amounts for which reimbursement is requested have been paid, except where the Secretary has specifically consented to an alternative procedure.

(f) *Where guarantees become payable.* If, prior to the Termination Date of the Escrow Fund, the Guarantees shall become payable by the Secretary, all amounts in the Escrow Fund at such time (including interest and realized income which have not yet been paid to the Obligor) shall be paid into the Federal Ship Financing Fund, created by section 1102 of the Act, and be credited against any amounts due or to become due to the Secretary from the Obligor with respect to all Guarantees.

(g) *Requisition of title, termination of construction contract or total loss of vessel.* In the event of requisition of title to or seizure of forfeiture of the Vessel, termination of the construction contract (unless the Obligor and the Secretary elect to have the Vessel completed) or the construction-differential subsidy contract (where applicable), or the actual or constructive total loss of the Vessel, all moneys remaining on deposit in the Escrow Fund may be disbursed by the Secretary for any of the following purposes:

(1) Redemption or payment of Obligations and accrued interest thereon to the date of redemption or payment, in accordance with the applicable provisions of the Documentation relating to such redemption or payment, where there is no existing default;

(2) Payment to the Obligor, if all outstanding Obligations are retired and paid other than by payment of the Guarantees, and all amounts payable to the Secretary and secured by the Mortgage have been paid; and

(3) Payment in accordance with the priorities set forth in § 298.41; if a default has occurred and if the Secretary shall have paid the Guarantees.

(h) *Disbursement upon termination date.* The Escrow Fund shall terminate on a date agreed upon by the Obligor and the Secretary as set forth in the Security Agreement (Termination Date). If on such Termination Date the full amount of Actual Cost of the Vessel has not been paid by or for the account of the Obligor, or is not then due and payable, the Obligor and the Secretary may extend the Termination Date by agreement. When the Secretary makes a final determination of Actual Cost at the written request of the Obligor, or at the instance of the Secretary if the Termination Date has occurred without such a request, the Termination Date shall be deemed to be the date of such final determination of Actual Cost. If payments under the Guarantees have not become due prior to the Termination Date, then on or immediately after said Termination Date, any balance in the Escrow Fund shall be disbursed by the Secretary in the following manner:

(1) Where the principal amount of the Obligations issued less the principal amount of Obligations which have been retired or paid on or before such Termination Date, and not availed of as a credit against any mandatory redemptions otherwise required to be made on or before such Termination Date, shall be in excess of 75 or 87½ percent (whichever is applicable) of the Actual Cost or Depreciated Actual Cost of the Vessel as finally determined by the Secretary as of the Termination Date, the Secretary shall pay such excess to the Indenture Trustee or any Paying Agent in accordance with the provisions of the Documentation relating to such payment. A written notice from the Secretary and

V 41 N 197 OCT 8 76 UM

the Obligor shall accompany such payment, stating the Termination Date and directing the Indenture Trustee or Paying Agent to redeem an equal amount of Obligations.

(2) An amount equal to interest accrued to the date to be fixed for redemption of the principal amount of Obligations to be redeemed, in accordance with the written notice of redemption to be issued, shall be remitted to the Indenture Trustee or any Paying Agent by the Obligor to be applied to the payment of interest to the date to be fixed for redemption.

(3) Any balance of the Escrow Fund shall be paid to the Obligor.

(i) *Investment and liquidation of the escrow fund.* The Secretary may invest and reinvest deposits to the Escrow Fund in securities which are obligations of the United States and with maturities such that sufficient cash will be reasonably available to the Escrow Fund as required to make periodic authorized disbursements. The Secretary shall deposit the Escrow Fund into a special Treasury Department account with instructions, pursuant to an agreement with the Obligor, for the investment, reinvestment and liquidation of the Escrow Fund.

(j) *Income on the escrow fund.* If the Guarantees shall not have become due, after receiving notice that the Treasury Department has deposited income earned on the Escrow Fund into the special account, the Secretary shall authorize the payment of such income to the Obligor. Income shall include the excess of the cash received from the sale of securities or the payment of securities at maturity (less any losses from the sale of securities not made up by payments by the Obligor pursuant to provisions of the Security Agreement) over the cost thereof, and interest received with respect to the securities.

(k) *Redeposit.* If, at any time, the Secretary shall have determined that there has been an improper disbursement from the Escrow Fund, the Secretary shall give written notice to the Obligor of the amount improperly disbursed, the amount to be redeposited into the Escrow Fund on account thereof and the reasons for such determination. The Obligor shall thereafter promptly redeposit such amount into the Escrow Fund.

§ 298.34 Construction fund.

(a) *Deposit.* Where the Security Agreement provides for an Escrow Fund deposit, usually a provision shall also be included therein for establishing Construction Fund deposits. Under the terms of this provision, at the time of each sale of Obligations the Obligor shall deposit with a Depository, in a special account subject to the joint control of the Obligor and the Secretary, cash equal to the principal amount of the Obligations issued at such time less the sum of (1) the aggregate principal amount then required to be in the Escrow Fund and (2) the amount in excess of 12½ or 25 percent of Actual Cost (whichever is payable under § 298.33(e)) which the Secretary determines has been paid by or for the account of the Obligor.

(b) *Withdrawals.* The Secretary shall, subject to the satisfaction of any applicable Conditions contained in the Security Agreement, periodically approve disbursements from the Constitution Fund directly to the Indenture Trustee or any Paying Agent for the payment of interest on the Obligations for periods prior to Vessel delivery and to the shipbuilder, the Obligor, or to any other Person entitled thereto with respect to costs included in Actual Cost. The Secretary shall not authorize any disbursement from the Construction Fund unless payments have been made by or for the account of the Obligor from sources other than the Obligations, in accordance with the requirements of subdivisions (2) and (3) of § 298.33(e).

(c) *Redeposit.* If, at any time, the Secretary shall have determined that there has been an improper disbursement from the Construction Fund, the Secretary shall give written notice to the Obligor of the amount improperly disbursed, the amount to be redeposited into the Construction Fund on account thereof and the reasons for such determination. The Obligor shall thereafter promptly redeposit such amount into the Construction Fund.

§ 298.35 Reserve fund and financial agreement.

(a) *Purpose.* In order to provide further security to the Secretary and to insure payment of the interest and principal due on the Obligations, the Company shall be required to enter into a Title XI Reserve Fund and Financial Agreement (Agreement). The Secretary may waive or modify provisions of the Agreement based on an evaluation of the aggregate security for the Guarantees.

(b) *Financial covenants for companies meeting primary financial requirements.* Covenants shall be imposed on the Company which is subject to compliance with the primary financial requirements at Closing, set forth in § 298.13(d), as follows:

(1) *Continuous covenants.* So long as Guarantees are in effect the Company, pursuant to agreements with the Secretary in the Documentation, shall not, without the prior written consent of the Secretary, take any actions, including, but not limited to those of the following nature:

(i) Pay dividends or make distributions in excess of 40 percent of its net income after tax for the latest prior fiscal year (noncumulative), unless, after giving effect to each payment or distribution, the Company's Long Term Debt does not exceed its Equity;

(ii) Enter into a service, management or operating agreement with respect to a Vessel financed with the assistance of Title XI Guarantees;

(iii) Sell, transfer or demise charter the Vessel; or

(iv) Sell or transfer a substantial part of its assets, enter into a merger or consolidation, engage in new business activities not directly connected with marine operations or guarantee (or otherwise be liable for) debts of other Persons.

(2) *Additional covenants which may become applicable.* If the Company shall at any time no longer satisfy the primary financial requirements, or such condition would occur after giving effect to any of the proposed transactions set forth below, the Company, pursuant to agreements with the Secretary in the Documentation, shall not, without the prior written consent of the Secretary, take any actions, including, but not limited to those of the following nature:

(i) Withdraw or redeem capital, convert capital into debt, pay dividends or make distributions (unless the Company is a party to an operating-differential subsidy agreement which provides for paying dividends or making distributions);

(ii) Make loans, advances, investments in or repayments of existing debts to Affiliates, stockholders, officers or directors;

(iii) Acquire fixed assets, become liable for Rentals, incur indebtedness or become subject to any liens, except if necessary in the ordinary course of existing business;

(iv) Pay salaries in excess of amounts specified in the Agreement, pay subordinated indebtedness or make loans; or

(v) Invest in securities other than those that qualify as Eligible Investments (described in paragraph (h) of this section) for the Title XI Reserve Fund.

(c) *Financial covenants for companies meeting the alternative financial requirements.* Covenants shall be imposed on the Company which is subject to the alternative financial requirements at Closing, set forth in § 298.13(e), as follows:

(1) *Continuous covenants.* So long as the Guarantees are in effect the Company, pursuant to agreements with the Secretary in the Documentation, shall not, without the prior written consent of the Secretary, take any action, including, but not limited to those of the following nature:

(i) Enter into a service, management or operating agreement for a Vessel financed with the assistance of Title XI Guarantees;

(ii) Sell, transfer or demise charter the Vessel;

(iii) Sell or transfer a substantial part of its assets, enter into a merger or consolidation, engage in any new business activities not directly connected with marine operations or guarantee (or otherwise become liable for) debts of other Persons;

(iv) Acquire fixed assets, become liable for any Rentals, incur indebtedness or become subject to any liens, except if necessary in the ordinary course of existing business;

(v) Make any loans or invest in any securities other than Eligible Investments for the Title XI Reserve Fund; or

(vi) Pay any subordinated indebtedness other than in accordance with a

subordination agreement approved by the Secretary.

(2) *Additional covenants which may become applicable.* If the Company shall at any time no longer satisfy the alternative financial requirements (after including the current portion of the Obligations or Rentals related to the Obligations, whichever may be applicable, as a current liability in computing Working Capital), or such condition would occur after giving effect to any proposed transaction set forth below, the Company, pursuant to agreements with the Secretary in the Documentation, shall not, without the prior written consent of the Secretary, take any action, including, but not limited to those of the following nature:

(i) Withdraw or redeem capital, convert capital into debt, pay dividends or make distributions (unless the Company is a party to an operating-differential subsidy agreement which provides for paying dividends or making distributions);

(ii) Make loans, advances, investments or prepayments of existing debts to Affiliates, stockholders, officers or directors, or invest in the securities of any Affiliates; or

(iii) Pay salaries in excess of amounts specified in the Agreement.

(3) *Covenants where Company's financial condition improves to meet primary financial requirements.* Whenever the Company, based on a review of its financial position, determines that it meets the primary financial requirements set forth in § 298.13(d), the Company shall promptly inform the Secretary of this fact, and shall submit such financial statements and all additional information which the Secretary shall consider necessary to verify compliance with such financial requirements. With the consent of the Secretary, the Company shall thereafter be subject to covenants applicable to a Company which had satisfied the primary financial requirements at Closing.

(d) *Title XI Reserve Fund Net Income.* The agreement shall provide that within 90 days after the end of its accounting year, the Company shall compute its net income attributable to the operation of one or more Vessels that were constructed, reconstructed reconditioned or refinanced with Title XI financing assistance (Title XI Reserve Fund Net Income). The computation involves using a ratio, expressed as a percentage, and applying this percentage to the Company's net income after taxes. The numerator of the ratio shall be the total original capitalized cost of all Company Vessels which were constructed, reconstructed, reconditioned or refinanced with the assistance of Guarantees. The denominator shall be the total original capitalized cost of all the Company's fixed assets. Such original capitalized costs shall include, where applicable, present values of Rentals, described in § 298.13(b)(4). The net income after taxes, computed in accordance with generally accepted accounting principles, shall be adjusted as follows:

(1) The depreciation expense applicable to the accounting year shall be added back.

(2) There shall be subtracted:

(i) An amount equal to the principal amount of debt required to be paid or redeemed, and actually paid or redeemed by the Company (other than from the Title XI Reserve Fund) during the year; and

(ii) The principal amount of Obligations retired or paid (as defined in the Security Agreement), prepaid or redeemed, in excess of the required redemptions or payments which may be used by the Company as a credit against future required redemptions or other required payments with respect to the Obligations.

(e) *Deposits.* Unless the Company, as of the close of its accounting year, was subject to and in compliance with the primary financial requirements set forth in § 298.13(d), the Company shall make one or more deposits to a special joint Depository account with the Secretary (the Title XI Reserve Fund) to be established pursuant to an agreement in writing (Depository Agreement) at the time the first deposit is required to be made. The amount of deposit as to any year, or period less than a full year, where applicable, shall be determined as follows:

(1) If the Company is the owner of the Vessel, an amount (pro rated for a period of less than a full year) that is equal to 10 percent of the Company's aggregate original Equity investment in the Vessel or Vessels shall be deducted from Title XI Reserve Fund Net Income.

(2) 50 percent of the Title XI Reserve Fund Net Income, adjusted where applicable, in accordance with paragraph (e)(1) of this section, shall be deposited into the Title XI Reserve Fund.

(3) There shall also be deposited any additional amounts that may be required, pursuant to provisions of the Security Agreement or any other agreement in the Documentation to which the Company is a party.

(4) Irrespective of the Company's deposit requirement as stated in preceding paragraph (e)(1)–(3) of this section, the Company shall not be required to make any deposits into the Title XI Reserve Fund if any of the following events shall have occurred:

(i) The Company shall have discharged the Obligations and related Secretary's Note and shall have paid other sums secured under the Security Agreement and Preferred Mortgage;

(ii) All Guarantees with respect to outstanding Obligations shall have terminated pursuant to the provisions of the Security Agreement; or

(iii) The amount in the Title XI Reserve Fund, (including any securities at market value), is equal to, or in excess of 50 percent of the principal amount of outstanding Obligations.

(f) *Fund in lieu of Title XI Reserve Fund.* If the Company has established a Capital Construction Fund (CCF), pursuant to section 607 of the Act, whether interim or permanent, at any time when a deposit would otherwise be required to be made into the Title XI Reserve Fund and the Company elects to make such deposits to the CCF, the Company shall enter into an agreement, satisfactory to the Secretary, providing that all such deposits of assets therein shall be segregated in the CCF and shall be security (CCF Security Amount) to the United States in lieu of the Title XI Reserve Fund. The deposit requirements of the Title XI Reserve Fund and Financial Agreement shall be deemed satisfied by deposits of equal amounts in the CCF, and withdrawals of the CCF Security Amount shall be subject to the same conditions as withdrawals from the Title XI Reserve Fund. If for any reason the CCF terminates prior to the payment of the Obligations, the Secretary's Note and all other amounts due under or secured by the Security Agreement or Mortgage, the CCF Security Amount shall be deposited or redeposited in the Title XI Reserve Fund.

§ 298.36 Annual guarantee fee.

(a) *Rates in general.* For annual periods, beginning with the date of the Security Agreement and prior to the delivery date of a Vessel, the Secretary shall charge the Obligor an annual fee (Guarantee Fee) at a rate of not less than ¼ of 1 percent and not more than ½ of 1 percent of the excess of the average principal amount of the Obligations to be outstanding during the annual period covered by said Guarantee Fee over the average principal amount, if any, on deposit in the Escrow Fund during said annual period (Average Principal Amount of Obligations Outstanding). For annual periods beginning with the delivery date of the Vessel, the Guarantee Fee shall be imposed at an annual rate of not less than ½ of 1 percent and not more than 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by the Guarantee Fee. The Obligor shall be responsible for payment of the Guarantee Fee.

(b) *Rate calculation.* The Guarantee Fee rate generally shall vary inversely with the ratio of Equity to Long Term Debt to the Person considered by the Secretary to be the primary source of credit in the transaction (Credit Source), e.g., the long term time charterer (where the charter hire represents the source of payment of interest and principal with respect to the Obligations), the guarantor of the Obligations, Obligor or the bareboat charterer. Where the ratio of Equity to Long Term Debt (Variable Rate) is used, the Secretary may make such adjustments to the computation of Equity and Long Term Debt considered necessary to reflect more accurately the financial condition of the Credit Source. The Guarantee Fee rate shall be subject to annual redetermination by the Secretary in accordance with the tests set forth in paragraphs (c) and (d)

V41N197 OCT 8 76 UMI

of this section, and the Secretary shall promptly give notice to the Obligor of a rate change for such annual period. The determination of Equity and Long Term Debt shall be based on information contained in forms or statements on file with the Secretary prior to the date on which the Guarantee Fee is to be paid. With the consent of the Secretary, there shall be included in Equity, but excluded from Long Term Debt, any subordinated indebtedness representing loans to the Credit Source, evidence of which has been delivered to the Secretary. The Secretary may establish a fixed rate or other method of calculation of the Guarantee Fee, upon an evaluation of the aggregate security for the Guarantees.

(c) *Variable Rate prior to vessel delivery.* For annual periods beginning prior to the delivery date of a Vessel being constructed, reconstructed or reconditioned, the Guarantee Fee shall be determined as follows:

(1) If the Equity is less than 15 percent of the Long Term Debt, the annual Guarantee Fee rate shall be ½ of 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(2) If the Equity is at least 15 percent of the Long Term Debt, but less than the Long Term Debt, the annual Guarantee Fee rate shall be ⅜ of 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(3) If the Equity is equal to or exceeds the Long Term Debt, the annual Guarantee Fee rate shall be ¼ of 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(d) *Variable Rate after Vessel delivery.* For annual periods beginning on or after the Vessel delivery date, the Guarantee Fee shall be determined as follows:

(1) If the Equity is less than 15 percent of the Long Term Debt, the annual Guarantee Fee rate shall be 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(2) If the Equity is less than 60 percent of the Long Term Debt but equal to or greater than 15 percent of the Long Term Debt, the annual Guarantee Fee rate shall be ¾ of 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(3) If the Equity is less than the Long Term Debt but equal to or greater than 60 percent of the Long Term Debt, the annual Guarantee Fee rate shall be ⅝ of 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(4) If the Equity shall equal or exceed the Long Term Debt, the Guarantee Fee rate shall be ½ of 1 percent of the Average Principal Amount of Obligations Outstanding during the annual period covered by said Guarantee Fee.

(e) *Payment of guarantee fee.* The initial Guarantee Fee covering the 12-month period commencing with the date of the Security Agreement shall be paid to the Secretary concurrently with the execution and delivery of said Agreement. The Guarantee Fee for each subsequent annual period must be paid to the Secretary at least 65 days prior to each anniversary of said payment. The Secretary shall refund the prepaid Guarantee Fee if the Guarantees shall have terminated, other than by reason of default, prior to the anniversary date.

(f) *Adjustment of guarantee fee.* If the Secretary at any time determines that the amount of any Guarantee Fee should be adjusted for any reason, the Secretary shall promptly give written notice thereof, specifying the correct amount, the basis for computation thereof and the amount of the deficiency or excess. With respect to any deficiency, payment shall be made to the Secretary within 30 days after receipt of such notice. Any excess payment shall, except if a default has occurred and has not been cured, be refunded by the Secretary.

(g) *Increase in guarantee fee due to security default.* If a Security Default, as described in § 298.40(c), shall have occurred and be continuing, the Secretary, after giving written notice to the Obligor of such Security Default, may increase the existing Guarantee Fee rate, if less than the maximum allowed under paragraph (a) of this section, to the maximum rate at the expiration of 60 days after receipt of notice by the Obligor, except if the Obligor shall have cured such Security Default or the Secretary shall have waived the Security Default during the 60-day period.

(h) *Proration of guarantee fee.* The Guarantee Fee shall be prorated where Vessel delivery is scheduled to occur during the annual period with respect to which payment of said Guarantee Fee is being made, as follows:

(1) *Undelivered vessel.* If the Guarantee Fee relates to an undelivered Vessel, the predelivery rate is applicable to the Average Principal Amount of Obligations Outstanding for the period from the date of the Security Agreement to the delivery date, and the delivered Vessel rate is applicable for the balance of the annual period.

(2) *Multiple vessels.* If the Guarantee Fee relates to more than one Vessel, the amount of outstanding Obligations shall be allocated to each Vessel in the manner prescribed in § 298.33(d), and an amount shall be determined for each Vessel by using the rate that is applicable under paragraph (c) or (d) of this section and the proration as set forth above. The Guarantee Fee shall be the aggregate of the amounts calculated for each Vessel.

§ 298.37 Examination and Audit.

The Secretary shall have the right to examine and audit the books, records (including original logs, cargo manifests and similar records) and accounts of the Obligor, bareboat charterer, time charterer or any other Person participating in the project receiving financing assistance under Title XI of the Act, as well as records of Affiliates and domestic agents connected with such Person, and shall have full, free and complete access thereto at all reasonable times. Also, the Secretary shall have full, free and complete access at all reasonable times to each Vessel with respect to which Guarantees or an insurance contract is in force. When the Vessel is in port or undergoing repairs, the Secretary may make photostatic or other copies of any books, records and other relevant documents or papers being examined or audited. Adequate office space and other facilities reasonably required by any representatives of the Secretary engaged in an examination, audit or inspection shall be furnished without charge by the Person in control of the premises where the examination or audit is being conducted.

Subpart E—Defaults and Remedies, Reporting Requirements, Applicability of Regulations

§ 298.40 Defaults.

(a) *In general.* Provisions concerning the existence and declaration of a default and demand for payment of the Obligations (described in paragraphs (b) and (c) of this section) shall be included in the Security Agreement and in other parts of the Documentation.

(b) *Payment default.* In the case of any default in the payment of principal or interest with respect to the Obligations, the following procedures shall be applicable:

(1) No demand shall be made for payment under the Guarantees unless the default shall have continued for 30 days (Payment Default).

(2) After the expiration of said 30-day period, demand for payment of all amounts due under the Guarantees must be made no later than 60 days thereafter (or such lesser time as provided for in the Guarantees or related agreements).

(3) After demand for payment is made by or on behalf of the Obligees, the Secretary shall make payment under the Guarantees, except if the Secretary determines, before payment of the Guarantees, that a Payment Default has not occurred or that such Payment Default has been remedied prior to demand being made.

(c) *Security Default.* If a default occurs under the Security Agreement which is other than a Payment Default, (Security Default), the Secretary, as provided in section 1105(b) of the Act, shall have the sole discretion to declare such default a Security Default and may notify the Obligee or agent of the Obligee of such Security Default, stating that demand for payment under the Guarantees must be made no later than 60 days (or lesser time as provided for in the Documentation) after the date of such notification.

(d) *Payment of Guarantees.* If demand for payment of the Guarantees is made, the Secretary shall, no later than 30 days after the date of such demand (or such lesser time as may be provided for in the Documentation), make payment to the Obligees, Indenture Trustee or any other agent of the unpaid principal amount of Obligations and unpaid interest accrued and accruing thereon up to, but not including, the date of payment.

§ 298.41 Remedies after default.

(a) *In general.* Provisions governing remedies after a default, which relate to rights and duties of the Obligor, the Secretary and other Persons (where appropriate), shall be included in the Security Agreement or in other parts of the Documentation.

(b) *Action by Secretary.* Before making payment required under the Guarantees, the Secretary make take the Vessel and hold, lease, charter, operate or use the Vessel, accounting only for the net profits to the Obligor. After making payment required under the Guarantees, the Secretary may initiate or otherwise participate in legal proceedings of every type, or take any other action considered appropriate, to protect rights and interests granted to the Secretary by sections 1105(c), 1105(e) and 1108(b) of the Act, the Security Agreement or other applicable provisions of law and of the Documentation.

(c) *Security Proceeds to Secretary.* The Secretary's interest in proceeds realized from the disposition of or collection with respect to security granted to the Secretary in consideration for the Guarantees (except proceeds from the sale, requisition, charter or other disposition of property purchased by the Secretary at a foreclosure or other public sale, which proceeds shall belong to and vest exclusively in the Secretary), shall be an amount equal to, but not in excess of, the sum of (in order of priority of application of the proceeds):

(1) Guarantee Fees, if any, due the Secretary under the Security Agreement;

(2) All moneys due and unpaid and secured by a Mortgage or Security Agreement;

(3) All advances by the Secretary, pursuant to the Security Agreement and all reasonable charges and expenses of the Secretary;

(4) The accrued and unpaid interest on the Secretary's Note;

(5) The accrued and unpaid balance of the principal of the Secretary's Note.

(d) *Security proceeds to obligor.* The Obligor shall be entitled to share in the proceeds from the sale or other disposition of security, described in paragraph (c) of this section, if and to the extent that the proceeds realized are in excess of:

(1) The aggregate of payments made pursuant to the Guarantees; and

(2) The actual expenses of collection of security proceeds, or a specific amount provided for in the Documentation.

§ 298.42 Reporting requirements-financial statement.

The accounts of the Company shall be audited at least annually, in accordance with generally accepted auditing standards, by independent certified public accountants or independent licensed public accountants. The accountants shall be certified or licensed by a regulatory authority of a State or other political subdivision of the United States, and may be the regular auditors of the Company.

(a) *Reports of company and other persons.* Except as otherwise required by the Secretary, the Company shall file a semiannual financial report and an annual financial report, prepared in accordance with generally accepted accounting principles, with Maritime Administration representatives, as specified in the Documentation. Included shall be the balance sheet and a statement of paid-in-capital and retained earnings at the close of the required reporting period, a statement of income for the period and any other statement that the Secretary shall consider necessary to accurately reflect the Company's financial condition and the results of its operations. By letter to the Company, the Secretary shall specify the form required for reporting and the number of copies to be submitted. The Secretary may, by notice to the Company, also require the Company to submit financial statements of any other Person, directly or indirectly participating in the project, if the financial condition of that Person affects the Secretary's security for the Guarantees. The required financial report for the annual period shall be due within 90 days after the close of each fiscal year of the Company, commencing with the first fiscal year ending after the date of the Security Agreement. The required semiannual report shall be due within 90 days after each semiannual period, commencing with the first semiannual period ending after the date of the Security Agreement. The annual and semiannual reports, respectively, shall be in the form prescribed or approved by the Secretary. The annual report shall be certified by the public accountants after audit. Certification of the semiannual report by the accountants may be required by the Secretary. Where independent certification is not required, a responsible corporate officer shall attach a certification that such report is based on the accounting records and, to the best of that officer's knowledge and belief, is accurate and complete.

(b) *Leveraged lease financing.* If the method of financing involved is a leveraged lease financing, or a trust is the owner of the vessels, the requirements for annual and semi-annual accounting reports of the Obligor may be modified accordingly by the Secretary.

§ 298.43 Applicability of the regulations.

(a) *Applicable generally; exceptions.* The regulations in this part shall be in effect as to all applications for commitments for Guarantees issued pursuant to section 1104(a) of the Act. These regulations supersede those issued under Part 298 of this title (23 FR 384) as of the effective date hereof, but shall not affect any commitment for Guarantees, Guarantees or contracts of insurance in existence on the effective date of these regulations. The regulations in this part may be amended, but said amendments shall have no effect upon any existing Guarantees, insurance contracts, commitment for Guarantees or documents.

(b) *Applicability to United States.* Nothing in the regulations in this part shall be deemed to impose any requirement on the United States or the Secretary in addition to those contained in Title XI of the Act or other provisions of law or the Guarantees, insurance contracts and commitments for Guarantees entered into under the Authority of Title XI.

AUTHORITY: Sections 204(b), 1109, Merchant Marine Act 1936, as amended (46 U.S.C. 1114(b), 1279b). Reorganization Plans No. 21 of 1950 (64 Stat. 1273), and No. 7 of 1961 (75 Stat. 840), as amended by Pub. L. 91-469 (84 Stat. 1036), and Department of Commerce Organization Order 10-8 (38 FR 19707, July 23, 1973).

Dated: September 30, 1976.

By order of the Assistant Secretary for Maritime Affairs, Maritime Administration.

JAMES S. DAWSON, JR.,
Secretary,
Maritime Subsidy Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 1000]

[Docket No. 76N-0383]

RADIATION SAFETY CRITERIA FOR MERCURY VAPOR LAMPS

Proposed Recommendations and Notice of Intent To Develop Performance Standards

The Food and Drug Administration (FDA) is proposing recommendations for mercury vapor discharge lamp radiation safety criteria and is announcing its intent to develop a radiation safety performance standard for these lamps. Interested persons may submit comments until December 7, 1976.

Under the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602, secs. 356, 358 (42 U.S.C. 263d, 263f)), the Secretary of the Department of Health, Education, and Welfare is charged with the responsibility of establishing and implementing an electronic product radiation control program designed to protect the public health and safety from electronic product radiation. In carrying out this responsibility, the Secretary is authorized to make recommendations relating to such radiation hazards and control as he considers appropriate, and to develop and administer performance standards to control the emission of electronic product radiation. This authority has been delegated to the Commissioner of Food and Drugs pursuant to § 5.1 of Chapter I of Title 21 of the Code of Federal Regulations (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)). Notice is hereby given that the Commissioner is proposing to amend the regulations by adding new § 1000.60

V 41 N 197 OCT 8 76 UM

(21 CFR 1000.60), which would prescribe the radiation safety performance criteria recommended for mercury vapor lamps used for illumination.

The Commissioner also announces that he may issue a proposal to add a performance standard for mercury vapor lamps to Part 1040, Performance Standards for Light-Emitting Products (21 CFR Part 1040), if the submitted data and information on proposed § 1000.60 warrant such action.

Because of high efficiency and long life as compared with other types of light sources, (e.g., incandescent and fluorescent lights), mercury vapor lamps are becoming important energy-saving sources of illumination. They are widely used for lighting, including street lighting and lighting school gymnasiums, sports arenas, commercial stores, and industrial facilities. Estimates are that more than 25,000,000 such lamps are currently installed in this country. These lamps basically consist of an inner gas discharge tube surrounded by an outer hard borosilicate glass envelope. Considerable shortwave ultraviolet (UV) radiation is transmitted through the inner quartz tube, but it is usually blocked by the outer glass envelope during the normal operation of the lamps. The Bureau of Radiological Health of the Food and Drug Administration (hereinafter, the Bureau) has found that the outer envelope of a 400-watt mercury vapor lamp reduces the irradiance of the UV radiation in the wavelength range of 250 to 320 nanometers by about a factor of 4,000. Therefore, with the outer envelope intact, the UV radiation from such lamps does not normally pose a radiation safety problem. If the outer glass envelope is removed, however, some lamps continue to operate for a period of time before burning out. Injury reports and laboratory testing confirm the risk of injury from human exposure to the shortwave UV radiation if the lamps continue to operate after breakage or removal of the outer envelope.

It is well known, yet not generally recognized by the public, that human exposure to UV radiation can have damaging biological effects. The possible effects on human skin include erythema (reddening), sunburn, changes that are interpreted as signs of "aging," and premalignant and maligant skin tumors. For the eye, the most marked reaction to UV radiation occurs in the cornea, conjunctiva, and lens. Photokeratitis (inflammation of the eye) appears to be the most frequent damage to the eye; erythema seems to be the most conspicuous short-term change in the skin. Response to UV radiation also varies with each person. More sensitive persons may respond to extremely low energy levels over a broad portion of the UV spectrum. Because a mercury vapor lamp with a broken outer envelope may emit intense shortwave UV radiation, exposure to such radiation is likely to be particularly hazardous to sensitive persons.

The Bureau first received reports of injuries in November 1974, to some persons in the gymnasium of a Montgomery County, Maryland, public school. A subsequent review of the report verified that the outer envelope of a mercury vapor discharge lamp had been broken, thus eliminating the outer envelope as a filter for the lamp emissions. Several exposed persons suffered reversible, but painful, photokeratitis and/or erythema, which lasted for several days. Having determined the likely source of the UV light and verified the nature of the injuries that could result from such exposure, the Bureau wrote the Montgomery County Superintendent of Schools and explained the problem and how it could be avoided. A copy of that letter was sent, with a cover communication, to all State health officers, to State radiation control agencies, and to FDA regional and district offices. The Bureau recommended that the State agencies disseminate the information and recommendations for avoiding the problem to concerned State officials, which would include the school officials. Since then, more than 60 persons have been reported as injured in this country as a result of accidents similar to the one reported in Maryland. Recognizing the need for information to prevent further incidents, the Bureau asked manufacturers of mercury vapor discharge lamps to attend an open meeting for an exchange of information; the meeting was held on February 13, 1975. Although many aspects of the problem were discussed by participants from industry, government, and the general public, the meeting did not provide a definitive means by which continued safe use of such lamps could be assured.

Therefore, in March 1975, the Bureau requested additional information from lamp manufacturers and discussed possible alternatives to improve the radiation safety performance of lamps to be manufactured in the future. It was suggested that a regulatory standard might not be necessary if industry meets a voluntary standard developed according to certain specified conditions, including the provision "that continued operation of the lamps after the outer bulb was broken could not occur or would not result in hazardous exposure." The voluntary approach is presently acceptable only if the voluntary standard is provided in a timely fashion, is effective in protecting the public health, and is endorsed and adhered to by all manufacturers of such lamps. The Food and Drug Administration must, in fulfillment of the requirement of its statutory mandate, consult the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC) before establishing any electronic product performance standard under the Radiation Control for Health and Safety Act of 1968. At the 13th meeting on September 18, 1975, the Committee expressed support of the efforts toward a voluntary standard, but asked FDA to continue parallel efforts toward a formal regulatory standard in the event the voluntary consensus standard is not achieved in a timely manner.

The Food and Drug Administration has since consulted closely with the American National Standards Institute (ANSI) in developing a voluntary standard. Following a November 25, 1975 open meeting of the ANSI task group and the Bureau's technical staff, a draft standard was prepared by the ANSI task group. The latest revised version of the draft standard was presented at the 14th TEPRSSC meeting on April 1, 1976. The radiation safety criteria in this proposed recommendation are based in part upon the ANSI draft standard, recommendations received from the TEPRSSC members, comments of other persons during and after the TEPRSSC meeting, and other public health considerations. Although there has been substantial progress toward developing appropriate performance criteria for new lamps, FDA is investigating other steps that could be taken to prevent injuries from lamps currently in use. The Bureau recently reissued its earlier warning and preventive recommendations in May 1976, upon learning of another UV radiation exposure incident involving mercury vapor lamps in a public school in the State of New York. The Commissioner would welcome further information and comments on steps that could be taken to prevent injuries from existing lamps.

Proposed § 1000.60(a) defines the scope of the applicability of the recommended criteria to include all high-intensity mercury vapor discharge lamps for general illumination, such as roadway, dusk-to-dawn, area, industrial, and commercial lighting. Suggestions have been made that the safety criteria be applied only to the use situations where abnormal failure of the lamp can occur and exposure of personnel to UV radiation from the inner arc tube can become hazardous. Because the use of mercury vapor lamps is essentially unrestricted, control measures for every different use condition would be extremely difficult to define and implement. The Commissioner believes that, until the interchangeability of the use of one type of lamp for another can be precluded, it is in the best interest of the public to apply the radiation safety criteria to the manufacture of all types of mercury vapor lamps that may be used for general illumination regardless of their particular applications.

The two steps for implementation of the performance criteria are also described in proposed § 1000.60(a): (1) Lamps manufactured 90 days after the final publication of the criteria should meet the criteria for a minimum of 1,000 hours of operation, and (2) lamps manufactured 2 years after final publication of the criteria should meet the criteria for the useful life of the product. The two-phase implementation plan is designed to encourage mercury vapor lamp manufacturers to introduce into commerce new lamps with the safety devices before they can complete the necessary life testing of such lamps, which should occur within a period of approximately 2 years. However, lamps manufactured thereafter that are designed to meet the criteria during the 2-year life-testing period should be expected to improve their performance according to the progress having been made to date in the life-testing program.

Proposed § 1000.60(b) recommends that the electric arc discharge of a mercury vapor lamp be permanently extinguished within not more than 2 minutes of operation when the outer envelope is broken or removed, whether such breakage or removal occurs before lamp starting or during lamp operation. The recommended maximum extinguishing time is based upon biological data and consideration of the normal use conditions of mercury vapor lamps. Although FDA knows of no research that would enable an exact quantification of the potential hazard associated with the use of such lamps, biological data do support a very low permissible dose of UV radiation. For example, extrapolation of the tumor-inducing dose of 313-nanometer radiation in mice indicates that the actual radiation level at 254 nanometers implicated to be tumorigenic is only 16 J/m² (joule per square meter). Tests at the Bureau also show that, at the distance of 1 meter, some typical mercury vapor lamps exceed, within a period of about 20 seconds to 6 minutes, the criteria for occupational exposure recommended by the National Institute for Occupational Safety and Health and the American Conference of Governmental Industrial Hygienists. However, persons injured in the incidents described previously were exposed for more than 2 hours (2 to 5 hours), and the light sources involved were usually located at a distance of about 4 to 8 meters from the injured persons. The Commissioner believes that, under most conditions of use, the risk of human injury from incidental exposure of less than 2 minutes is very unlikely. The 2-minute termination time was suggested by the agency to the ANSI task group at the public meeting of November 25, 1975. The presentations of several representatives of the manufacturers of such lamps indicated during the 14th TEPRSSC meeting on April 1, 1976, that such a termination time is technically feasible.

Proposed § 1000.60 sets forth in paragraph (c) the test conditions for determining compliance with paragraph (b) for all products under paragraph (a) of the same section. Paragraph (c)(1) recommends that in testing for compliance with the 2-minute extinguishing time, the lamp be started and operated on a reference ballast at the starting current specified in the appropriate ANSI standard for the power and operating potential ratings of the lamp under test that results in the maximum extinguishing time for the discharge arc. This recommendation is associated with the possibility of using different ballasts to control the current at the start and during the operation of such lamps, that might result in a different termination time for the same lamp. In order that a lamp in actual use would not exceed the 2-minute limit, the Commissioner believes it is reasonable and necessary to start and operate the lamp under test on a reference ballast that would yield the longest extinguishing time. To avoid the disturbing effect of air movement and to further ensure that the performance criteria are applied under the same test procedures, it is proposed in paragraph (c)(2) that the test be performed with the lamp initially at 25° C in still air at the time of lamp start-up. If the tests are performed in an enclosure, the lamp should be placed at a distance not less than 50 centimeters from any enclosure surface.

These proposed recommendations are intended to improve the radiation safety performance of lamps manufactured to meet the criteria under current use conditions and thereby achieve the protection of the public from exposure to unnecessary UV radiation from broken mercury vapor lamps. Alternative actions to the proposed performance criteria also have been carefully considered. Some lamp manufacturers suggested incorporation of shielding into the fixture so as to prevent the breakage of the outer envelope of the lamp. This approach was not supported by the available information from fixture manufacturers. One fixture manufacturer estimated that installation of a shield such as a glass plate over the fixture would reduce the light output efficiency of the lamp by about 10 percent. As a result, to maintain the illumination at the same level could mean a proportional increase of the number of both lamps and fixtures at a given installation. It could also lead to an increase of energy consumption and maintenance costs. Further, if the protective shielding breaks, as it sometimes does, protection is no longer provided. The Commissioner therefore concludes that it would be inappropriate in this case to issue recommendations applicable to a fixture, unless the fixture and lamp are manufactured and distributed by the same manufacturer.

The Commissioner is required under the act to prescribe performance standards for electronic products to control the emission of electronic product radiation from such products if he determines that such standards are necessary for the protection of the public health and safety. The proposed criteria embody the basic concepts that would likely be contained in a formal regulatory performance standard. The promulgation of a regulatory standard will require additional time for the agency to collect further documentation and to meet the requirements of the Administrative Procedure Act (5 U.S.C. 553), the National Environmental Policy Act (42 U.S.C. 4332), and Executive Order No. 11821 of 1974 on inflation impact of proposed actions. This regulatory action may not be taken if there is convincing information to demonstrate that the final recommended criteria are endorsed and vigorously adhered to by manufacturers, and the criteria are adequate to protect the public health and safety. The Commissioner welcomes the submission of written data; views, or arguments concerning the need, the subject matter, and impacts of a possible regulatory standard.

Information and comments are specially invited relative to the following topics:

1. Reports of injuries or alleged injuries from mercury vapor lamps, and comments or recommendations on steps, including those discussed herein, that should be taken to prevent injuries from such lamps currently in use.

2. Comments and information about the need for a regulatory standard for mercury lamps.

3. The appropriate class(es) of products to which a mercury vapor lamb performance standard should be applicable.

4. The types of radiation safety performance requirements that would be appropriate for this type of lamp.

5. Appropriate quality control programs, including methods and conditions of measurement.

6. Appropriate radiation safety warning labels, and user and service instructions.

7. The possible environmental impact of such a regulatory standard, including factors such as reduction in radiation exposure injuries, injury costs, and economic consequences in relation to the availability of such products or major business losses through a prohibitive price increase.

8. The possible inflation impact of such action, including factors such as cost increases to industry, government and consumers; substantial changes in the competitive structure of the lamp industry; increases in the number of employees to sustain current levels of production; shortage in supply of important service and/or materials; and increase of usage or decrease of energy availability.

Persons or organizations who want to receive further information or publications on this topic may have their names placed on the mailing list by writing to: Division of Compliance (HFX-440) Bureau of Radiological Health, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852.

Pertinent background data on these proposed radiation safety criteria are on file in the office of the Hearing Clerk, Food and Drug Administration (adress below). Therefore, under the public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90–602, sec. 356, 82 Stat. 1174–1176 (42 U.S.C. 263d)) and under authority delegated to him (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), the Commissioner proposes to amend Subchapter J of Chapter I of Title 21 of the Code of Federal Regulations in Part 1000 by adding new § 1000.60 to Subpart C, to read as follows:

§ 1000.60 Radiation safety criteria for high-intensity mercury vapor lamps.

(a) *Applicability.* The criteria specified in paragraph (b) of this section should apply to all high-intensity mercury vapor discharge lamps that are designed, intended, or promoted for general

V 41 1976 OCT 8 76 UM

illumination, including roadway, dusk-to-dawn, area, industrial, and commercial lighting through the following two steps:

(1) Lamps manufactured after (date 90 days after date of publication of the final recommendation in the FEDERAL REGISTER) should meet the criteria at least for the first 1,000 hours of operation; and

(2) Lamps manufactured after (date 2 years after date of publication of the final recommendation in the FEDERAL REGISTER) should meet the criteria for the useful life of the product.

(b) *Maximum extinguishing time.* When the outer glass envelope of the lamp is broken or removed before lamp start-up or during lamp operation resulting in the emission of radiation having the potential of creating a significant risk of injury, the electric arc discharge between the main electrodes of the lamp should be permanently extinguished within not more than 2 minutes of operation.

(c) *Test conditions.* Lamps under test for compliance with paragraph (b) of this section should be:

(1) Started and operated on a reference ballast at the starting current specified in the appropriate standard of the American National Standards Institute for the power and operating potential ratings of the lamp under test, that results in the maximum extinguishing time for the electric arc.

(2) Started in still air that has a temperature of 25°±5°C. If the glass envelope is broken or removed following lamp start-up, the removal or breakage should occur at any time after start-up that results in the maximum extinguishing time for the electric arc. The heating and generation of thermal convection of the air by the lamp during the test is permitted. Other means for changing the temperature and circulation of air during the test are not permitted. If the tests are performed in an enclosure, the lamp should be placed at a distance no less than 50 centimeters from any enclosure surface.

Interested persons may, on or before December 7, 1976, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: September 30, 1976.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

CIVIL AERONAUTICS BOARD

[14 CFR Parts 221, 250]

[EDR-303A/296C; Dockets 29776; 29139; dated October 5, 1976]

OVERBOOKINGS AND OVERSALES BY AIR CARRIERS

Extension of Time for Comments

In the matter of construction, publication, filing and posting of tariffs of air carriers and foreign air carriers and priority rules, denied boarding compensation tariffs and reports of unaccommodated passengers.

On September 14, 1976, the Board, by notices EDR–296B and EDR–303, set the date of October 11, 1976, for the receipt of public comments in response to its advance notice of proposed rulemaking EDR–296 (41 FR 16478, April 18, 1976) in Docket 29139 and its notice of proposed rulemaking EDR–303 (41 FR 40500, September 20, 1976) in Docket 29776. EDR–296 asked for comments on the wide range of issues relating to the Board's policies with respect to deliberate overbooking and oversales by air carriers. EDR–303 proposed that air carriers having on file tariffs describing their deliberate overbooking practices also be required to give certain actual notice, and requested comments on the specific interim proposed rules accompanying that notice.

October 11, 1976 is a Federal holiday and the Board's usual practice is to allow the filing of documents due on weekends or holidays on the next business day. In order to avoid confusion on the part of those members of the public who may not be aware of this practice, however, this notice is being issued to specifically extend the due dates for these public comments to October 12, 1976.

Since EDR–296 was issued, the Board has changed its practice in rulemaking cases to require the submission of 20 copies of such comments rather than 12. Interested persons, other than individual consumers, are therefore requested to file 20 copies of such comments. Individual members of the general public who wish to express their interest as consumers are required to file only one copy of their comments.

Accordingly, the date of October 12, 1976, is hereby set for the receipt of comments in response to notices EDR–296 and EDR–303.

This action is taken pursuant to delegated authority (14 CFR 385.20(d)). Petitions seeking review may be filed in accordance with the provisions of the Board's Organizational Regulations (14 CFR 385.50 et seq.).

(Section 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324(a).)

SIMON J. EILENBERG,
Associate General Counsel, Rules.

[14 CFR Part 252]

[EDR–306, Docket No. 29044, Dated October 5, 1976]

PROVISION OF DESIGNATED "NO-SMOKING" AREAS ABOARD AIRCRAFT OPERATED BY CERTIFICATED AIR CARRIERS

Proposed Rulemaking

Notice is hereby given that the Civil Aeronautics Board is proposing to amend Part 252 of the Economic Regulations (14 CFR Part 252) to prohibit the smoking of cigars and/or pipes aboard aircraft operated by certificated air carriers (both route and supplemental), to effect improved segregation of cigarette smokers on such aircraft, and to require pertinent changes in the employee manuals of certificated air carriers. The proposals are described in the Explanatory Statement and the proposed amendments are set forth in the Proposed Rules. The Board is also specifically inviting comments to focus on the possible adoption of rules completely prohibiting smoking aboard aircraft operated by certificated air carriers.

The rules are proposed under the authority of sections 204(a), 404(a), and 407 of the Federal Aviation Act of 1958, as amended, (72 Stat. 743, 760, 766 (as amended); 49 U.S.C. 1324, 1374, 1377).

Interested persons may participate in the proposed rulemaking through submission of twenty (20) copies of written data, views, or arguments pertaining thereto, addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. All relevant material received on or before November 8, 1976, and reply comments received on or before November 23, 1976, will be considered by the Board before taking final action on the proposed rule.

Copies of such communications will be available for examination by interested persons in the Docket Section of the Board, Room 711 Universal Building, 1825 Connecticut Avenue, NW., Washington, D.C. upon receipt thereof.

Those persons planning to file comments and/or responsive comments who wish to be served with the comments filed by others, and are willing to undertake service of their own comments on others, shall file with the Docket Section at the above address by October 18, 1976, a request to be placed on the service list in Docket 29044. The service list will be prepared by the Docket Section and sent to the persons named thereon. The persons on the service list are to serve each other with their comments and/or responsive comments at the time of filing, and are to include appropriate proof of service (Rule 8(e), 14 CFR 302.8(e)) with each filing.

Individual members of the general public who wish to express their interest as consumers by participating informally in this proceeding, may do so through submission of comments in letter form to the Docket Section at the above indicated address, without the necessity of filing additional copies thereof.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

EXPLANATORY STATEMENT

Part 252 of the Board's Economic Regulations, adopted in 1973, requires certificated direct air carriers to provide a "no-smoking" area or areas for each class of service, and for charter service, and to insure that there are a sufficient number of seats in "no-smoking" areas to accommodate persons wishing to sit there. It further enjoins each such carrier to insure that there is in fact no smoking in "no-smoking" areas, to enforce the rules required by Part 252 with respect to segregation of passengers in "smoking" and "no-smoking" areas, and to maintain and file with the Board an employees manual containing its rules for smoking by passengers aboard aircraft.

The Action on Smoking and Health (ASH) and Paul R. Kaiser have filed a petition for rulemaking to amend Part 252. The petition seeks no change with respect to smoking of cigarettes but requests a total prohibition of cigar and pipe smoking. No answers to the petition have been filed.[1]

Although petitioners refer to the "safety" of passengers, they appear to use this term in the sense of physical well-being rather than, more conventionally, with reference to hazards such as fire, which might be caused by the smoking of cigars or pipes. In any event, this type of conventional safety consideration is within the jurisdiction of, and has been considered by, the Federal Aviation Administration.[2]

The health aspects of smoking have also been examined by the Federal Aviation Administration and that agency, finding no persuasive evidence that smoke in concentrations likely to occur in transport aircraft is injurious to the health of non-smokers, withdrew its Advance Notice of Proposed Rulemaking in July, 1973.[3] Inasmuch as the Federal Aviation Administration has already asserted jurisdiction of the health question under its authority to promote safety of flight, we think it appropriate to continue to defer to that agency on this issue. In any event, on the basis of the material cited and submitted by petitioners, we are not persuaded that the smoking of cigars and/or pipes should be banned on the ground of injury to the health of passive smokers.[4] Our consideration of the instant petition will accordingly be limited to the question of passenger comfort and whether the smoking of cigars and/or pipes by passengers on certificated air carriers so discomforts non-smokers that carriers which permit it are failing to provide "adequate service" or observe "reasonable practices" within the meaning of section 404(a) of the Act.

Petitioners contend that cigar and pipe smoke differs from cigarette smoke in quality and quantity and causes more discomfort. Their contention is that the smoking of cigars and pipes results in more pollution than the smoking of cigarettes because the smoker, inhaling less, produces relatively unfiltered mainstream smoke, as well as a relatively larger quantity of sidestream smoke, which contains a higher concentration of noxious elements.[5] Petitioners further urge that cigar and pipe smoke causes more discomfort because it is more alkaline, thicker, more voluminous, and difficult to dissipate. And they suggest that cigars and pipes are not habit forming as are cigarettes and, accordingly, that abstention would not impose hardship or discomfort on smokers in the course of "what is generally a relatively short airline flight."[6]

The question of cigar and pipe (as distiguished from cigarette) smoking was not explored at the time Part 252 was adopted, and the Board has no expertise on the technical questions involved. Petitioners seek to support a distinction between cigar and pipe versus cigarette smoke by citation of medical literature and submission of individual letters and of responses to a very informal ASH survey of flight attendants. They also point to the opinion of an ICC Administrative Law Judge which would ban pipe and cigar smoking on trains except in cars which have been allocated as smoking areas in their entirety.[7]

The recommended decision of the ICC Administrative Law Judge has now been adopted by the Commission.[8] But while the railroad rule on pipes and cigars is of interest, its relevance to the question before us here is limited since the situation with respect to aircraft is different from that on trains where entire cars can be designated for smoking.

Literature cited by petitioners indicates that in certain test situations, the smoking of one cigar produced considerably more pollutants than the smoking of a number of cigarettes.[9] Several of the cited authorities appear to place pipes in the same category as cigars with respect to production of pollutants.[10] The cited medical authorities do not establish that pipe and cigar smoke in fact produces more irritation or discomfort in passive smokers.[11] And none of these cited tests

---

[1] Although no formal answers have been filed, a letter in opposition to the petition has been received from William L. Sullivan, Jr., who complains that the proposed rule discriminates against cigar and pipe smokers. A letter of August 31, 1976, from the Airline Passengers Ass'n, Inc., appears to indicate association support for Mr. Sullivan's position. These letters will be placed in the correspondence file of the docket. The issue of discrimination is among those which will be considered in this proceeding.

[2] Dockets 10012, 10033, Notice 70–14, 35 FR 5045, March 25, 1970.

[3] 38 FR 19048, July 17, 1973.

[4] Passive smoking is the term used in the literature to refer to the inhalation of smoke by nonsmokers in the vicinity of persons who are smoking.

[5] Mainstream smoke emerges from the tobacco product after being drawn through the tobacco during puffing. Sidestream smoke rises from the burning cone of tobacco. Mainstream and sidestream smoke contribute different concentrations of many substances to the atmosphere for several reasons: Different amounts of tobacco are consumed in the production of mainstream and sidestream smoke; the temperature of combustion differs for tobacco during puffing or while smoldering; and certain substances are partially absorbed from the mainstream smoke by the smoker. Department of Health, Education, and Welfare, "Health Consequences of Smoking" 1975, p. 92.

[6] While petitioners thus refer to the length of flights, their proposal would ban all cigar and pipe smoking without regard to this factor.

[7] The ICC Administrative Law Judge found "adequate data to demonstrate that pipe and cigar smoke is a substantially more lasting and obnoxious imposition on 'passive smokers' than cigarette smoke." He noted a higher content of carbon monoxide in cigar and pipe smoke and stated that since these materials tend to be burned for longer periods of time per usage in the case of pipes and cigars, they also tend to generate more total pollutants per smoking incident.

[8] The newly adopted ICC rule reads: 1124.21 (Regulation 21) Allocation of space for nonsmokers and smokers.

a. Smoking shall not be permitted on trains except in appointed areas with fire-resistant materials and equipped with ventilation systems adequate to exchange air completely in reasonably short periods of time.

b. In train cars meeting the above requirement, smoking may be permitted as follows:

(1) Smoking may be permitted in private sleeping cars.

(2) Smoking is not permitted in any dining car, snack car, or other car where food is served, unless the train consist has alternative smoking and nonsmoking cars offering such food services.

(3) Smoking may be permitted in up to one-half of the space in any other car which is the sole one of its type in the consist, or if there is more than one car of this type in the consist, unreserved coach, reserved coach, parlor car, dome car, and lounge car shall each be considered a separate "type" of car.

(4) Pipe and cigar smoking is not permitted on board trains, except in cars which have been allocated as smoking areas in their entirety.

[9] One study is said to have indicated that the carbon monoxide generated by one cigar was double that generated by three cigarettes smoked simultaneously. Epstein, "Effects of Tobacco Smoke Pollution on the Eyes of the Non-Smoker," Paper presented to Third World Conference on Smoking and Health, June 4, 1975, New York, p. 2. And a 1970 (Hartke) study showed that the smoking in an unventilated room of 9 cigars in 30 minutes polluted the air as much as the smoking of 42 cigarettes in 16–18 minutes. 118 Cong. Rec. No. 72, Attachment 5 to petition.

[10] The 1970 Hartke study concluded that pipe smoking in the same unventilated room produced less carbon monoxide and nictotine than either cigarette or cigar smoking. More recent general statements, however, appear to classify pipe and cigar smoke together with respect to producing pollutants. Epstein, note 9 supra; Steinfeld, "Health Consequences of Smoking," Talk presented June 2, 1975, 3rd World Conference on Smoking and Health, New York, and Doyle, "Pipe and Cigar Smoking—Is It Safe?" American Lung Ass'n. Bulletin, March 1974.

V41I197 OCT 8 76 UMI

and experiments took place in aircraft conditions.[12]

Individual letters of complaint submitted by petitioners describe severe nausea and respiratory discomfort said to have been caused by pipe and cigar smoke on particular flights but would not in themselves form sufficient basis for adoption of a blanket prohibition on cigars and pipes. No survey of passengers is offered, petitioners submitting instead a miscellaneous collection of responses to a questionnaire distributed to flight attendants. The different forms of this questionnaire and the replies make tabulation difficult and petitioners have made no effort at systematic compilation. It does, however, appear that a majority of the responding flight attendants are more affected by cigar and/or pipe smoke[13] than by cigarette smoke. Study of the responses nevertheless shows that, in terms of their effect on the comfort of flight attendants, the distinction between cigars and pipes, on the one hand, and cigarettes on the other, may not be as clear cut as the instant petition would suggest.

Thus, a substantial number of attendants would distinguish pipes from cigars; some found cigars and cigarettes more of a problem than pipes; a few noted that cigarettes are the real problem because they are used more frequently. On the longer questionnaire form where room was available, a substantial proportion of attendants, in response to the question concerning cigars or pipes, took pains to point out that all smoking affected them. Furthermore, of those attendants advocating a ban on smoking, more favored a total ban than a ban limited to cigars and pipes. Factors mentioned as relevant to annoyance caused by smoking are type of aircraft and length of flight. Letters received from individual members of the public show a pattern somewhat similar to that of the attendants' responses. While most of the letters emphasize cigar and pipe smoking—many complaining of nausea and allergic reactions a substantial number urge a full ban on all smoking now, or as the next regulatory step.

While the material presented by petitioners is not conclusive, it does indicate that the smoking of cigars and pipes by airline passengers may cause particular discomfort per smoking incident.[14] At the time Part 252 was originally considered, the carriers themselves appeared to believe that a distinction between cigars, pipes, and cigarettes might exist. And employee manuals on file with the Board indicate that some carriers do in fact ban the use of cigars and/or pipes. We are interested in the reasons why these rules have been adopted, and in carrier experience with the rules.

Whatever our ultimate conclusion as to the adoption of a ban on cigar and/or pipe smoking, the responses of flight attendants and of members of the public already received, as well as the Board's experience with Part 252 over the last three years, lead us tentatively to find that some amendment of the present provisions of Part 252 is in any event desirable. While some of the surveyed attendants complain of difficulties in requiring passengers to comply with existing regulations, passengers comment on the need for better enforcement. Entirely apart from this rulemaking, the Board has received a large number of complaints with respect to effectuation of Part 252, and a number of enforcement proceedings have resulted.[15]

Complaints filed with the Board generally have raised such problems as insufficiency of seats in no-smoking areas, lack of clear boundaries between smoking and no-smoking areas, and lack of enforcement by airline personnel. It appears that some carriers have failed to provide their employees with sufficient guidance in respect to the regulation or to employ adequate measures to insure compliance by company employees. In the circumstances and on the basis of this experience, we tentatively find a need for the proposed amendments of Part 252 so as to provide more detailed guidance to carriers, and to insure that specific instructions are given to carrier employees.

Amendment of the rule also appears needed to improve segregation of smokers from non-smokers when some configurations are used. Section 252.2 presently requires that carriers subject to the Part provide a "no-smoking" area for each class of service. It does not explicitly prohibit the provision of more than one smoking area per class of service. As a general rule, carriers which provide only first-class and coach service (normally in separate parts of the aircraft) have provided one "smoking" area and one "no-smoking" area per class, and thus per compartment. However, certain carriers which have offered more than one class of service per aircraft compartment have had difficulty in segregating smokers from non-smokers. They have usually been faced with the choice of allotting the forward and rear quarter of the aircraft compartment to one group, i.e., either smokers or non-smokers, and the center half to the other. In those instances in which the center half of the compartment has been allotted to smokers, the Board has received few if any complaints. However, when the converse configuration has been employed so that non-smokers are seated in the center half between two "smoking" sections, the Board has received both formal and informal complaints alleging that such configurations provide ineffective segregation.[16] Based on this experience, we tentatively find that § 252.2 should be amended explicitly to prohibit more than one smoking area per aircraft compartment.

In addition to comments on a ban of cigar and/or pipe smoking and on the specific proposed amendments to Part 252, we are interested in comments on whether or not and under what circumstances there should be a total ban on all smoking by passengers on commercial aircraft. We rejected such a solution at the time Part 252 was adopted since we, at that time, did not believe that an absolute ban was the only reasonable solution to the discomfort problem. However, the material submitted by petitioners and other individual members of the public as well as the volume of complaints with respect to Part 252 suggest that public tolerance of smoking has further decreased since the adoption of the Part. That tolerance has markedly declined in the past five years is confirmed by a recent official publication of the Department of Health, Education, and Welfare.[17] In the present circumstances, it might be best to consider the entire question of smoking on aircraft and the conditions under which it should be banned or permitted, rather than to explore the question on a piecemeal basis, one step at a time.

In addition to the specific proposed amendments, we would be interested in

[12] Aircraft conditions have generally been found to be very favorable due to the rapid changes of air.

It has, however, been suggested that low atmospheric pressure in aircraft puts air crew at a disadvantage when exposed to carbon monoxide. Howlett and Shephard, "Carbon Monoxide as a Hazard in Aviation," 15 Journal of Occupational Medicine 874, November, 1973.

[13] All forms of questionnaire employed in ASH's survey of flight attendants inquired whether the attendants are bothered by cigar and/or pipe smoke on passenger flights, how it affects their health, comfort and job performance, and whether it affects them more than cigarette smoke. One form of questionnaire referred to "cigars and pipes" while another referred to "cigars or pipes."

[14] We have no information as to the relative frequency of pipe and cigar smoking on commercial aircraft generally. The study sample employed at the time Part 252 was adopted involved 20 MAC flights to Europe and Asia carrying 3,073 passengers and eight "domestic flights" with a total of 265 passengers. Of the 3,073 passengers on MAC flights, 1,604 smoked, of whom 28 smoked cigars and 37 pipes. Of 265 passengers on domestic flights, 83 smoked, of whom one smoked cigars and 5 pipes.

[15] One cease and desist order has been issued. Order 76-4-160, April 28, 1976.

[16] The Board has also received complaints against carriers which offer only one class of service but provide two "smoking" areas and one "no-smoking" area. This has been found to be ineffective segregation. See Order 76-4-160, note 15, supra. A third party complaint has been filed against Piedmont Aviation for employing the same type of configuration. *Libow* v. *Piedmont Aviation*, Third-Party Complaint, Docket 28288.

[17] Of 12,010 people interviewed in 1975, 70 percent (including more than half of those who themselves smoke) agreed that the smoking of cigarettes should be allowed in fewer places than it now is. The comparable figure for 1970 was 57 percent. "Adult Use of Tobacco—1975," pp. 7-8, Department of Health, Education, and Welfare, June 1976.

comments directed to the following issues:

1. Should all passenger smoking on commercial aircraft be prohibited?

2. Should any prohibition with respect to passenger smoking on commercial aircraft (whether limited or all-inclusive, as to type of smoke) be applicable on all passenger flights on all aircraft operated by certificated air carriers?

3. Should any prohibition with respect to passenger smoking on commercial aircraft be conditioned on: (a) Type of aircraft, (b) Length of flight, or (c) Other (*e.g.*, number of stops)?

4. Should there be "no-smoking" flights and, if so, in what markets and under what circumstances should they be provided? and

5. Should the "no-smoking" area be prescribed as a minimum percentage of sets on the aircraft, e.g., 40 percent?

PROPOSED RULES

It is proposed to amend Part 252 of the Board's Economic Regulations, Provision of Designated "No-Smoking" Areas Abroad Aircraft Operated by Certificated Air Carriers (14 CFR Part 252), as follows:

PART 252—PROVISION OF DESIGNATED "NO-SMOKING" AREAS ABOARD AIRCRAFT OPERATED BY CERTIFICATED AIR CARRIERS; PROHIBITION OF CIGAR AND PIPE SMOKING

1. Amend the part heading to read as set forth above.

2. Amend the Table of Contents by adding new §§ 252.1a and 252.1b to the table, so that the table as amended reads in pertinent part as follows:

Sec.
252.1 Applicability.
252.1a Definitions.
252.1b Carriers to prohibit smoking of cigars and pipes aboard aircraft.
252.2 Carrier to provide specially designated "no-smoking" areas in which smoking is prohibited.

* * * * *

3. Revise § 252.1 to read as follows:

§ 252.1 Applicability.

This part provides for the prohibition of cigar and pipe smoking abroad aircraft and for the provision of specially designated areas in which smoking of cigarettes is prohibited (hereinafter "no-smoking" areas). This part shall apply to each direct air carrier which holds a certificate of public convenience and necessity issued pursuant to section 401 of the act authorizing the transportation of persons. Nothing in the regulation shall be deemed to require such carrier to permit the smoking of cigarettes aboard aircraft.

4. Add a new § 252.1a to read as follows:

§ 252.1a Definitions.

For purposes of this part:

(a) "Compartment" means any portion of a passenger cabin separated by a bulkhead or other partition.

(b) "Row" means an entire horizontal line of seats including both sides of any intervening aisles.

5. Add a new § 252.1b to read as follows:

§ 252.1b Carriers to prohibit smoking of cigars and pipes aboard aircraft.

Each carrier subject to this part shall prohibit the smoking of cigars and pipes by passengers aboard aircraft, whether in scheduled or charter service.

6. Revise § 252.2 to read as follows:

§ 252.2 Carriers to provide specially designated "no-smoking" areas in which smoking is prohibited.

Carriers subject to this part shall provide a "non-smoking" area or areas for each class of service and for charter service: *Provided, however*, That there shall be no more than one "smoking" area per aircraft compartment. Each carrier shall adopt procedures, pursuant to this section, which shall insure that a sufficient number of seats in the "no-smoking" areas of the aircraft are available to accommodate all persons who wish to be seated in such areas. Such procedures shall include specific provision for expansion of the "no-smoking" area to meet passenger demand and in no case shall any "no-smoking" area consist of less than two rows of seats.

7. Revise § 252.3 to read as follows:

§ 252.3 Carrier to insure smoking of cigars and pipes not permitted aboard aircraft, to insure smoking of cigarettes not permitted in "no-smoking" areas, and to enforce its rules for the segregation of smokers and nonsmokers.

Each carrier shall take such action as is necessary to insure that smoking of cigars and pipes is not permitted aboard aircraft, to insure that smoking of cigarettes is not permitted in "no-smoking" areas, and to enforce its rules with respect to the segregation of passengers in "smoking" and "no-smoking" areas. Such action shall include requiring that the following procedures be carried out by carrier employees:

(a) For flights on which seat selection is available, each passenger shall be offered, upon check-in, a choice of "no-smoking" or "smoking" accommodation;

(b) For all flights, whether or not seat selection is available, all passengers shall be informed of the boundaries of the "no-smoking" and "smoking" areas and pre-boarding and pre-departure announcements shall explain that, in accordance with Civil Aernautics Board regulations, all passengers are entitled to seating in the appropriate "no-smoking" areas on request;

(c) (1) In cases of cigarette smoking in a "no-smoking" area:

(i) An attempt to reseat the passenger in the appropriate "smoking" area;

(ii) In the absence of seats in the appropriate "smoking" area, a request that the passenger refrain from smoking while in the "no-smoking" area;

(iii) If this request is ineffective, notice to the passenger that he is subject to disembarkation at the next scheduled point;

(iv) If this notice is ineffective, disembarkation of the passenger at the next scheduled point.

(2) In cases of cigar or pipe smoking aboard aircraft:

(i) A request that the passenger refrain from smoking;

(ii) If this request is ineffective, notice to the passenger that he is subject to disembarkation at the next scheduled point;

(iii) If this notice is ineffective, disembarkation of the passenger at the next scheduled point.

[FR Doc.76-29680 Filed 10-7-76;8:45 a.m.]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

FM BROADCAST STATIONS IN NAPLES AND NORTH NAPLES, FLA.

Proposed Table of Assignments and Memorandum Opinion and Order

Adopted: September 28, 1976.
Released: October 1, 1976.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Naples and North Naples, Florida), Docket No. 20935, RM-2653, RM-2690. FM Broadcast Stations in Naples and North, Naples, Fla.

1. *Petitioner, proposal and comments.* (a) The Commission has before it, and will consider jointly, the petitions of Sunshine Broadcasters, Ltd. (RM-2690) and Donald W. Miles, Harold M. Kneller, Jr. and David P. West (hereinafter "Miles") (RM-2653), regarding Naples and North Naples, Florida, respectively.

(b) The petition of Sunshine Broadcasters, filed April 21, 1976, requests the assignment of FM Channel 276A to Naples. Oppositions have been received from Sterling Communications Corporation, the Deltona Corporation, and Collier Broadcasting Company. A reply comment was filed by the petitioner.

(c) The petition of Miles, filed February 4, 1976, requests the assignment of FM Channel 288A to North Naples, Florida. An opposition was submitted by Sterling Communications Corporation and a reply has been received from the petitioner.

2. *Demographic Data.* (a) *Location.*—Naples, the county seat of Collier County, is located in southwest Florida, 160 kilometers (100 miles) west of Miami. North Naples is an unincorporated area of Collier County stretching from Naples, north approximately 16 kilometers (10 miles) to the county line.

(b) *Population.* — Naples — 12,042;[1] North Naples—3,201; Collier County—38,040.

(c) *Present aural services.*—Naples is served by three FM stations: WRGI-FM (Channel 288A), licensed to Collier Broadcasting Co.; WNTU(FM) (Channel 249A), permit issued to Sterling Communications Corp.; and WCVU(FM) (Channel 233), licensed to Palmer

[1] Population figures are taken from the 1970 U.S. Census, unless otherwise indicated.

V41I197 OCT 8 76 UMI

Broadcasting Co.; and one AM station, WNOG (unlimited-time), also licensed to Palmer Broadcasting Co. In addition one UHF-TV Station WEVU-TV (Channel 26) serves Naples. North Naples is unserved by local stations. Collier County has, in addition to the Naples' stations, Station WRGI(AM) and unoccupied FM Channel 266, Marco, and Station WKEM (AM), Immokalee.

3. *Preclusion considerations.* The assignment of Channel 276A to Naples would result in preclusion on that channel in an area which is largely swampland and lacks significant population. The assignment of Channel 288A to North Naples would result in preclusion on the co-channel affecting an area which includes the following communities—Immokalee (pop. 3,764); East Naples (pop. 6,152); Mt. Myers Beach (pop. 4,305), and Bonita Springs (pop. 1,932). However local aural service is already provided to Bonita Springs by Station WLEQ(FM) (Channel 240A), to Immokalee by Station WKEM(AM) and a petition to assign Channel 257A to Ft. Myers Beach (RM-2736) was received on July 23, 1976. Only East Naples is without such service.

4. *Community Data—Naples (RM-2690).* According to petitioner, Sunshine Broadcasters, Naples has been listed by a "National Advertising" magazine as the top growth area in the state of Florida. Detailed information is provided by petitioner to demonstrate that Naples is a sizable community that provides all the important services and facilities normally desired in a city. It also alleges that the 1970 population figure for the Naples area is 27,000, with "Florida state figures" for 1972, totalling over 30,000 persons, and at the present growth rate it is projected that the 1980 population will be from 65,000 to 75,000 persons. In a supplemental filing, petitioner provided more recent population data for the city and county. According to estimates furnished through local county and city agencies and the University of Florida, the 1975 population of Naples is 17,224 persons and of Collier County is 59,700 persons. The 1980 projections for Naples is 23,861 persons and for Collier County is 80,000 persons.

5. *Responsive Comments.* Sterling Communications Corp., permittee of Station WNTU(FM) (Channel 249A), Naples, Florida, states that the petitioner has not shown any special circumstances to justify another departure from the Commission's population guidelines.[2] Sterling argues that Naples is well served by existing stations and any proposal to add another station would represent an inefficient use of the radio spectrum contrary to section 307(b) of the Communications Act of 1934, as amended, Collier Broadcasting Co., licensee of Station WRGI-FM, Naples, and AM Station WRGI, Marco, makes substantially the same argument. In reply comments, petitioner argues that the primary consideration regarding its proposal is a technical one rather than an economic one and since there is no FCC policy or rule which would preclude adoption of its proposal, it urges that we view the opponents pleadings as an attempt to keep competition out. Therefore it requests that we take cognizance of the rapid growth in the Naples area by assigning Channel 276A to Naples.

DISCUSSION

6. We do not doubt the substantial growth that has taken place in Naples. However, even assuming large gains in population and a corresponding increase in need for aural service, the assignment of a fourth channel is not necessarily justified. Our population criteria are premised upon the mandate of section 307(b) of the Communications Act of 1934, as amended, "* * * the Commission shall make such distribution of * * * frequencies * * * among the several States and communities as to provide a fair, efficient and equitable distribution of radio service to each of the same." The formulation of criteria based upon population reflects our belief that there is indeed a limit beyond which it is neither fair, efficient nor equitable to allocate additional channels to a particular community of a particular size. Our guidelines which impose a limit of 2 channels for communities under 50,000 population, of course, are not immutable[3] but have yielded to special circumstances such as provision for anticipated future growth,[4] or where channel availability is such that due to the absence of adverse effects elsewhere a fair distribution would result.[5] We have assigned a third channel to communities which have populations between 40,000 and 50,000 where there appears to be a substantial increase from the last census.[6] But we can find no case in which our population guidelines have been stretched as far as petitioner requests. To the contrary, we have denied the assignment of even a third channel to large communities in other situations.[7] Contrary to petitioner's assertion that our only consideration is a technical one, i.e., whether the requested channel can be assigned in accordance with our engineering rules, we believe that section 307(b) of the Act dictates that our determination consider the fairness of the distribution. This evaluation is not based primarily on economics nor the lack of significant preclusion but, due to the scarcity of frequencies that might be allocated to this area of Florida, the retention of flexibility is an important factor. In a recent case, Bend, Oregon, 40 F.R. 53597 (1975), recons. den. FCC 76-436, Mimeo No. 40524, released May 20, 1976, a request for a third FM channel to a community of 13,710 (1970 U.S. Census) was denied. Population projections for the city included a 1974 estimate—17,215 and for the urban area—25,690 and a 1985 city prediction of 45,000. The Commission stated that these projections were far short of the guidelines, that no nighttime first or second aural service would be provided and that the community was adequately served by four existing stations. Thus no special circumstances could be found to warrant a departure from the guidelines and it was emphasized that a lack of preclusion in itself was not such a significant consideration. In the present situation, we also fail to find sufficient special circumstances to justify pursuing the request for a fourth FM channel to a community this size (pop. 12,042) even with the predicted growth to a population 23,861 for 1980. We believe that our previous grant of a third FM channel to the community which exceed our criteria was designed to accommodate the future increase in needs for aural service. Thus we believe that this petition must be denied.

7. *Community Data—North Naples (RM-2653).* According to petitioner Miles, the term, North Naples, is "used to describe almost all of the unincorporated part of Collier County, Florida, which lies directly north of the City of Naples." It is purported to include Naples, Park, an unincorporated community of 1,522 persons, Palm River Estates, Palm River Shores, Vanderbilt Beach, Vanderbilt Beach Estates, Poinciana Village, Forest Lakes and other residential developments. Petitioner alleges that Collier County is, according to the 1970 U.S. Census, one of the five fastest growing areas in the United States and that substantial growth is indicated for the county. Petitioner avers that this substantial growth taking place in Collier County is to be found in the unincorporated areas surrounding Naples. It is conceded by petitioner, that the county still considers North Naples as an "unincorporated area" and that it lacks a "city hall," and its own post office. Nevertheless, they argue that based on growth indicators provided plus the existence of various facilities such as an industrial park, shopping center, and numerous residential developments, that a community of interest exists. Among the existing indicators of community status for North Naples that petitioner points to are the "North Naples Fire District" designation given to it by the county; the

[2] The guidelines limit communities under 50,000 population to one to two stations. In 1974, a third FM channel was assigned to Naples "even though it exceeds the quota set forth in the FM assignment policy guidelines." Naples, Florida, 49 F.C.C. 2d 1266, 1269 (1974).

[7] See Bend, Oregon, 40 FR 53597 (Docket No. 20481) (1975); recons. den. (1975); Bangor, Maine, 55 F.C.C. 2d 282, recons. den. Mimeo No. 65775, released June 3, 1976; Santa Maria, California, 8 F.C.C. 2d 402 (1967); Kingston, New York, 5 R.R. 2d 1548 (1965).

"Water Management District Number Seven"; and "Water Sewer District A" which comprise the area regarded as North Naples. The County Sheriff Department's dispatches refer to North Naples, according to petitioner and at least five county voting precincts are situated within the area, while numerous other services lie, at least in part, within the designated boundaries of North Naples. In an attached letter written by the president of the Naples Park Area Association, we are told that the area consists of many named communities which have new homes, schools, banks, golf clubs and a drive-in theatre under construction. The president further states that the area should be considered as a single unit because—it is served by one fire district; most of the area is located in the sewer district and a new state park offers a central place for recreation. In addition he refers to the rapid increase in service facilities and a new shopping center to show that residents of this area have become independent of the facilities offered by Naples.

8. *Responsive Comments.* Sterling Communications Corp., permittee of Channel 249A at Naples, contends that petitioner has failed to make a threshold showing that North Naples is a distinct community in need of a separate aural service and that therefore petitioner is realistically seeking another Naples facility. It points to a statement from the Chairman of the County Commissioner which states that North Naples has no autonomous governing body nor definite boundaries, that the area relies on the city of Naples for its water supply and on the county for sewers and police protection. He further notes that no major shopping centers or civic associations identify themselves with the North Naples area at large. In addition, Sterling argues that North Naples is well served by 5 existing stations and another potential station in the area. Moreover, preclusion would be significant, according to Sterling in that 3 communities with larger populations and without any assignments would be affected. In reply petitioner argues that it is committed to serving North Naples rather than Naples and that its proposed community of assignment has grown considerably since the U.S. Census was taken in 1970. In response to Sterling's allegation that North Naples does not have an organization which speaks for the community at large, petitioner comments that its proposal seeks to provide that specific function by operating a local station. It concedes that there are no definite boundaries nor local government, but asserts that no such requirement exists for assignment purposes.

9. *Discussion.* Based on the information thus far provided, we have some serious reservations about the petition to assign a first FM channel to North Naples but for reasons to be discussed we believe that the request should be pursued in a rule making proceeding. First, the status of North Naples as a community is unclear. In Seven Locks Broadcasting Co., 37 F.C.C. 2d 82, 83 (1964), we described the term "community" as "an identifiable population grouping separate and distinct from all others." The test that has been formulated in this regard is whether the residents function as and conceive of themselves as residents of a community, around which their interests coalesce.[8] Included in the evidence offered to support community status in North Naples is the designation of the "North Naples Fire District" and the "Water Management District No. Seven" and "Water Sewer District A". These designations are demographic in nature indicating only that the county, not the residents, recognizes a geographic area known as North Naples. However, the type of information that we require for the purposes of community status, as used by the Act, include civic organizations, clubs, local newspapers, shopping centers, etc., such that it appears the interest of the residents coalesce into community facilities or services to satisfy some common needs of these residents. We have been told that there are some facilities such as a new shopping center and more residential construction in existence. However we need to know in what way each existing facility or organization is designated and what needs of the community's residents as opposed to the county's residents, they seek to fulfill. In order to allow petitioner or some other party to provide information on this issue, we will pursue the request to assign Channel 288A to North Naples. Regarding the delineation of boundaries for North Naples, petitioner is wrong in asserting that no such requirement exists.[9] Therefore we expect petitioner, in its comments, to show the boundaries of the community to be served. As to Sterling's contention that a North Naples station would in reality seek to serve the larger community of Naples, we believe that the commitment given by petitioner is sufficient provided an adequate showing can be made that North Naples is a distinct and viable community including information regarding the availability of business activity such a station would look to for its source of advertising.

10. Accordingly, the Commission proposes, pursuant to sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, to amend the FM Table of Assignments (§ 73.202(b) of the Commission's rules) as follows:

City	Channel No. Present	Channel No. Proposed
North Naples, Fla.		288A

11. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures and filing requirements are contained below and are incorporated herein.

12. Interested parties may file comments on or before November 12, 1976, and reply comments on or before December 2, 1976.

13. *Further, it is ordered,* That the petition of Sunshine Broadcasters to assign Chanel 276A to Naples, Florida, (RM-2690), is denied.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in this *notice of proposed rulemaking.*

2. *Showings required.* Comments are invited on the proposal(s) discussed in this notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in this notice of proposed rule making. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be

[8] Yorktown, Virginia, 38 F.R. 6695 (Notice) (1973); Sierra-Pacific Radio Corp. (KOSO), 7 F.C.C. 2d 61 (1967). In Jensen Beach, Florida, 47 F.C.C. 2d 54 (1974) it was shown that a community existed since there was an independent fire department, ambulance service, Chamber of Commerce, commercial bank, a variety of services for residents and tourists, a local newspaper, several organizations and the residents had started a drive to seek incorporation. See also Holliday, Florida, 41 F.R. 20663 (1976).

[9] See Yorktown, Va., supra; Seven Locks Broadcasting Co., 37 F.C.C. 82 (1964). Such information is needed, among other reasons, so as to determine community coverage from a proposed transmitter site under the Commission's rules. See § 73.315(a).

served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commissions' Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc.76-29655 Filed 10-7-76;8:45 am]

NATIONAL CREDIT UNION ADMINISTRATION

[12 CFR Part 720]

PRIVACY ACT OF 1974

Specific Exemptions of Systems of Records

Under authority of sections 120(a) and 209(a)(11) of the Federal Credit Union Act (12 U.S.C.A. 1766(a), 1789 (a)(11)), and pursuant to section (k) of the Privacy Act of 1974 (5 U.S.C. 552a (k)), the Administrator of the National Credit Union Administration (NCUA) hereby proposes to revise 12 CFR 720.35, as set forth below.

Section 720.35 is NCUA's regulatory provision by which certain of its systems of records are exempted from provisions of the Privacy Act in accordance with section (k) thereof. Section 720.35 does not presently identify those systems of records for which exemptions are claimed. Rather, it describes the effects of the exemptions claimed and refers the reader to NCUA's public notices of systems of records to determine the specific systems exempted. Based upon a reconsideration of section (k) of the Act, it is now considered more appropriate that § 720.35 identify both those systems of records for which exemptions are claimed and the provisions of the Act from which they are exempted. This proposed revision will accomplish that purpose.

Interested persons are hereby invited to submit written data, views or arguments on this proposal, to the Administrator, National Credit Union Administration, 2025 M Street NW., Washington, D.C. 20456. Comments received on or before November 12, 1976, will be considered before final action is taken on this proposal. Copies of all written comments received will be available for public inspection during normal business hours at the foregoing address.

C. AUSTIN MONTGOMERY,
Administrator.

SEPTEMBER 30, 1976.

Authority: Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1014 (12 U.S.C 1789)

§ 720.35 Exemptions.

(a) The Administration maintains three systems of records which are exempted from some of the provisions of the Privacy Act of 1974. In paragraphs (b) and (c) of this section, those systems of records are identified (by System Name and System Number as stated in the Administration's "Notice of Systems of Records," published in the FEDERAL REGISTER) and the provisions from which each system is exempted and the reasons therefor are set forth.

(b) System NCUA–2, entitled "Federal Employee Security Investigations Containing Adverse Information," consists of adverse information about Administration employees which has been obtained as a result of routine Civil Service Commission security investigations. System NCUA–17, entitled "Security Clearance Records Concerning NCUA Personnel Who Occupy Critical Sensitive Positions," consists of records obtained as a result of investigations conducted by the Civil Service Commission and/or the Bureau of Federal Investigation to determine qualifications of NCUA officials for security clearances. To the extent that the Administration maintains records in either of these systems pursuant to Civil Service Commission guidelines which require or may require retrieval of information by use of individual identifiers, those records are encompassed by and included in the Civil Service Commission's Government Wide System of Records Number 4, entitled "Personnel Investigations Records," and thus are subject to the applicable specific exemptions promulgated by the Commission at 5 CFR § 297.117. Additionally, in order to ensure the protection of properly confidential sources, particularly as to those records which are not maintained pursuant to such Civil Service Commission requirements, the records in these systems of records are exempted, pursuant to section k(5) of the Act (5 U.S.C. 552a(k)(5)), from section (d) of the Act (5 U.S.C. 552a(d)). As a result, to the extent that disclosure of a record would reveal the identity of a confidential source, the Administration need not grant access to that record by its subject. Information which would reveal a confidential source shall, however, whenever possible, be extracted or summarized in a manner which protects the source and the summary or extract shall be provided to the requesting individual.

(c) System NCUA–4, entitled "Investigative Reports Involving Possible Felonies and/or Violations of the Federal Credit Union Act," consists of a limited number of records about individuals suspected of involvement in felonies or infractions under the Federal Credit Union Act (12 U.S.C. 1751, et seq.). These records are maintained in an overall context of general investigative information concerning crimes against credit unions, the bulk of which does not pertain to and is not identifiable to individual persons. To the extent that individually identifiable information is maintained, however, for purposes of protecting the security of any investigations by appropriate law enforcement authorities and promoting the successful prosecution of all actual criminal activity, the records in this system are exempted, pursuant to section k(2) of the Act (5 U.S.C. 552a(k)(2)), from sections (c)(3) and (d) of the Act (5 U.S.C. 552a (c)(3), (d)). As a result, the Administration need not make an accounting of previous disclosures of a record in this system of records available to its subject, and the Administration need not grant access to any records in this system of records by their subject. Further, whenever an individual requests records about himself and maintained in this system of records, the Administration shall, to the extent necessary to realize the above stated purposes, neither confirm nor deny the existence of that record but shall advise the individual only that no record available to him pursuant to the Privacy Act of 1974 has been identified. However, should a review of the information reveal that it has been used or is being used to deny the individual any right, privilege or benefit for which he is eligible or to which he would otherwise be entitled under Federal law, the individual shall be advised of the existence of the information and shall be provided the information except to the extent it would identify a confidential source. Information which would identify a confidential source shall, if possible, be extracted or summarized in a manner which protects the source and the summary or extract shall be provided to the requesting individual.

(d) For the purposes of this section, a "confidential source" means a source who furnished information to the Government under an express promise that the identity of the source would remain confidential, or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 118]

HANDICAPPED ASSISTANCE LOANS

Proposed Rulemaking

Notice is hereby given that pursuant to the authority contained in Section 5 of the Small Business Act, 15 U.S.C. 631, et seq., it is proposed to amend, as set forth below, § 118.71 of Part 118 of Chapter I, Title 13 of the Code of Federal Regulations.

Prior to the final adoption of such amendment, consideration will be given to any comments. Such comments should be submitted in writing, in triplicate, to the Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416, on or before October 28, 1976.

Information. The proposed amendment creating a new paragraph (b) to § 118.71 liberalizes a part of the definition of "associate" set forth in § 120.1(d)(3) of Part 120. It would make SBA financial assistance available to HAL–1 organizations whose officers, directors, trustees or members may also be officers, directors, or shareholders of the prospective lender, provided such person does not participate in the lender's decision on a loan to the HAL–1 organization. This liberalization is being proposed because applicable provisions of Parts 120 and 122 of this chapter apply to both HAL–1 and HAL–2 loans.

It is proposed to amend § 118.71 by adding new paragraph (b) thereto which will read as follows:

§ 118.71 Applicability of other SBA regulations.

* * * * *

(b) For the purpose of determining the eligibility of a nonprofit organization, as defined in § 118.2(e) to receive financial assistance from SBA under 7(h) of the Small Business Act, as amended, such organization shall not be deemed an associate of the lender solely because one or more of its officers, directors, or members may also be officers, directors, or holders of ten percent or more of the lender's stock, unless such person has participated in the lender's decision to make a loan in participation with SBA to the said nonprofit organization.

(Catalog of Federal Domestic Assistance Program No. 59,021, Small Business loans.)

Dated: OCTOBER 1, 1976.

MITCHELL P. KOBELINSKI,
Administrator.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF DEFENSE

Department of the Army

SPECIAL COMMISSION ON THE U.S. MILITARY ACADEMY

Meeting

1. In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name of committee: The Special Commission on the United States Military Academy.

Date of meeting: 27–29 October 1976.

Place: United States Military Academy, West Point, New York.

Time: 1300—1700, 27 October 1976. Open Session; 1700–2100, 27 October 1976, Closed Session (unless deferred to permit greater public participation); 28 October–29 October, Closed Session.

Proposed agenda: The Commission will meet from 1300–1700 hours to receive public evidence concerning the eight questions posed by the Secretary of the Army (FR Sept. 3, 1976). This portion of the meeting will be open to the public; however, in order to assure adequate space accommodations, it is necessary for all persons wishing to attend, appear before or file statements with the Commission during the session to advise the Executive Director of the Commission in writing not later than 22 October 1976 at the following address: Executive Director, Special Commission, United States Military Academy, West Point, New York. This portion of the meeting will remain open to the public as long as is required on 27 October to permit all persons having expressed an interest in appearing before or in filing statements with the Commission to do so. Persons appearing before the commission are asked to limit their presentations to a reasonable period of time, the length of which will be determined by the Executive Director of the Commisison, based upon the number of persons wishing to appear.

2. The Commission will recess its session at 1700 hours 27 October, 1976 unless public participation determines that the closed session will be deferred as stated above. The Commission will immediately reconvene in closed sessions from 1700 to 2100 hours 27 October 1976, or as soon thereafter as public participation in open session has been concluded, but not later than 2000 hours, 27 October 1976. The Commission will remain in closed session until such time as may be determined by the Secretary of the Army or his designee, but not later than 29 October, 1976. These sessions will be closed to the public since the Commission will be addressing matters directly involved with the Electrical Engineering 304 cheating incident and the alleged Honor Code Violations resulting therefrom. An integral and inseparable portion of the subject matter of the closed sessions will involve discussions and review of personnel and similar files as well as personal interviews of individuals, many of whom have cases still pending. The public disclosure of this information would constitute a clearly unwarranted invasion of personal privacy of the individuals concerned. Further, investigatory records compiled in connection with investigation of the cheating incident will also be reviewed during these sessions. The disclosure of this information will constitute a clearly unwarranted invasion of personal privacy. These matters are exempt from public disclosure under Title 5, U.S.C. 552(b)(6). Accordingly, it has been determined necessary to close these portions of the 27–29 October 1976 meeting to the public pursuant to Section 10(d) of Pub. L. 92–463, the Federal Advisory Committee Act.

3. Persons wishing additional information on the above scheduled meeting may write the Executive Director at the address given above or may telephone the Executive Director at 914–938–3005.

Dated: October 6, 1976.

By authority of the Secretary of the Army.

R. S. SEEBERG,
LTC, U.S. Army, Acting Director, Administrative Management, TAGGEN.

Department of the Navy

ACADEMIC ADVISORY BOARD TO THE SUPERINTENDENT, UNITED STATES NAVAL ACADEMY

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Academic Advisory Board to the Superintendent, United States Naval Academy will meet on November 15, 1976, at the conference room 301 (Rickover Hall Conference Room), Rickover Hall, United States Naval Academy, Annapolis, Maryland. The meeting will commence at 8:00 a.m. and terminate at 3:00 p.m.

The purpose of the meeting is to advise and assist the Superintendent of the Naval Academy concerning the education of the midshipmen. To accomplish this objective, the Board will review academic policies and practices of the Naval Academy and submit their proposals to the Superintendent to aid him in improving educational standards and in solving academy problems.

Dated: OCTOBER 1, 1976.

JOHN S. JENKINS,
Captain, JAGC, U.S. Navy, Assistant Judge Advocate General, (Civil Law).

[FR Doc.76–29670 Filed 10–7–76;8:45 am]

BOARD OF VISITORS TO THE UNITED STATES NAVAL ACADEMY

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Board of Visitors to the United States Naval Academy will meet on November 29 and 30, 1976, at the conference room 301 (Rickover Hall Conference Room), Rickover Hall, United States Naval Academy, Annapolis, Maryland. The session to be held on November 29 will commence at 8:30 a.m. and terminate at 6:30 p.m., and the session to be held on November 30 will commence at 9:00 a.m. and terminate at 1:30 p.m.

The purpose of the meeting is to make such inquiry as the Board shall deem necessary into the state of morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, and academic methods of the Naval Academy.

Dated: October 1, 1976.

JOHN S. JENKINS,
Captain, JAGC, U.S. Navy, Assistant Judge Advocate General (Civil Law).

[FR Doc.76–29669 Filed 10–7–76;8:45 am]

CHIEF OF NAVAL OPERATIONS EXECUTIVE PANEL ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Chief of Naval Operations Executive Advisory Committee will meet on October 27 and 28, 1976, at the Pentagon, Washington, D.C. The meeting will be closed to the public. The sessions will commence at 8:30 a.m. and terminate at 5:30 p.m. each day of the meeting.

The agenda will consist of matters required by Executive Order to be kept secret in the interest of national defense, including intelligence briefings of Soviet strategic and general purpose forces, naval operations, and research and development. Presentations will also cover

United States naval command, control and communications, and strategic planning. The Secretary of the Navy has therefore determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552(b)(1) of title 5, United States Code.

JOHN S. JENKINS,
Captain, JAGC, U.S. Navy, Assistant Judge Advocate General (Civil Law).

DEFENSE SCIENCE BOARD TASK FORCE ON PATRIOT VULNERABILITY

Notice of Advisory Committee Meeting

The Defense Science Board Task Force on Patriot Vulnerability will meet in closed session on 26, 27, and 28 October 1976 at Fort Bliss, Texas.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long-range guidance in these areas to the Department of Defense.

The task force will provide an analysis of the Patriot vulnerability to current and projected threats and provide related guidance and advice regarding R. & D. action considered appropriate within the Department of Defense.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this task force meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

OCTOBER 4, 1976.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

DEFENSE SCIENCE BOARD

Notice of Advisory Committee Meeting

The Defense Science Board will meet in closed session on 4–5 November 1976 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

A meeting of the Board has been scheduled for 4–5 November 1976 to discuss interim findings and tentative recommendations resulting from ongoing Task Force activities associated with Strategic, Tactical, Intelligence/Com-Technology issues. The Board will also discuss plans for future consideration of scientific and technical aspects of specific strategies, tactics, and policies as they may affect the U.S. national defense posture.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Defense Science Board meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

DEFENSE INTELLIGENCE AGENCY SCIENTIFIC ADVISORY COMMITTEE

Notice of Closed Meetings

Pursuant to the provisions of Section 10 of Public Law 92–463, effective January 5, 1973, notice is hereby given that closed meetings of the DIA Scientific Advisory Committee will be held at Headquarters, Strategic Air Command, Offutt Air Force Base, Nebraska on:

Thursday and Friday, 2–3 December 1976

The entire meetings commencing at 0830 hours are devoted to the discussion of classified information as defined in Section 552(b)(1), Title 5 of the U.S. Code and therefore will be closed to the public. The Committee will receive briefings on and discuss several current critical intelligence issues and advise the Director, DIA on related scientific and technical intelligence matters.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

Drug Enforcement Administration

MANUFACTURE OF CONTROLLED SUBSTANCES

Application

Section 303(a)(1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a)(1)) states:

The Attorney General shall register an applicant to manufacture controlled substances in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) Maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes.

Pursuant to § 1301.43 of Title 21 of the Code of Federal Regulations (CFR), notice is hereby given that on August 3, 1976, Applied Science Laboratories, Inc., 139 North Gill Street (Box 440), State College Park 16801, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substances listed below:

Drug:	Schedule
Mescaline	I
Lysergic Acid Diethylamide	I

Pursuant to Section 301 of the Controlled Substances Act (21 U.S.C. 821), and in accordance with 21 CFR 1301.43 (a), notice is hereby given that the above firm has made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substances indicated, and any other such person, and any existing registered bulk manufacturer of the above substances may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on the application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than November 12, 1976.

Comments and objections may be addressed to the DEA Federal Register Representative, Office of Chief Counsel, Drug Enforcement Administration, Room 1203, 1405 Eye Street, NW., Washington, D.C. 20537.

Dated: October 4, 1976.

FREDERICK RODY,
Acting Deputy Administrator, Drug Enforcement Administration.

OUTER CONTINENTAL SHELF ADVISORY BOARD

Meeting

This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Pub. L. No. 92–643, 5 U.S.C. App. I and the Office of Management and Budget's Circular No. A–63, Revised.

The Outer Continental Shelf Advisory Board will meet during the period 9:00 a.m. to 5:00 p.m., November 8, 1976, at Dunfey's, West End Circle, Hyannis, Massachusetts.

The meeting will cover the following principal subjects:

1. OCS Schedule
2. OCS Legislation, including Coastal Energy Impact Program
3. OCS Order 15
4. Information Clearinghouse
5. Pipelines
   a. State of the art
   b. Proposed actions, corridor studies
   c. Experience in Gulf of Mexico and Alaska

V 41 1976 OCT 8 76 UMI

6. Report by the OCS Environmental Studies Advisory Committee
   a. Role of and problems with the studies program
   b. Resolution concerning baseline data collection relative to lease schedule
7. Nearshore-onshore Studies
8. Coast Guard Briefings
   a. Oil spill clean up procedures
   b. Conflicts between marine traffic and fixed OCS structures
   c. Enforcement of 200-mile fishing limit
9. Archeological Surveys
   a. Terms under which industry conducts
   b. Release of data to the States
10. Contract Study with the State University System of Florida Institute of Oceanography (SUSIO)
11. Procedural Matters
   a. Role of vice-chairman
   b. Role of agenda steering committee
12. Resolution on Commercial Fisheries and OCS Development
13. Lease Termination Provision
14. Other Items

The meeting is open to the public. Interested persons may make oral or written presentations to the committee. Such requests sohuld be made no later than November 3 to: Alan Powers, Office of OCS Program Coordination, Department of the Interior, Washington, D.C. 20240, 202/343–9311.

Minutes of the meeting will be available for public inspection and copying three weeks after the meeting at the Office of OCS Program Coordination, Room 4126, Department of the Interior, 18th and C Streets, NW., Washington, D.C.

SHIPPERS ADVISORY COMMITTEE MEETING

Public Meeting

Pursuant to the provisions of § 10(a)(2) of the Federal Advisory Committee Act (86 Stat. 770), notice is hereby given of a meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905). This order regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The committee will meet in the A.B. Michael Auditorium of the Florida Citrus Mutual Building, 302 South Massachusetts Avenue, Lakeland, Florida, at 10:30 a.m. on October 26, 1976.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of the named fruits.

The names of committee members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813–682–3103.

Dated: October 6, 1976.

ADVISORY COMMITTEE ON FOREIGN ANIMAL DISEASES

Meeting

A meeting of the Advisory Committee on Foreign Animal Diseases with Consultants to the Plum Island Animal Disease Center will be held at 8:30 a.m. on October 27, 1976, in the Emergency Programs Information Center, Federal Building, 7th Floor, United States Department of Agriculture, Hyattsville, Maryland 20782.

The purpose of the committee is to advise the Secretary of Agriculture regarding program operations or measures to prevent, suppress, control, or eradicate an outbreak of food-and-mouth disease (FMD) or other destructive foreign animal disease in the event such diseases should enter this country.

The purpose of this meeting is to review policies of the Department regarding the stockpiling of FMD vaccine and to discuss guidelines for utilization of such vaccines during an outbreak of FMD in the United States.

The meeting is open to the public. Written statements may be filed with the committee before or after the meeting. Any member of the public who wishes to file a statement or who has further questions may contact Dr. F. J. Mulhern, Administrator, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 316–E, Washington, D.C. 20250, Area Code (202) 447–3668.

Dated: October 1, 1976.

F. J. MULHERN,

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

DEPARTMENT OF AGRICULTURE—PASADENA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00374. Applicant: U.S. Department of Agriculture, Fruit and Vegetable Chemistry Laboratory, 263 South Chester Avenue, Pasadena, California 91106. Article: Nuclear Magnetic Resonance Spectrometer System, Model No. JNM–EX–60. Manufacturer: JEOL, Japan. Intended use of article: The article is intended to be used for studies of natural products isolated from plant or microbial sources, or derivatives prepared from these products. They include bitter constituents of citrus, sweeteners derived from these bitter constituents, carotenoid pigments, and bioregulators. Research will be carried out to determine the chemical structures of these materials or to determine how they bind to proteins and enzymes.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (June 30, 1975). Reasons: The foreign article provides the capability for proton homonuclear and heteronuclear decoupling. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated September 15, 1976 that the capability of the article described above is pertinent to the applicant's intended purposes. HEW also advises that (1) the most closely comparable domestic instrument is the Model CFT–20 manufactured by Varian Instrument Division (Varian) and (2) the CFT–20 did not provide the pertinent capability satisfied by the article at the time the foreign article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

FREDERICK CANCER RESEARCH CENTER

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00431. Applicant: Frederick Cancer Research Center, Post Office Box 'B', Frederick, Maryland 21701. Article: Cryokit, Model LKB 14801–1, Set of tools and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to study the localization of subviral proteins in normal and infected tissue culture cells. These proteins are immunochemically tagged and frozen thin sections offer retention of antigen sites. Frozen thin sections will be prepared of cells and virus pellets and specifically prepared tags will be reacted to these sections.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to an accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated September 16, 1976 that it knows of no domestic instrument of equivalent scientific value to the article for its intended uses.

The Department of Commerce knows of no other similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

HARTFORD HOSPITAL

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00418. Applicant: Hartford Hospital, 80 Seymour Street, Hartford, Connecticut 06115. Article: EMI Scanner with Magnetic Tape System and Diagnostic Display Console. Manufacturer: EMI Ltd., United Kingdom. Intended use of article: The article is intended to be used for clinical studies, the results of which will be the subject or papers to be presented at hospital, state, and national medical societies and publications pertinent to the field of medicine. The article will also be used in an educational activity formulated at the following levels of organization:

1. Brain Scanner Operation—Teaching the theory of scanner and actual operation to technicians, radiologist, and repair personnel.

2. Brain Scanning—Teaching and training radiology residents, radiologists, neurologists, and neurosurgeons to interpret brain scanner images for medical diagnosis.

3. Brain Scanning—Teaching practical application so that staff completing the program will be capable of operation of a scanning unit.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (June 17, 1975).

Reasons: This application is a resubmission of Docket Number 76–00214–33–90000 which was denied without prejudice to resubmission on March 8, 1976 for informational deficiencies. At the time of order the foreign article was a newly developed system designed to provide precise transverse axial X-ray tomography. The Department of Health, Education and Welfare (HEW) advises in its memorandum dated September 15, 1976 that the sensitivity and non-invasive methodology of the article are pertinent to applicant's intended purposes. Although comparable domestic instruments are now available, HEW advises that it knows of no domestic instruments of equivalent scientific value to the foreign article for such purposes as the article is intended to be used which was commercially available at the time the article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

NORTH CAROLINA STATE UNIVERSITY

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles

The following is a consolidated decision on applications for duty-free entry of scientific Articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00398. Applicant: North Carolina State University, Geosciences Department, Withers Hall, Raleigh, NC 27607. Article: Deep Sea Reversing Thermometers & Case. Manufacturer: Watanabe Keiki Manufacturing Co. Ltd., Japan. Intended use of article: The article is intended to be used to measure and record deep ocean water temperatures and, in addition, provide the means by which the depth of measurement can be determined. Application received by Commissioner of Customs: May 6, 1976. Advice submitted by National Oceanic and Atmospheric Administration on: June 22, 1976. Article ordered: January 2, 1976.

Docket Number: 76–00399. Applicant: North Carolina State University, Geosciences Department, Withers Hall, Raleigh, North Carolina 27607. Article: Deep Sea Reversing Thermometers & Case. Manufacturer: Watanabe Keiki Manufacturing Co. Ltd. Intended use of article: The article is intended to be used to measure and record deep ocean water temperatures and, in addition, provide the means by which the depth of measurement can be determined. Application received by Commissioner of Customs: May 6, 1976. Advice submitted by National Oceanic and Atmospheric Administration on: June 22, 1976. Article ordered: January 2, 1976.

Docket Number: 76–00400. Applicant: North Carolina State University, Geosciences Department, Withers Hall, Raleigh, North Carolina 27607. Article: Deep Sea Reversing Thermometers & Case. Manufacturer: Watanabe Keiki Manufacturing Co., Ltd. Intended use of article: The article is intended to be used to measure and record deep ocean water temperatures and, in addition, provide the means by which the depth of measurement can be determined. Application received by Commissioner of Customs: May 6, 1976. Advice submitted by National Oceanic and Atmospheric Administration on: June 22, 1976. Article ordered: January 2, 1976.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications denied. An instrument or apparatus of equivalent scientific value to each foreign article, for such purposes as these articles are intended to be used, was being manufac-

V41197 OCT 8 76 UMI

tured in the United States at the time the articles were ordered.

Reasons: In response to Question 9, in each of the foregoing applications, the applicant states that to its knowledge no deep sea reversing thermometers are being manufactured in the United States. At the time each foreign article was ordered, however, there were two known U.S. manufacturers of such instruments providing specifications comparable to each foreign article, i.e., Kahl Scientific Instruments Corporation and Walter H. Kessler Company Incorporated. In response to Question 8, the applicant alleges in each application that the unique structure of the reversing thermometers (articles) is designed to accomplish each of the stated purposes for which each article is intended to be used. The National Oceanic and Atmospheric Administration advised in its respectively cited memoranda that domestic instruments manufactured by these two firms are scientifically equivalent to each foreign article cited above for each applicant's intended purposes.

For these reasons, we find that at the time the articles were ordered, the domestic deep sea reversing thermometers were of equivalent scientific value to each of the foreign articles cited above for such purposes as these articles are intended to be used.

NORTHWESTERN UNIVERSITY MEDICAL SCHOOL

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00423. Applicant: Northwestern University Medical School, Dept. of Anesthesia, 303 East Chicago Avenue, Chicago, Illinois 60611. Article: Four Choice Reaction Tester and accessory unit. Manufacturer: Kneesworth Electronics, United Kingdom. Intended use of article: The article is intended to be used for studies of the reaction times of subjects following a number of experimental conditions of anesthetic exposure. The objectives pursued in the course of investigation will be confined to establishing the normal reaction time, using this test system, of normal subjects to the flashing light display. The subject will then be studied following a variety of anesthetic exposure conditions, in order to determine how long it takes to return to the normal, baseline, reaction time level.

Comments: No comments have been received with respect to this application:

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article is specifically designed for the applicant's research studies and is portable enough to be carried from room-to-room. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated September 15, 1976 that the capability described above is pertinent to the applicant's intended purposes. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

SANDIA LABORATORIES

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00354. Applicant: Sandia Laboratories, Kirtland AFB, East Albuquerque, New Mexico 87115. Article: Picosecond and manosecond pulse YAG generator. Manufacturer: Quantel, France. Intended use of article: The article is intended to be used in three different areas of research:

Fusion Research. Studies of the compressibility and conductivity of deuterium and gold at high temperatures.

X-ray Laser Studies. Laser pulses produced by the article will be amplified and focused on metallic targets in order to generate ultrasoft high power X-ray pulses.

Laser Damage Studies. Laser pulses produced by the article will be used to test the optical strength of a number of optical materials.

In addition, the article will be used to educate researchers of the Physics Department in some recently developed laser techniques incorporated in the article.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a high power level of 10 megajoules and selectable pulse widths of 25, 50, 100 and 200 picoseconds as well as adjustable pulse widths over a 2-10-nanosecond range. The National Bureau of Standards advises in its memorandum dated September 14, 1976 that the specifications described above are pertinent to the applicant's intended purposes. NBS also advises it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

UNIVERSITY OF GEORGIA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Education, Scientific, and Cultural materials importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00168-85-40600. Applicant: University of Georgia, Department of Geology, Athens, Georgia 30602. Article: Isotope Radio Mass Spectrometer, Model 602C and accessories. Manufacturer: V. G. Micromass, United Kingdom. Intended use of article: The article is intended to be used for the following projects:

(1) Examination of the influence of surface meteoric waters upon subsurface volcanic processes. This feature will be studied through analyses of the $^{18}O/^{16}O$ in rocks and minerals from samples obtained from various localities in Antarctica.

(2) Measurement of $^{18}O/^{16}O$ variations of rocks and minerals for the purpose of ascertaining temperatures attained within major thrust sheets of the northern and central Rocky Mountains.

(3) Examination of $^{18}O/^{16}O$ variations of foraminifera from deep sea cores obtained from the Caribbean Sea. These analyses will be utilized for the purposes of obtaining stratigraphic correlation with already analyzed cores at different localities, and

(4) Examinations of $^{18}O/^{16}O$ and $13_C/12_C$ variations from rocks and minerals related to the iron ore deposits of S.E. Missouri. This study will be conducted for the purpose of obtaining information about the source of waters and the temperatures involved in deposit of these ore bodies.

The article will also be used as an educational tool for students in geology and in other scientific fields such as archeology, chemistry and biology.

Comments: No comments have been received with respect to this application. A letter received from Nuclide Corporation (Nuclide) on December 9, 1975 is being treated as an offer to provide additional information.

Decision: Application denied. An instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: This application is a resubmission of Docket Number 75-00401-85-40600 which was denied without prejudice to resubmission on July 10, 1975 for informational deficiencies. In response to Question 8 the applicant lists the following allegedly pertinent specifications:

(a) Precision of ±0.0025 percent.

(b) All metal bakeable sample inlet system.

(c) Vacuum pressure of 10^{-9} torr and

(d) Sample size of 0.01 atm cm^3.

The National Bureau of Standards (NBS) advises in its memorandum dated April 30, 1976 that the Model 6-60-RMS ratio mass spectrometer manufactured by Nuclide is the most closely comparable domestic instrument. NBS states that the Nuclide letter received by the Department on December 9, 1976, had been considered "for the factual information provided."

In connection with the alleged pertinent features listed by the applicant, in the order listed above, NBS provided the following advice:

(a) The 6-60-RMS has an internal precision of up to +0.0002% for specified ratio differences and Nuclide was able to provide the required precision at the time this article was ordered (December 30, 1974).

(b) The specific choice of materials of which the inlet system is made is a design feature and is not pertinent. A bakeable inlet system is pertinent to the applicant's intended purposes. Nuclide's Model 6-60-RMS was available at the time of order with an optional inlet system bakeout oven with a temperature capability of 450 degrees centigrade. (The Department also notes that NBS advised in its memorandum relating to Docket Number 76-00076-88-40600 which is analogous to this application in this and in other respects that Nuclide could provide an all metal bakeable inlet system at the time the article to which that application related was ordered (September 6, 1974).)

(c) Nuclide's 6-60-RMS was available at the time of order with ion pumps capable of producing a vacuum of 10^{-9} torr.

(d) Nuclide was able to provide the desired sample size at the time this article was ordered.

NBS further advises that the Model 6-60-RMS provides all the features found pertinent within the meaning of § 301.2(n) of the regulations. In this connection, NBS notes that it is normal practice for manufacturers of complex instrument systems, e.g., ratio mass spectrometers, to quote on specifications not listed in their general catalogue literature. We note that Nuclide was not afforded a formal opportunity to bid on the applicant's technical requirements.

NBS concludes with the finding that the Nuclide 6-60-RMS ratio mass spectrometer is scientifically equivalent to the foreign article for the applicant's intended uses. For these reasons, we find that the Model 6-60-RMS is of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.76-29585 Filed 10-7-76;8:45 am]

UNIVERSITY OF MIAMI

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00076-88-40600. Applicant: University of Miami, Coral Gables, Florida 33124. Article: Mass Spectrometer, Model 602C. Manufacturer: VG-Micromass, United Kingdom. Intended use of article: The article will be used to study the high frequency variation of climate by applying the oxygen isotope method of paleotemperature analysis to sections of deep sea sediments.

Comments: No comments have been received with respect to this application. A letter received from the Nuclide Corporation (Nuclide) on October 20, 1975 is being treated as an offer to provide additional information. Nuclide alleges inter alia that it could have quoted the applicant without any hesitation the 3-60-RMS with a bakeable metal inlet system. A letter was also received from the applicant on October 20, 1975. The applicant's letter is also being treated as an offer to provide additional information. The applicant alleges inter alia that Nuclide could not provide an all metal inlet system.

Decision: Application denied. An instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: This application is a resubmission of Docket Number 75-00252-88-40600 which was denied without prejudice to resubmission on May 13, 1975 for informational deficiencies.

The applicant claims that the following features of the article are pertinent to his purposes and are not available in a domestic instrument:

(a) All metal bakeable inlet system;

(b) Capability of handling small samples with the greatest possible accuracy;

(c) Background pressure in the 10^{-9} torr range;

(d) Permanent magnet;

(e) Maximum reproducibility, and

(f) high precision (±0.002%).

The National Bureau of Standards (NBS) advises in its memorandum dated March 15, 1976 that the Model 6-60-RMS ratio mass spectrometer manufactured by Nuclide is the most closely comparable domestic instrument.

In connection with the alleged pertinent features listed by the applicant in this and the initial submission, NBS provided the following advice, keyed to the features set forth above:

(a) Bakeable inlet systems were available for Nuclide in both glass and metal and all-metal designs at the time the article was ordered.

(b) Nuclide was able to provide this feature (which the applicant termed "most crucial") at the time the article was ordered.

(c) Nuclide could provide ion pumps capable of producing better than 10^{-9} torr at the time the article was ordered.

(d) Nuclide could provide an optional permanent magnet at the time the article was ordered.

(e) Nuclide was, at the time of order, able to provide instruments capable of satisfying this feature.

(f) The Model 6-60-RMS could be provided with an internal precision of up to ±0.002%.

NBS further advises that the Model 6-60-RMS provides all the features found pertinent within the meaning of § 301.2(n) of the regulations. In this connection, NBS notes that it is normal practice for manufacturers of complex instrument systems such as ratio mass spectrometers to quote on specifications not listed in their general catalogue literature. We note that Nuclide was not afforded a formal opportunity to bid on the applicant's technical requirements.

V41 1976 OCT 8 76 UMI

NBS concludes with the finding that the Nuclide 6–60–RMS ratio mass spectrometer is scientifically equivalent to the foreign article for the applicant's intended use.

For these reasons, we find that the Model 6–60–RMS is of equivalent scientific value to the foreign article for the applicant's intended purposes.

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.76-29582 Filed 10-7-76;8:45 am]

UNIVERSITY OF TEXAS MEDICAL BRANCH

Consolidated Decision on Applications for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00426. Applicant: University of Texas Medical Branch, Marine Biomedical Institute, 200 University Blvd., Galveston, Texas 77550. Article: Ultramicrotome, Model LKB 8800A and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of embryonic marine fish larvae, particularly the leptocephalous larvae of eels and related fishes. Experimental investigation will center on tracing the development of embryonic cells as they transform to adult organs with specific function. The development throughout will be studied both at the cellular level in the electron microscope and at the tissue and organ level in the light microscope. The objectives pursued in the course of the investigation will be to identify the phylogenetic position of the Anguilliform leptocephali. Special emphasis will be placed on the ultrastructure and function of their osmoregulatory system. Another group of fishes under study are the ceratioid or deep-sea angler fishes. Special attention will be given to the ultrastructure of this light organ and to the intracellular bacteria contained therein.

Application received by Commissioner of Customs: May 28, 1976. Advice submitted by the Department of Health, Education, and Welfare on: September 16, 1976. Article ordered: May 15, 1974.

Docket Number: 76–00430. Applicant: Northwestern University Medical School, 303 East Chicago Avenue, Chicago, Illinois 60611. Article: Ultramicrotome, Model LKB 8800A and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigation of the factors modifying the development of cancer and elucidating the biological and functional role of peroxisomes, which are cytoplasmic organelles. The materials used for this research include liver, kidney, pancreas, parotid, testicular interstitial tissue, and isolated cultured liver cells. The article will also be used in the courses designed to teach principles of cell biology, patholobiology and ultrastructural pathology for undergraduates, and graduate students. Also interns and residents in pathology, who participate in research training will be using the article.

Application received by Commissioner of Customs: May 28, 1976. Advice submitted by the Department of Health, Education, and Welfare on: September 16, 1976. Article ordered: May 13, 1976.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, is being manufactured in the United States. Reasons: Each of the foreign articles provides a range of cutting speeds from 0.1 to 20 millimeters per second. The most closely comparable domestic instrument is the Model MT–2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT–2B has a range of cutting speeds from 0.09 to 3.2 millimeters per second. The conditions for obtaining high-quality sections that are uniform in thickness, depend to a large extent on the hardness, consistency, toughness and other properties of the specimen materials, the properties of the embedding materials, and geometry of the block. In connection with a prior application (Docket Number 69–00665–33–46500), which relates to the duty-free entry of an article that is identical to those to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting (among such [other] factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior application (Docket Number 70–00077–33–46500) which also relates to an article that is identical to those described above, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness etc." requires a maximum range in cutting speed and, further, that the "production of ultrathin serial sections of specimens that have a great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 millimeters per second are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments. For these reasons, we find that the Sorvall Model MT–2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.76-29578 Filed 10-7-76;8:45 am]

UNIVERSITY OF VERMONT

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an appliction for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00408. Applicant: University of Vermont, Waterman Building, Burlington, Vermont 05401. Article: High Pressure Calorimeter. Manufacturer: Lunds Universitetet, Sweden. Intended use of article: The article is intended to be used in determining thermodynamic parameters for the absorption (desorption) of hydrogen by a series of representative intermetallic compounds that have potential usefulness for energy (hydrogen) storage. Among the systems that will be investigated are $LaCO_2/H_2$, $LaNi_5/H_2$, $LaCO_5/H_2$, and $FeTi/H_2$. It is proposed to determine thermodynamic absorption parameters by direct calorimetry and from pressure-composition-temperature (p-c-t) relationships. The two types of measurements will be performed concomitantly in a single apparatus that mates a precision calorimeter to a gas-handling system.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides operation at pressures of 0–60 atmospheres and temperatures between 20 and 100° Centigrade. The National Bureau of Standards (NBS) advises in its memorandum dated September 21, 1976 that specifications described above are pertinent to the applicant's intended purposes. NBS also advises that it knows of no domestic high pressure calorimeter of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

Maritime Administration

[Docket No. S–515]

FREDERICKSBURG SHIPPING CO.

Application

Notice is hereby given that Fredericksburg Shipping Company, 611 Wilmington Trust Building, 100 West 10th Street, Wilmington, Delaware 19801, has filed an application dated September 15, 1976, with the Maritime Subsidy Board (the Board) pursuant to Title VI of the Merchant Marine Act, 1936, as amended (the Act), for an operating-differential subsidy contract, to expire December 31, 1976, to operate the *SS Fredericksburg*, 28,050 deadweight tons, in the carriage of export bulk raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the U.S. to ports in the Union of Soviet Socialist Republics (U.S.S.R.). Dry and liquid bulk cargoes may be carried from the U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk raw and processed agricultural commodities to the U.S.S.R.

Full details concerning the U.S.-U.S.S.R. export bulk raw and processed agricultural commodities subsidy program, including terms, conditions and restrictions upon both the subsidized operators and vessels, appear in Title 46 of the Code of Federal Regulations, Part 294.

For purposes of section 605(c) of the Act, it should be assumed that should the Board grant the requested approval, the vessel named above will engage in the described trade, on a full-time basis, during the indicated time period. Under such approval, each voyage must be approved for subsidy assistance prior to its commencement, and the Board will act on such request(s) as an administrative matter for which there is no requirement for further section 605(c) notice(s).

Any person having an interest in the granting of the application and who would contest a finding by the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes previously specified is inadequate, must on or before October 18, 1976, notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with Board's rules of practice and procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605 (c) of the Act and, with as much specificity as possible, the facts that the intervenor would undertake to prove at such hearing.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to the subject application, the purpose of such hearing will be to receive evidence relevant to (1) whether the application herein described, with respect to the vessel to be operated in an essential service and served by citizens of the U.S., would be in addition to the existing service or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon. If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such actions as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

Dated October 4, 1976.

By order of the Maritime Subsidy Board/Maritime Administration.

JAMES S. DAWSON, Jr.,
Secretary.

National Bureau of Standards

COMPUTER NETWORKING STANDARDS FOR LIBRARY AND INFORMATION SCIENCE COMMUNITY TASK FORCE

Meeting

A task force has been established to address the problem of developing high-level computer-to-computer protocols for the nationwide interchange of information among existing and planned library and information science networks.

Members of the task force were designated by the National Commission on Libraries and Information Science on the basis of their recognized experience and knowledge in the area of computer-to-computer data interchange for this class of application, and their competence in developing related computer networking standard protocols. The task force receives technical support from the NBS Institute for Computer Sciences and Technology.

The results of the task force effort, expected to be completed in about one year, will be provided directly to the American National Standards Institute, the American Library Association, and the American Society for Information Science for their respective consideration in development and adoption of standards directed specifically to the library and information science community.

All meetings of this task force will be open to the public; the purpose of this public notice is to announce the second task force meeting which will be held on November 10, 11, and 12, 1976, in Room 2010, New Executive Office Building, 17th and H Street, NW., Washington, D.C. The session on November 10 will convene at 10 a.m., and on the following days the session will convene at 9 a.m. Future meetings of this task force will be announced in the Federal Register.

For further information, interested members of the public may contact John L. Little, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, telephone: 301/921–3723.

Dated: October 4, 1976.

ERNEST AMBLER,
Acting Director.

National Oceanic and Atmospheric Administration

SEA GRANT ADVISORY PANEL

Partially Closed Meeting

The Sea Grant Advisory Panel will meet from 9:00 a.m. to 4:00 p.m. on October 28, 1976, and from 8:15 a.m. to 4:00 p.m. on October 29, 1976, in the Penthouse, Page Building #1, 2001 Wisconsin Avenue, N.W., Washington, D.C. 20235.

The Panel was established in 1967, and advises the Secretary of Commerce on (a) policy with respect to the establishment and operation of a national network of Sea Grant Colleges and programs; major individual program and project proposals requesting financial support, and plans and policies governing execution of the National Sea Grant Program, under the National Sea Grant College and Program Act of 1966, as amended (33 U.S.C. 1121–1124).

The Panel's meeting agenda is as follows:

V 41 1976 OCT 8 76 UM

OCTOBER 28, 1976 (CLOSED SESSION: 9:00 A.M.–3:00 P.M.)

9 a.m.——— Preliminary Remarks and
9:15 a.m.——— A. Institutional and Coherent Area Program Discussions: University of Southern California, University of Alaska, Mississippi/Alabama Sea Grant Consortium, Virginia Institute of Marine Science, New York Sea Grant Institute, University of Florida, University of North Carolina, University of Maine/University of New Hampshire, University of Washington, University of Maryland, University of Michigan.
B. Sea Grant College Candidate Discussion.

OCTOBER 28, 1976 (OPEN SESSION: 3:00–4:00 P.M.)

3 p.m.——— C. Sea Grant Participation in the Extended Jurisdiction Program.

OCTOBER 29, 1976 (OPEN SESSION: 8:15 A.M.–4:00 P.M.)

8:15 p.m.——— D. Action on Panel Recommendation.
E. New Authorization Legislation, National Projects, International Programs, Fellowships, Panel Organization and Membership.
F. Appropriation, Legislation, Budget Increase Language.
G. Discussion of NACOA Report.
12 noon——— Lunch.
1 p.m.——— H. Discussion with Sea Grant Directors.
3 p.m.——— I. USC Journal of Marine Education.
J. State and Federal Interaction Between CZM Programs and Sea Grant.
4 p.m.——— Adjourn.

Agenda items A and B will deal with matters listed in 5 U.S.C. 552(b)(5).

Agenda items C on October 28 and D through J on October 29 will be open to public attendance. Approximately thirty seats will be available to the public on a first-come, first-served basis. If time permits before the scheduled adjournment the chairman will solicit oral comments by the attendees. Written statements may be submitted at any time before or after the meeting.

With respect to agenda items A and B, the Assistant Secretary for Administration, with the concurrence of the Assistant General Counsel for Administration formally determined on September 28, 1976 pursuant to section 10(d) of the Federal Advisory Committee Act, that these items should be exempt from the provisions of the Act relating to open meetings and public participation therein, because these items will be concerned with matters listed in 5 U.S.C. 552(b)(5), i.e., interagency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency. (A copy of the determination is available for public inspection and copying).

Minutes of the open portion of the meeting will be available 30 days thereafter on written request addressed to the National Sea Grant Program, 3300 Whitehaven Street, Washington, D.C. 20235.

For further information, contract Mr. Arthur G. Alexiou, Associate Director of Programs, at above address. Telephone: (202) 634–4019.

Dated: October 1, 1976.

T. P. GLEITER,
Assistant Administrator for Administration, National Oceanic and Atmospheric Administration.

NOTICE OF DETERMINATION FOR PARTIAL CLOSURE OF AN ADVISORY COMMITTEE MEETING

The Sea Grant Advisory Panel, established in 1967, advises the Secretary of Commerce on (a) policy with respect to the establishment and operation of a national network of Sea Grant colleges and programs; (b) major individual program and project proposals requesting financial support; and (c) plans and policies governing execution of the National Sea Grant Program, under the National Sea Grant College and Program Act of 1966, as amended (33 U.S.C. 1121–1124).

The Panel currently has 18 members appointed by the Secretary of Commerce, with a balanced representation of interests, including those from industry and the academic community.

The Panel's activities are conducted in accordance with the provisions of the aforesaid Act and the Federal Advisory Committee Act (5 U.S.C. App. I).

The Sea Grant Advisory Panel is scheduled to hold its next meeting on October 28 and 29, 1976, in the Penthouse, Page Building #1, 2001 Wisconsin Avenue, NW., Washington, D.C. As its first agenda item on October 28, the Panel will review, evaluate, and make recommendations with respect to specific grant proposals and applications submitted to the Office of Sea Grant for financial assistance, for institutional and coherent area programs. As the second agenda item on October 28, the Panel will review, evaluate, and make recommendations concerning grant proposals and applications of candidates for designation as Sea Grant Colleges. The Panel will consider during these two agenda items such matters as: evaluation of details relating to the type or design of work performed or to be performed, adequacy of the applicant's facilities, competence of the applicant's staff, budget data, and other information on the applicant's financial situation.

For such consideration in its deliberative process, the Panel will also be presented with and discuss evaluative information and data contained in written reports submitted to the Office of Sea Grant by individual consultants (special employees of the Department), devoted to evaluations and ranking of applicants involved in the two agenda items. These reports contain detailed and candid analyses and expressions of opinion essential for complete and effective evaluation and ranking, and were prepared for review by the Panel and ultimate decision by the Office of Sea Grant.

In the interest of maintaining the utility of consultants' evaluations, and encouraging the candid expression of opinion at the Panel meeting concerning the relatives merits of the various proposals, the Administrator, National Oceanic and Atmospheric Administration, has recommended that these agenda items be closed to the public because the items discussed and the documents referred to will be concerned with matters listed in section 552(b)(5) of title 5, United States Code.

In view of the considerations enumerated above, I hereby determine, pursuant to section 10(d) of Public Law 92–463, that the above two agenda items of the forthcoming Sea Grant Advisory Panel meeting on October 28 shall be exempt from the open meeting provisions of the Federal Advisory Committee Act, because the Panel discussions will be concerned with documents exempt from disclosure under matters listed in 5 U.S.C. 552(b)(5), and it is essential to close these portions of the meeting to avoid undue interference with agency and committee operations. The remaining portions of the meeting (the third agenda item on October 28 and all those on October 29) will be open to the public.

Dated: September 28, 1976.

JOSEPH E. KASPUTYS,
Assistant Secretary of Administration.

Dated: September 24, 1976.

ALFRED MEISSNER,
Assistant General Counsel for Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of November 1976:

DRUG ABUSE PREVENTION REVIEW COMMITTEE

Date and time: November 3–5; 9:30 a.m.
Place: Conference Room 873, Rockwall Building, Rockville, Maryland.
Open—November 3, 9:30–11:00 a.m.
Closed—Otherwise.
Contact Mr. John R. Olsen, Rockwall Building, Room 752, 11400 Rockville Pike, Rockville, Md. 20852, 301–443–2450.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Drug Abuse relating to drug abuse prevention activities and makes recommendations to the National Advisory Council on Drug Abuse for final review.
Agenda: From 9:30 to 11:00 a.m., November 3, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

SOCIAL SCIENCES RESEARCH REVIEW COMMITTEE

Date and time: November 3–5; 9:00 a.m.
Place: Thomas Paine Room, Sheraton Park Hotel, 2660 Woodley Road, NW., Washington, D.C.
Open—November 3, 9:00–9:30 a.m.
Closed—Otherwise.
Contact Mr. Joel Goldstein, Parklawn Building, Room 10–95, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–3936.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to social sciences research and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 to 9:30 a.m., November 3, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and Section 10(d) of Pub. Law. 92–463 (5 U.S.C. Appendix I).

MINORITY GROUP MENTAL HEALTH PROGRAMS REVIEW COMMITTEE

Date and time: November 4–6; 9:00 a.m.
Place: North Scott Room, Gramercy Inn, 1616 Rhode Island Avenue, N.W., Washington, D.C.
Open—November 4, 9:00–10:00 a.m.
Closed—Otherwise.
Contact Mrs. Edna M. Hardy Hill, Parklawn Building, Room 7–102, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–3724.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to minority mental health research and training and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 to 10:00 a.m., November 4, the meeting will open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

PERSONALITY AND COGNITION RESEARCH REVIEW COMMITTEE

Date and time: November 5–7; 9:00 a.m.
Place: New York Room, Mayflower Hotel, 1127 Connecticut Avenue, NW., Washington, D.C.
Open—November 5, 9:00–10:00 a.m.
Closed—Otherwise.
Contact Shirley Maltz, Parklawn Building, Room 10C–06, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–3942.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to research activities and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 to 10:00 a.m., November 5, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

CLINICAL PSYCHOPHARMACOLOGY RESEARCH REVIEW COMMITTEE

Date and time: November 8–9; 9:00 a.m.
Place: Shoreham-American Hotel, Board Room, 2500 Calvert Street, NW., Washington, D.C.
Open—November 8, 9:00–10:00 a.m.
Closed—Otherwise.
Contact Antionette C. Simms, Parklawn Building, Room 9–105, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–3568.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to research activities and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 to 10:00 a.m., November 8, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

SOCIAL PROBLEMS RESEARCH REVIEW COMMITTEE

Date and time: November 11–13; 9:00 a.m.
Place: Kalorama Room, Washington Hilton Hotel, Connecticut Avenue at Columbia Road, NW., Washington, D.C.
Open—November 11, 9:00–9:30 a.m.
Closed—Otherwise.
Contact Mrs. Vi Kemp, Parklawn Building, Room 10–104, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–4843.
Purpose. The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to the field of social problems and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda. From 9:00 to 9:30 a.m., November 11, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

ALCOHOL TRAINING REVIEW COMMITTEE

Date and time: November 15–16; 9:00 a.m.
Place: Conference Room B, Parklawn Building, Rockville, Mrayland.
Open—November 15, 9:00–11:00 a.m.
Closed—Otherwise.
Contact Dr. Melvin Davidoff, Parklawn Building, Room 16C–26, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–1056.
Purpose. The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Alcohol Abuse and Alcoholism relating to training activities and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.
Agenda. From 9:00 to 11:00 a.m., November 15, the Committee will be open for reports and announcements of administrative and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

CLINICAL PROJECTS RESEARCH REVIEW COMMITTEE

Date and time: November 18–20; 9:00 a.m.
Place: Mary Custis Lee Room, Arlington Hyatt House, 1325 Wilson Boulevard, Arlington, Virginia
Open—November 16, 9:00–10:00 a.m.
Closed—Otherwise
Contact Mrs. Harriet German, Parklawn Building, Room 10C–25, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–4707
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to clinical research and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00 to 10:00 a.m., November 18, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

MENTAL HEALTH SMALL GRANT COMMITTEE

Date and time: November 18–20; 1:00 p.m.
Place: Parlor A and the Oak Room, Burlington Hotel, 1120 Vermont Avenue, NW., Washington, D.C.

V41197 OCT 8 76 UM

Open—November 18, 4:00–5:00 p.m.
Closed—Otherwise
Contact Ms. Mary E. Enyart, Parklawn Building, Room 10C–14, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–4437
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to mental health research and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 4:00 to 5:00 p.m., November 18, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact persons listed above.

The NIAAA Information Officer who will furnish summaries of the meeting and rosters of the Committee members is Mr. Harry C. Bell, Associate Director for Public Affairs, NIAAA, Room 6C–15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–3306. The NIDA Information Officer who will furnish summaries of the meeting and rosters of the Committee members is Mr. Joshua Hammond, Program Information Officer for Drug Abuse, NIDA, Room 814, Rockwall Building, 11400 Rockville Pike, Rockville, Maryland 20852, 301–443–6548. The NIMH Information Officer who will furnish summaries of the meetings and rosters of the Committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–3600.

Dated: October 4, 1976.

CAROLYN T. EVANS,
Committee Management Officer Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 76–29613 Filed 10–7–76;8:45 am]

Food and Drug Administration

[Docket No. 76N–0289]

METHADONE

Proposed Withdrawal of New Drug Applications; Opportunity for Hearing

The Food and Drug Administration is amending the notice of opportunity for hearing on the proposed withdrawal of approval of certain new drug applications (NDA's) for methadone.

The Commissioner of Food and Drugs issued the notice in the FEDERAL REGISTER of July 9, 1976 (41 FR 28342) in response to the decision of the United States District Court for the District of Columbia in *American Pharmaceutical Association* v. *Weinberger*, 377 F. Supp. 824 (1974). The notice stated that approval of NDA's for methadone would be withdrawn unless the holders of currently approved NDA's for methadone submitted supplemental NDA's requesting approval for the manufacture and distribution of methadone under §§ 310.304 (b) and 310.505 (21 CFR 310.304(b) and 310.505) to conform with the District Court's decision. The notice stated that the principal change required by the amended regulations related to labeling, and that the Commissioner "will permit existing stocks of methadone to bear the labeling specified in currently approved new drug applications, and will permit future shipments to be made using such labeling until October 7, 1976."

A manufacturer of methadone has recently advised the Commissioner that prohibiting shipments of methadone bearing previously approved NDA labeling after October 7, 1976, might require the retrieval and repackaging of existing stocks of methadone in the possession of intermediaries. It was suggested that this would be wasteful and unnecessary, and that the purpose of the notice would be served adequately if the prohibition on shipments of methadone with previously approved labeling were made to apply only to methadone packaged after October 7, 1976.

The Commissioner agrees. The July 9 notice emphasized that references in previously approved methadone labeling to "[a]ny limitation on the shipment to, or the receipt of dispensing by, any duly licensed pharmacy of methadone for analgesic use shall be disregarded." There is no reason why such references cannot be disregarded in the labeling of methadone packaged before, but shipped after, October 7, 1976, and little purpose is served by requiring manufacturers to retrieve and repackage drugs solely to eliminate from labeling a reference that the agency has made clear is to have no effect.

Accordingly, the Commissioner is permitting the use of previously approved labeling on any methadone packaged on or before October 7, 1976, even though it may be shipped after that date. References in such labeling to limitations on the shipment to, or the receipt or dispensing by, duly licensed pharmacies of methadone for analgesic use shall be disregarded. Methadone packaged after October 7, 1976, must, when shipped, bear labeling in conformity with supplemental new drug applications approved pursuant to the July 9 notice.

Dated: October 5, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

[FR Doc.76–29764 Filed 10–7–76;8:45 am]

[Docket No. 76F–0280]

RUMINANT NITROGEN PRODUCTS CO.

Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (MF–3555) has been filed by Ruminant Nitrogen Products Co., 2347 Science Parkway, Okemos, MI 48864, proposing that § 121.209 *Anhydrous ammonia* (21 CFR 121.209) be amended to provide for the addition of anhydrous ammonia to water to be mixed with corn silage prior to ensiling as a source of nonprotein nitrogen for cattle.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Assistance Commissioner for Public Affairs, Rm. 15B–42 or the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, during working hours, Monday through Friday.

Dated: September 30, 1976.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

Health Resources Administration

HEALTH CARE TECHNOLOGY STUDY SECTION

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to assemble during the month of October 1976:

HEALTH CARE TECHNOLOGY STUDY SECTION

Date and time: October 27–29, 1976, 9:00 a.m.
Place: Conference Room M, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852.
Open—October 27, 9:00 a.m.–10:30 a.m.
Closed for remainder of meeting.
Purpose: The Study Section is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.
Agenda: Agenda items for the open portion of the meeting will cover administrative matters and reports; minutes of previous meeting; and establish future meeting dates. The remainder of meeting will be closed to the public to hear a preliminary report on the study of medical information systems being conducted by the Offices, in accordance with the provisions set gress, and for the review of research grant applications relating to the delivery, organization, and financing of health servvices, in accordance with the provisions set forth in section 552(b)(5) and (6), Title 5, U.S Code and the Determination by the Administrator, Health Resources Administration, pursuant to Pub. L. 92–463.

Anyone wishing to obtain a roster of members, minutes of meeting, or other relevant information should contact Dr. Alan E. Mayers, Room 15–29, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, Telephone (301) 443–2950.

Agenda items are subject to change as priorities dictate.

Dated: October 1, 1976.

JAMES A. WALSH,
Associate Administrator for Operations and Management.

BIOMEDICAL AND BEHAVIORAL RESEARCH PERSONNEL

Notice of a Study of National Needs

Section 473 of the Public Health Service Act, 42 U.S.C. 2891–2, as added by Section 103 of Pub. L. 93–348, Title I, the National Research Service Award Act of 1974 (and amended by Section 205 of Title II, Pub. L. 94–278, Health Research and Health Services Amendments of 1976), requires the Secretary of Health, Education, and Welfare to undertake studies respecting the Nation's needs for biomedical and behavioral research personnel and provides that the Secretary shall request the National Academy of Sciences to conduct such studies. Studies are now in progress for use in developing the Academy's report which will be submitted to Congress not later than September 30, 1977. Information concerning either the conduct of these studies or the procedure for submission of views for consideration by the Academy may be obtained from Dr. Herbert B. Pahl, Staff Director, Commission on Human Resources, National Research Council, National Academy of Sciences, 2101 Constitution Avenue, Washington, D.C. 20418.

Dated: September 20, 1976.

DONALD S. FREDRICKSON,
Director, National Institutes of Health.

CLEARINGHOUSE ON ENVIRONMENTAL CARCINOGENS

Meetings

Pursuant to Public Law 92–463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be entirely open to the public to discuss issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014, unless otherwise stated.

Mrs. Marjorie F. Early, Committee Management Office, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20014 (301/496–5708) will furnish summaries of the meetings and rosters of committee members upon request.

Other information pertaining to the meeting can be obtained from the Executive Secretary indicated.

Name of committee: Clearinghouse on Environmental Carcinogens.
Dates: November 8, 1976; 8:30 a.m.–5:00 p.m.
Place: Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, Maryland.
Times: Open for the entire meeting.
Agenda: To review the function of the Clearinghouse and NCI Bioassay Program.
Executive secretary: Dr. James M. Sontag.
Address: Landow Building, Room A306, National Institutes of Health.
Phone: 301–496–5471.
Name of committee: Clearinghouse on Environmental Carcinogens Subgroup on Chemical Selection.
Dates: November 9, 1976; 9:00 a.m.–3:00 p.m.
Place: Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, Maryland.
Times: Open for the entire meeting.
Agenda: To consider criteria and procedures to be used in selecting chemicals to be tested for carcinogenicity.

CLINICAL TRIALS REVIEW COMMITTEE

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Clinical Trials Review Committee, National Heart, Lung, and Blood Institute, November 22–23, 1976; at the Holiday Inn, Bethesda, Maryland, on November 22, and at the National Institutes of Health, Building 31, Conference Room 9 on November 23. This meeting will be open to the public from 8:00 p.m. to 8:30 p.m. on November 22, 1976, to discuss administrative details and to hear a report concerning the current status of the National Heart, Lung, and Blood Institute.

In accordance with the provisions set forth in Sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5, U.S. Code and Section 10(d) of P.L. 92–463, the meeting will be closed to the public on November 22, 1976 from 8:30 p.m. to adjournment and from 8:30 a.m. to adjournment on November 23, for the review, discussion and evaluation of individual initial pending, supplemental, and renewal grant applications and individual contract proposals. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications and individual contract proposals containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications and proposals.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, National Institutes of Health, Building 31, Room 5A03, phone (301) 496–4236, will provide summaries of the meeting and rosters of the committee members. Dr. Earl W. Gardner, Review Branch, Division of Extramural Affairs, NHLBI, Westwood Building, Room 653, phone (301) 496–7351, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13,837, National Institutes of Health.)

Dated: September 30, 1976.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

SINGLE DONOR PLATELET TRANSFUSIONS: SCIENTIFIC, LEGAL, AND ETHICAL CONSIDERATIONS

Availability of DHEW Publication No. (NIH) 76–1059

The Division of Blood Diseases and Resources of the National Heart, Lung, and Blood Institute wishes to announce the availability of Single Donor Platelet Transfusions: Scientific, Legal, and Ethical Considerations, DHEW Publications No. (NIH) 76–1059. This publication covers the proceedings of a conference held June 16 and 17, 1975, jointly sponsored by the Division and the Puget Sound Blood Center in Seattle.

The purpose of the conference was to review the scientific basis of platelet transfusion therapy and to identify the complex issues involved in the development of programs for long-term platelet support of patients with damaged bone marrows. Specific topics included: HL–A typing and platelet crossmatching for compatible donor selection; the current status of plateletpheresis; existing platelet donor programs; and ethical and legal aspects of platelet donor motivation, education, and consent. Single copies of the publication may be obtained, free of charge, by writing to:

The Puget Sound Blood Center, Terry at Madison, Seattle, Washington 98104.

Dated: September 22, 1976.

DONALD S. FREDRICKSON,
Director, National Institutes of Health.

Office of the Assistant Secretary for Health, Public Health Service

NATIONAL IMMUNIZATION; POLICIES ETC.

Meeting

Notice is hereby given of the intention to hold a public meeting on November 12, 13, and 14, 1976, to discuss our national immunization effort, including policies, priorities, implementation, liability and indemnification, informed consent, and potentials for new vaccines.

Sponsor: Office of the Assistant Secretary for Health, Public Health Service, Department of Health, Education, and Welfare.
Time: 9 a.m. to 5 p.m., November 12, 13, and 14, 1976.
Place: Main (Masur) Auditorium, Clinical Center, Building 10, National Institutes of Health, Bethesda, Maryland 20014.

This meeting will be open to the public and public participation is expected and encouraged. There will be solicited formal presentations with panel discussion and audience participation.

In addition, those wishing to address the conference may do so by submitting a text of comments to the address given below. Such written submissions may be of any length. Oral presentations will be limited to five (5) minutes. Those who wish may submit only written comment.

The sponsor reserves the right to limit the number of oral presentations in consideration of time available. In general, every attempt will be made to accept participants in the order that submissions are received. To be considered, copy of a text must be received before November 5, 1976. All submissions will be acknowledged.

Address inquiries and submit text to:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D-76-461]

CERTAIN HUD EMPLOYEES IN OEO ATLANTA REGIONAL OFFICE, REG. IV

Redelegation of Authority To Administer Oaths and Verify Complaints

SECTION A. *Authority to Administer Oaths and Verify Complaints.* The incumbents of the following positions in the Department of Housing and Urban Development, Atlanta Regional Office, Office of Equal Opportunity, are hereby authorized to administer oaths under section 811 (a) of Title VIII (Fair Housing) of the Civil Rights Act of 1968, Pub. Law 90-284 (42 U.S.C. 3611 (a)) and to verify complaints filed under the Civil Rights Act of 1968:

1. Director, Equal Opportunity Compliance Division.
2. Director, Field Evaluation and Support Division.
3. Equal Opportunity Specialists.
4. Equal Opportunity Compliance Specialists.

SECTION B. *Supersedure.* This redelegation of authority supersedes the redelegation effective September 1, 1971 (38 FR 2344, January 24, 1973).

(Redelegation of Authority by the Regional Administrator effective May 1, 1976 (41 FR 41137, Sept. 21, 1976).)

Effective date. This redelegation of Authority shall be effective May 1, 1976.

CHARLES E. CLARK,
Assistant Regional Administrator for Equal Opportunity, Atlanta Regional Office.

CIVIL AERONAUTICS BOARD

[Docket 28992; Order 76-10-16]

AIR TRANSPORT ASSOCIATION OF AMERICA

Order Regarding Application For Authority To Discuss Administration of the Dimensional Weight Rule Filed by Carrier

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 4th day of October, 1976.

By Order 76-5-100, May 21, 1976, the Board denied an application by members of the Air Transport Association of America (the carriers) for permission to hold discussions on carrier administration of the dimensional weight rule (cube rule).[1]

On June 14, 1976, the carriers submitted a petition for reconsideration of that order. The petitioners assert, inter alia, that the Board has inappropriately applied the standards enunciated in the Local Cartage Agreement Case (Cartage case), 15 C.A.B. 850 (1952), since the matters to be discussed would not be "plainly repugnant" to established anti-trust principles because the discussions would pertain only to enforcing currently effective rules and regulations, and would not impose new ones; and that, even under the Cartage case criteria, the discussions should be permitted, inasmuch as there is no "more serious transportation need * * * than that shippers pay the rates and charges specified in carrier tariffs."

The carriers also assert that Order 76-5-100 precluded their participation in meetings held by the Board's Bureau of Enforcement (BOE) on May 26, 1976, for the purpose of initiating "affirmative action" programs to eliminate alleged deviations from air freight tariff requirements, including the cube rule (Dockets 27933 and 29223). Accordingly, they request that, if the Board does not reconsider its denial of the discussion authority requested, it should at a minimum permit the carriers to meet with BOE for the foregoing purpose.

An answer in opposition to the petition has been filed by the Air Freight Forwarders Association (AFFA), which claims, inter alia, that the carriers have given no reasons why each one cannot separately enforce its own tariffs, and that the sole reason for the carriers' request for discussions is to shift the burden of complying with carrier tariffs from the carriers to the forwarders. AFFA also maintains that the Board should not allow the airlines "to hide behind the cloak" of BOE to obtain their objectives; that there is no reason why BOE cannot discuss affirmative action plans with each of the carriers separately; and that the Board should not permit an industrywide action plan without the consent and participation of shippers and forwarders.

In their original application, the carriers indicated they wished to discuss more than mere compliance with tariffs. The carriers' original application stated that they wished to discuss "possible alternatives" to dimensional weight rule application and added that there might be possible solutions that could require "industry-wide procedures directed to institute expanded cooperation of the shipper." In their petition for reconsideration, however, the carriers limit their request to discussions of effective compliance with the tariff rules and, if that is refused, permission to meet with BOE on affirmative action programs.

In view of the foregoing and all other relevant factors, the Board has decided to reconsider its denial of the carriers' prior application and to permit the discussions, subject to conditions. Clearly, the matter is now presented on a narrower basis and is limited to tariff enforcement. Accordingly, the request will be granted. Discussion of the dimensional weight rule shall be restricted to an interchange of ideas on administrative techniques and devices for implementing existing tariffs in such a way as not to add new or different conditions of any kind upon the tariffs' application. The discussions will be authorized for a period of 90 days from the date of this order.

We will also condition our approval to permit interested shippers, including indirect carriers, to express their views during the course of the discussions and prior to the conclusion of any final agreement. Our approval will also require that the attendance of Board observers be permitted.

The Board also wishes to make it clear that, while the approval granted herein is limited to the carriers' request to discuss compliance with the existing cube rule tariff provisions, the carriers are also free to engage in discussions initiated by the Board's Bureau of Enforcement for the purpose of establishing "affirmative action" programs designated to bring the carriers into conformity with their existing air freight tariffs.[2]

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 412, and 414 thereof,

It is ordered, That:

1. The petition for reconsideration of Order 76-5-100 filed by the members of the Air Transport Association of America in Docket 28992 is granted;

2. The carrier members of the Air Transport Association are authorized for a period of 90 days from the date of this order to engage in discussions on administration of the dimensional weight rule that will be strictly limited to the interchange of ideas on administrative techniques and devices for implementing existing tariffs in such a way as not to add new or different conditions of any kind upon the tariffs' application;

3. An agenda of matters to be discussed shall be filed with the Board's Docket Section in this docket at least 10 calendar days in advance with respect to any meeting called pursuant to this order;

4. Any shipper (including indirect air carrier) or shipper organization may advise the Air Transport Association that it is interested in the discussions and thereafter all meeting notices and agendas shall be mailed to any such shipper or shipper organization, with such notice to include an invitation to submit comments upon the agenda matters and to arrange for personal appearances at the carriers' meeting;[3]

[1] The participating carriers include all members of the Air Transport Association except Aloha Airlines, Inc.

[2] AFFA requests that joint discussions with BOE not be permitted without forwarder participation. However, any enforcement settlement agreed to by BOE is ultimately reviewable by the Board. The agreement of BOE to an affirmative action plan incorporated in such a settlement is done under a delegation of authority from the Board. Interested third persons such as AFFA may petition the Board for review of such matters. The Board, therefore, will not at this time circumscribe or expand the proposed enforcement discussions. In addition, BOE is not precluded from holding joint discussions with carriers, be it with air freight forwarders or direct air carriers, with or without an enforcement proceeding.

[3] If the direct carriers so desire, they may appoint a secretary to represent them for the purposes of preparing meeting notices, agendas, minutes of meetings, and the filing of agreements.

V 41 1917 OCT 8 76 UM

5. The Director of the Bureau of Economics shall be given at least five business days' notice of the time and place of any meetings called pursuant to the authority granted herein;

6. The Board reserves the right to have one or more observers in attendance at all meetings of the carriers;

7. Complete and accurate minutes shall be kept of all meetings and a true copy thereof filed with the Board's Docket Section not later than two weeks after the conclusion of each meeting;

8. Any agreement or agreements reached as a result of such discussions shall be filed with the Board for advance approval in accordance with section 412 of the Federal Aviation Act of 1958; and

9. This order will be served upon the Air Transport Association of America, the Air Freight Forwarders Association, and the Hawaii Air Cargo Shippers Association, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

ALASKA FARES INVESTIGATION

[Docket 29198]

Notice of Prehearing Conference

Notice is hereby given that a prehearing conference in this proceeding is assigned to be held on November 17, 1976, at 9:30 a.m. (local time), in Room 1003, Hearing Room A, Universal Building North, 1875 Connecticut Avenue, NW., Washington, D.C., before Administrative Law Judge Henry M. Switkay.

In order to facilitate the conduct of the conference, parties are instructed to submit one copy to tach party and six copies to the Judge of (1) proposed statements of issues; (2) proposed stipulations; (3) proposed requests for information and for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of Economics will circulate its material on or before October 22, 1976, and the other parties on or before November 5, 1976. The submissions of the other parties shall be limited to points on which they differ with the Bureau, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

Dated at Washington, D.C., October 1, 1976.

ROBERT L. PARK,
Chief Administrative Law Judge.

[Docket 29879, 22859, 26838; Order 76-10-74]

CONTINENTAL AIR LINES, INC.

Order of Suspension

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 4th day of October, 1976.

By tariff revisions[1] posted September 2 and marked to become effective October 17, 1976, Continental Air Lines, Inc. (Continental) proposes to increase all mainland bulk and container general and specific commodity rates and charges, small package rates and charges, and priority reserved air freight rates and charges by approximately 8 percent. In addition, bulk general commodity minimum charges per shipment are to be increased by $1.00 to a level of $13.00 per shipment.

In support of its proposal, Continental asserts, inter alia, that the proposed rate increases are more than justified on a cost basis; that for the year ended June 30, 1976, the carrier incurred an operating loss of $4.6 million from its mainland freight operations; that the proposal is expected to generate an estimated $3 million in additional revenue in 1977, or 5.8 percent of carrier's forecasted freight revenue for its entire system; that the proposed increase would about eliminate the deficit return on investment of its mainland freight operations; and that the proposal will help maintain rate and service parity with surface carriers in the small shipment market.

The proposed rates and charges come within the scope of either the Domestic Air Freight Rate Investigation (DAFRI), Docket 22859, or the Priority Reserved Air Freight Rates Investigation (PRAFRI), Docket 26838, and their lawfulness will be determined in these proceedings. The issue now before the Board is whether to suspend the proposal or to permit it to become effective pending investigation.

The Board concludes that a number of the priority reserved freight rates may be excessive inasmuch as they are above 130 percent of the otherwise applicable regular service general or specific commodity rates or charges and should not be permitted to become effective pending investigation. Although at one time the Board permitted Continental (as well as certain other carriers) to establish such priority general commodity rates at levels exceeding 130 percent of the otherwise applicable rates, the Board subsequently found that a 30-percent premium over the applicable rates (whether general or specific commodity) was the highest that should be permitted pending final decision in PRAFRI (e.g., see Orders 75-11-8, 75-3-116, and 75-1-80). Our action herein is consistent with that taken with respect to priority rates proposed by other carriers as well as in Order 75-12-28, December 5, 1975, by which the Board suspended priority reserved rate increases proposed by Continental in the same markets. Other increases in priority rates do not exceed appropriate levels and will be allowed.

Upon consideration of all relevant factors, the Board finds that the rate increases, to the extent that they apply to priority reserved rates and charges set forth in detail in Appendix A,[1a] should be suspended. The remaining portions of the proposal do not appear excessive in relation to costs,[2] and the Board will permit them to become effective.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly Sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That:

1. Pending hearing and decision by the Board, the increased rates, charges and provisions described in Appendix A hereto are suspended and their use deferred to and including January 14, 1977, unless otherwise ordered by the Board, and that no change be made therein during the period of suspension, except by order or special provision of the Board; and

2. Copies of this order shall be filed with the tariffs and served upon Continental Air Lines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket 27918; Order 76-10-12]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding North Atlantic Fares Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 1st day of October, 1976.

By Order 75-6-42, the Board instituted an all-encompassing investigation of the North Atlantic fare structure for scheduled serivce. The purpose is to ascertain the cost of offering the many types of service now available and to develop standards upon which to base evaluation of future fare agreements reached by the member carriers of the International Air Transport Association (IATA). In that order, the Board also set in motion the recurrent filing by U.S. carriers of basic cost and statistical data to facilitate the building of a meaningful historical record.

The purpose of this order is to set forth the procedures for undertaking the investigation instituted in Order 75-6-42, and to dispose of various petitions for reconsideration.

Order 75-6-42, which articulated the general scope of this investigation, contemplated that the Board would conduct its evaluation of North Atlantic fares on the basis of a full-scale evidentiary proceeding with hearings before an administrative law judge. Upon further reflection, however, the Board has determined that an adjudicatory investigation of North Atlantic fares is unnecessary and inefficient in light of the policy objectives that the proceeding is intended to achieve. Accordingly, the Board has determined to forego, at this time, the formal hearings contemplated in Order 75-6-42 and to follow rulemaking procedures.

The objective of this investigation, as set forth in Order 75-6-42, is the "establishment of reasonable guidelines and standards for evaluating passenger fares for scheduled services provided between U.S. points, except points in the Pacific Ocean and Puerto Rico, on the one hand, and points in Europe and the Middle East (as defined by IATA Resolutions 012 and 021b), on the other hand." At the outset, it is abundantly clear that there is no statutory requirement that the Board conduct a hearing in order to formulate such policies and that the question of how best to proceed lies solely within the Board's discretion. For the following reasons, we prefer rulemaking. To begin with, since North Atlantic fare levels are reviewed periodically in connection with the Board's evaluation of IATA fare agreements, it is not our intention that this proceeding should embark on a massive overall inquiry into fare levels, per se. To the contrary, the Board's limited powers to prescribe rates and fares in foreign air transportation persuade us that the real value of this investigation lies not in determining the economic corrections of a set of fares and costs at any one particular point in time, but rather in establishing reasonable fare policies which will endure over the longer term and which will move the IATA carriers toward a more rational fare structure than that which is currently in effect and which, it is hoped, will be useful to foreign governments in their own inquiries into these matters. Thus, the principal objection of this investigation is to establish reasonable standards and guidelines evaluating both fare level and fare structure, on a recurrent basis, in the context of North Atlantic fare agreements that are reached in IATA Traffic Conferences and are filed with the Board for its approval. In our judgment, rulemaking, which affords the additional benefit of facilitating broader public participation, is at least as effective for this purpose as a formal hearing and may result in considerable savings of time and resources, not only for the Board but for the public and the industry as well. In this connection, the conventional trial process has much to commend it, and there is no question that the expertise of an experienced administrative law judge in the refinement of issues, synthesization of data, and other functions is of invaluable assistance to the Board in the conduct of its formal proceedings. However, this process would appear to be of less importance in a case in which the principal issues are not so much questions of fact, as they are judgments as to policy.

Moreover, even were the Board to hold hearings in this investigation, there is no reason at this time to believe that the record developed on that basis would be of significantly higher quality than that which will be developed on the basis of the rulemaking instituted herein. The Board, by virtue of the recurrent reports filed pursuant to Order 75-6-42, and supplemented by data in the carriers' accounting reports, already has at its disposal most of the information necessary to conduct a reasonably thorough analysis of the North Atlantic cost structure and no logical need is perceived at this time to go beyond these data to develop the evidentiary basis for the proposed rule.

By employing these data (as supplemented by the data requested herein) it will be possible to develop reasoned policies on the basic cost-structure issues, including the identification of any distinguishable cost differences between fares for the various categories of service. Although this analysis will, out of necessity, proceed on the basis of U.S. carrier data only, it is believed that the structure of costs, particularly the cost taper, for these carriers should not be sufficiently dissimilar to that of the foreign carriers so as to provide distorted results. In any event, the proposed policy statement, as well as its underlying analytical base, will be subject to challenge in the responsive comments of interested persons. With full opportunity to comment by all interested persons, we believe that the rulemaking is sufficiently flexible to establish a North Atlantic fare policy in which all relevant points of view have been considered.

It is the Board's intention to issue a notice of rulemaking setting forth its analysis of the structure of costs, including the cost of through point-to-point service and cost taper. This notice will also articulate the Board's tentative views on what constitutes a reasonable North Atlantic fare structure, including, but not necessarily limited to: (a) the relationship between normal economy fares and costs, including seating and load-factor considerations; (b) the proper relationships between normal economy fares and fares for other basic classes of service; (c) the relationship between peak, off-peak, and/or shoulder fares for the normal-fare classes of service; (d) the relevant definition of "trip" for the purpose of determining normal fares (i.e., including the extent to which stopovers are to be permitted without extra charge); and (e) the relationships which should obtain between normal and promotional fares.

It should be pointed out that the Notice of Proposed Rulemaking will not address two matters placed in issue by Order 75-6-42, namely, the proportional fares used to construct fares to/from nongateway U.S. points and the division of joint fares. Both issues would require voluminous data from foreign carriers and U.S. domestic carriers and their consideration along with the more basic policy issues could only serve to delay the adoption of reasoned policies for North Atlantic fares. In any event, since the evaluations of the fare structure will be predicated on existing proportionals and divisions, we should gain considerable insight into this and will then be in a better position to decide what further action is appropriate in that regard.

As previously indicated, Order 75-6-42 required the recurrent filing by U.S. carriers of special reports showing their cost and traffic data for transatlantic scheduled combination aircraft services, and various passenger statistics by fare category. In order that the staff may properly conduct the cost analysis discussed above, it is necessary that these data be augmented with the additional North Atlantic entity data specified in the Appendix attached, and their provision will be ordered herein. These additional data consist primarily of cost inputs not included in the currently filed reports and more particularized information on discount fares. A special passenger survey is also being requested to determine, by fare category, the amount of revenue dilution attributable to the division of joint fares for the various circuitous routings and stopovers that are available under the present North Atlantic fare structure. Although, for the reasons discussed above, the rulemaking will not address the appropriate means by which joint fares should be divided, submission of this survey data is being required to assess the extent to which North Atlantic fares are affected by existing divisions. While, like the earlier reported data, we are ordering these supplemental data to be filed by U.S. carriers, we repeat our previous invitation to the foreign air carriers to provide similar data in the same or comparable format.

We turn next to the requests for reconsideration. Petitions for reconsideration have been filed by Pan American World Airways, Inc. (Pan American), Trans World Airlines, Inc. (TWA), and the United States Department of Transportation (DOT).[3] The essential thrust of all three is that the investigation should be expanded to include in issue the reasonableness of passenger charter rates in the North Atlantic market, with particular focus on the costs of providing the various types of charter service now offered. Pan American further requests that, if this issue is included, the U.S. supplemental carriers be made parties to the investigation and be required to furnish the same type of detailed cost and traffic information required of the U.S. scheduled carriers.

[1] Revisions to Airline Tariff Publishing Company, Agent, Tariffs C.A.B. Nos. 169, 227 and 235.

[1a] Appendix A filed as part of the original document.

[2] Industry-average costs as adopted by the administrative law judge in DAFRI, and revised to reflect cost increases through the 12-month period ended June 1976.

[3] DOT also requests that the scope of the investigation be expanded to include re-evaluation of the basic underlying IATA machinery which, it alleges, is responsible for the resolutions submitted as agreements which the Board must act upon. However, the scope of investigation is the determination of the appropriate structure of North Atlantic fares, and the issue of the IATA machinery is not germane to that determination.

V41N197 OCT 8 76 UMI

It is alleged that any investigation of North Atlantic fares would be incomplete without consideration of charter rates; that the cost of providing transatlantic charter service has never been fully examined and that this proceeding provides a unique opportunity to do so; that there is a distinct interrelationship between charter rates and fares on scheduled services; and that, absent investigation of charter costs, the Board would not be in a position to regulate charter rates and hence to evaluate the reasonableness of scheduled service fares. Pan American, in addition, requests that the investigation go beyond the question of the cost of providing charter service and into the appropriate interrelationship between per-passenger charter rates and fares on scheduled services. Pan American contends that the Board has acknowledged the interplay between charter and scheduled-service pricing and that the fare structure on scheduled service reflects a necessary competitive response to charter activity.

Finally, TWA requests clarification as to the public availability of data to be submitted during the course of this proceeding, and contends that certain ordered reporting requirements constitute an undue burden on the carriers since the data are already routinely submitted to the Board. TWA also requests that the Board modify its timing requirement for submission of profit and loss statements and investment and revenue data.

Answers in opposition to the petitions for reconsideration have been filed by the Airlines Charter Tour Operators Association (ACTOA), Capitol International Airways, Inc. (Capitol), Davis Agency, Inc. (Davis), Overseas National Airways, Inc. (ONA), Spantax, S.A. (Spantax), and Trans International Airlines, Inc. (TIA). An answer in support of the petitions to incorporate charter rate levels in issue has been filed by British Caledoian Airways Limited (BCAL). With the exception of BCAL, these parties contend that the Board's order was clearly directed toward the reasonableness of fares in scheduled service and that expanding the scope of the proceeding to include charter rates would involve undue complexity to the point that it would become unmanageable. It is alleged that such an expansion of the issues would divert the focus of the case from the Board's primary intention—an examination into the fare structure of scheduled service on the North Atlantic. The respondents refer to the Board's previous statements that charter services do not appear to have diverted traffic unduly from scheduled services, and they contend that consumers have benefited from expanding levels of service at inexpensive rates, and that the scheduled carriers' problems stem from operation of overcapacity and illegal rebating. ONA suggests that, if the reasonableness of North Atlantic charter rates is to be pursued, it should be in the context of the rulemaking proceeding in Docket 25875.

Upon consideration of the petitions, the answers thereto, and other relevant matters, the Board has decided to deny the requests that rates and costs of providing charter service on the North Atlantic be included in issue in this proceeding.

In substance, charter services and scheduled services have inherently different characteristics which involve separate and distinct costing and pricing considerations. Thus, charter rates are based on the economics of full-planeload operations whereas scheduled services are priced in relation to anticipated load factors. In the Board's opinion, inclusion of charter costs in this proceeding would unduly complicate development of the record and unnecessarily deter our most immediate objective of developing a definitive policy for North Atlantic scheduled service fares.

In Docket 25875, the Board sought to ascertain the cost of charter services and to arrive at a regime which would be equitable to both the charter and scheduled carriers. This did not prove feasible in the context of that proceeding. We recognize as we did then that, as a practical matter, charter services have an important bearing upon the fares which the IATA carriers agree upon for their scheduled services. However, this is essentially a matter of relative price. Our primary interest in this proceeding is to analyze the North Atlantic fare structure and develop reasoned policies by which to evaluate future passenger-fare agreements.

It cannot, of course, be denied that the level of charter prices will have an effect upon the level of fares which the carriers will wish to offer in scheduled service at the lower end of the spectrum. This is a factor which cannot realistically be ignored in the market place. The impact of charter rates on pricing of scheduled service, of course, is a factor which will be examined in this proceeding. On the other hand, we perceive on mandate of law or policy which would require the establishment of charter prices on the basis of some artificial relationship to scheduled service prices. In the Board's opinion, inclusion of the issue of the cost of charter service, which by its nature involves significantly different facts and circumstances, would unduly complicate an already extremely complex proceeding. Accordingly, we will deny the petitions.

TWA requests an extension of time for filing the required profit and loss statement, and investment data for scheduled North Atlantic service on the grounds that such data can only be developed after preparation of the regular Form 41 reports. The 20 days requested beyond the date for filing Form 41 reports is acceptable to the Board. Also, we will permit the carriers to accumulate their monthly fare usage data by quarter and submit these data simultaneously with the quarterly profit and loss and investment data described above. This, in substance, meets TWA's need for additional time to file these data.[2] However, we are unable to accept TWA's request that traffic and capacity statistics be eliminated from the special reporting requirements in the Appendix to Order 75–6–42 because these materials are already submitted to the Board. We are not persuaded that the effort which is involved will constitute an undue burden. The reporting which has been required is an obligation of the carriers to the development of a useful record in this proceeding.[3]

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 404, 412, 414, and 1002 thereof,

It is ordered, That:

1. The petitions of Pan American World Airways, Inc., Trans World Airlines, Inc., and the Department of Transportation for reconsideration of Order 75–6–42, to the extent not granted herein, be and they hereby are denied;

2. The motions filed by Department of Transportation to expedite proceedings in this Docket be and they hereby are dismissed;

3. Ordering paragraph 4 of Order 75–6–42 is hereby amended to read as follows:

"National Airlines, Inc., Pan American World Airways, Inc., and Trans World Airlines, Inc. shall supply in this Docket the following information:

"(1) a quarterly report showing the profit and loss, and investment data for scheduled North Atlantic service outlined in Appendix B of this order; and

"(2) a quarterly report showing, by month, the fare usage data (i.e., passengers enplaned, revenue passenger-miles, and passenger revenue for each fare category in the North Atlantic structure) specified on page four of this order.

These data shall be submitted 20 days after the date for filing Form 41 reports covering the same time period."

4. National Airlines, Inc., Pan American World Airways, Inc., and Trans World Airlines, Inc. shall supply in this Docket the North Atlantic entity data specified in the attached Appendix,[4] these data to be submitted as follows: (1) the data required in paragraphs A, B, and C shall be reported for the 12-month period ending June 30, 1976, and each year ended June 30 thereafter, and shall be submitted by the following December 1; *Provided, however*, That the data for the year ending June 30, 1976 shall be submitted by November 1, 1976; and (2) the passenger survey data required in paragraph D shall be accumulated on a quarterly basis and submitted simultaneously with the data reported pursuant to Order 75–6–42;[5] and

5. The reporting requirements as set forth in the Appendix to Order 70–2–124 be and hereby are terminated.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-29681 Filed 10-7-76;8:45 am]

[Docket 29845; Order 76–10–21]

EL AL ISRAEL AIRLINES LTD.

Order of Suspension and Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of September, 1976.

By tariff revisions filed September 8, 1976, for effectiveness October 8, 1976, El Al Israel Airlines Ltd. (El Al) proposes a special 50-percent reduction from the U.S.-Israel normal economy fares "for members of the official national teams participating in the Chess Olympic Games and members of the Official National Delegations to the congress, traveling from a point in the U.S.A. or Canada to Israel." The fares would be available from October 14 through November 21, 1976, and were filed pursuant to an order of the Government of Israel.

Upon consideration of all relevant matters, the Board has concluded that the proposed fares may be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated. The Board further concludes that the fares should be suspended pending investigation.

Extension of a special discount to a limited group of U.S. residents based on their membership in a specific cultural or other organization clearly presents a prima facie case of unjust discrimination which is inconsistent with the statute. Were the Board to approve this filing, we could reasonably expect to receive numerous requests for special discounts for other groups. Moreover, the discount fares available on an equal basis to all members of the traveling public, adopted by the members of the International Air Transport Association (IATA), including both the U.S. and Israel flag carriers and approved by both governments, would appear to provide an adequate facility for the carriage of participants in the Chess Games.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 801 and 1002(j) thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the provisions in Rule 298–B, on 16th Revised Page 82–J, to Passenger Fares Tariff No. PF–4, C.A.B. No. 44, issued by Air Tariffs Corporation, Agent, and practices affecting such provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and, if found to be unlawful, to take appropriate action to prevent the use of such provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board, the tariff provisions specified in paragraph 1 above are suspended and their use deferred from October 8, 1976 to and including October 7, 1977, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the Board;

3. This order shall be submitted to the President[1] and shall become effective on October 8, 1976;

4. The investigation ordered herein be assigned for hearing before an administrative law judge of the Board at a time and place hereafter to be designated; and

5. Copies of this order be filed in the aforesaid tariff and be served upon El Al Israel Airlines Ltd.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

CIVIL SERVICE COMMISSION

ADVISORY COMMITTEE ON ADMINISTRATIVE LAW JUDGES

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92–463, notice is hereby given that the Advisory Committee on Administrative Law Judges will meet at 9:30 a.m. on Friday, October 29, 1976. This meeting will be held in Room 5323 of the U.S. Civil Service Commission Building, 1900 E Street NW., Washington, D.C.

The Advisory Committee's agenda will consist of a discussion of recruitment and selection procedures for Administrative Law Judges, including the nature of the application process and information required at the various stages in the selection process. There will be further discussion of the qualifications criteria; application of Veterans Preference Act requirements; experience required; the use of personal investigation and the vouchering system; the desirability of continuing selective certification procedures; and, such other matters as members of the Advisory Committee may wish to discuss including issues to be considered at future meetings.

This meeting will be open to the public.

Inquiries regarding this notice may be addressed to Arthur L. Burnett, Assistant General Counsel, Legal Advisory Division, Office of General Counsel, Civil Service Commission, 1900 E Street NW, Washington, D.C. 20415, telephone: Area Code 202–632–5421 or 632–5422.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS FROM MALAYSIA

Adjustment of Import Levels

Correction

In FR Doc. 76–28051, appearing in the issue for Friday, September 24, 1976, and corrected at 41 FR 43440, October 1, 1976, the letter that was contained in the above document should have read as set forth below. Please note the footnotes and their references.

[1] This order was submitted to President on September 29, 1976.

[2] Inasmuch as the monthly reporting on North Atlantic passenger traffic by fare category required by Order 75–6–42 duplicates the information being provided by Pan American and TWA in response to Order 70–2–124, the filing requirement with respect to the latter order will be terminated.

[3] The Department of Transportation has filed two separate motions to expedite the proceedings instituted in Order 75–6–42. However, in view of the action taken herein to establish the procedural framework of the investigation, these motions have become moot and will be dismissed.

[4] Appendix filed as part of original document.

[5] The initial survey report shall include a description of the basis for the sampling method employed in accumulating the data, including full source references and notes.

V41 1976 OCT 8 76 UM

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

SEPTEMBER 21, 1976.

DEAR MR. COMMISSIONER: On December 22, 1975, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning January 1, 1976 and extending through December 31, 1976 of cotton and man-made fiber textile products in certain specified categories, produced or manufactured in Malaysia, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to paragraph 5 of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of January 8 and May 16, 1975, between the Governments of the United States and Malaysia, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed, effective on September 24, 1976 and for the twelve-month period beginning on January 1, 1976 and extending through December 31, 1976, to amend the levels of restraint established for Categories 22/23 and 26 to the following amounts:

Category:	*Amended twelve-month level of restraint* [2]
22/23	2,824,800 square yards.
26	6,474,600 square yards.

[2] The levels of restraint have not been adjusted to reflect any entries made after December 31, 1975.

The actions taken with respect to the Government of Malaysia and with respect to imports of cotton textile products from Malaysia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

ESTABLISHING IMPORT LEVELS FOR CERTAIN COTTON, WOOL AND MAN-MADE FIBER TEXTILES

Products From the Republic of Korea, Effective October 1, 1976

Correction

In FR Doc. 76–29089, appearing at page 43440 in the issue for Friday, October 1, 1976, the levels of restraint in the table and the footnotes should read as set forth below:

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

SEPTEMBER 29, 1976.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, between the Governments of the United States and the Republic of Korea, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on October 1, 1976 and for the twelve-month period extending through September 30, 1977, entry into the United States for consumption of cotton textile products in Categories 9/10, 18/19 and part of 26, 22/23, part of 26, 39, 42/43/62 pt., 45/46/47, 48, 49, 50/51, 52, 62 pt., and 63; wool textile products in Categories 104, 116/117, 120, 121 and 124; and man-made fiber textile products in Categories 208, 210, 218, 219, 221, 222, 224, 228, 229, 234, 235, 237, and 238 in excess of the following levels of restraint:

Category:	*Twelve-month level of restraint*
9/10	6,583,024 square yards.
18/19/26 (printcloth)[1]	5,235,626 square yards.
22/23	3,604,345 square yards.
26 (duck)[2]	21,943,401 square yards.
39	311,880 dozen pairs.
42/43 and part of 62[3]	3,200,000 square yards equivalent.
45/46/47	3,186,797 square yards equivalent.
48	22,453 dozen.
49	51,039 dozen.
50/51	192,817 dozen (of which not more than 102,184 dozen shall be in Category 50 and not more than 138,309 dozen shall be in Category 51).
52	70,727 dozen.
pt. 62[4]	195,652 pounds.
pt. 63 (T.S.U.S.A. Nos. 380.3980 and 382.3380)	1,086,957 pounds.
pt. 63[5]	1,086,957 pounds.
104	2,200,000 square yards.
116/117	470,815 pounds.
120	320,448 numbers.
121	193,920 numbers.
124	1,010,000 numbers.
208	18,000,000 square yards (of which not more than 8 million square yards shall be in T.S.U.S.A. Nos. 338.3035 and 338.3036).
210	1,750,000 square yards.
218	897,790 dozen.
219	4,082,036 dozen.
221	2,801,092 dozen.
222	1,025,100 dozen.
pt. 224 (only T.S.U.S.A. Nos. 380.0420 and 380.8143).	41,333 dozen.
pt. 224[6]	48,485 dozen.
228	4,358,974 pounds.
229	881,517 dozen.
234	752,455 dozen.
235	3,845,407 dozen.
237	1,422,840 dozen.
238	155,555 numbers.
	218,013 dozen.

[1] In Category 26 the T.S.U.S.A. Numbers for printcloth are: 320.—34, 321.—34, 322.—34, 326.—34, 327.—34, 328.—34.

[2] In Category 26 the T.S.U.S.A. Numbers for duck fabric are: 320.—01 through 04,06,08, 321.—01 through 04,06,08, 322.—01 through 04,06,08, 326.—01 through 04,06,08, 327.—01 through 04,06,08, 328.—01 through 04,06,08.

[3] In Category 62, only T.S.U.S.A. Nos.: 380.0024, 380.0027, 382.0002, 382.0605, 382.0610, 382.3904, 382.6904.

[4] In Category 62, all T.S.U.S.A. Numbers not listed in Footnote 3.

[5] In Category 63, all T.S.U.S.A. Numbers except T.S.U.S.A. Nos. 380.3980 and 382.3380.

[6] In Category 224, all T.S.U.S.A. Numbers except T.S.U.S.A. Nos. 380.0402, 480.0420, 380.8103 and 380.8143.

In carrying out this directive, entries of cotton, wool and manmade fiber textile products in the foregoing categories, produced in the Republic of Korea and exported to the United States prior to October 1, 1976, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the period October 1, 1975 through September 30, 1976. In the event that the levels of restraint established for that twelve-month period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of June 26, 1975 between the Governments of the United States and the Republic of Korea which provide, in part, that: 1) within the aggregate and applicable group limits, specific levels of restraint within Group I may be exceeded by 10 percent; within Group II, by 7 percent; and within Group III, by 5 percent; 2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; 3) consultation levels may be increased within the aggregate and applicable group limits upon agreement between the two governments; and 4) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

A detailed description of the categories in terms of T.S.U.S.A. numbers and factors for converting category units into equivalent square yards was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of cotton, wool and man-made fiber textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of January 8 and May 16, 1976, between the Governments of the United States and Malaysia which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Appropriate adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; 3) consultation levels may be increased within the aggregate and applicable group limits upon agreement between the two governments; and 4) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

A detailed description of the categories in terms of T.S.U.S.A. numbers and factors for converting category units into equivalent square yards was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of cotton, wool and man-made fiber textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1976

Additions to Procurement List

Notice of proposed additions to Procurement List 1976, November 25, 1975 (40 FR. 54742) of the commodities listed below were published in the FEDERAL REGISTER on July 16, 1976 (41 FR 29472) and July 23, 1976 (41 FR. 30380).

After consideration of all the relevant data presented, the Committee has determined that the commodities listed below are suitable for procurement by the Government under Pub. L. 92–26, 85 Stat. 77. Accordingly, they are hereby added to the Procurement List.

Class 7530

Pad, Writing Paper (IB)
7530–00–285–3083 (for GSA Region 8 and Franconia Depot in GSA Region 3 only)
7530–00–285–3088 (for GSA Region 5 only)

By the Committee.

C. W. FLETCHER,
Executive Director.

[FR Doc.76–29617 Filed 10–7–76;8:45 am]

PROCUREMENT LIST 1976

Deletions From Procurement List

Notice of Proposed Deletions from Procurement List 1976, November 25, 1975 (40 FR 54742), was published in the FEDERAL REGISTER on August 6, 1976 (41 FR 32943) and August 13, 1976 (41 FR 34350).

Pursuant to the above notices the following commodity and military resale items are deleted from the Procurement List:

Class 7510

Pointer, Pencil
7510–00–237–4926

Military Resale Item and Number

906 Broom, corn
921 Mop, self-wringing
927 Mophead, wet
929 Mop, dusting
930 Applicator, wax
931 Refill, wring easy mop
938 Refill, wax applicator
939 Refill, mophead, dusting
942 Cloth, dish
943 Cloth, dishwashing
953 Scrubber, plastic
967 Bag, laundry
981 Cloth, all purpose
982 Cloth, polishing
984 Cloth, wash
985 Bib, terrycloth
992 Mat, floor
997 Duster, all purpose

By the Committee.

C. W. FLETCHER,
Executive Director.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Availability

Environmental impact statements received by the Council on Environmental Quality from September 27 through October 1, 1976. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the *minimum* period for public review and comment on draft environmental impact statements in forty-five (45) days from this FEDERAL REGISTER notice of availability. (November 22, 1976) The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies will also be available at cost from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Coordinator of Environmental Quality Activities, Office of the Secretary, U.S. Department of Agriculture, Room 359–A, Washington, D.C. 20250, 202–447–3965.

FOREST SERVICE

Draft

Deer Island Unit Plan, Gallatin National Forest, Alaska, September 28: Proposed is a land management plan for the 9,100-acre Deer Island Management Unit, Tongass N.F., on Ernest Sound, Alaska. The plan calls for construction of 8 to 10 miles of access road and initiation of timber harvest within 8,290 acres of forest containing an estimated 200 million board feet of timber. For the 5-year period of 1977 through 1981, 14 million board feet of timber is to be harvested, followed by a rotating harvesting period averaging from 90 to 120 years. The conversion of old-growth stands to second groth stands will modify the wildlife habitat, and the area will no longer be suitable for Wilderness classification. (190 pages). (ELR Order No. 61421.)

Vernon Unit Plan, Kisatchie National Forest, Vernon County, La., September 27: Proposed is a 10-year management plan for the Vernon Unit, Kisatchie National Forest. The 84,874-acre unit is divided into 2 zones according to the degree of military use, ranging from "Intensive" to "Limited Use." This statement proposes timber management on 573 acres, site preparation on 433 acres, thinning on 2,500 acres, prescribed burning on 14,500 acres, and development of range facilities and trails. Adverse impacts include soil movement, stream siltation, and effects caused by timber harvesting. (118 pages). (ELR Order No. 61416.)

Mount Hebgen Management Alternatives, Gallatin County, Mont., September 28: Proposed is the issuance of a special use permit to Ski Yellowstone, Inc., to develop ski facilities on Mount Hebgen, Montana. The plan consists of the construction of a mountain-top restaurant, an 8,300-foot long gondola, and 11 double chair lifts serving 637 acres of ski slopes and trails. The facility, to be built over a 10-year period, will have a capacity of 6,500 skiers. Negative impacts include minor slope instability, soil erosion, increased demands on existing facilities, and degradation of air due to increased automobile emissions. (206 pages). (ELR Order No. 61420.)

Final

Pioneer Mountains Unit, Challis and Sawtooth National Forest, Custer, Blaine, and Butte counties Idaho, September 28: The statement concerns a land use plan for the 695,964-acre Pioneer Mountain Planning Unit of Sawtooth and Challis National Forest. Two percent of the land is owned by the State of Idaho or private interests. The new plan differs from the existing one in that it provides for the construction of 16 miles of public access road into Meridian Creek and East Pass Creek, the increase of study areas from 106,200 acres to 180,300 acres, the availability of 243,000 of the existing 543,000 acres of roadless area for timber harvests, the intense management of livestock allotments, the increase of the capacity for recreation sites, and the artificial rehabilitation of 1300 acres. (336 pages). Comments made by: EPA, DOI, AHP, DOC, HUD, State and local agencies, and concerned citizens. (ELR Order No. 61422.)

RURAL ELECTRIFICATION ADMINISTRATION

Draft

Gamerco Coal Mine, McKinley County, N. Mex., October 1: Proposed is the development, by Arizona Electric Power Cooperative, Inc., of 8,011 acres of land, located approximately 3 miles northwest of the City of Gallup, as a coal stripmine facility. Associated with the mine will be a proposed coal washing plant with associated settling and freshwater holding ponds, coal loadout facility, 2.1 mile railroad spur, 116 one-hundred-ton coal railroad cars, shops and offices, deepwater well, haul roads, and substation. Adverse effects include disturbances to topography, soils, air quality, and archeological resources. (345 pages). (ELR Order No. 61441.)

Final

New River and Phoenix City Streams, Maricopa County Ariz., September 27: The project is the second phase of a 5-phase plan designed to serve as a framework for flood control in the Phoenix area. Three flood control dams, to be located on Cave Creek, Skunk Creek, and New River, will be constructed. A 17 mile long diversion channel, containing both earth and concrete sections will be constructed immediately north of and parallel to the Arizona Channel. Adverse impacts include the loss or alteration of 410 acres of riparian habitat, the alteration or destruction of 3 archaeological sites, the urbanization of 310 acres of open space, and the relocation of 288 homes and 38 businesses (Los Angeles District (323 pages). Comments made by: USDA, HEW, EPA, DOI, DOT, DOC, and State and local agencies, and concerned citizens. (ELR Order No. 61442.)

Calleguas Creek Flood Control, Ventura County Calif., September 27: Proposed is the development of a flood control project in Simi Valley. The project includes flood control channels, a total of 253 acres of park and trail development, and flood plain management for both Simi Valley and Moorpark. Adverse impacts include the loss of 62 acres of riparian wildlife, and the urbanization of 185 acres of open space and agricultural land. (Los Angeles District). (158 pages). (District). (80 pages). Comments made by: USDA, HEW, HUD, DOI, DOT, EPA, FPC, and State and local agencies, and concerned citizens. (ELR Order No. 61415.)

Bear River Flood Protection Plan, Yuba County, Calif., September 28: Proposed is a flood protection plan for the Bear River Basin area, in Yuba County, California. The project includes use of 3,300 acres of flowing easements; enlargement of Linda Drain; and construction of new flood channels, levees, a pumping plant, and recreation facilities. Low-yield crop and pastureland, future residential land, and reaches of existing stream channel will be converted for project levees and channels. The major impact will be loss of about one acre of natural stream section. (Sacramento District). (76 pages). Comments made by: DOI, EPA, HEW, DOT, and State and local agencies, and concerned citizens. (ELR Order No. 61424.)

Morrison Creek Stream Group, Sacramento, Calif., September 30: Proposed is a flood control project for the southern Sacramento metropolitan area. Included are an 11,000 acre-foot reservoir, 25.8 miles of levees, 66.3 miles of channel works, and a 7,800 acre flood retardation basin. There may be water quality problems in the reservoir. Approximately 3,085 acres will be committed to project structures, with 460 of the amount being permanently inundated and 1,600 acres being intermittently inundated; 50.9 miles of natural stream will be converted to excavated trapezoidal cross section; 7,800 acres will be acquired for the retention basin. (150 pages). Comments made by: USDA, DOC, HEW, DOI, DOT, EPA, and State and local agencies, and concerned citizens. (ELR Order No. 61433.)

Nearman Creek Generating Station, Wyandotte County, Kans., October 1: Proposed is the construction of a 246 Megawatt coal-fired steam-electric generating facility and appurtenant structures on and in the Missouri River between River Miles 377 and 379 in the City of Kansas City, Kans. The proposed powerplant would convert approximately 725 acres of agricultural land and wildlife habitat to industrial use, and plant operation would result in the release of waste by-products of combustion and a heated discharge into the Missouri River. (Kansas District). (382 pages). Comments made by: USDA, DOC, HEW, HUD, DOI, DOT, EPA, AHP, and State and local agencies, and concerned citizens. (ELR Order No: 61437.)

Grand Isle and Vicinity, Jefferson County La., September 30: Proposed is the construction of a 2,600 foot stone jetty at Caminada Pass, in order to stabilize the western end of Grand Isle; and a 7.5 mile sandfill dune and berm to protect the island's gulf shore from beach erosion and hurricane waves. There will be adverse impact to aesthetics and to marine biota. (New Orleans District). (90 pages). Comments made by: DOI, DOC, HEW, USCG, EPA, and State and local agencies, and concerned citizens. (ELR Order No. 61432.)

Wears Creek, Jefferson Creek Flood Control, Cole County Mo., September 28: Proposed is the construction of a flood protection project consisting of enclosing the lower reaches of Wears Creek in a covered conduit and filling the surrounding area with hydrolic fill dredged from the Missouri River. The project will displace 135 residences and 70 businesses, and will result in the loss of recreational potential of the natural Wears Creek setting, relocation of five historic buildings, and removal and relocation of some railway transportation facilities which serve area industry. (Kansas City District). (172 pages). Comments made by: USDA, HUD, DOI, DOT, USCG, EPA, FPC, AHP, and State and local agencies, and concerned citizens. (ELR Order No. 61423.)

Flathead Flood Control, Kalispell, Flathead County Mont., September 27: Proposed is a project for flood control for the Flathead River near Kalispell. The plan includes construction of a 6.25-mile setback levee and appurtenant structures on the bank of Flathead River, addition of flap gates to two existing culverts, and local flood plain zoning. Adverse impacts include the possible lowering of water quality, loss of agricultural potential, loss of wildlife habitat, increased potential damages to communities should an extremely great flood occur, and possible loss of archaeological information. (Seattle District). (170 pages). Comments made by: USDA, EPA, HEW, DOI, DOT, and State and local agencies, and concerned citizens. (ELR Order No. 61413.)

New Jersey Coastal Inlets and Beaches, Barnegat to Longport, Ocean County N.J., September 27: The proposed action consists of the construction of jetties, groins, bulkheads, beach berms, sand bypassing and the placement of beachfill and dunefill for the purpose of meeting beach erosion control, storm protection, and navigation needs of the inlets and beaches between Great Egg Harbor Inlet and Barnegat Inlet. The project includes dredging the channel at Barnegat Inlet and Absecon Inlet. Dredging at ocean borrow sites will cause turbidity and benthic disruption. (Philadelphia District). (175 pages). Comments made by: EPA, DOI, HEW, DOT, HUD, and State and local agencies, and concerned citizens. (ELR Order No. 61411.)

New Jersey Coastal Inlets and Beaches (2), N.J., September 30: The statement refers to the proposed construction of jetties, groins, bulkheads, and a breakwater, and the placement of beach and dune fill for the purposes of meeting beach erosion control, storm protection, and navigation needs of the inlets and beaches between Hereford Inlet and the Delaware Bay entrance of the Cape May Canal. Adverse impact will occur to marine biota. There will be malodorous gases from polluted beach fill, and increases in the pollution levels of the backbays due to increased use of motorboats. (Philadelphia District). (63 pages). Comments made by: EPA, DOI, HEW, HUD, and State and local agencies, and concerned citizens. (ELR Order No. 61431.)

Beach Erosion Control, Presque Isle Peninsula, Pa., September 27: The proposed project is the construction of three partial breakwaters alone the north shore of Presque Isle State Park, to control beach erosion. The breakwaters along the north shore of Presque segments located 100 feet apart in 10 feet of water 1,000 feet offshore. An initial 1,600,000 cubic yard beach sand replenishment will be required. The project will destroy some lake bottom habitat, disrupt recreation, and affect the litoral drift of sandspits at Gull Point. (Buffalo District). (220 pages). Comments made by: USDA, DOC, EPA, DOI, DOT, and State and local agencies, and concerned citizens. (ELR Order No. 61409.)

Hay Creek Flood Control Project, Birdsboro, Pa., September 27: The project involves the construction of approximately 4,150 linear feet of levees and floodwalls along portions of Hay Creek. The East Main and East First Bridges will be raised by 6 and 4 feet respectively, to accommodate the levees and floodwalls. The Penn Central Railroad Bridge is to be modified by moving the center pier 16 ft. eastward so that it would be out of the Hay Creek channel. There will be temporary adverse effects of construction including traffic congestion, noise, and turbidity. (Philadelphia District.) (78 pages.) Comments made by: USDA, DOI, and State and local agencies, and concerned citizens. (ELR Order No. 61410.)

Neches River Salt Water Barrier, Jefferson County, Tex., September 27: The proposed action consists of the maintenance of a permanent barrier across the Neches River at the city of Beaumont to prevent intrusion of salt water to upstream freshwater supply intakes. The proposed barrier will consist of a gated dam in the river, a gated navigation bypass channel, an auxiliary dam in a small tributary bayou, an access road and service bridge, and other related works. Fifty-seven acres of land will be lost, and closure of the barrier will impede upstream migration of estuarine animals. (Galveston District.) Comments made by: USDA, HEW, DOI, EPA, DOT, State and local agencies, and concerned citizens. (ELR Order No. 61412.)

Richmond Flood Protection Measures, Va., September 30: Proposed is a flood protection plan for Richmond, Virginia. The statement recommends the construction of 2 floodwalls to protect the Shockoe Creek area and the South Side industrial and commercial area, designed for 39.5 feet m.s.l. at the Great Ship Lock or City Lock. A portion of the old Libby Prison site would be permanently covered by the wall on the north side, and a concrete gravity wall will cover an area of river bottom 900' x 50'. (Norfolk District). (60 pages). Comments made by: EPA, USDA, DOI, AHP, and State and local agencies, and concerned citizens. (ELR Order No. 61429.)

Virginia Beach Streams Canal No. 2, Va., September 30: Proposed is the improvement of the drainage canal between the Eastern Branch of the Lynnhaven River and Shipps Corner. The proposal consists of improving 2.3 miles and maintaining 2.2 miles of existing canal. Environmental impacts include loss of 7 acres of marsh, loss of benthos, temporary turbidity, potential alteration of salinity distribution, and alteration of succession in cypress-gum swamps of West Neck Creek. (Norfolk District). (63 pages). Comments made by: EPA, DOI, USDA, DOT, and State and local agencies, and concerned citizens. (ELR Order No. 61430.)

U.S. Route 209 Relocation, Pa., DWGNRA (S-1), Monro County, Pa., September 30: Proposed is the construction of Relocated U.S. 209, a four-lane, limited access highway to be constructed in two phases. Phase I consists of a two-lane, limited access facility having at-grade intersection. Phase II will result in construction of an additional two lanes when traffic conditions warrant and funds become available. Relocated U.S. 209 will start from near Bushkill, Pa. northward for 23 miles to its terminus near the U.S. Route 6 interchange with Interstate Route 84 just west of Milford, Pa. The highway relocation is authorized by Congress as part of the Tocks Island Lake Project. (Philadelphia District). (95 pages). (ELR Order No. 61434.)

NAVY

Supplement

Dredge R. Channel, USN Submarine Base, New London (S-2), Suffolk County, Conn., October 1: This statement supplements a final EIS filed in 1972. It describes continued dredging requirements of the Navy to insure the successful introduction of the new deep-draft SSN 688 class submarines at the USN Submarine Base, and also corrects deficiencies noted in the decision of the U.S. Circuit Court of Appeals in National Resources Defense Council et al. v. Callaway et al., dated September 9, 1975. Navy dredging requirements in support of the SSN 688 class submarines are projected over a ten-year period. (1800 pages). (ELR Order No. 61438.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Ms. Rebecca W Hanmer, Director, Office of Federal Activities, Room WSMW 537, 401 M Street, SW., Washington, D.C. 20460, 202-755-0780, (stop 460).

Supplement

Lead-Deadwood Sanitary Facilities (S-2), S. Dak., October 1: This statement supplements a final EIS filed with CEQ in 1972. Proposed is the construction of an advanced waste treatment facility and interceptor collector system for the Lead and Deadwood areas in the Black Hills. The plant will consist of secondary treatment plus ammonia and chlorine removal, and will provide the sewage treatment facilities the town currently lacks. Sludge disposal will be by truck haul to a landfill area near the Black Hills. Adverse effects include leaching problems, minor odors, and a variety of construction related impacts (Region VII) (310 pages). (ELR Order No. 61436.)

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

Contact: Mr. W. Herbert Pennington, Office of Assistant Administrator, E-201, ERDA, Washington, D.C. 20545, 301-973-4241.

Draft

High Performance Fuel Laboratory, Hanford Reservation, Benton County, Wash., October 1: Proposed is the construction of a High Performance Fuel Laboratory (HPFL) at the ERDA Hanford Reservation in Richland, Washington. The HPL will provide a pilot scale facility to support the liquid metal fast breeder reactor program, and will be used to develop manufacturing processes for fuels comprising oxides of plutonium and uraniuu. The project will result in limited release of chemicals to waste ponds, loss of wildlife habitat, and degradation of air. (500 pages). (ELR Order No. 61440.)

FEDERAL POWER COMMISSION

Contact: Dr. Jack M. Heinemann, Acting Assistant Director for Environmental Quality, 441 G Street, N.W., Washington, D.C. 20426, 202-275-4791.

Draft

Santee-Cooper Project No. 199, several counties, S.C., September 27: Proposed is the granting of a new license for the continued operation of South Carolina Public Service Authority's constructed Santee-Cooper Project No. 199, located on the Santee and Cooper Rivers in Berkely, Calhoun, Clarendon, Organgeburg, and Sumter Counties, South Carolina. The project consists of 110,600 acre Lake Marion impounded by Santee Dam on the Santee River, a 7.5 mile long Diversion Canal connecting Lake Marion to Lake Moultrie, and adjacent 60,400 acre reservoir impounded by Pinopolis Dam and several dikes, and a 4.5 mile long Tailrace Canal discharging into the Cooper River. Continued operation would perpetuate conditions modified over 35 years ago. (275 pages). (ELR Order No. 61418.)

Supplement

Alaska Natural Gas Transportation Systems (S-2), September 27: This supplement presents the results of a revised economic analysis, including the Northwest proposal, for the Alaska Natural Gas Transportation Systems, Alcan Pipeline Project. This work is based upon an improved model for estimating gross benefits that eliminates some of the deficiencies of the final ELS model. (21 pages). (ELR Order No. 61408.)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Room 7628, 451 7th Street, S.W., Washington, D.C. 20410, 202-755-6308.

Draft

Monte Brisas Development, Fajardo, Puerto Rico, September 29: Proposed is the approval of the third section of the Monte Brisas Development, Fajardo. This third and final section calls for the construction of 396 units on a 63.85 acre tract of land over a period of approximately 3 years. The project will also contain active and passive park areas, cultural and recreational facilities, and supporting community commercial facilities. Adverse effects include construction disruption, and increased solid waste collection and disposal activity. (ELR Order No. 61426.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BUREAU OF LAND MANAGEMENT

Final

Timber Management Program, September 27: Proposed is a 10-year timber management program on 22.9 million acres of forest land in the Western United States. Only the program thrust of the major area, western Oregon, is described in the statement. The plan includes harvest of mature timber, road construction, salvage of dead trees, commercial thinning of marketable trees, site preparation and reforestation, and mechanical and chemical forms of protection for the trees. Adverse impacts include massive soil movements due to clearcutting and partial cutting, interruption of natural succession of forest vegetation, and disruption of aquatic life due to stream channel changes. (594 pages). Comments made by: EPA, USDA, HEW, AHP, DOI, and State and local agencies, and concerned citizens. (ELR Order No. 61414.)

BUREAU OF RECLAMATION

Draft

Savery-Pot Hook Project, Colorado & Wyoming, September 28: The proposed Savery-Pot Hook Project would involve the construction of two earthfill dams and two conveyance systems in the Little Snake River Basin in south-central Wyoming and northwest Colorado. It would supply water for irrigation and benefit fisheries, recreation, and flood control. A 6-year construction period is anticipated. Adverse effects include the inundation of good stream fisheries, and intrusion upon the natural setting by man-made structures. Three families would be required to relocate. (205 pages). (ELR Order No. 61419.)

Final

Dallas Creek Project, several counties Colo., September 28: The proposed project calls for the construction of two earthfill dams and water collection and delivery systems in the Uncompahgre River Basin, Colorado. This project would supply water for irrigation, municipal, and industrial use, as well as benefit fisheries, recreation, and flood control. Adverse effects include the reduction of wildlife habitat and hunting opportunities by the inundation of 1,030 acres of land and the acquisition of 1,000 acres of land for an intensive wildlife management area. (410 pages). Comments made by: AHP, HEW, HUD, DOI, USDA, COE, EPA, and State and local agencies, and concerned citizens. (ELR Order No. 61425.)

NUCLEAR REGULATORY COMMISSION

Contact: Mr. Benard Rersche, Director of Division of Reactor Licensing, P-722, NRC, Washington, D.C. 20555, (301) 492-7373.

Final

Manufacture of Floating Nuclear Power Plants, Sept. 30: The statement is the second of two separately prepared environmental statements relating to the proposed siting and operation of floating nuclear power plants in the coastal waters of the Atlantic Ocean and the Gulf of Mexico. The previous statement covered the siting and operation of the offshore facility located at Blount Island, and this generic statement concerns the environmental considerations of siting and operation of floating nuclear power plants in general. Adverse impacts discussed include only those unique to offshore siting, specifically dredging and once-through cooling systems. (550 pages). Comments made by: AHP, USDA, COE, DOC, HUD, DOI, DOT, TREA, ERDA, OEO, and State and county agencies, and concerned citizens. (ELR Order No. 61435.)

Marble Hill Nuclear Generating Station, Units 1 and 2, Jefferson County, Indiana, Sept. 27: The proposed action is the issuance of construction permits to the Public Service Company of Indiana, Inc., for the construction of the Marble Hill Nuclear Generating Station, Units 1 and 2. The MH 1 & 2 stations will employ two pressurized water reactors to produce up to 3425 MWt and 2360 MWe each. The exhaust steam will be cooled by mechanical draft cooling towers with make-up water obtained from and discharged to the Ohio River. Construction of the plant will disturb 250 acres of forest and cropland, and transmission lines constructed by the applicant will require about 3475 acres of land for the corridors. (375 pages). Comments made by: USDA, AHP, COE, DOC, HEW, HUD, DOT, ERDA, EPA, FPC, FEA, and State and local agencies and concerned citizens. (ELR Order No. 61417.)

V41 1976 OCT 8 76 UM

TENNESSEE VALLEY AUTHORITY

Contact: Dr. Peter Krenkel, Director of Environmental Planning, 720 Edney Building, Chattanooga, Tennessee 37401, (615) 755-2002.

Draft

Phipps Bend Nuclear Plant, Units 1 & 2, Hawkins County, Tennessee, Sept. 30: Proposed is the construction and operation of a 2-unit nuclear plant in Hawkins County, Tennessee. Operation of the closed-cycle cooling towers will result in evaporation of water and release of heat and minor amounts of particulates into the air. A small amount of land will be converted from agricultural to industrial use. (370 pages). (ELR Order No. 61428.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, S.W., Washington, D.C. 20590, (202) 426-4357.

FEDERAL AVIATION ADMINISTRATION

Draft

Schuyler Municipal Airport, Nebraska, Colfax County, Nebraska, Sept. 29: Proposed is the approval of an airport site and a 20-year development plan for a general utility airport at Schuyler, Nebraska. Land (370 acres) will be taken out of crop production for airport use. Adverse effects include increases in noise and emission levels in the immediate area of the airport, and the displacement of some wildlife. (130 pages). (ELR Order No. 61427.)

Final

Harry S. Truman, Airport, St. Thomas, Virgin Islands, Sept. 28: The proposed project involves the construction of a new Runway 9-27, 7,000×150 feet with parallel taxiway and attendant facilities, 1,200 feet of extended safety areas, installation of lighting and landing aids, a commercial terminal and cargo area on hydraulic fill, new general aviation facilities, construction of access road, fencing, and the removal of obstructions to air navigation. Construction of the project will alter the configuration, esthetics and ecology of Brewer's Bay. The associated dredging and filling operation will impact a total of 408 acres of the marine environment. (614 pages). Comments made by: DOI, EPA, COE, FHWA, HEW, HUD, DOC, State and local agencies, and concerned citizens. (ELR Order No. 61407.)

GARY L. WIDMAN,
General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 628-8; OPP-30122A]

ELANCO PRODUCTS CO.

Application To Register Pesticide Product Containing New Active Ingredient

On September 20, 1976, the Environmental Protection Agency (EPA) announced (41 FR 40550) that Elanco Products Co., Div. of Eli Lilly and Co., PO Box 1750, Indianapolis IN 46206, had submitted an application to register the pesticide product SWARD 50W (EPA File Symbol 1471-RNA), containing 50 percent of the active ingredient prosulfalin [N-[[(4-dipropylamino)-3,5-dinitrophenyl] sulfonyl]-S,S-dimethylsulfilimine] which has not been included in any previously registered pesticide products. The application received from Elanco Products Co. proposed that the product be classified for general use as a turf herbicide.

Application for registration of the technical grade product had not been submitted by Elanco Products. Co. prior to their application with regard to SWARD 50W. Therefore, notice is given at this time that Elanco Products Co. has submitted an application to register PROSULFALIN TECHNICAL (EPA File Symbol 1471-RNT), which contains 95% of the active ingredient prosulfalin, which has not been included in any previously registered pesticide products. PROSULFALIN TECHNICAL is intended for use in the formulation of other pesticide products.

Application was made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (86 Stat. 973, 89 Stat. 751, 7 U.S.C. 136 et seq.), and the regulations thereunder. Notice of receipt of this application is given in accordance with the provisions of section 3(c)(4) of FIFRA [40 CFR 162.2(b)(6)] and does not indicate a decision by this Agency on the application.

Any Federal Agency or other interested persons are invited to submit comments on these applications to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Room 401, East Tower, 401 M St. SW, Washington DC 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. The comments must be received on or before November 4, 1976, and should bear the EPA file symbols cited. Comments received within the specified time period will be considered before a final decision is made with respect to the pending applications. Comments received after the specified time period will be considered only to the extent possible without delaying processing of the applications. Specific questions concerning these applications should be directed to Product Manager (PM) 24, Registration Division (WH-567), Office of Pesticide Programs, at the above address or by telephone at 202/755-2196.

Notice of approval or denial of these applications to register PROSULFALIN TECHNICAL and SWARD 50W will be announced in the FEDERAL REGISTER. The labeling furnished by Elanco Products Co., as fell as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: October 4, 1976.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FRL 628-2]

SCIENCE ADVISORY BOARD ECOLOGY ADVISORY COMMITTEE

Notice of Open Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the Ecology Advisory Committee of the Science Advisory Board will be held beginning at 9 a.m., October 28-29, 1976, in the Administrator's Conference Room (Room 1101), Waterside Mall West Tower, 401 M Street SW., Washington, D.C.

This is the tenth meeting of the Ecology Advisory Committee. The agenda includes a report on the Science Advisory Board's activities; review of EPA's National Ecology Research Plan 1978-1982; response to the Committee's September 13, 1976, Advisory Statement, "Ecosystem Research Can Save Money"; discussion of the feasibility study of the possible containment or removal of kepone contaminants in the James River; ecological problems in the Office of Water and Hazardous Materials; discussion of items for the Committee's future consideration; and member items of interest.

The meeting is open to the public. Any member of the public wishing to attend, participate, or obtain additional information should contact Dr. J. Frances Allen, Executive Secretary, Ecology Advisory Committee (703) 557-7720.

THOMAS D. BATH,
Staff Director,
Science Advisory Board.

OCTOBER 1, 1976.

[FR Doc.76-29703 Filed 10-7-76;8:45 am]

[FRL 628-1]

ENVIRONMENTAL MEASUREMENTS ADVISORY COMMITTEE

Notice of Open Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the Environmental Measurements Advisory Committee will be held beginning at 8:30 am November 1 and 8:00 am November 2, 1976, in the auditorium of the U.S. Environmental Protection Agency's Environmental Research Center, Research Triangle Park, North Carolina.

This is the third meeting of the Committee. The agenda includes current activities of the Science Advisory Board; presentations by laboratory and program directors of the Center describing current measurement, instrumentation, and monitoring activities; comments on an interim method of determining the asbestos content of water samples; progress toward the establishment of a subcommittee to provide advice and assistance in the study of emissions from automotive catalytic exhaust control devices; a briefing on the activities of agency Standing Working Groups on Air and Water Monitoring; and member items of interest.

The meeting is open to the public. Any member of the public wishing to attend or obtain additional information should contact Dr. A. F. Forziati, Executive Secretary, Environmental Measurements Advisory Committee, (703) 557-7720 by close of business on October 28, 1976.

THOMAS D. BATH,
Staff Director,
Science Advisory Board.

OCTOBER 1, 1976.

[FR Doc.76-29702 Filed 10-7-76;8:45 am]

[FRL 628-4]

NATIONAL AIR POLLUTION CONTROL TECHNIQUES ADVISORY COMMITTEE

Notice of Open Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the National Air Pollution Control Techniques Advisory Committee will be held at 9 am on November 3 and 4, 1976, at the U.S. Environmental Protection Agency, Region IX, Conference Rooms A, B, and C (2nd floor), 100 California Street, San Francisco, California 94111.

The purpose of the meeting will be to discuss two New Source Performance Standards to be proposed under sec. 111 of the Cleah Air Act—hydrocarbon emissions from degreasing facilities and revision to the nitrogen oxide standard for fossil fuel-fired steam generators. A third item on the agenda will be a discussion of simplifying the data collection and technical documentation in the development of the new source performance standards.

Also on the agenda is a discussion of the revision of the standard of performance for primary aluminum reduction plants, which was promulgated on January 26, 1976 (41 FR 3826). In August 1976, the Anaconda Co., Aluminum Division, submitted to the Administrator information on fluoride emissions and a request to revise the standard of performance. Based on information submitted in support of this request and a preliminary Environmental Protection Agency investigation at an Anaconda aluminum plant, the Agency is reconsidering the standard of performance. Petitions for review of this standard of performance filed by the Aluminum Co. of America, National Steel Corp., Kaiser Aluminum and Chemical Corp., and Revere Copper and Brass Inc. are also currently pending in the United States Court of Appeals of the District of Columbia.

All meetings are open to the public. Anyone wishing to attend or submit a paper should contact Mr. Don R. Goodwin, Director, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

The area code and telephone number are (919) 688-8146, extension 271.

Date: October 1, 1976.

ROGER STRELOW,
Assistant Administrator for
Air and Waste Management.

[FRL 629-1]

NATIONAL DRINKING WATER ADVISORY COUNCIL

Open Meeting

Pursuant to Public Law 92-423, notice is hereby given that a meeting of the National Drinking Water Advisory Council established under Public Law 93-523, the "Safe Drinking Water Act," will be held at 9:00 a.m., October 27, 1976, in Room 402, and at 8:30 a.m., October 28, 1976, in Room 436, Statler Hilton Hotel, Park Square at Arlington Street, Boston, Massachusetts 02203.

The purpose of the meeting will be to discuss the status of the Environmental Protection Agency's current work on organics in drinking water and the responses to EPA's Adanvce Notice of Proposed Rule Making for the control of organics in drinking water. The background, purpose, and public comments on EPA's proposed Underground Injection Control Regulations will be discussed. In addition, regional water supply problems will be addressed.

The meeting will be open to the public. The Council encourages the hearing of outside statements and allocates a portion of the meeting time for public participation. Any outside parties interested in presenting an oral statement should petition the Council in writing. The petition should include the general topic of the proposed statement and and the petitioner's telephone number.

Any person who wishes to file a written statement can do so before or after a Council meeting. Accepted written statements will be recognized at Council meetings.

Any member of the public wishing to attend the Council meeting, present an oral statement, or submit a written statement should contact Patrick Tobin, Executive Secretary for the National Drinking Water Advisory Council, Office of Water Supply (WH-550), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

The telephone number is: Area Code 202/426-8847.

EDWIN L. JOHNSON,
Acting Assistant Administrator
for Water and Hazardous Materials.

[FRL 628-6; OPP-33000/468]

PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of Section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ["Interim Policy Statement"]. On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 [P.L. 94-140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, SW., Washington DC 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

V 41 1976 OCT 8 76 UM

PM 11, 12, & 13—202/755–9315	PM 15, 16, & 17—202/426–9425
PM 21 & 22—202/426–2454	PM 23—202/755–1397
PM 24—202/755–2196	PM 25—202/426–2632
PM 31—202/426–2635	PM 32—202/426–9486
PM 33—202/755–9041	PM 34—202/426–9490

The Interim Policy Statement requires that claims for compensation be filed on or before December 7, 1976. With the exception of 2(c) applications not subject to the new Section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made on or before November 8, 1976.

Dated: October 5, 1976.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

APPLICATIONS RECEIVED (OPP–33000/468)

EPA Reg. No. 16–58. Dragon Chemical Corp., PO Box 7311, Roanoke VA 24019. DRAGON 5% MALATHION DUST. Active Ingredients: Malathion 5%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM16

EPA Reg. No. 59–119. Cooper Div., Burroughs Wellcome Co., 3030 Cornwallis Rd., Research Triangle Park NC 27709. 4% MALATHION DUST. Active Ingredients: Malathion (0,0-dimethyl dithiophosphate of diethyl mercaptosuccinate) 4.0%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM16

EPA Reg. No. 100–455. Ciba-Geigy, Agricultural Div., PO Box 11422, Greensboro NC 27409. MILOGARD 80W. Active Ingredients: Propazine: 2-chloro-4,6-bis (isopropylamino)-s-triazine 80%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM25

EPA Reg. No. 148–359. Thompson-Hayward Chemical Co., PO Box 2383, Kansas City KS 66110. MALATHION DUST NO. 5. Active Ingredients: Malathion 5.0%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM16

EPA Reg. No. 148–1016. Thompson-Hayward Chemical Co. 4% MALATHION DUST. Active Ingredients: Malathion 4.00%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM16

EPA Reg. No. 148–1120. Thompson-Hayward Chemical Co. DED–WEED MCPA AMINE SALT. Active Ingredients: Dimethylamine salt of 2-methyl-4-chlorophenoxyacetic acid 52.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

ROHM AND HAAS CO.

Issuance of Experimental Use Permit

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) *et seq.*), an experimental use permit has been issued to the following applicant. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 707–EUP–80. Rohm and Haas Company, Philadelphia, Pennsylvania 19105. This experimental use permit allows the use of 9,000 pounds of the herbicide 2,4-dichlorophenyl p-nitrophenyl ether on wheat to evaulate control of various weeds. A total of 2,925 acres is involved; the program is authorized only in the States of Arizona, California, and Oregon. The experimental use permit is effective from September 23, 1976, to October 4, 1977. A temporary tolerance for residues of the active ingredient in or on wheat has been established.

Interested parties wishing to review the experimental use permit are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., S.W., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. This file will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: October 5, 1976.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

NATIONAL COMMISSION ON SUPPLIES AND SHORTAGES

PUBLIC HEARING

OCTOBER 5, 1976.

The National Commission on Supplies and Shortages hereby announces the date, time, and location of its previously-announced public hearing. The hearing will be held on Wednesday, October 13, in Room 2010, New Executive Office Building, 726 Jackson Place, NW, Washington, DC. The hearing will begin at 9:30 am and run through 5:30 pm with a break for lunch. The tentative list of witnesses and the subjects they will cover are as follows:

General Issues

9:30–11:30 — Mr. Edgar R. Fiedler, Vice President, Economic Research, The Conference Board.
Mr. Jack Carlson, Salt Lake City, Utah (Former Assistant Secretary for Energy and Minerals, Department of Interior).
Ms. Jocelyn Gutchess, Senior Associate, Ruttenberg, Friedman, Kilgallon, Gutchess and Associates, Inc.

The International Perspective

11:30–12:30 — Dr. Timothy Stanley, President, International Economic Policy Association.
Dr. C. Fred Bergsten, Senior Fellow, The Brookings Institution.

Materials Information

1:30–3:30 — Dr. William L. Fisher, Assistant Secretary for Energy and Minerals, Department of the Interior.
Dr. James Boyd, President, Materials Associates.
Michael West, Editorial Director, Mining Journal.

Economic Stockpiling

3:30–4:30 — Mr. Paul E. Kindig, Manager, Material Resource and Traffic Operation, General Electric Company.
Mr. R. D. Coursen, Director, The Malayan Tin Bureau.
Mr. William Lawrence, Vice President, Willking International.

OTA Studies

4:30–5:00 — Mr. Emilio Q. Daddario, Director, Office of Technology Assessment.

Recycling

5:00–5:30 — Mr. A. Blakeman Early, Environmental Action, Inc.

The above list is subject to change. A final witness list will be made available on the day of the hearing.

Several individuals have expressed a desire to submit statements for the record. The Commission welcomes such statements and will accept any received on or before Wednesday, October 20, 1976. All written statements plus a summary of the hearing transcript will be published by the Commission as an addendum to its final report.

GEORGE C. EADS,
Executive Director.

NATIONAL COMMISSION ON NEW TECHNOLOGICAL USES OF COPYRIGHTED WORKS

MEETING

A meeting of the National Commission on New Technological Uses of Copyrighted Works will be held at 10 a.m. on October 21, and 9 a.m. on October 22, 1976, at the offices of the Commission, located in Room 910, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia. The proceedings will be devoted to the presentation of testimony providing information relating to the problems of photocopying of copyrighted materials.

Various invited witnesses will testify on their ongoing activities relating to this subject. This is the first in a number of fact-finding hearings which will be held on the photocopying issue. The hearings will be open to the public.

All members of the public, including representatives of groups concerned, are invited to submit requests to present testimony in future hearings on this subject. Such request should be accompanied by brief written statements identifying the individual or group requesting to testify on the issue of photocopying of copyrighted materials and the evidence desired to be given.

All such requests should be addressed to Robert W. Frase, Assistant Executive Director, National Commission on New Technological Uses of Copyrighted Works, Washington, D.C. 20558.

ARTHUR J. LEVINE,
Executive Director.

FEDERAL ENERGY ADMINISTRATION

FEDERAL POLICY ON LIQUEFIED NATURAL GAS (LNG) IMPORTS

Public Hearing

The Federal Energy Administration (FEA), on behalf of the Energy Resources Council (ERC), hereby announces it will conduct public hearings and receive public comments on selected issues associated with Liquefied Natural Gas (LNG) imports.

In his energy message of February 26, 1976, the President stated imports of liquefied natural gas (LNG) could be expected to grow to supplement our declining domestic supply of natural gas and directed the ERC to implement a new national policy which would balance energy needs with the assurance that the United States would not become overly dependent on LNG imports.

The ERC established an inter-agency task force to investigate various aspects of LNG imports, including such issues as the potential world market in LNG, the implications of dependence upon LNG imports on various regions of the U.S., and the impact of domestic energy decisions on LNG import policy.

Upon completion of this initial effort, the ERC, on August 5, 1976, issued a policy statement elaborating on the President's LNG policy. This statement included guidance on such issues as import dependency, pricing, government financing of LNG projects, and contingency planning in the event of supply cutoff.

The ERC also identified certain additional issues which would require further analysis and directed the Task Force to investigate these issues and report its findings to the ERC. These additional issues are (1) the procedures and problems associated with the siting and safety of LNG terminals and (2) the design dimensions and implementation of supply contingency plans.

In conducting its analysis, the ERC is interested in obtaining input from all interested persons. To this end the ERC and FEA are particularly interested in obtaining at the hearing, data, views and arguments on the following questions:

1. Procedures & Problems Associated with LNG Terminal Siting and Safety.—What are the major procedural and substantive problem areas in obtaining full approval for terminal sites and what actions could be taken to mitigate them?

To the extent that overlaps or gaps in authority exist among Federal agencies, and between Federal and state/local agencies, what is the impact?

How can the LNG import site approval process be streamlined?

What has been the impact of delays in obtaining approval for these LNG import projects?

What are the major unresolved questions or problems with respect to safety, and what may be needed to resolve them?

Would a uniform set of criteria or guidelines or increased Federal analytical efforts assist in the resolution of some or all of these problems?

How do safety issues affect the siting of facilities?

Should LNG facilities be concentrated in a few sites or should they be dispersed?

2. *Supply Contingency Plans.*—What specific techniques or procedures should be included in a supply contingency plan? Interested parties should address the following:

Length of supply interruption for which a contingency plan should be designed.

Establishing additional gas reserves (either LNG or gas storage).

Mandatory exchange agreements with pipeline interconnections where such interconnections do not exist or are inadequate as to size or location.

Stand-by mandatory authority for allocating gas supplies among gas pipeline and distribution systems.

Use of SNG or propane/air plants to provide contingency supplies.

Methodology for planning, designing and operating a contingency plan, including who is to bear that cost.

What would be the effect of requiring such plans on proposed LNG projects?

The public hearings will be held at 9:30 a.m., e.d.s.t. on October 26, 1976, and will continue, if necessary, on October 27, 1976, in Room 3000A, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C.

Any person who has an interest in this proceeding, or who is a representative of a group or class of persons that has an interest in it may make a written request for an opportunity to make an oral presentation at the hearing. Such a request should be directed to Executive Communications, FEA, and must be received before 4:30 p.m., e.d.s.t. on October 15, 1976. Such a request may be hand delivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why she or he is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through October 22. Each person selected to be heard will be so notified by FEA before 4:30 p.m., e.d.s.t., October 18 and should submit 100 copies of his or her statement to FEA, Room 3309, 12th and Pennsylvania Avenue, N.W., before 4:30 p.m., e.d.s.t., on October 22.

FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings, and there will be no cross-examination of persons presenting statements.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

Interested persons who do not intend to participate in the hearings, or who wish to submit additional information, are invited to submit written data, views, or arguments with respect to the subject matter set forth in this notice to Executive Communications, Room 3309, Federal Energy Administration, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Such written comments should specify Box JG, at the address set forth above, and should be identified on the outside of the envelope and on documents submitted with the designation, "LNG Import Policy."

Fifteen copies should be submitted. All comments received by October 26, 1976, and all relevant information, will be considered by the Federal Energy Administration. Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to the determination.

Issued in Washington, D.C., October 6, 1976.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

TRANS-ALASKA PIPELINE

Priorities Assistance for Construction

CROSS REFERENCE: For a document regarding the priorities assistance and allocations support under the Defense Production Act of 1950, as amended, for the development and production of Alaska North Slope oil resources, see FR Doc. 76-29543 appearing in the Notices Section of this issue.

FEDERAL HOME LOAN BANK BOARD

FEDERAL SAVINGS AND LOAN ADVISORY COUNCIL

Meeting

OCTOBER 4, 1976.

Pursuant to section 10(a) of Pub. L. 92-463, entitled the Federal Advisory Committee Act, notice is hereby given of the meeting of the Federal Savings and Loan Advisory Council on Monday, Tuesday, and Wednesday, November 29, 30, and December 1, 1976. The meeting will commence at 9 a.m. on November 29, at 9 a.m. November 30, and 9 a.m. December 1. The locations of the meetings are listed below.

MONDAY, NOVEMBER 29

9:30 a.m., Valley Forge Room, Hyatt Regency Washington.
The intent of present insurance regulations relative to:
1. Market value appraisal.
2. The accounting treatment of loss reserves under the AICPA Audit Guide.
3. The effect if FASB-12 Market Value Accounting is expanded to include debt securities.
FHL Bank Board investment in service corporations financing low and moderate income projects.
Review of service charges on savings accounts.
Up-date on Mortgage Corporation regarding inner city lending and multi-family advance commitments.
Federal Home Loan Bank Board responsibilities under Federal Home Loan Mortgage Disclosure Act, Truth in Lending Act, Fair Credit Reporting Act, Flood Insurance Act, and similar acts.
2 p.m., Federal Home Loan Bank Board Building.
Role of holding companies in the S&L industry.
Expansion of list of securities eligible as liquid assets.
Review of scheduled items:
a. Real estate transferred to service corporations.
b. Mobile homes "slow loans."
c. Modification of construction loans on 1-4 unit properties.
d. Slow loan definition—time element.
Restatement of the importance of the FHLB System to the housing industry.
Federal Home Loan Banks' dividend policy.
Capital adequacy.
Establish farm loan category.

TUESDAY, NOVEMBER 30

9 a.m., Federal Home Loan Bank Board Building.
Continued discussion of Monday afternoon topics.
2 p.m., Columbia Room A, Hyatt Regency Washington.
General Discussion.

WEDNESDAY, DECEMBER 1

9 a.m., Columbia Room C, Hyatt Regency Washington.
General Discussion.

The meeting of the Federal Savings and Loan Advisory Council is open to the public.

GARTH MARSTON,
Acting Chairman.

FEDERAL MARITIME COMMISSION

ATLANTICA, S.P.A. CONSORTIUM

Agreement Filed

Notice is hereby given that the following agreement, accompanied by a statement of justification, has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814)

Interested parties may inspect and obtain a copy of the agreement and the statement of justification at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W. Room 10126; or may inspect the agreement and the statement of justification at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 25, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Stanley O. Sher, Esquire, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street, N.W., Washington, D.C.

Agreement No. 9958-3, among the members of the above-named agreement, previously appeared in the FEDERAL REGISTER of July 8, 1976, Vol. 41, No. 132, page 28011. This amendatory agreement has now been modified to delete Canadian Pacific Steamship Limited as a party and to add to the geographic scope of the basic agreement. French ports in the Bay of Biscay from Les Sables d'Olonne to the Spanish border.

By Order of the Federal Maritime Commission.

Dated: October 5, 1976.

FRANCIS C. HURNEY,
Secretary.

[Docket No. 76-55]

MATSON NAVIGATION CO.

Petition for Declaratory Order

Notice is hereby given that Matson Navigation Company has petitioned the Commission for a declaratory order regarding capitalization of the cost of funds used to finance the construction of a new vessel.

Matson Navigation Company (Matson") is a common carrier of property by water, operating, among other routes, between ports of the Pacific Coast of the United States and ports of the State of Hawaii. Matson has a new containership under construction by Bath Iron Works Corporation under a contract contemplating progress payments during construction.

Matson Navigation Company ("Mat-

(1) Authorizing it to capitalize, as a part of the capital cost of the vessel, the cost to Matson, during the construction period, of funds used to finance the construction of such new containership;

(2) Stating that such capitalized cost of funds will be recognized by the Commission as part of Matson's investment in the vessel for ratemaking purposes;

(3) Stating that such ruling will be applicable to any subsequent use by Matson of funds used for construction of other vessels, subject to such amendment or modification thereof as may be made by the Commission from time to time.

Matson requests that the Commission determine the cost of funds to be capitalized as (a) actual interest paid on funds borrowed to meet construction costs, and (b) income foregone by Matson on other funds used to meet construction costs, calculated at the average rate earned during the preceding calendar month on funds from which such other funds are withdrawn. Matson requests, however, that the Commission defer ruling as to the capitalization of income foregone on funds representing deferred income taxes.

By means of this notice interested persons, including the Commission's Bureau of Hearing Counsel, are invited to comment on the petition. Any such comments, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573 on or before October 26, 1976. Any person desiring a hearing on the petition shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. A copy of any such comments shall be forwarded to counsel for petitioner, David F. Anderson, 100 Mission Street, San Francisco, California 94105.

Interested parties may inspect and obtain a copy of the petition at the Washington office of the Federal Maritime Commission, 1100 L St., NW., Room 11409; or may inspect the petition at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket Nos. G-9947, et al.]

ASHLAND OIL, INC., ET AL.

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

SEPTEMBER 28, 1976.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 27, 1976, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applictions in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

LANDS WITHDRAWN IN PROJECT NO. 1261

Finding and Order Vacating Land Withdrawal Under Section 24 of the Federal Power Act

SEPTEMBER 29, 1976.

The Forest Service, United States Department of Agriculture, has requested that the land withdrawal for transmission line Project No. 1261 be vacated insofar as it pertains to lands within the Roosevelt National Forest, thereby requiring Commission consideration under Section 24 of the Federal Power Act. This order pertains to all lands withdrawn for Project No. 1261. The lands affected by the withdrawal are listed in the Attachment hereto.

Project No. 1261 consisted of several 13 kV lines with an aggregate length of 5.7 miles, near the towns of Gold Hill, Salina, Sugarloaf, and Switzerland Park, in Boulder County, Colorado. The 30-year license for the project, held by the Public Service Company of Colorado, expired on February 15, 1967.

By letter dated April 6, 1967, the staff advised the Public Service Company of Colorado that the subject transmission lines were not primary lines or part of a "project" as defined in Section 3(11) of the Federal Power Act and, therefore, were not within the licensing authority of the Commission. Consequently, the Company obtained authorization from the Bureau of Land Management and the Forest Service for the continued occupancy of the Federal lands traversed by the lines.

The Commission finds, that the land withdrawal for Project No. 1261 no longer serves a useful purpose and should be vacated in its entirety.

The Commission orders, the land withdrawal for Project No. 1261 is hereby vacated in its entirety.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

PROJECT NO. 1261—COLORADO
PUBLIC SERVICE COMPANY OF COLORADO
SIXTH PRINCIPAL MERIDIAN, COLORADO

Portions (totaling about 73 acres) of the following described lands were withdrawn pursuant to the filing on November 28, 1933, as supplemented March 6, 1936, of an application for license for Project No. 1261 for which the Commission gave notice of land withdrawal to the General Land Office (now Bureau of Land Management) by letter dated March 26, 1936.

LANDS WITHDRAWN IN PROJECT NO. 1093

Order Vacating Land Withdrawal Under Section 24 of the Federal Power Act

SEPTEMBER 29, 1976.

The Forest Service, United States Department of Agriculture, has requested that the land withdrawal for Project No. 1093 be vacated in its entirety, thereby requiring Commission consideration under Section 24 of the Federal Power Act.

By letter dated May 26, 1930, the Commission gave notice to the General Land Office (now Bureau of Land Management) of the withdrawal of the following described land pursuant to the filing by L. P. Starkey of Fort Collins, Colorado, on May 21, 1930, of an application for license for Project No. 1093:

SIXTH PRINCIPAL MERIDIAN, COLORADO

T. 7 N., R. 73 W.,
Sec. 20, NE¼SW¼.
(40 acres.)

A re-examination of our records shows that only 1.63 acres within said subdivision were affected by the project.

Project No. 1093 was an 18-horsepower diversion-conduit development on Fall Creek, a small tributary of the South Fork Cache la Poudre River, near the north boundary of Rocky Mountain National Park, in Laramie County, Colorado. The last of three 10-year licenses for the project expired on August 25, 1960, and an incomplete application for a fourth license was dismissed by Commission order issued August 12, 19764. The Forest Service reports that power development was discontinued many years ago and that the Federal land involved has been restored to a satisfactory condition.

The Commission finds, that the land withdrawal for Project No. 1093 no longer serves a useful purpose.

The Commission orders, that the land withdrawal for Project No. 1093 is hereby vacated in its entirety.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER76-911]

ARIZONA PUBLIC SERVICE CO.

Cancellation and Termination of Rate Schedule

SEPTEMBER 30, 1976.

Take notice that, effective September 30, 1976, Supplement No. 11 to Arizona Public Service Company Rate Schedule FPC No. 6 is to be cancelled, pursuant to notice received by the Company from Navajo Tribal Utility Authority.

Take further notice that, effective September 30, 1976, Navajo Tribal Utility Authority will cease furnishing electric service for the construction needs at the Navajo Generating Station, and that therefore Supplement No. 10 to the wholesale Power Supply Contract between Arizona Public Service Company and Navajo Tribal Utility Authority will, by its own terms, expire on September 30, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29633 Filed 10-7-76;8:45 am]

[Docket No. RP75-105]

COLUMBIA GULF TRANSMISSION CO.

Proposed Changes in FPC Gas Tariff

OCTOBER 1, 1976.

Take notice that on September 24, 1976 Columbia Gulf Transmission Company (Columbia Gulf) tendered for filing Second Substitute Twenty-Second Revised Sheet No. 7 to its FPC Gas Tariff, original Volume No. 1.

Columbia Gulf states that this tariff sheets represents its settlement rates in the referenced docket, and is filed in accordance with ordering Paragraph (C) of the Commission's Order issued September 13, 1976 in the proceeding.

Columbia Gulf states that copies of the filing were made on Columbia Gas Transmission Corporation.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before October 19, 1976. Comments will be considered by the Commission in determinining the appropirate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29646 Filed 10-7-76;8:45 am]

[Docket No. CP76-523]

COLUMBIA GAS TRANSMISSION CORP.

Application

OCTOBER 1, 1976.

Take notice that on September 16, 1976, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP76-523 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Gas Transport, Inc. (Gas Transport), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to receive into its Lines Q-217 and C-106 in Barlow Township, Washington County, Ohio, all of the gas delivered by Gas Transport, which gas would be purchased under the gas purchase agreement between Gas Transport and Dolph Anderson (Anderson), a small producer, by which Gas Transport would pay Anderson $1.42 per Mcf of gas at 14.7 psia, increasing one cent per Mcf every three months starting October 1, 1976. It is stated that Applicant would redeliver such gas to an existing point of delivery to Anchor Hocking Corporation (Anchor Hocking) at Lancaster, Ohio, for the account of Gas Transport. Applicant proposes to charge for such transportation 21.99 cents per Mcf of gas at 14.4 psia and would retain for company-use and unaccounted-for gas 3.6 percent of the total volume of gas delivered into its system by Gas Transport.

Applicant proposes to transport gas delivered by Gas Transport in the Ohio counties of Sciota, Jackson, Lawrence, Gillia, Meigs, Athens, Vinton, Hocking, Fairfield, Perry, and Muskingum, on a best efforts basis subject to the limitation that all gas received from Gas Transport and all other existing transportation and exchange agreements between Applicant, Gas Transport and/or Anchor Hocking would not result in a total delivery to Anchor Hocking at Lancaster, Ohio, in excess of 12,000 Mcf per day.

It is stated that the transportation obligation of Applicant hereunder would be subject to the limits of its pipeline capacity and to its customer service obligations, and that transportation charges would be subject to adjustment as reflected in pending and future FPC rate filings.

The application further states that the facilities of Gas Transport are physically located in an area of declining natural gas production, and to supplement its gas supply, Gas Transport became a wholesale customer of Applicant, which supplies approximately 75 percent of Gas Transport's daily requirements. In the winter season of 1975-76, it is indicated, Columbia Transmission curtailed its normal delivery to Gas Transport by 56 percent and has estimated that curtailment for the winter period of 1976-77 to Gas Transport would be 68 percent of normal delivery. The application states that due to a dwindling supply of its own gas and severe curtailment by Applicant, Gas Transport has expanded its operations into geographic regions of greater natural gas potential, and has several opportunities either to purchase or develop natural gas reserves in the twelve-county area hereinbefore enumerated.

Applicant asserts that the transportation of gas as requested herein would permit utilization of existing pipeline facilities, making it unnecessary for Gas Transport to undertake major duplicative pipeline construction in the same area.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 22, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this appli ation if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29649 Filed 10-7-76;8:45 am]

VOL 41 NO 197 OCT 8 1976 UM

[Docket No. CP76–534]

EASTERN SHORE NATURAL GAS CO.

Application

OCTOBER 1, 1976.

Take notice that on September 22, 1976, Eastern Shore Natural Gas Company (Applicant), 201 East Main Street, Salisbury, Maryland 21801, filed in Docket No. CP76–534 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to render a special service to any person to whom it normally sells or for whom it normally transports natural gas or who, although he may not normally receive service from Applicant, requires such service to meet an emergency on his system or to offset curtailments to high-priority customers, but only where pre-existing high-priority users would otherwise be without natural gas supply due to emergency situations or curtailment, and Applicant would so condition its sales agreement to any such purchaser, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes that the rate schedule under which such emergency service would be provided (SG–1) would apply to all natural gas which Applicant may have available from time to time, and from whatever source, which it is willing to sell on an interruptible basis and at an incremental price to offset curtailment or alleviate emergencies on the system of any buyer. It is said that sales made hereunder would be of short-term duration, would be made on such basis as may be mutually agreeable to buyer and Applicant and in such manner as to meet the stated emergency but not to impair Applicant's ability to render service to its other customers. Sales for resale would be at rates satisfactory to the Federal Power Commission, to whom copies of all agreements covering such sales would be submitted, it is stated, and any agreements so submitted would be accompanied by relevant cost data, including the cost of the purchased gas, and cost of transportation, necessary to demonstrate the manner in which the proposed service is consistent with the public interest.

Applicant asserts that it is a natural-gas company within the meaning of the Natural Gas Act only by virtue of its unique geographic location on the Delmarva Peninsula where its facilities cross the borders of several states, and that it has no storage facilities of its own and is unable on its own behalf to accommodate major fluctuations in gas supply.

It is maintained that difficulties encountered during the 1975–76 winter compel Applicant to seek the authorization requested herein, so that it may be protected against the economically precarious situation in which it found itself as a result of its efforts to offset an impending shortage during the past winter.

Applicant explains that on October 15, 1975, in Docket Nos. RP71–121 and RP72–21 Applicant submitted a report as to how projected shortages would impact on its system, how it planned to deal with such shortages, and the flexibility it and its customers might call upon in dealing with these supply deficiencies.

It is stated that in that report, Applicant indicated that it purchases its entire supply of natural gas from Transcontinental Gas Pipe Line Corporation (Transco), that its entitlement for November 1, 1975, through March 31, 1976, was expected to be 1,206,986 Mcf of gas based upon Transco's existing, flowing gas supply, and that this entitlement represented sharp curtailment of supply and indicated that Applicant would have to curtail deliveries to jurisdictional customers, including some sales in Priority 1.

Further, it is stated that Applicant also submitted curtailment projections based upon its receipt from Transco of an entitlement of 2,424,000 Mcf of gas, which entitlement assumed that Transco would be able to effectuate emergency gas purchases and was not based on Transco's existing, flowing gas supply. Even on the basis of that entitlement, it is said, Applicant's customers were expected to be curtailed by approximately 220,085 Mcf, but only large, industrial nonjurisdictional customers would be affected.

Applicant indicates that because of this threatened adverse impact on its market area, preliminary negotiations were completed on October 6, 1975, with McCormick Oil and Gas Corporation (McCormick) for the purchase of gas on a 60-day emergency basis from the North Johnson Bayou Prospect and from the Carter Well, Kings Bayou, both in Cameron Parish, Louisiana. It is said that these emergency purchases, each in the amount of some 3,000 Mcf per day, were to be for the benefit of Applicant's direct industrial customers and that the transportation was to be provided by Texas Eastern Transmission Corporation (Tetco) and Transco.

It is stated that Applicant was to pay McCormick $1.40 per Mcf for all gas thus delivered and was to pay any expenses to be incurred in connection with the transportation and delivery of the gas, including the cost of building field laterals which would be required to transport the gas from the wells in question to the facilities of Transco and Tetco plus all related taxes. The sales and deliveries of such gas were expected to commence on or about January 1, 1976, it is said.

Further, it is stated that on September 9, 1975, in Docket No. RP76–9, Applicant tendered for filing tariff sheet revisions to its FPC Gas Tariff which provided for an excess and emergency service which would have facilitated the sale of gas purchased on an emergency basis to all classes of customers on a nondiscriminatory basis.

It is shown that on September 30, 1975, the Commission issued an order rejecting the aforementioned revised tariff sheets, presumably because of earlier Commission disapproval of Transco's efforts to be saved harmless in selling emergency gas it might purchase at prices in excess of the National Area Rate.

While Applicant was thus aware of the fact that it might be faced with certain difficulties in disposing of gas to high-priority customers for which it had agreed to pay $1.40 per Mcf plus transportation charges, Transco's projected curtailment was of such magnitude that it is maintained that Applicant regarded its exposure as minimal, and in due course consummated the agreement to purchase the gas from McCormick. However, it is shown that the unusually warm weather of the 1975–76 winter, plus Transco's ability to reduce its projected curtailments, resulted in Applicant's having available to it sufficient gas to meet the high-priority requirements of its market area. Thus, Applicant states that the McCormick gas was no longer needed for its intended purpose.

It is stated that since the Commission's order of April 30, 1975, denied Applicant the opportunity to dispose of such gas for high-priority uses, Applicant's only choice was either to sell this gas on an interruptible basis for boiler fuel or to cancel the McCormick contract, which Applicant chose to do to its financial detriment.

It is said that Transco's curtailment impact study for the period November 1, 1976, through October 31, 1977, indicates that Applicant's annual period allotment would be 2,730,000 Mcf for Priority 1 and Priority 2A, with a winter period allotment of 1,123,000 Mcf. Applicant asserts that since Transco is Applicant's exclusive pipeline supplier, Applicant would once again have to locate supplies of gas elsewhere if it is to meet the high-priority requirements of its market. It is maintained that Applicant must assume that such gas can only be obtained at relatively high prices and that this application is submitted in an effort to assure Applicant's full recovery of all costs incurred in providing the emergency service in the event it goes forward once more to meet its service obligations to its market.

Applicant indicates that it does not intend to consummate emergency gas purchases again unless it receives some assurance that it can lawfully recoup the additional costs of such gas. Applicant lieves that, with such assurance, it can purchase sufficient volumes of emergency gas to offset curtailment of high-priority customers during this coming winter-heating season and the service herein proposed is designed to enable it to meet that objective.

Applicant states that no additional facilities would be required to effectuate such service.

It is stated that the Commission itself has, in Section 2.79 of its General Policy and Interpretations, recognized that certain customers should be accorded an opportunity to purchase natural gas directly in the intrastate market for their own use and obtain the transportation of that gas by interstate pipelines. Inherent in the policy of Section 2.79, it is said, is the conclusion that certain customers can obtain significant benefits by paying incremental prices for supplies of natural gas not available through traditional pipeline sources and should

be permitted to do so. Applicant asserts that its proposal brings the benefit of this policy to those customers who are too small in and of themselves to utilize the procedures of Section 2.79 by permitting the pipeline itself to purchase a short-term supply of gas to be sold to those customers desiring such service at incremental rates. It is maintained that approval of this application would avoid the alternatives of inflationary alternative fuel supplies or unemployment and attendant economic dislocation produced by the unavailability of a needed energy source. Further, it is said that the service could be rendered promptly and on a basis which would make it subject to close Commission scrutiny.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 26, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76–29637 Filed 10–7–76;8:45 am]

[Docket No. ER76–902]

EDISON SAULT ELECTRIC CO. CLOVERLAND ELECTRIC COOPERATIVE, INC.

Filing

SEPTEMBER 30, 1976.

On September 10, 1976, Edison Sault Electric Company (Edison Sault) and Cloverland Electric Cooperative, Inc. (Cloverland) submitted for filing supplemental agreement No. 5(a) to Rate Schedule FPC No. 2 between the two parties. This contract has been executed pursuant to a contract between Edison Sault and the Secretary of the Army, Contract DA–20–064–ENG–632, a contract to which Cloverland is a third party beneficiary.

The contract filed herein relates to currently effective wheeling and demand charges for energy delivered to Cloverland. Cloverland has filed a Certificate of Concurrence. Such charges become effective within 30 days from the date of filing.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 5, 1976, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76–29630 Filed 10–7–76;8:45 am]

[Docket Nos. G–2730, *et al.*]

HILDA B. WEINERT, ET AL.

Intent To Act

OCTOBER 1, 1976.

On August 31, 1976, Natural Gas Pipe Line Company of America and Transcontinental Gas Pipe Line Corporation filed a renewal of a joint motion for an order approving a settlement agreement in this docket certified on November 11, 1974. The settlement proposes an arrangement for dividing the remainig production from the La Gloria Field, Jim Wells and Brooks Counties, Texas, between the two pipelines. The settlement has been effectuated up to now on a temporary basis subject to payback conditions pursuant to temporary authorizations issued November 15, 1974, January 17 and August 19, 1975, and March 31, 1976, pending submission of new gas sales agreements and agreement amendments conforming to the settlement terms by all the La Gloria Field producers subject to the present proceeding.

The present joint motion advises that all producers have made the the necessary submissions. In view of the numerous submisisons that are involved, additional time is required for review beyond the thirty days provided for action on the present motion by Section 1.12(e) of the Commission's Rules of Practice and Procedure.

The Commission finds: It is necessary and in the public interest to extend the time limit for action on the renewed joint motion.

The Commission orders: The joint motion shall not be deemed denied by the passage of time.

By Direction of the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76–29647 Filed 10–7–76;8:45 am]

[Docket No. RP73–14 (PGA76–4)]

MICHIGAN WISCONSIN PIPE LINE CO.

Proposed Change in Rates

OCTOBER 1, 1976.

Take notice that on September 27, 1976, Michigan Wisconsin Pipe Line Company (Mich Wis) tendered for filing a revised tariff sheet to its FPC Gas Tariff, Second Revised Volume No. 1, seeking increased rates under the purchased gas cost adjustment provision of its tariff and Commission Opinion No. 770. The increase reflects an increase in annual jurisdictional rates of $212 million reflecting increased costs of purchased gas based on increases resulting from Commission Opinion Nos. 770 and 749 and an increase in the cost of gas imported from Canada; a regular surcharge to recover approximately $29 million; and a special surcharge to recover increased costs as a result of the effect of Opinion No. 770 for the period July 27 through October 31, 1975, of $22.9 million.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 14, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76–29642 Filed 10–7–76;8:45 am]

[Docket No. RP71–16 (Southern System) (PGA76–6)]

MIDWESTERN GAS TRANSMISSION CO.

PGA Filing Pursuant to Opinion No. 770

OCTOBER 1, 1976.

Take notice that on September 27, 1976, Midwestern Gas Transmission Company (Midwestern) tendered for filing Second Substitute Fifteenth Revised Sheet No. 5 to Third Revised Volume No. 1 to its FPC Gas Tariff to be effective on October 27, 1976.

Midwestern states that the purpose of this revised tariff sheet is to adjust Midwestern's rates for its Southern System pursuant to the PGA provision of Article XVII of the General Terms and Conditions to reflect increased purchased gas costs resulting from the rate increase

filed September 27, 1976, by its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) which is based solely on producer filings made pursuant to Opinion No. 770. The annualized amount of claimed purchased gas cost increases is $64,554,462 or 36.45 cents per Mcf

Midwestern requests waiver of Sections 1.2 and 1.3 of Article XVII of its FPC Gas Tariff in order to make the revised tariff sheet effective on October 27, 1976. Midwestern states that the proposed effective date is in accord with Opinion No. 770 which specifically allows such PGA increases to become effective on that date.

Midwestern states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29640 Filed 10-7-76;8:45 am]

[Docket No. RP75-20]

MISSISSIPPI RIVER TRANSMISSION CORP.

Proposed Change in Rates

OCTOBER 1, 1976.

Take notice that on September 24, 1976, Mississippi River Transmission Corporation ("Mississippi") tendered for filing six (6) copies of Substitute Forty-Fourth Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, to become effective September 27, 1976, and six (6) copies of Substitute Forty-Sixth Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, to become effective October 1, 1976.

Mississippi states that the instant tariff sheets are being submitted to adjust Mississippi's effective base tariff rates to reflect the appropriate level of transportation costs associated with Mississippi's purchases of gas in the Mills Ranch Field. Mississippi notes that in accordance with the terms of its transportation agreement with Natural Gas Pipeline Company of America ("Natural"), Natural transports natural gas for Mississippi from the Mills Ranch Field in consideration for the right of Natural to purchase one-third (⅓) of the subject gas at eighty-five percent (85%) of the actual cost of such gas to Mississippi. Accordingly, the cost to Mississippi of such transportation services varies directly with the cost of the natural gas being transported. As a result, Mississippi states that Article V of the Stipulation and Agreement settling Mississippi's last general rate increase proceeding at Docket No. RP75-20 provides for the filing of adjustments to Mississippi's effective base tariff rates to reflect the appropriate level of Mills Ranch Field transportation costs.

The instant tariff sheets serve to adjust Mississippi's base tariff rates which will be effective as of September 27, 1976, and October 1, 1976, to reflect the increase in transportation costs associated with Mississippi's purchases of gas in the Mill Ranch Field due solely to the increase in the wellhead price of natural gas as a result of Opinion No. 770. Mississippi requests waiver of the notice requirements of the Commission's Regulations and all other applicable provisions of the Commission's Regulations as may be necessary in order that the subject tariff sheets become effective as of the dates proposed. Mississippi also requests waiver of the notice requirements and the filing dates contained in the aforementioned Stipulation and Agreement at Docket No. RP75-20.

Mississippi has submitted work papers containing computation supporting the proposed rate changes. Mississippi states that copies of its filing were served on Mississippi's jurisdictional customers and the state commissions of Arkansas, Illinois and Missouri.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene unless such petition has previdusly been filed. Copies of the filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP71-125 and RP75-108 (PGA76-8a)]

NATURAL GAS PIPELINE CO. OF AMERICA

Purchased Gas Cost Adjustment to Rates and Charges

OCTOBER 1, 1976.

Take notice that on September 20, 1976 Natural Gas Pipeline Company of America (Natural) submitted for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, the below listed tariff sheets, to be effective September 1, 1976:

Second Substitute Twenty-ninth Revised Sheet No. 5
Second Substitute Fourth Revised Sheet No. 5A

Natural states that it filed a PGA unit adjustment on July 16, 1976, to be effective September 1, 1976, which the Commission by order issued August 31, 1976, accepted for filing, but suspended the effective date until September 2, 1976, when it would become effective subject to refund. Ordering Paragraph (B) of said order authorized Natural to file a revised PGA unit adjustment to become effective September 1, 1976 which would reflect the elimination of (a) that portion of 60-day emergency purchases in excess of the rate level prescribed in Opinion No. 770 and (b) those costs associated with non-jurisdictional purchases.

Natural also states that on September 9, 1976, it filed an Application for Reconsideration or Rehearing in which it stated that its rates as filed on July 16 did not reflect any 60-day emergency purchases at prices in excess of Opinion No. 770 after adjustment for production tax reimbursement as provided for in that Opinion, and that further, the only cost associated with the non-jurisdictional purchase was, in fact, a refund which was credited to the Deferred Purchased Gas Cost Account which had the effect of reducing the level of the PGA unit adjustment filed for.

Therefore, pursuant to Ordering Paragraph (B) and taking into consideration the facts relative to emergency and non-jurisdictional purchases as set out in Natural's Application for Reconsideration or Rehearing, Natural requested that the Commission accept the PGA unit adjustment as set out on the filed tariff sheets to be effective September 1, 1976, without any refund obligation. The PGA unit adjustment as filed reflects the level ordinarily filed on July 16, 1976. Natural also revised Sheet No. 5A to reflect the rate level for Rate Schedules MS-3 and LS-1 which have previously been accepted by the Commission to be effective on May 21, 1976 by letter order issued August 24, 1976 (Docket No. CP76-325) and July 1, 1976 by letter order issued August 18, 1976 (Docket No. CP75-256) respectively.

Natural states that it does not believe any waivers of the Commission's Regulations are necessary but respectfully requested the Commission to grant such waivers as it may deem necessary to accept the filed tariff sheets to be effective September 1, 1976.

Copies of this filing were mailed to Natural's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 22, 1976. Protests will be considered by the

Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

LIQUEFIED NATURAL GAS IMPORTATION AND STORAGE TERMINALS

[Docket No. RM76-13]

Answer to Petition To Intervene; Acceptance of Filing

OCTOBER 1, 1976.

On September 17, 1976, the States of New Jersey, Pennsylvania, and Delaware, the Attorney General of New York, the Public Advocate of New Jersey, the Township of Woodbridge, New Jersey, and the Honorable John M. Murphy, United States Representative, filed a motion for acceptance of the late-filed answer to petitions to intervene.

Upon consideration, notice is hereby given that the answer to petitions to intervene has been accepted as timely filed.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29652 Filed 10-7-76;8:45 am]

PACIFIC POWER AND LIGHT CO.

Commission License Term Policy for Projects Where Taum Sauk Is the Basis for Commission Jurisdiction

OCTOBER 5, 1976.

Public notice is hereby given that, in a September 24, 1976, Order Issuing License (Major) for Pacific Power & Light Company's Big Fork Project No. 2652, the Commission enunciated a license term policy for unlicensed, non-Federal hydroelectric projects where the Taum Sauk decision, *FPC* v. *Union Electric Co.*, 381 U.S. 90 (1965), provides the basis of Commission jurisdiction. That order requires the publication of an appropriate notice in the FEDERAL REGISTER.

The Commission spelled out a three-pronged policy designed to encourage compliance with the Federal Power Act, provide incentives for owners of unlicensed projects to review the jurisdictional status of these projects and to file applications in conformance with the Act, conserve the Commission's administrative resources, eliminate the inequities in the Commission's previous policy without sacrificing the desirable features of that previous policy, and give appropriate consideration to unauthorized post-1935 construction. First, for license applications on file with the Commission as of September 24, 1976, the Commission stated that licenses for these projects would, except as noted below, terminate twenty-five years from the date of issuance of a Commission licensing order. Second, for those Taum Sauk projects where no license application has been filed, the Commission stated that, for all owners of these projects who, within 90 days of notification by the Secretary of this order, file with the Secretary a reasonable schedule for the filing of license applications, not to exceed three years, and subsequently file applications consistent with that schedule, any license issued for that project would terminate twenty-five years from the date of filing of the license application. Third, in cases where license applications cannot be processed (for failure to file or timely file an application acceptable for processing or requested information) or where the Commission incurs substantial administrative, investigative, or litigative expense directly related to the project owner's recalcitrance, a license issued for that project would terminate fifty years from the date of any unauthorized post-1935 construction or September 1, 2001, whichever is earlier.

All owners of unlicensed, non-Federal hydroelectric projects should review the jurisdictional status of their projects and other matters discussed in the order. The September 24, 1976, order is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-29636 Filed 10-7-76;8:45 am]

[Docket No RP73-36 (PGA76-4)]

PANHANDLE EASTERN PIPE LINE CO.

Change in Tariff

OCTOBER 1, 1976.

Take notice that on September 2?, 1976, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing Eighteenth Revised Sheet No. 3-A to its F.P.C. Gas Tariff, Original Volume No. 1, such sheet proposed to be effective November 1, 1976.

The Company submits that this revised sheet is filed in accordance with Paragraph (D) of the Commission's Opinion No. 770 issued July 27, 1976, as modified by FPC order issued September 22, 1976, and pursuant to the provisions of the General Terms and Conditions of Panhandle Eastern Pipe Line Company's FPC Gas Tariff.

Panhandle states that the revised tariff sheet reflects only those increases in purchase gas costs as authorized by the Commission in Opinion No. 770 to be effective July 27, 1976. No other increases in purchase gas costs are included in the filing. In accordance with the Commission's order of September 22, 1976, Panhandle has elected to file for a surcharge (including a nine (9) percent carrying charge) to recover costs incurred as a result of Opinion No. 770 from July 27, 1976 to November 1, 1976, such surcharge to be effective for the twelve (12) month period commencing November 1, 1976. Panhandle shall maintain a separate account relating to such surcharge amounts and any imbalance in the account at the end of the twelve (12) month period shall be transferred to the Deferred Purchased Gas Cost Account maintained in accordance with Section 18.3 of the General Terms and Conditions of Panhandle's tariff.

The annualized amount of claimed purchased gas cost increases under Opinion No. 770 is $67,291,580. The proposed surcharge to recover unrecovered purchased gas costs attributable to Opinion No. 770, including carrying charges, is $13,172,065.

Also, the revised tariff sheet reflects the flow through of amounts resulting from Trunkline Gas Company's rate adjustment to be effective November 1, 1976, which Trunkline is filing concurrently herewith. Trunkline's rate adjustment is also filed in accordance with the provisions of Opinion No. 770. The annualized amount of the Trunkline increase is $76,270,955, including surcharge and carrying charges.

The Company submits that the purchased gas cost increases by reason of Opinion No. 770 rates effective July 27, 1976, which Panhandle has included in its rates herein, have been calculated on the basis of producer filings with the Commission. To the extent that the amounts filed by the producers are subject to refund, the related amounts included in Panhandle's rates shall also be subject to refund in accordance with Section 18.5 of the General Terms and Conditions of Panhandle's tariff.

To the extent required, if any, Panhandle has requested that the Commission waive those sections of the regulations and provisions of Opinion No. 770 as it may deem necessary for the acceptance of this filing to become effective November 1, 1976.

Copies of this filing were served on Panhandle's jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29638 Filed 10-7-76;8:45 am]

[Docket No. ER76-909]

PHILADELPHIA ELECTRIC CO.

Revised Schedules of EHV Transmission System Agreement

SEPTEMBER 30, 1976.

Take notice that on September 17, 1976, Philadelphia Electric Company

V41N197 OCT 8 76 UM

(PECO) tendered for filing revised Schedules 2.03, 3.03, 4.03, 6.02, and 8.04 modifying the EHV Agreement which is on file with the Commission according to PECO. PECO states that the parties to this Agreement are:

Public Service Electric and Gas Company
Philadelphia Electric Company
Atlantic City Electric Company
Delmarva Power & Light Company
Pennsylvania Power & Light Company
Baltimore Gas and Electric Company
Potomac Electric Power Company
Pennsylvania Electric Company
Metropolitan Edison Company
Jersey Central Power & Light Company
UGI Corporation

PECO states that the parties to the EHV Agreement have approved PECO's filing.

PECO states that the revised Schedules update the description of two transmission lines covered by the EHV Agreement. PECO states that there is no provision for any change in the monthly rate for excess of investment over investment responsibility as previously filed.

PECO states that the changes have an effective date of November 1, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 13, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER76-912]

PUGET SOUND POWER & LIGHT CO.

Notice of Filing of Contract

SEPTEMBER 30, 1976.

Take notice that on September 20, 1976, Puget Sound Power & Light Company (Puget) tendered for filing a Power Sales Contract between it and the City of Pasadena, California. Puget states that the contract provides for sales from its share of certain coal fired generation for the months of August through April each year through 1981.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 20, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP76-22]

SOUTH GEORGIA NATURAL GAS CO.

Filing of Proposed Settlement Agreement

SEPTEMBER 30, 1976.

Take notice that on September 17, 1976, South Georgia Natural Gas Company (South Georgia) tendered for filing a proposed Stipulation and Agreement.

South Georgia states that the Stipulation and Agreement is the product of discussions among the parties to the proceeding and that the Stipulation and Agreement is fully supported by all parties. In view of the support of all parties for the Stipulation and Agreement, South Georgia requests that the period for comments be shortened to fifteen days.

South Georgia requests, further, that the Commission accept for filing South Georgia FPC Gas Tariff, First Revised Volume No. 1, with Original Sheet Nos. 1 through 44 to be effective as of April 10, 1976, with First Revised Sheet No. 4 to be effective May 14, 1976, and with Second Revised Sheet No. 4 to be effective July 2, 1976, all of which sheets are filed in conjunction with the Stipulation and Agreement.

Any person desiring to be heard or to protest said filing should file comments with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before October 4, 1976. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of the filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP73-49 (PGA76-6)]

SOUTH GEORGIA NATURAL GAS CO.

Revision to Tariff

OCTOBER 1, 1976.

Take notice that on September 27, 1976, South Georgia Natural Gas Company (South Georgia) tendered for filing Twenty-first Revised Sheet No. 3A to Original Volume No. 1 of its FPC Gas Tariff.

South Georgia states that the above sheet represents a rate change under its PGA clause for the purpose of tracking a rate increase filing made by Southern Natural Gas Company on September 27, 1976. South Georgia states that the instant filing will increase South Georgia's jurisdictional rates by $5,084,696. An effective date of October 27, 1976 is proposed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP76-53]

SOUTH TEXAS NATURAL GAS GATHERING CO.

Motion To Place Proposed Rates Into Effect

SEPTEMBER 30, 1976.

Take notice that on August 31, 1976, South Texas Natural Gas Gathering Company (South Texas) filed a motion, pursuant to Section 4(e) of the Natural Gas Act and Section 154.67 of the Commission's Regulations, that the proposed tariff sheets filed by South Texas on January 12, 1976, as supplements to South Texas' FPC Gas Rate Schedule Nos. 1 and 2 go into effect, subject to refund, as of August 31, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 8, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP73-64 (PGA76-4)]

SOUTHERN NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

OCTOBER 1, 1976.

Take notice that Southern Natural Gas Company (Southern), on September 27, 1976, tendered for filing proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 1, to become effective October 27, 1976. Southern claims such filing is pursuant to and in accordance with the Commission's Opinion No. 770 and Order Modifying Opinion No. 770 issued September 22, 1976.

Southern states that the filing provides for an increase in Southern's rates for the current cost of gas of 24.331¢ per Mcf, or $131,014,729 annually, and a surcharge adjustment of 3.624¢ per Mcf to recover an estimated $18,000,000 which was paid to producers for the period July 27, 1976 through October 26, 1976. Southern states that such surcharge adjustment includes an estimated amount for carrying costs at 9% in the amount of .188¢ per Mcf, or approximately $984,000.

Southern states that copies of the filing are being served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29641 Filed 10-7-76;8:45 am]

[Docket No. RP73-114 (PGA 76-4)]

TENNESSEE GAS PIPELINE CO.

Proposed PGA Filing Pursuant to Opinion No. 770

OCTOBER 7, 1976.

Take notice that on September 27, 1976, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), tendered for filing Substitute Thirteenth Revised Sheet Nos. 12A and 12B to Ninth Revised Volume No. 1 of its FPC Gas Tariff to be effective on October 27, 1976.

Tennessee states that the sole purpose of these revised tariff sheets is to reflect an increase in its rate of 36.02 cents per Mcf based solely on increases in its purchased gas cost resulting from producer rate increases pursuant to Opinion No. 770. Tennessee further states that this increase is based on a twelve-month amortization period for its Unrecovered Purchased Gas Cost Account and the inclusion of a 9% annual carrying charge on the balance in that account resulting from Opinion No. 770 in accord with the Commission's order issued September 22, 1976, in Docket No. RM75-14.

The annualized amount of claimed purchased gas cost increases under Opinion No. 770 is $316,076,818. The proposed surcharge to recover unrecovered purchased gas costs attributable to Opinion No. 770 for the period July 27, 1976, through October 26, 1976, is $77,775,762. Carrying charges on the unrecovered purchased gas costs are $4,182,209. The total amount claimed is $398,034,789.

Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition.

Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29645 Filed 10-7-76;8:45 am]

[Docket No. RP75-75]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Tariff Filing

OCTOBER 1, 1976.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) on August 10, 1976 tendered for filing revised tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2. Such tariff sheets reflect a 0.1¢ reduction in the commodity portion of the rates which are currently effective (July 1, 1976) and those filed on July 16, 1976 to be effective on September 1, 1976. This reduction is being filed to eliminate the rate effect of separate compression charges reserved in Article XI of Transco's Settlement Agreement in Docket No. RP75-75. Transco states that because the acquisition agreement with Union Oil supersedes the letter agreement which provides that Transco pay a separate compression charge and because Transco expects to make similar arrangements with the other two producers, the issue has become moot and consequently, a rate reduction is appropriate. Transco also states that it will refund to its customers, with interest, on or about August 13, 1976 the amounts collected under Article XI of the Settlement Agreement in the instant docket which relates to the reserved issue on compression charges.

The Company states that copies of the filing have been mailed to each of the Company's jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 22, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29643 Filed 10-7-76;8:45 am]

[Docket Nos. RP75-3 and RP75-75]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Tariff Filing

OCTOBER 1, 1976.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) on August 30, 1976 tendered for filing revised tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2. Such tariff sheets reflect a 0.5¢ reduction in the commodity portion of the rates to be effective August 1, 1976, September 1, 1976 and October 1, 1976. Transco states that this reduction is being filed to eliminate the rate effect of all costs related to the naphtha gasification study. In addition to the rate reduction, Transco also states that it will refund to its customers, with interest, on or about September 3, 1976 the amounts collected during the period February 1, 1975 through July 31, 1976.

In the approved settlement agreement in Docket Nos. RP74-48 and RP75-3, there was deferred for separate disposition in Article III, Section 8, the "Propriety of Inclusion of Costs Related to Expenditures in the Unsuccessful Search for Alternate Gas Supplies." Also, such issue was deferred in the approved settlement agreement in Docket No. RP75-75 (Article VII) pending the disposition in Docket No. RP75-3. Included in the costs labeled "unsuccessful search for alternate gas supplies", are costs related to a naphtha gasification study. In its Motion for Approval of Attached Offer of Settlement filed July 2, 1976 in Docket Nos. RP74-48 and RP75-3, Transco proposed among other things, to remove from cost of service in that case all costs related to the naphtha gasification study since the proposed naphtha gasification plant has obtained renewed vitality. Now that Transco is moving forward on this project, the propriety of inclusion in Transco's rates of costs related to the naphtha gasification study has become moot. Consequently, a rate reduction and refunds to eliminate such costs are appropriate.

VOL 41 NO 197 OCT 8 1976 UM

The Company states that copies of the filing have been mailed to each of the Company's jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 22, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

UTAH GAS SERVICE CO.

Proposed Change in FPC Gas Tariff

OCTOBER 1, 1976.

Take notice that Utah Gas Service Company, on September 24, 1976, tendered for filing a Notice of Rate Change pursuant to the Purchased Gas Cost Adjustments provision of its Special Rate Schedule No. X-1 under which surplus gas is sold to Northwest Pipeline Corporation.

The purpose of the filing is to recover the jurisdictional portion of the increase in purchased gas costs resulting from Opinion No. 770. Based on estimated sales in the 12-month period ended July 31, 1976 the increase in revenues on an annual basis would be $342,395, subject to Btu adjustment. In addition, the filing provides for a surcharge to permit recovery of increases in the cost of purchased gas delivered prior to October 27, 1976, in an estimated amount of $114,589 including carrying charges.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before *October 14, 1976*. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

FIRST ARABIAN CORP.

Formation of Bank Holding Company

The First Arabian Corporation, Paris, France, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of more than 25 per cent of the voting shares of Bank of the Commonwealth, Detroit, Michigan. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than November 5, 1976.

Board of Governors of the Federal Reserve System, October 1, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-29619 Filed 10-7-76;8:45 am]

FIRST NATIONAL BANCORPORATION, INC.

Order Approving Acquisition of Bank

The First National Bancorporation, Inc., Denver, Colorado, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of The First National Bank of Montrose, Montrose, Colorado ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by the Attorney General of the State of Colorado and by the Comptroller of the Currency,[1] in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the largest banking organization in Colorado, controls 11 banks (including the largest bank in the State) with aggregate deposits of $1.2 billion, representing approximately 16 per cent of the total deposits held by commercial banks in that State.[2] Colorado currently has 10 multi-bank holding companies that collectively control approximately 67 per cent of the total deposits and 34 per cent of all the banks in the State. The five largest banking organizations (all multi-bank holding companies) control approximately 57 per cent of total deposits and 25 per cent of all the banks in Colorado. Acquisition of Bank[4] by Applicant would contribute to some extent to increasing deposit concentration in Colorado; however, the Board regards the effects upon concentration to be only slight inasmuch as Applicant's share of State deposits would increase by no more than approximately four-tenths of one per cent.

Bank (deposits of $30 million) is the larger of two banks[4] in the relevant banking market[5] and controls approximately 63 percent of the total deposits in that market. Applicant has no subsidiaries operating in the relevant banking market, and its closest bank subsidiary to Bank is located 61 miles to the northwest of Montrose. It appears that no meaningful competition currently exists between Bank and any of Applicant's subsidiary banks, and that it is unlikely that significant competition between these institutions would develop in the future in view of the distances involved. On the basis of the facts of record, the Board concludes that consummation of the proposal would not have any significant adverse effect upon existing competition in the relevant banking market.

Applicant, as the largest banking organization in Colorado, appears to possess the financial and managerial resources necessary to establish a *de novo* bank in the relevant market and, thereby, to increase the number of banking alternatives operating therein. Although population per banking office for the market is 7,800,[6] compared to 9,300 for the State, and deposits per bank in the market[7] are below the average deposits per bank for the entire State, Montrose is growing rapidly and exhibits good prospects for continued growth in population, income, and employment opportunities.[8] As a result, the Montrose banking market may be regarded as marginally attractive for *de novo* entry in the future. In light of the future economic prospects for the Montrose area and Applicant's ability to effect an alternative means of entry into the area, consummation of this proposal would eliminate Applicant as a potential *de novo* entrant into the relevant market. However, the effects of this elimination are minimized by the existence of several other potential entrants into the relevant market, including several Colorado multi-bank holding companies that have not entered the market but have the resources to do so. Inasmuch as the relevant market is only marginally attractive for *de novo* entry in the future and there exist other potential entrants into that market, it is the Board's judgment that, on balance, consummation of Applicant's proposal would have only slightly adverse effects upon potential competition.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are considered to be generally satisfactory based upon information in the record, including all bank examination information available to the Board. In addition, Applicant's overall financial condition will enable it to augment the capital of any of its subsidiaries should there be a need to do so in the future. Accordingly, the Board regards the banking factors as being consistent with approval of the application.

Affiliation of Bank with Applicant would enable Bank to receive Applicant's financial and managerial expertise and would provide a variety of additional services to the market. In view of the increase in economic activity that is expected in the Montrose area, it appears that the provision of these additional services by Applicant, through Bank, will have some beneficial effect upon the area in providing for its convenience and needs for banking services. Accordingly, the Board concludes that the considerations relation to the convenience and needs of the community to be served lend weight toward approval of the application and are sufficient to outweigh any slightly adverse effects that the proposal may have on potential competition. It is the Board's judgment that consummation of the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record,[9] the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[10] effective September 30, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-29620 Filed 10-7-76;8:45 am]

[1] In a letter to the Board, dated March 30, 1976, the Comptroller of the Currency recommended approval of this application stating that it was in the public interest. The Attorney General of Colorado, in a letter to the Board, dated March 17, 1976, while not recommending denial of the application, requested that the Board consider issues pertaining to concentration in the Colorado banking industry, competition in both the State and relevant banking markets, convenience and needs of the community to be served, and public benefits to be derived from consummation of the proposal. The Boards' conclusions with respect to these issues as they relate to this application are herein set forth.

[2] All banking data are as of June 30, 1975, unless otherwise indicated.

[3] Bank is the 18th largest independent bank and the 50th largest of the 277 banks in Colorado.

[4] The smaller bank is a subsidiary of the second largest banking organization in Colorado. In addition, a new bank opened on August 30, 1976, in Olathe, which is ten miles north of Montrose.

[5] The relevant banking market is approximated by the eastern portion of Montrose County, which is divided in half by the Uncompahgre Forest.

[6] This figure is reduced to 5,200 when the new bank in Olathe is taken into account.

[7] Nevertheless, the market's average for deposits per bank is nearly double that of any of the three adjacent counties.

[8] From 1970–1975, the populations of Montrose County and town, respectively, increased 13.6 and 25.9 percent. In addition, the average household income for Montrose County increased 85.6 percent during the same period.

[9] Dissenting Statement of Governor Coldwell filed as part of the original document. Copies are available upon request to Board of Governors of the Federal Reserve System, Washington, D.C. 20551 or to the Federal Reserve Bank of Kansas City.

[10] Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, and Lilly. Voting against this action: Governor Coldwell. Absent and not voting: Chairman Burns and Governor Partee.

FIRST NATIONAL CHARTER CORP.

Proposed Acquisition of Charter Bankers Life Insurance Company

First National Charter Corporation, Kansas City, Missouri, has applied, pursuant to Section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Charter Bankers Life Insurance Company, Kansas City, Missouri. Notice of the application was published on August 11, 1976, in "The Kansas City Star," a newspaper circulated in Kansas City, Missouri.

Applicant states that the proposed subsidiary would engage in the activities of underwriting credit life and credit accident and health insurance directly related to extensions of credit by its credit-granting subsidiaries. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than November 3, 1976.

Board of Governors of the Federal Reserve System, September 30, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-29621 Filed 10-7-76;8:45 am]

FIRST OKMULGEE CORP.

Formation of Bank Holding Company

First Okmulgee Corporation, Okmulgee, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 percent of the voting shares of First National Bank and Trust Company, Okmulgee, Oklahoma. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than November 2, 1976.

Board of Governors of the Federal Reserve System, October 4, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-29622 Filed 10-7-76;8:45 am]

LISCO STATE CO.

Order Approving Formation of a Bank Holding Company

Lisco State Company, Lisco, Nebraska ("Applicant"), has applied for the Board's approval pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)) and § 225.3(a) of Regulation Y (12 CFR 225.3(a)) to become a bank holding company through the acquisition of 89 percent or more of the voting shares of Lisco State Bank, Lisco, Nebraska ("Bank").

Notice of the application, affording an opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act (41 FR 30068). Time for filing comments and views has expired and the application and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Upon acquisition of Bank (deposits of $3.6 million), Applicant would control the 356th largest bank in Nebraska, holding .05 percent of total deposits in commercial banks in the State.[1] Bank is the smallest of the three banks located in Garden County, which approximates the relevant banking market, and controls 20.52 percent of deposits therein. Acquisition of Bank would result in no immediate change in banking services available in the relevant market.

[1] Unless otherwise indicated, all banking data are as of December 31, 1975.

V 41 197 OCT 8 76 UM

Applicant's principal shareholder has ownership interests in one Colorado and two Nebraska one-bank holding companies. The subsidiary banks of these holding companies are located considerable distances from Bank and operate in different banking markets. Inasmuch as the proposal to form a bank holding company represents a restructuring of the existing ownership of Bank into corporate form, consummation of the proposal would eliminate neither existing nor potential competition, nor does it appear that there would be any adverse effects on other banks in the trade area.

The financial and managerial resources and future prospects of Applicant, which are dependent on those of Bank, are considered satisfactory and consistent with approval. The debt to be incurred by Applicant appears to be serviceable from the income derived from Bank without having an adverse effect on the financial condition of either Applicant or Bank. Accordingly, considerations relating to banking factors are consistent with approval of the application.

Although consummation of the proposal would cause no changes in the banking services offered by Bank, considerations relating to the convenience and needs of the community to be served are consistent with approval. It has been determined that consummation of the transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[2] effective October 1, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-29623 Filed 10-7-76;8:45 am]

SANTA ANA BANCORP., INC.

Formation of Bank Holding Company

Santa Ana Bancorp., Inc., St. Ann, Missouri, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 per cent or more of the voting shares of Bank of St. Ann, St. Ann, Missouri. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than October 29, 1976.

Board of Governors of the Federal Reserve System, October 4, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-29624 Filed 10-7-76;8:45 am]

[2] Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.

GENERAL SERVICES ADMINISTRATION

Proposed Policy Revision

FEDERAL AGENCY HOUSING AND COMMUNITY PLANNING

Opportunity for Comment

Notice is hereby given that the General Services Administration is considering a revision to its policy on Federal agency housing and community planning to reflect, among other things, criteria by which Federal building construction proposals would be developed. The proposed change is presented as it would appear in Chapter 4, Public Buildings and Space, of the GSA Policy Manual.

Any person who wishes to submit written data, views, or objections pertaining to the proposed policy may do so by filing them, in duplicate, with the Commissioner, Public Buildings Service, (P), General Services Administration, 18th and F Streets, NW., Washington, D.C. 20405, on or before December 8, 1976. This notice is being published at the request of the Office of Management and Budget.

Dated: October 6, 1976.

TERRY CHAMBERS,
Acting Administrator.

CHAPTER 4. PUBLIC BUILDINGS AND SPACE

PART 1. FEDERAL AGENCY HOUSING AND COMMUNITY PLANNING

1. *Federal Agency Housing.*

a. *Basic Policy.* The General Services Administration (GSA) will satisfy the long range space requirements of Federal agencies through the most cost effective methods practicable with full consideration given to such factors as compatibility with local plans for development or redevelopment and the socioeconomic impact of the proposed actions. The term "Federal agencies" includes all establishments for which GSA provides space as defined in the Public Buildings Act of 1959. Long range plans for housing Federal agencies shall be developed after careful analysis of appropriate housing alternatives, including continued use of Government-owned or leased space; major alterations, conversions, and/or extensions to existing Government-owned space; new construction; acquiring lease space; the purchase of privately owned buildings; or a combination of these.

b. *Operating Policy.* (1) GSA will maintain a system for monitoring the short range and long range housing requirements of Federal agencies. (2) In order to properly evaluate Federal construction as an alternative in satisfying agency space requirements, direct Federal construction proposals shall be developed according to the following criteria:

(a) Federal construction projects will be developed based on their comparative urgency of need with due regard for the eqiutable distribtuion of public buildings throughout the Nation.

(b) Proposals with a unitized cost significantly greater than existing housing shall require substantial justification.

(c) Proposed projects shall result in effective consolidation of agency activities. Priority shall be given to consolidation of related activities of individual agencies and to consolidating agencies with similar program missions. General consolidation of unrelated Federal activities shall be given a lower priority.

(d) The construction of the proposed project will provide for the consolidation of Federal activities and will result in significantly improved delivery of Government services and convenience to the public.

(e) The project proposal will be compatible with, to the greatest extent practicable, local plans for growth and development.

(f) The construction of the proposed project will result in expanded socioeconomic benefits to the community. This criterion shall be considered satisfied when the community for which the project is proposed has experienced a recent history of high and/or persistent unemployment in its genearl economy and in the construction industry, and the delineated area for the proposed project contains an urban development or redevelopment area or it is considered a low income area.

(g) Adequate low and moderate income housing will be available and accessible on a nondiscriminatory basis to the Federal employees to be housed in the proposed project.

(3) In unique situations such as international border station facilities as one example, Federal construction may be the only viable option for satisfying agency requirements. In such circumstances, the criteria listed in (2) above may be waived, subject to those established by applicable laws, orders, or directives.

(4) When the leasing of privately owned space is determined to be the preferred method of satisfying agency requirements, suitable space shall be acquired at rental rates commensurate with prevailing price levels for comparable space in the rental market of the community where the project will be located.

2. *Community Planning.*

a. *Basic Policy.* Federal space requirements shall be determined through continuous surveys and investigations of agency space needs in communities throughout the Nation. Plans for housing Federal agencies shall be developed pursuant to the requirements established by the Public Buildings Act of 1959, as amended; Executive Order 11512; Intergovernmental Cooperation Act of 1968; National Environmental Policy Act of 1969; and other applicable laws, orders, and directives.

b. *Operating Policy.* (1) Basic community planning data will be assembled in the development of Federal projects to ensure their compatibility with local planning objectives. Federal projects are defined as public building construction projects and lease construction projects required to be authorized in accordance with, or in the manner provided by, the provisions of the Public Buildings Act of 1959, as amended, and projects involving a significant change in the use of Federally owned property or property to be acquired by exchange in connection with a public buildings project authorized under the provisions of the Public Buildings Act of 1959, as amended, or in the Federal Property and Administrative Services Act of 1949, as amended.

(2) In the conduct of space surveys and planning studies, GSA will take care to avoid any implication to Federal, State, or local officials or others that the planning survey will lead to a Federal project in the community.

(3) In developing long range housing plans for Federal agencies, maximum use shall be made of existing Government-owned buildings (including excess property) which are adequate or economically adaptable to the space needs of agencies. In determining whether to retain or excess an existing Government-owned building, its historical and/or architectural significance and the development or redevelopment plans of the community shall be given consideration in the planning analysis.

(4) In determining the need for development or redevelopment, the availability of low and moderate income housing, and other socio-economic conditions in connection with planning studies for particular communities, GSA will also consult with and receive advice from the Departments of Housing and Urban Development; Health, Education, and Welfare; Commerce; and others, as appropriate.

(5) Planning proposals shall reflect the objective of promoting the efficient performance of the missions and programs of the executive agencies with due consideration given to convenience to the public, beneficial socioeconomic impact, and safe and healthful working conditions for employees and the public.

(6) Because of the importance of the Federal interest in the National Capital Region and in order that the effect of the Federal Government's activities will be consistent with and directed in a manner which will foster the implementation of modern planning concepts, GSA, in collaboration with other Federal agencies, will be guided by the development policies and guidelines issued by the National Capital Planning Commission in its Comprehensive Plan for the Washington, D.C., area. The feasibility of decentralizing services or activities which can be carried on elsewhere in the Nation without excessive costs or significant loss of efficiency shall be considered in accordance with the general criteria promulgated under the Office of Management and Budget Circular A-60, Criteria for Decentralizing Federal Activities from the National Capital Region.

(7) In the development of planning proposals for particular communities, contact shall be made with the United States Postal Service (USPS) at the earliest practicable date in the planning process so as to ensure effective coordination between GSA and USPS in satisfying Government space requirements.

[FR Doc.76-29868 Filed 10-7-76;8:45 am]

[Federal Procurement Rgs.; Temporary Rg. 40]

NEGOTIATED CONTRACTS INCLUDING ADMINISTRATION OF COST ACCOUNTING STANDARD 414

Pricing Policy

• 1. *Purpose.* This FPR Temporary Regulation provides interim policies and procedures to implement the Cost Accounting Standards Board (CASB) Part 414—Cost Accounting Standard (CAS), Cost of money as an element of the cost of facilities capital. •

2. *Effective date.* This regulation is effective October 1, 1976.

3. *Expiration date.* This regulation will continue in effect until canceled.

4. *Background.* a. Subpart 1-3.12 prescribes policies and procedures with respect to the application of regulations and standards of the CASB to both negotiated national defense contracts and negotiated nondefense contracts, effective as promulgated by the CASB. CAS 414, which is effective October 1, 1976, establishes criteria for the measurement and allocation of the cost of capital committed to facilities. The computation is required on each CAS-covered contract (defense and nondefense) in accordance with a form (CASB-CMF) and instructions stipulated in the standard. This technique takes explicit account of the varying capital asset commitments among contracts and therefore provides improved understanding of this factor in pricing determinations.

b. Present FPR pricing policy requires that capital asset commitments should be considered in determining profit or fee in all contracts; i.e., § 1-3.808-2 (d), (e), and (f), respectively, extent of Government assistance, extent of the contractor's investment, and character of contractor's business.

c. Until the publication of Defense Procurement Circular (DPC) Number 76-3, effective October 1, 1976, the Armed Services Procurement Regulation (ASPR) also considered capital asset commitments as factors in determining profit or fee. Additionally, for many contracts negotiated under cost analysis techniques, the ASPR utilizes a structured methodology (Weighted Guidelines) to arrive at the Government's going-in profit objective.

d. DPC 76-3 makes changes in this structured profit policy to provide more specifically that the level of facility investment, as measured by CAS 414 techniques, will be recognized in reaching the prenegotiation profit objective. The DPC also provides that the imputed costs measured and allocated in accordance with CAS 414 are to be allowable costs on most negotiated DOD contracts which are priced on the basis of cost analysis. The DPC provides for a profit objective offset of the allowed imputed cost both (1) in the formula under the Weighted Guidelines structure, and (2) by an appropriate reduction in the profit objective to compensate for CAS 414 allowed costs where other methods (nonstructured) are used to establish a profit objective.

e. The Office of Federal Procurement Policy (OFPP) is actively considering the issues raised by CAS 414, particularly in relation to the Commission on Government Procurement recommendations A-28, A-30, and A-35 concerning Government-wide principles on cost allowability, uniform guidelines for equitable profit objectives, and stimulation of contractor acquisition of production facilities. It is anticipated that the policies and procedures expressed in this temporary regulation will be superseded by policies evolving from OFPP initiatives.

5. *Agency action.* a. Agencies may employ, during the term of this regulation, pricing policies consistent with the rules and regulations of the Cost Accounting Standards Board (CASB), the Federal Procurement Regulations, and this temporary regulation. In this regard, five options are provided by subparagraphs (1) through (5) of this paragraph 5.

(1) *Option 1.* Agencies may elect not to change pricing policies. If this option is elected, the following pricing policies are applicable:

(a) Recognition of contractor investment will continue as a factor in determination of profit or fee (§ 1-3.808-2 (d), (e), and (f)).

(b) Negotiated contracts which are subject to the provisions of Subpart 1-3.12, Cost Accounting Standards, both defense and nondefense (§ 1-3.1203(a)(1) and (2), respectively), require measurement and allocation of the cost of money as an element of the cost of facilities capital in accordance with CAS 414 (CAS 414 imputed costs).

(c) CAS 414 imputed costs, for contracts subject to Subpart 1-3.12, shall be treated in accordance with CAS 405, Accounting for unallowable costs, and will be considered in accordance with subparagraph (a) above.

(2) *Option 2.* Agencies may elect to withdraw the applicability of CAS 414 to nondefense contracts. If this option is elected, the following pricing policies are applicable:

(a) Recognition of contractor investment will continue as a factor in determination of profit or fee (§ 1-3.808-2 (d), (e), and (f)).

(b) Negotiated defense contracts (§ 1-3.1203(a)(1)) which are subject to the provisions of Subpart 1-3.12, Cost Accounting Standards, require measurement and allocation of the cost of facilities capital in accordance with CAS 414 (CAS 414 imputed costs).

(c) CAS 414 imputed costs for defense contracts subject to Subpart 1-3.12 shall be treated in accordance with CAS 405, Accounting for unallowable costs, and will be considered in accordance with subparagraph (a) above.

(d) Negotiated nondefense contracts otherwise subject to CASB rules will not be subject to CAS 414. This status shall be reflected by contract clause (see subparagraph d) recognition in each affected contract.

(3) *Option 3.* Agencies may elect to withdraw the applicability of CAS 414 to nondefense contracts and to make CAS 414 imputed costs allowable only for CAS-covered defense contracts. If this option is elected, agencies shall modify their profit policies applicable to defense CAS-covered contracts to take into consideration the explicit recognition of CAS 414 imputed costs; i.e., on an overall agency basis, a policy objective shall be that aggregate prices will not increase. Defense CAS-covered contracts shall include contract clause (see subparagraph e) recognition for progress payment or cost reimbursement purposes. Nondefense CAS-covered contracts shall include contract clause (see subparagraph d) recognition of CAS 414 withdrawal.

(4) *Option 4.* Agencies may elect to make CAS 414 imputed costs allowable for both defense and nondefense CAS-covered contracts. If this option is

V 41 1976 OCT 8 76 UM

elected, agencies shall modify their profit policies applicable to both defense and nondefense CAS-covered contracts to take into consideration the explicit recognition of CAS 414 imputed costs; i.e., on an overall agency basis, a policy objective shall be that aggregate prices will not increase. CAS-covered contracts shall include contract clause (see subparagraph e) recognition for progress payment or cost reimbursement purposes.

(5) *Option 5.* Agencies may elect to make CAS 414 imputed costs allowable for contracts subject to cost accounting standards pursuant to Subpart 1–3.12 and also to any other negotiated contracts. Agencies shall modify their profit policies which are applicable to contracts for which CAS 414 imputed costs have been made allowable so that the policies take into consideration the explicit recognition of CAS 414 imputed costs; i.e., on an overall agency basis, a policy objective shall be that aggregate prices will not increase. Such contracts shall include contract clause (see subparagraph e) recognition for progress payment or cost reimbursement purposes.

b. Agencies shall ensure that subcontract flow-down provisions are compatible with agency pricing policy elections.

c. If an agency now utilizes a structured pricing policy and elects to make CAS 414 imputed costs allowable, the agency shall take into consideration the explicit recognition of such costs; i.e., on an overall agency basis, a policy objective shall be that aggregate prices will not increase.

d. The following contract clause is suggested for use when an agency elects Options 2 or 3: .

COST ACCOUNTING STANDARD WITHDRAWAL

Cost Accounting Standard 414—Cost of money as an element of the cost of facilities capital—is withdrawn from application to the provisions of the clauses in this contract entitled "Cost Accounting Standards" and "Administration of Cost Accounting Standards."

e. The following contract clause is suggested for use when an agency elects Options 3, 4, or 5:

FACILITIES CAPITAL COST OF MONEY

Costs defined, measured, and allocated in accordance with Cost Accounting Standard 414—Cost of money as an element of the cost of facilities capital—qualify as costs incurred for purposes of the "Allowable Cost, Fee, and Payment" or "Progress Payments" clause of this contract.

f. With reference to the content of CAS 414, the purpose of Form CASB–CMF is to accumulate capital values and convert them to cost of money factors. Additional computation is required to determine facilities capital employed for a specific contract. It is suggested that agencies consider use of DD Form 1861 (July 30, 1976) and accompanying instructions for this purpose. This information is contained on pages 36 and 37 of DPC 76–3, 1 September 1976.

g. Agencies shall furnish a copy of each policy action issued pursuant to this temporary regulation to the General Services Administration (FV), Washington, DC 20406.

Dated: October 1, 1976.

JACK ECKERD,
Administrator of General Services.

[FR Doc.76–29541 Filed 10–7–76;8:45 am]

[GSA Bulletin FPMR D–143]

SMOKING IN GSA-CONTROLLED BUILDINGS AND FACILITIES

Guidelines

SEPTEMBER 17, 1976.

1. *Purpose.* This bulletin notifies Federal agencies of the guidelines established by the General Services Administration for controlling smoking in public areas and large working areas in GSA-controlled buildings and facilities.

2. *Expiration date.* This bulletin contains information of a continuing nature and will remain in effect until canceled.

3. *Background.* a. During the past several years, GSA has received numerous letters from nonsmokers requesting that smoking be prohibited either altogether or in certain areas of buildings under GSA jurisdiction. Answers to these letters emphasized the vast number of buildings and amount of space therein managed by GSA, involving hundreds of thousands of employees and visitors, and the impracticability of controlling smoking except in areas where inherent dangers are obvious.

b. In view of the continuing concern about this matter, further consideration was given in November 1973, to the finding of the Surgeon General, as reflected on each pack of cigarettes and in advertising, that cigarette smoking is dangerous to one's health and to studies by the Department of Health, Education, and Welfare showing that an atmosphere contaminated with tobacco smoke can contribute to the discomfort of many individuals. GSA Bulletin FPMR D–102, Smoking in GSA-controlled buildings, was issued November 27, 1973, setting forth guidelines.

4. *Rights of employees.* GSA recognizes the right of individuals working or visiting in GSA-controlled buildings or space to an environment which is reasonably free from contaminants. Consideration should also be given to the right of an employee to smoke under reasonable conditions as determined by the supervisor of the organizational unit to which he or she is assigned.

5. *Action by agency officials and employees.* a. GSA requests that the agency head in each building take affirmative action to implement the guidelines set forth in this bulletin.

b. The full cooperation of all supervisors and employees is requested in ensuring that an equitable balance is maintained between the rights of nonsmokers and those of smokers in implementing or enforcing the smoking guidelines set forth in par. 6.

6. *Guidelines.* Occupant agency officials are requested to observe the following guidelines:

a. *Auditoriums and conference rooms.* Smoking is not permitted in auditoriums. Action will be taken by each GSA buildings manager to post no smoking signs outside the entrances to auditoriums and to place receptacles for cigarette butts outside all entrances to auditoriums. Smoking may be permitted in conference rooms only (1) if they are properly ventilated, as jointly determined by each buildings manager and/or each area manager and each local head of each occupant agency, or (2) if they are equipped with mechanical air cleaners. If not, smoking should be prohibited in these areas, and signs and receptacles should be placed outside the entrances.

b. *Cafeterias.* No smoking areas should be established in cafeterias contracted by GSA. These areas should be designated by each GSA buildings manager in collaboration with the heads of occupant agencies based on an estimate of the relative number of smoking and nonsmoking patrons served, which may be adjusted on the basis of local experience. The no smoking areas should be identified by appropriate signs.

c. *Elevators.* Elevators should be designated as no smoking areas. No smoking signs should be posted in all elevators.

d. *Shuttle vehicles.* Smoking will be prohibited in shuttle vehicles under the jurisdiction of GSA. No smoking signs will be posted in all such vehicles.

e. *Work areas.* The establishment of no smoking work areas in large open space with many employees (e.g., engineering and drafting offices, typing pools, and card punch areas) should be thoroughly investigated. Supervisors should plan work space in such a way that employees who desire a no smoking area can be accommodated, provided that: (1) Efficiency of work units will not be impaired; (2) additional space will not be required; and (3) costly alterations to the space or procurement of additional office equipment will not be necessary. The no smoking areas should be identified by appropriate signs. In establishing and continuing a smoking policy in work areas under their jurisdiction, supervisors should strive to maintain an equitable balance between the rights of nonsmokers and those of smokers.

f. *Medical care facilities.* In medical clinics and employee health units, smoking should be restricted to visitor waiting areas, staff lounges, private offices, and specially designated areas. If possible and practical, waiting areas should be divided into smoking and no smoking areas.

7. *Cancellation.* GSA Bulletin FPMR D–102, issued November 27, 1973, is canceled.

NICHOLAS A. PANUZIO,
Commissioner,
Public Buildings Service.

TRANS-ALASKA PIPELINE

Priorities Assistance for Construction

This notice amends the General Services Administration and Federal Energy Administration notices of December 30, 1974 (40 FR 26), and January 31, 1975 (40 FR 5409), which notices amended that of September 23, 1974 (39 FR 34608). Together, these notices, subject to the terms and conditions contained therein, authorize priorities assistance and allocations support under the Defense Production Act of 1950, as amended, for the development and production of Alaska North Slope oil resources.

This action is necessary because the construction schedule for the third flow station and associated facilities (Increment 3) on the east field has been delayed pending resolution of issues relating to unitization of the Prudhoe Bay field. In addition, severe weather conditions and uncertain transportation capability constitute an added threat to the timely delivery of equipment and supplies.

In the formulation of this notice, there was consultation with representatives of industry receiving the priorities and allocations suport, and consideration has been given to their recommendations. Further consultation with other industries, including trade associations, was rendered impracticable because this notice applies to numerous trades and industries.

By virtue of the authority vested in the President by Title I of the Defense Production Act of 1950, as amended, and delegated pursuant to Executive Orders 10480 of August 14, 1953, 11725 of June 27, 1973, and 11790 of June 25, 1974, the General Services Administration and the Federal Energy Administration notices of December 30, 1974, and January 31, 1975, are ameded to revise the expiration date appearing in those notices to read December 1, 1976. These notices are further amended to limit the use of the priorities assistance and allocations support to the construction schedule for the third flow station and associated facilities on the east field of the North Slope, for the materials and equipment to be shipped to Prudhoe Bay through the summer of 1978.

This notice is effective as of October 1, 1976.

Dated: October 4, 1976.

FRANK G. ZARB,
Administrator.
Federal Energy Administration.

LESLIE W. BRAY, JR.,
Director, Federal Preparedness Agency, General Services Administration.

NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL FOR MATHEMATICAL SCIENCES

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Mathematical Sciences.
Date and Time: October 28 and 29, 1976; 9:00 am each day.
Place: Room 321, National Science Foundation, 1800 G Street, N.W., Washington, D.C.
Type of meeting: Part Open—Open 10/28 all day. Closed 10/29—9:00 a.m.–10 a.m., open remainder of meeting.
Contact person: Dr. William H. Pell, Head, Mathematical Sciences, Section, Rm. 802, National Science Foundation, Washington, D.C. 20550, telephone (202) 632–7377.
Summary minutes (open Portion): May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Rm. 214, National Science Foundation, Washington, D.C. 20550.
Purpose of panel: To provide advice and recommendations concerning support for research in the mathematical sciences.

AGENDA

THURSDAY, OCTOBER 28

9:00 a.m.	Introduction and Opening Remarks—Dr. William H. Pell, Head, Mathematical Sciences Section.
9:15 a.m.	Recapitulation of FY 1976 and FY 1976 Transition Quarter Operations—Dr. William H. Pell and Dr. Alvin I. Thaler, Program Director for Algeb.
10:00 a.m.	Remarks on the NSF FY 1977 Budget—Dr. John R. Pasta, Director, Division of Mathematical and Computer Sciences.
10:45 a.m.	The Peer Review System—Section Staff.
11:30 a.m.	The Mathematical Sciences in China—Dr. G. F. Carrier, T. Jefferson Coolidge Professor of Applied Mathematics, Harvard University.
12:15 p.m.	Recess.
1:30 p.m.	Review of the Applied Mathematics Program—Mr. B. R. Agins, Program Director for Applied Mathematics.
5:00 p.m.	Adjourn.

FRIDAY, OCTOBER 29

9:00 a.m.	(Closed) Review and Evaluation of Research Proposals—Staff.
10:00 a.m.	Future Plans: The Mathematics Research Institute—Dr. Pasta and Section Staff.
11:30 a.m.	Discussion of possible Replacements of Rotators.
12:30 p.m.	Adjourn.

Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act. Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

M. REBECCA WINKLER,
Acting Committee Management Officer.

OCTOBER 5, 1976.

[FR Doc.76–29712 Filed 10–7–76;8:45 am]

ADVISORY PANEL FOR METABOLIC BIOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, P. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Metabolic Biology.
Date and time: October 28, and 29, 1976; 9:00 a.m. each day.
Place: National Science Foundation, 1800 G Street, N.W., Washington, D.C., Room 511.
Type of meeting: Closed
Contact person: Dr. Elijah B. Romanoff, Program Director for Metabolic Biology, Room 331, National Science Foundation, Washington, D.C. 20550, telephone (202) 632–4312.
Purpose of panel: To provide advice and recommendations concerning support for research in Metabolic Biology.
Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.
Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is, thus, subject to exemption (5) of the Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92–463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

OCTOBER 5, 1976.

M. REBECCA WINKLER,
Acting Committee Maagement Office.

[FR Doc.76–29713 Filed 10–7–76;8:45 am]

ADVISORY PANEL ON SCIENCE EDUCATION PROJECTS

Renewal

Pursuant to the Federal Advisory Committee Act, P.L. 92–463, I have hereby determined that the renewal of the Advisory Panel on Science Education Projects is necessary and is in the public interest in connection with the performance of duties imposed upon the National Science Foundation by the National Science Foundation Act of 1950, as amended, and other applicable law. This determination follows consultation with the Office of Management and Budget (OMB), pursuant to section 14(a)(1) of the Federal Advisory Committee Act and OMB Circular No. A–63, Revised.

Authority for this advisory panel shall expire on October 8, 1978, unless the Director of the National Science Foundation formally determines that continuance is in the public interest.

RICHARD C. ATKINSON,
Acting Director.

OCTOBER 5, 1976.

[FR Doc.76–29711 Filed 10–7–76;8:45 am]

ADVISORY PANEL FOR SCIENCE EDUCATION PROJECTS; SUBPANEL ON UNDERGRADUATE RESEARCH PARTICIPATION PROGRAM

Meeting

In accordance with the Federal Advisory Committee Act, P.L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel on Undergraduate Research Participation Program, Advisory Panel for Science Education Projects.

Dates and times: October 28–30, 1976—9 a.m. to 5 p.m. each day.

Place: Sheraton-Park Hotel, 2660 Woodley Road, N.W., Washington, D.C. and simultaneously at Quality Inn Downtown, Massachusetts Avenue and Thomas Circle, N.W., Washington, D.C.

Type of meeting: Closed.

Contract person: Dr. Lafe R. Edmunds, Coordinator, Student-Oriented Programs, Room W–400, National Science Foundation, Washington, D.C. 20550, tel: (202) 282–7150.

Purpose of subpanel: To provide advice and recommendations concerning support in the Undergraduate Research Participation Program.

Agenda: To review and evaluate specific education proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92–463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

M. REBECCA WINKLER,
Acting Committee Management Officer.

OFFICE OF TELECOMMUNICATIONS POLICY

UNITED STATES INMARSAT PREPARATORY COMMITTEE WORKING GROUP

Establishment

In accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92–463) and the Office of Management and Budget (OMB) Circular No. A–63, and after consultation with OMB, the Director of the Office of Telecommunications Policy has determined that the establishment of the U.S. INMARSAT Preparatory Committee Working Group is in the public interest in connection with the performance of duties imposed on this Office by Sec 2(d) of Executive Order 11556, 3 CFR 956 (1970).

The Working Group will advise the Director on the various positions to be taken by the U.S. Government on issues under consideration by the INMARSAT Preparatory Committee. That Preparatory Committee was established by the Second Session of the International Conference on the Establishment of an International Maritime Satellite System (INMARSAT) to conduct economic and technical studies and to prepare draft organizational structure and financial and staff regulations. The Office of Telecommunications Policy will continue to require the advice of the Working Group until such time as the INMARSAT Preparatory Committee is replaced by a fully functioning INMARSAT organization.

The Working Group will consist of approximately 25 members. In order to provide for an adequate balancing of views, representatives will be appointed from all entities having an interest in INMARSAT, including but not limited to those parties who participated in the initial INMARSAT negotiations.

The Working Group will report and be responsible to the Director and will function solely as an advisory body in compliance with the Federal Advisory Committee Act and OMB Circular A–63. Copies of its charter shall be filed under the Act on or before October 26, 1976.

Interested persons are invited to submit comments regarding the establishment of the U.S. INMARSAT Preparatory Committee Working Group. Such comments, as well as related inquiries, may be addressed to Mr. L. Daniel O'Neill, Advisory Committee Management Officer, Office of Telecommunications Policy, 1800 G Street NW., Washington, D.C. 20504, 202–395–5174.

THOMAS J. HOUSER,
Director.

SMALL BUSINESS ADMINISTRATION

FARGO DISTRICT ADVISORY COUNCIL

Public Meeting

The Small Business Administration Fargo District Advisory Council will hold a public meeting at 9:30 a.m., Thursday, October 21, 1976, at the Ramada Inn, Jamestown, North Dakota, to discuss such matters as may be presented by members, staff of the Small Business Administration, or others present. For further information write or call E. Maine Shafer, U.S. Small Business Administration, Federal Office Building—Room 218, P.O. Box 3086, Fargo, North Dakota 58102, (701) 783–5131.

Dated: October 5, 1976.

HENRY V. Z. HYDE, JR.,
Deputy Advocate for Advisory Councils.

[FR Doc.76–29599 Filed 10–7–76;8:45 am]

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the office of management and budget on September 29, 1976 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529), or from the reviewer listed.

NEW FORMS

U.S. CIVIL SERVICE COMMISSION

Test study of paid leave provisions:
Single-time, private establishment employing 50 or more employees, Strasser, A., 395–5867.

DEPARTMENT OF COMMERCE

National Bureau of Standards:
Private sector R & D management interview Guide, NBS–1069, single-time, private sector R & D performers and manufacturers, Ellett, C. A., 395–5867.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education:
Data collection forms in response to section 437, GEPA, calendar 1976 collection, single-time, 50 states, Washington, D.C. 2 regional offices, Kathy Wallman, 395–6140.

Food and Drug Administration:
Effects on offspring of high level exposure to microwave radiation, single-time, armed forces personnel exposed to radar, Richard Eisinger, 395–6140.

Social Security Administration:
Hospital, hospital-skilled nursing facility complex, cost, SSA–2551, 2551 A through, annually, hospitals, skilled nursing facilities, Caywood, D.P., 395–3443.
Individualized service plan (short form, extended form 1 and 2), SSA–3407, 34 3407B, on occasion, all medicare-certified clinical psychologists, Caywood, D. P., 395–3443.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Policy development and research:
Survey of Landlords-Section 8 program, single-time, landlords in 90 SMSA's, housing, veterans and labor division, Sunderhauf, M. B., 395–3532.

Contract H–2555 Community Issues Dialog Northwest Regional Foundation, Spokane, Wash., single-time, individuals, housing, veterans and labor division, information systems division, 395–3532.

Housing Management:
Field Office Inventory of Deferred Maintenance on Capital Improvement Needs; Regional Office Summary, HUD–53002, HUD–53002–A, single-time, selected public housing agencies, housing, veterans and labor division, Sunderhauf, M. B., 395–3532.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration:
Regulations Governing Applications Under Section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976, on occasion, railroads and other persons, Strasser, A., 395–5867.
Regulations Governing Applications Under Section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976, on occasion, railroads and other persons, Strasser, A., 395–5867.

Federal Highway Administration:
Highway Needs and State Revenues From Energy Resource Activities, single-time, State highway departments, Strasser, A., 395–5867.

REVISIONS

VETERANS ADMINISTRATION

Physician's Approval for Hypodermic Injections, 5–3986, on occasion, private physicians, Warren Topelius, 395–5872.

DEPARTMENT OF COMMERCE

Bureau of Census:
(Part of 1980 Decennial Census of Population and Housing) Prelist Address Register DE 101, DE 102, single-time, housing units in test area not covered by commission mailing list, George Hall, 395–6140.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration:
Statement Regarding School Attendance, SSA–1372, on occasion, full-time students between 18–22, Caywood, D. P., 395–3443.

DEPARTMENT OF LABOR

Employment and Training Administration:
Claims and Payment Activities, ES–213, monthly, State employment security offices, Strasser, A., 395–5867.
Interstate Arrangement for Combining Employment and Wages, MA5–86, quarterly, State employment security offices, Strasser, A., 395–5867.

EXTENSIONS

GENERAL SERVICES ADMINISTRATION

Forms for use by Displaced Persons in Applying for Benefits Under the Uniform Relocation Assistance and Real Property Act, SF 260, on occasion, individuals, Caywood, D. P., 395–3443.

DEPARTMENT OF COMMERCE

Bureau of Census:
Asphalt and Tar Roofing and Siding Products-Monthly Shipments, MA–29A, monthly, manufacturers, Cynthia Wiggins, 395–5631.
Hardwood Plywood (Consumption of Selected Materials, Production and Shipments) Annual Report, MA–24F, annually, manufacturers, Cynthia Wiggins, 395–5631.
Annual Report on Shipments and Production of Industrial Gases, MA–28E.2, annually, manufacturers, Cynthia Wiggins, 395–5631.
Electric Housewares and Fans, MA 36E, annually, manufacturers, Cynthia Wiggins, 395–5631.
Cotton, Man-Made Fiber Staple and Raw Linters Consumption and Stocks, MA–22P, annually, manufacturing plants consuming raw cotton and manmade fiber, Cynthia Wiggins, 395–5631.
Commercial Steel Forgings, MA34C, annually, manufacturers, Cynthia Wiggins, 395–5631.
Selected Industrial Air-Pollution Equipment—Annual Manufacturers Report, MA–35J, annually, manufacturing establishments, Ellett, C. A., 395–5867.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education:
Application for Federal Assistance (Short Form)—Section 1203 HEA Comprehenaive Planning Grants, OE 1279, annually, State Commission, Caywood, D. P., 395–3443.

Center for Disease Control:
A Research Action Evaluation Program for Venereal Disease in Los Angeles, CDC 1107, single-time, VD clinic patients and VD clinic personnel, George Hall, 395–6140.

Social Security Administration:
Home Health Agency Statement of Reimbursable Cost—Hospital Based Home Health Agency Statement of Reimbursable Cost, SSA–1728, annually, health care providers, Caywood, D. P., 395–3443.
Notice of Change in School Attendance, SSA–1383, on occasion, student beneficiaries, Warren Topelius, 395–5872.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing Management:
Application for Tenant Eligibility Under the Section 236 Program, FHA 3131, on occasion, low and moderate income households, Housing, Veterans and Labor Division, 395–3532.
Biennial Certification of Family Income and Composition Under The Section 236 Program, FHA 3132, on occasion, low and moderate income households, Housing, Veterans and Labor Division, 395–3532.

DEPARTMENT OF JUSTICE

Offices, Boards, Divisions:
Short Form Registration Statements of Individuals (Foreign Agents) (OBD Criminal), LEAA–66, on occasion, individuals, Warren Topelius, 395–5872.
Exhibit A to Registration Statement (Foreign Agents), DJ–306, on occasion, individuals, Warren Topelius, 395–5872.
Exhibit B to Registration Statement, DJ–304, on occasion, individuals, Warren Topelius, 395–5872.

PHILLIP D. LARSEN,
Budget and Management Officer.

[FR Doc.76–29771 Filed 10–7–76;8:45 am]

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS

Notice of Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farms and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or cility upon the local labor market, with facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to:

Deputy Assistant Secretary for Employment and Training, 601 D St., NW, Washington, D.C. 20213.

Signed at Washington, D.C. this Fourth day of October, 1976.

BEN BURDETSKY,
Deputy Assistant Secretary for Employment and Training.

VOL 41 NO 197 OCT 8 1976 UM

Applications received during the week ending Oct. 1, 1976

Name of applicant	Location of enterprise	Principal product or activity
The Village Motel	White Sulphur Springs, W. Va.	Rental of rooms and apartments.
Brogdon Industries, Inc. (tenant of town of Andrews).	Andrews, S.C.	Manufacture of fishing rods, radio antennas and other fiberglass and cellulose products.
Bonders, Inc. (tenant of city of Dunn)	Dunn, N.C.	Manufacture of ladies' coats.
J. & C. Co.	Newbern, Tenn.	Building and leasing of facility for agricultural implement sales.
Gibson Products Co. of Cordele, Inc.	Americus, Ga.	Retailing general merchandise.
Shallco, Inc	Smithfield, N.C.	Manufacture of audio attenuators and rotary switches.
Shallcross Investment Realty Co	do	Leasing factory.
Hipps Produce Inc. (tenant of North Carolina Department of Agriculture) Asheville, N.C.	Asheville, N.C.	Wholesale produce and trucking.
C. & J. Produce (tenant of North Carolina Department of Agriculture).	do	Wholesale produce.
Omega Development	Eveleth, Minn	Rental of land and buildings.
Quandahl Associates, Inc	Sparta, Wis.	Manufacture and sales of kitchen cabinets, counter tops, and floor coverings.
Lake County Nursery Exchange, Inc.	Perry, Ohio	Nursery stock.
Thurman L. Warren	Marlin, Tex.	Grocery and washateria.
Sprinkles-Perkins	do	Automobile and farm equipment sales and service.
Park Control, Inc	Phoenix, Ariz.	Manufacture of parking equalizers.
Adamson's Inc	Carey, Idaho	Sale of petroleum products, auto parts, farm machinery, and other products.

[FR Doc.76-29603 Filed 10-7-76;8:45 am]

JOB CORPS CENTER, GLENMONT, N.Y.

Decision Not To Issue Environmental Impact Statement

Notice is hereby given that pursuant to the Code of Federal Regulations, Title 40, Chapter V, Part 1500 the Department of Labor has determined that an environmental impact statement is not required in order to establish a Job Corps Center at Our Lady of Angels Seminary in Glenmont, New York. Reasons for this determination are set forth below.

The proposed New York Job Corps Center will be a training center with residential and educational facilities for 275 disadvanted young men and women, ages 16 through 21 who need and can benefit from intensive employment related services. The function of the center and the staff of approximately 100 will be to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

The center will be a self-contained facility on a ridge on the westerly slope of the Valley of the Hudson River, approximately four miles from Albany. The facility consists of approximately 11 buildings constructed on concrete and steel with brick exterior walls. The campus is located on a 240 acre wooded tract, next to a commerical area, with no more than 14 families living within four miles of the grounds.

The proposed Job Corps Center at Our Lady of Angels is not one of "major Federal actions significantly affecting the quality of the human environment" within the meaning of § 1500.6(c). The intended purpose is the same as the use of the site by the previous occupants, specifically residential living and instruction in an educational institution.

Sewage facilities are planned to include the installation of an aeration tank and establishment of a settlement area. Provision will be made for chlorination of the effluent. Effluent will be discharged into a basin.

Two wells on the property more than adequately meet the volume requirements and standards for water supply. A third well, chemically treated, will be used as a back-up.

Noise will not be a factor since the center will be located in brick buildings off a highway in an isolated area on 244 acres with abundant trees.

Furthermore, the center will be operated in compliance with 29 CFR 97a.116, the standard Job Corps procedures on environmental health, which include:

(a) Center Directors adhere to Federal, State and local regulations concerning environmental health. Routine environmental health inspections of dormitories, food preparation and serving areas, and water waste treatment facilities, will be performed at least once a week by the center physician or his designee. The Center Director will also arrange for formal environmental health inspections by qualified non-center personnel.

(b) The water supply:

(1) It will be adequate for the center's needs, and shall satisfy the latest U.S. Public Health Services Regulations on Drinking Water Standards (42 CFR 72.201-207).

(2) In case of any construction or renovation of the water supply system, design, specifications, and construction procedures will be conducted in compliance with regulations of State and local or other health authorities and their approval.

(3) The Center Director will maintain records which shall show the amount of water treated, amount of chlorine used, daily free chlorine residual, and other data pursuant to standards set by the EPA and local authorities pertaining to water treatment. The Center Director will arrange for all necessary bacterial and chemical tests to be performed by State and local health authorities with the exception of the daily routine residual chlorine test which shall be done by center staff.

(4) The Job Corps center will comply with the water quality and related standards of the State and with the standards established by the Federal Water Pollution Control Act, 33 U.S.C. 1151 et seq.; by Executive Order 11752; 3 CFR 380, (1974) and by the Environmental Protection Agency.

(5) The Center Director will see that septic tanks are inspected by appropriate non-center personnel at least once a year.

(6) The installation will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752, 3 CFR 380, (1974) and at 40 CFR, Part 76.

(c) Food handling practices shall meet local and United States Public Health Department Standards; all meat products shall meet U.S. Department of Agriculture standards; and pesticides shall not be used where food is prepared or served.

(d) Insecticides will be used only in conformance with State and Federal pesticide laws including the regulations of the Environmental Protection Agency.

Signed at Washington, DC this 4th day of October, 1976.

PIERCE A. QUINLAN,
Administrator, Office of Comprehensive Employment Development.

Office of Federal Contract Compliance Programs

FEDERAL ADVISORY COMMITTEE FOR HIGHER EDUCATION EQUAL EMPLOYMENT OPPORTUNITY PROGRAMS

Redesignation

On February 10, 1976 the Office of Federal Contract Compliance Programs published a notice in the FEDERAL REGISTER, 41 FR 5880, designating Leonard J. Biermann as Executive Secretary of the Federal Advisory Committee for Higher Education Equal Opportunity Programs. Dr. David G. Speck, is hereby designated as the Executive Secretary, and will replace Leonard J. Biermann who has served as Executive Secretary of the Committee since its inception. Any persons wishing to correspond with or submit documents to the Committee may do so by sending them to the redesignated Executive Secretary:

Dr. David G. Speck, Executive Secretary, Office of Federal Contract Compliance Programs, Federal Advisory Committee for Higher Education Equal Employment Opportunity Programs, New U.S. Department of Labor Building, Room C3325, Washington, D.C. 20210.

Signed at Washington, D.C., this 5th day of October, 1976.

LAWRENCE Z. LORBER,
Director, Office of Federal Contract Compliance Programs.

Occupational Safety and Health Administration

COLORADO STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 12, 1973, notice was published in the FEDERAL REGISTER (38 FR 25172) of the approval of the Colorado plan and the adoption of Subpart M to Part 1952 containing the decision.

The Colorado plan provides for the adoption of Federal standards as State standards after public hearings. Section 1952.193 of Subpart M of 29 CFR Part 1952 sets forth the State's schedule for the adoption of Federal standards. By letter dated June 15, 1976, from Norman L. Sothan, Chief of Labor Services, to Curtis A. Foster, Regional Administrator, and incorporated as part of the plan, the State submitted Supplement No. 1, Rules and Regulations for Construction Standards which are comparable to the Construction Safety and Health Standards of 29 CFR 1926, as published in FEDERAL REGISTER (39 FR 22801) dated June 24, 1974. These standards, which are contained in the Colorado Occupational Safety and Health Rules and Regulations for Construction, were promulgated after hearings which were held on July 26, 1974, October 17, 1974, and October 9, 1975, and with resolutions adopted by the Colorado Occupational Safety and Health Standards Board on December 19, 1974, April 3, 1975, and October 30, 1975, pursuant to Section 8-11-104, Colorado Revised Statutes 1973.

2. *Decision.* The State submission having been reviewed in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards as of June 24, 1974. In addition, the State standards are more specific in several areas, particularly with respect to the rules and regulations which apply to Illumination, Warning Vests, Material Hoppers, Chutes, Bins and Tank Openings, Tar Kettles, Specific Excavation Requirements, Flooring Requirements and Structural Steel Assembly.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 15010, Federal Building, 1961 Stout Street, Denver, Colorado 80202; Office of the Chief for Labor Services, 1313 Sherman Street, Room 414, Denver, Colorado 80203; and the Technical Data Center, Room N3620, 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Colorado State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason.

The standards were adopted in accordance with the procedural requirements of State law which included public comment, and further public participation would be repetitious.

This decision is effective October 8, 1976.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Denver, Colorado, this twentieth day of August 1976.

CURTIS A. FOSTER,
Regional Administrator.

Office of the Secretary

[TA-W-1091]

AMERICAN ATHLETIC SHOE, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 23, 1976 the Department of Labor received a petition dated September 2, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of American Athletic Shoe, Inc., Ware, Massachusetts (TA-W-1091).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with hockey skates and baseball shoes produced by American Athletic Shoe, Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment assistance, at the address shown below, not later than October 18, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 23rd day of September 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-993]

BIENEN-DAVIS, INC.

Certification Regarding Eligibilty To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-993; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 19, 1976 in response to a worker petition received on July 19, 1976 which was filed on behalf of workers and former workers producing ladies' handbags at Bienen-Davis, Inc. located in New York, New York.

The notice of investigation was published in the FEDERAL REGISTER on July 30, 1976 (41 FR 31957). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bienen-Davis, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers declined 11.5 percent from 1973 to 1974 and then declined 13.0 percent from 1974 to 1975. Employment declined 28.6 percent in the first four months of 1976 compared to the first four months of 1975. Employment of all workers was terminated in April 1976 when the plant closed.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Annual sales of handbags by Bienen-Davis declined 16.6 percent in value from 1973 to 1974 and 24.4 percent from 1974 to 1975. Sales declined 34.1 percent in the first four months of 1976 compared to the first four months of 1975.

INCREASED IMPORTS

Imports of leather handbags increased 56.8 percent in quantity from 1971 to 1972. Imports declined 8.6 percent from 1972 to 1973 and 40.9 percent from 1973 to 1974. Imports increased 28.7 percent from 1974 to 1975 and increased 36.8 in the first quarter of 1976 compared to the first quarter of 1975. Domestic production and consumption figures for leather handbags are not separately identifiable from total handbag production and consumption figures.

Imports of all handbags increased 18.5 percent in quantity from 1971 to 1972. Imports declined 0.3 percent from 1972 to 1973 and 18.8 percent from 1973 to 1974. Imports increased 6.4 percent from 1974 to 1975 and increased 52.9 percent in the first quarter of 1976 compared to the first quarter of the previous year. The ratios of imports to domestic production and consumption increased from 93.9 percent and 48.8 percent, respectively, in the first quarter of 1975 to 122.7 percent and 55.8 percent, respectively, in the first quarter of 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers of Bienen-Davis have indicated that they have reduced purchases from Bienen-Davis and increased purchases of imported handbags. The price differential between domestic and imported handbags was the factor cited most frequently as the reason that customers switched from domestic to foreign suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' handbags produced by Bienen-Davis, Inc. contributed importantly to the total or partial separations of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of handbags at Bienen-Davis, Inc. of New York, New York who became totally or partially separated from employment on or after July 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of September 1976.

JAMES F. TAYLOR,
Director, Officer of Management, Administration and Planning.

[TA-W-1094]

B & M SHRIMP CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 27, 1976 the Department of Labor received a petition dated September 21, 1976 which was filed under Section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of B & M Shrimp Company, Tampa, Florida (TA-W-1094).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with the shrimp caught by B & M Shrimp Company or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further related, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 27th day of September 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-987]

CARDINAL SHOE CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-987: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 8, 1976 in response to a worker petition received on that date which was filed by workers and former workers producing women's footwear at Cardinal Shoe Corporation, Lawrence, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on July 27, 1976 (41 FR 31275). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Cardinal Shoe Corporation.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales, production, or both, of the firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the first and second criteria have not been met.

Employment and average weekly hours worked at Cardinal increased in each quarter from the first quarter of 1975 through the second quarter of 1976 when compared to the same quarter of the previous year.

From the first quarter of 1975 through the second quarter of 1976, both sales and production of women's footwear at Cardinal increased in each quarter when compared to the same quarter of the previous year.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at Cardinal Shoe Corporation have not become, and are not threatened with becoming, totally or partially separated from employment at the firm, and that neither sales nor production of women's footwear at Cardinal Shoe Corporation, Lawrence, Massachusetts have decreased obsolutely as required by Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1,095]

GE-RIC, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 27, 1976 the Department of Labor received a petition dated September 21, 1976 which was filed under Section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Ge-Ric, Incorporation, Tampa, Florida (TA-W-1,095).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with the shrimp caught by Ge-Ric, Incorporated or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further related, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than October 18, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 27th day of September 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-1,092]

J. BASS CO., INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 23, 1976 the Department of Labor received a petition dated August 20, 1976 which was filed under Section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of J. Bass Company, Inc., West Hazleton, Pennsylvania (TA-W-1,092).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with the printing and dyeing of materials by J. Bass Company, Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further related, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than October 18, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

[TA-W-992]

JONELL SHOE CO.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-992: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 19, 1976 in response to a worker petition dated July 2, 1976 which was filed by the United Shoe Workers of America on behalf of workers and former workers producing women's casual canvas shoes at Jonell Shoe Company, Lawrence, Massachusetts, a subsidiary of Morse Shoe Company, Canton, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on July 30, 1976 (41 FR 31959). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Jonell Shoe Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important, but not necessarily more important than any other cause.

The investigation revealed that although criteria one and two were met, criteria three and four were not met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at Jonell declined 6.3 percent from 1973 to 1974 and declined 23.5 percent from 1974 to 1975. In the first six months of 1976, the average number of production workers increased 8.1 percent compared to the first six months of 1975.

Average weekly hours worked declined 0.3 percent from 1973 to 1974 and declined 12.4 percent from 1974 to 1975. In the first six months of 1976, average weekly hours worked increased 9.5 percent compared to the first six months of 1975.

The average number of salaried workers remained stable from 1973 to 1974 and from 1974 to 1975. In the first six months of 1976 the average number of salaried employees declined 5.9 percent compared to the first six months of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

The value of sales of women's canvas shoes by Jonell increased 8.3 percent from 1973 to 1974 and then declined 4.8 percent from 1974 to 1975. In the first six months of 1976 the value of sales increased 12.4 percent compared to the first six months of 1975.

Production of women's canvas shoes at Jonell declined 8.0 percent from 1973 to 1974 and declined 22.1 percent from 1974 to 1975. In the first six months of 1976, production increased 6.4 percent compared with the first six months of 1975.

INCREASED IMPORTS

Imports of canvas footwear declined absolutely and relatively from 1971 to 1972 and then increased absolutely and relatively from 1972 to 1973 and from 1973 to 1974. Imports declined absolutely from 1974 to 1975, and in the first quarter of 1976 compared with the first quarter of 1975. The ratios of imports to domestic production declined from 18.2 percent in 1974 to 17.8 percent in 1975 and declined from 18.9 percent in the first quarter of 1975 to 15.6 percent in the first quarter of 1976.

The category canvas footwear (SIC 30212) consists largely of traditional styles of sneakers and includes women's casual canvas shoes with rubber soles. Import data for women's casual shoes could not be isolated from the basket category.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that customers reduced purchases of women's canvas shoes from Jonell in 1975. The customers agreed that the shoes were not selling as well as anticipated. Consequently, purchases were reduced because the retailers were overstocked with JoneH's shoes.

Several customers indicated, however, that they were increasing purchases from Jonell in 1976. None of the customers purchased imports of this type of shoe.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's casual canvas shoes produced at Jonell Shoe Company, Lawrence, Massachusetts did not contribute importantly to the total or partial separations of workers of that plant.

Signed at Washington, D.C., this 29th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

LOWELL SHOE COMPANY, INC.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-985: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 14, 1976 in response to a worker petition dated June 8, 1976 which was filed on behalf of workers and former workers producing women's duty shoes at Lowell Shoe Company, Incorporated, Lowell, Massachusetts, a subsidiary of Morse Shoe Company, Inc., Canton, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on July 23, 1976 (41 FR 30418). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Lowell Shoe Company, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criteria (1) and (2) have not been met.

The evidence developed in the Department's investigation reveals that sales and production by Lowell Shoe Company, Incorporated increased 20 percent in 1975 from 1974. Production increased 5 percent in the first six months of 1976 compared to the first six months of 1975. When compared to the same quarter of the previous year, production increased during eight consecutive quarters from the second quarter of 1974 through the first quarter of 1976.

Employment of production workers at Lowell Shoe Company, Incorporated increased 7 percent in 1975 from 1974 and increased 1 percent in the first 5 months of 1976 compared to the first 5 months of 1975. The average weekly hours worked by production workers increased 6 percent in 1975 from 1974 and increased 3 percent in the first 5 months of 1976 compared to the first five months of 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at Lowell Shoe Company, Incorporated, Lowell, Massachusetts are not threatened with becoming, totally or partially separated from employment at the firm, and that neither sales or production of women's duty shoes at Lowell Shoe Company, Incorporated, Lowell, Massachusetts have decreased absolutely as required by Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.76-29724 Filed 10-7-76;8:45 am]

[TA-W-957]

LEISURE MANUFACTURING CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-957: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 29, 1976 in response to a worker petition received on June 29, 1976 which was filed on behalf of workers and former workers producing women's boat deck sandals at Leisure Manufacturing Company, Haverhill, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on July 16, 1976 (41 FR 29515). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Leisure Manufacturing Co., its customers, the U.S. Department of Commerce, U.S. International Trade Commission, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important that any other cause.

The Department's investigation revealed that criterion (4) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATION

The average number of production workers declined 33 percent in 1975 compared to 1974. The average number of production workers declined 33 percent in the first six months of 1976 compared to the first six months of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

A fire at the Leisure plant in January 1975 destroyed all records prior to that period and closed the plant from January through March 1975.

Production at Leisure prior to January 1975 was estimated by company officials. Production at Leisure based on these estimates declined 37.6 percent in 1975 compared to 1974.

INCREASED IMPORTS

Imports of women's and misses' non rubber footwear, including sandals, increased absolutely each year from 1971 through 1975 with the exception of 1974. While the ratio of imports to domestic production decreased from 102.6 percent in 1974 to 101.0 percent in 1975 and increased from 134.1 percent in the first quarter of 1975 to 113.7 percent in the first quarter of 1976, imports increased absolutely from 187.6 million pairs in 1974 to 190.7 million pairs in 1975 and increased from 55.5 million pairs in the first quarter of 1975 to 66.6 million pairs in the first quarter of 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation indicated that Leisure Manufacturing Company produces a specialized women's non-skid boat deck sandal. These sandals are sold primarily to stores located in boating marinas in Florida. Leisure's customers stated that they have never carried any imported women's boat deck sandals.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's boat deck sandals produced by Leisure Manufacturing Company did not contribute importantly to the total or partial separation of the workers of that firm.

Signed at Washington, D.C. this 30th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1097]

M & B SHRIMP CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 27, 1976 the Department of Labor received a petition dated September 21, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of M & B Shrimp Co., Tampa, Florida (TA-W-1097).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with the shrimp caught by M & B Shrimp Co. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assist-

V 41 197 OCT 8 76 UM

ance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 27th day of September 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc.76-29730 Filed 10-7-76;8:45 am]

[TA-W-982]

MINI SHOE COMPANY, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-982: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 9, 1976 in response to a worker petition dated June 4, 1976 which was filed on behalf of workers and former workers producing canvas uppers for casual footwear at Mini Shoe Company, Incorporated, Lowell, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER on July 23, 1976 (41 FR 30419). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Mini Shoe Company, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers at Mini Shoe Company, Incorporated declined 19 percent from 1974 to 1975 and increased 24 percent in the first six months of 1976 compared to the first six months of 1975. Average weekly hours for production workers were reduced 50 percent during May-August 1975 and from March 1976 to the present time.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales by Mini Shoe Company, Incorporated decreased 24 percent in 1975 from 1974. All sales to the customer accounting for 95 percent of sales by Mini in 1975 were terminated in February 1976, resulting in a sharp decline in output by Mini Shoe Company in the first hal fof 1976.

INCREASED IMPORTS

Most shoe uppers of foreign construction enter the United States as component parts of completed shoes; imported canvas shoe uppers are therefore not separately identifiable within the Tariff Schedules of the United States. After declining from 1971 to 1974, imports of cotton shoe uppers—including canvas—increased 12 percent from 1.3 million pounds in 1974 to 1.5 million pounds in 1975. Imports increased 19 percent in the first seven months of 1976 compared to the same period of 1975.

CONTRIBUTED IMPORTANTLY

A customer accounting for 95 percent of sales by Mini Shoe Company terminated all orders from Mini in February 1976 and began ordering instead from a foreign source. Imports by the customer, which entered the United States for the first time in July 1976, contributed to a 35 percent increase in U.S. imports of cotton shoe uppers in July 1976 compared to July 1975. Reduced sales due to the loss of its major customer resulted in the separation of the workers of Mini Shoe Company.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with canvas shoe uppers produced at Mini Shoe Company, Incorporated, Lowell, Massachusetts contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Mini Shoe Company, Incorporated, Lowell, Massachusetts who became totally or partially separated from employment on or after June 4, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 29th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.76-29725 Filed 10-7-76;8:45 am]

[TA-W-1007]

QUAKER KNITTING MILLS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1007: investigation regarding certification of eligibility to apply for work adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on July 30, 1976 in response to a worker petition received on July 30, 1976 which was filed on behalf of workers and former workers producing men's sweaters at the Quaker Knitting Mills, Berlin, New Jersey, a division of Warnaco, Inc., Bridgeport, Connecticut.

The notice of investigation was published in the FEDERAL REGISTER on August 13, 1976 (41 FR 34393). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Warnaco, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Plant employment declined 23.5 percent in 1975 compared to 1974 and declined 18.9 percent in the last six months of 1975 compared to the like period in 1974. All workers were laid off on or before December 5, 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Plant production of men's sweaters declined 31.0 pecent in 1975 compared to 1974 and declined 25.7 percent in the last six months of 1975 compared to the like 1974 period. The plant ceased production in November 1975.

The Berlin, New Jersey plant produces men's sweaters which are distributed by the Men's Sportswear Division of Warnaco. Division sales of men's sweaters declined 28.0 percent in 1975 compared to 1974 and declined 13.6 percent in the last six months of 1975 compared to the like 1974 period.

INCREASED IMPORTS

Imports of men's sweaters increased 84.2 percent from 5.7 million units in the January through June period of 1975 to 10.5 million units for the like 1976 period.

CONTRIBUTED IMPORTANTLY

A geographic sampling of the customers of Warnaco's Men's Sportswear Division indicates that customers who have reduced purchases of men's sweaters from Warnaco, have increased their purchases of imported men's sweaters.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of men's sweaters have contributed importantly to the total or partial separation of workers at Quaker Knitting Mills, Berlin, New Jersey a division of Warnaco, Inc., Bridgeport, Connecticut. In accordance with the provisions of the Act, I make the following certification:

All employees at Quaker Knitting Mills, Berlin, New Jersey a division of Warnaco, Inc., who became totally or partially separated from employment on or after July 26, 1975, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 29th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.76-29726 Filed 10-7-76;8:45 am]

[TA-W-949]

STRIDE RITE SHOE CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-949: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 21, 1976 in response to a worker petition dated June 10, 1976 which was filed on behalf of workers and former workers producing children's footwear at the Newburyport, Massachusetts plant of the Stride Rite Manufacturingg Corp., Boston, Massachusetts.

The notice of investigation was published in the FEDERAL REGISTER (41 FR 27804) on July 6, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Stride Rite Manufacturing Corp., its customers, the American Footwear Industries Assn., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that although the third criterion has been met, the first, second, and fourth criteria have not been met.

Significant total or partial separations. From 1974 to 1975, the average number of production workers at the Newburyport plant increased six percent, and average weekly hours decreased one percent. In the first half of 1976 employment and weekly hours were 14 percent and three percent above respective levels in the same period of 1975.

Sales or production, or both, have decreased absolutely. Production at the Newburyport plant rose in quantity by 21 percent from 1973 to 1974 and by three percent from 1974 to 1975. In the first half of 1976 plant production was 15 percent above that in the like period of 1975.

Increased imports. Imports of nonrubber footwear for infants and babies declined in volume each year from 1972 through 1974 and then increased in 1975 over 1974. Imports rose in volume in the first quarter of 1976 compared to the like period in 1975.

Imports of children's nonrubber footwear decreased in volume each year from 1972 through 1975 and increased in the first quarter of 1976 compared to the same period in 1975.

Imports of nonrubber footwear for youth and boys decreased in volume each year from 1972 through 1974 and rose in 1975 over 1974. Imports increased in volume in the first quarter of 1976 compared to the like period of 1975.

Imports of misses' nonrubber footwear declined in volume each year from 1972 through 1975 and increased in the first quarter of 1976 compared to the same period in 1975.

Contributed importantly. A survey of customers who bought children's footwear from the Stride Rite Manufacturing Corp. indicated that those customers who reduced their purchases from Stride Rite did not switch to imports. Customers indicated that Stride Rite's footwear had higher quality than and were generally price competitive with imports.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the children's footwear produced at the Newburyport, Massachusetts plant of the Stride Rite Manufacturing Corp. did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C. this 30th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc.76-29727 Filed 10-7-76;8:45 am]

[TA-W-905]

SUPERIOR PLASTICS, INC.

Negative Determination Regarding Eligibility for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-905: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 27, 1976 in response to a worker petition dated May 12, 1976 which was filed by the International Association of Machinists and Aerospace Workers on behalf of workers formerly producing custom molded plastic parts for televisions at the Chicago, Illinois plant of Superior Plastics, Inc.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 26771) on June 29, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Superior Plastics, its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, and U.S. Department of Labor files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

V41I197 OCT 8 76 UMI

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first two criteria have been met, criteria (3) and (4) have not been met.

Significant total or partial separations. The average number of production and salaried workers declined 29 percent from 1973 to 1974 and fell 38 percent from 1974 to 1975. Average employment then rose 7 percent in the first quarter of 1976 compared to the first quarter of 1975. Average weekly hours worked fell 5 percent from 1973 to 1974 and then fell 10 percent from 1974 to 1975. Average weekly hours worked increased 11 percent in the first quarter of 1976 compared to the first quarter of 1975.

Sales or production, or both, have decreased absolutely. Sales declined 27 percent from 1973 to 1974 and 24 percent from 1974 to 1975. Sales increased 56 percent in the first quarter of 1976 compared to the first quarter of 1975. Production fell 24 percent from 1973 to 1974, and 23 percent from 1974 to 1975. Production increased 72 percent in the first quarter of 1976 compared to the same quarter, previous year.

Increased imports. Imports of custom molded plastic parts for televisions fell both absolutely and relative to domestic production and consumption in each year from 1971 through 1975. Imports fell from 0.07 percent and 0.08 percent of domestic production and consumption, respectively, in 1974 to 0.06 percent of each domestic production and consumption in 1975. The ratio of imports to each domestic production and consumption fell to 0.05 percent in the first quarter of 1976 from 0.06 percent in the same quarter of the previous year. From 1974 through the first quarter of 1976, imports comprised an insignificant percentage of domestic production and consumption, never exceeding one tenth of one percent.

According to Department of Labor industry analysts, domestic production, exports, and imports of custom molded plastic parts for stereos all follow the same pattern as production, exports and imports of plastic parts for television.

Contributed importantly. The Department's investigation indicated that customers of Superior Plastics did not switch from purchases of plastic products made by Superior to purchases of imported plastic products.

A major customer decreased purchases of component parts from Superior Plastic because of a shift in production of complete television sets. Production of custom molded plastic parts for television sets are a local adjunct to complete television set production.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with plastic products, including plastic parts for televisions and stereos, produced at the Chicago, Illinois plant of Superior Plastics, Inc., did not contribute importantly to the total or partial separations of workers at that plant.

Signed at Washington, D.C. this 30th day of September 1976.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1,098]

TARA LOU, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 27, 1976 the Department of Labor received a petition dated September 21, 1976 which was filed under section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Tara Lou, Inc., Tampa, Florida (TA-W-1,098). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221 (a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with the shrimp caught by Tara Lou, Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

Interested persons are invited to submit written comments regarding the subject matter of this investigation to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 18, 1976.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, D.C. 20210.

Signed in Washington, D.C. this 27th day of September 1976.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

I. INTRODUCTION AND SUMMARY

1. The issues involved in this proceeding can be traced to the early 1960's with the inception of Docket 14251 (the original TELPAK investigation) and Docket 14650 (an inquiry into Western Union's domestic telegraph and other services). Docket 18128 originally concerned the lawfulness of TELPAK rate increases of March 25, 1968. However, through consolidation of certain issues extant in Docket 16258 (which concerned appropriate interstate service revenue contributions) and Docket 18684 (which concerned revised video transmission rates), the scope of this proceeding now includes the issue of the general lawfulness of overall rate levels[1] and interservice rate level relationships of Bell's major categories of interstate service. (Findings in this proceeding apply to those services of Western Union which exhibit matching rate levels.) Implicit in the determination of appropriate earnings relationships of Bell's services is our parallel determination of the proper methodology by which each service's contribution to total earnings is to be measured.

2. It is Bell's position that each category of service should yield revenues, at a minimum, to cover its forward looking, long-run incremental costs (LRIC). Actual rates should exceed such minimums so that aggregate revenues from all services yield the overall interstate revenue requirement. Bell has employed a "basic service philosphy" with regard to determining how total revenue requirements are to be recovered by its private line and monopoly services (MTS and WATS). That is, private line service rates are to yield an "optimum" contribution to earnings above minimum LRIC levels. MTS and WATS rates are to cover residual revenue requirements not met by private line service revenues. Bell has proposed an incremental, prospective "burden test" allegedly to show that its rates are free from cross-subsidization, and a "retrospective accountability" test for purposes of providing comparative information concerning forecast and actual results.

3. The Chief of the Common Carrier Bureau released a Recommended Decision (RD) herein on January 19, 1976. The case is before us on exceptions filed to the RD. The RD did not accept Bell's LRIC-oriented basic service philosophy, but supported Fully Distributed Costs (FDC) Method 1 to determine each service's relevant costs. The RD relied on individual service deviations from the Method 1 computed return on investment as an indication of the existence of cross-subsidization and to determine the lawfulness of rate levels and rate level relationships. (The RD held that MTS rates should be designed so as to yield earnings no more than the lesser of Bell's maximum allowed rate of return, or the overall rate of return actually being realized. Private line categories of service rates should be designed to yield no less than the minimum allowable overall rate of return).

4. We find it encumbent to select the costing methodology which best reflects our statutory mandate (see Section VIII). Our prior policy supports the position that actual costs of providing service underline the statutory requirement that rates be just, reasonable, and nondiscriminatory, albeit this does not mean that costs are the only criterion useful in determining whether rates are lawful under the Act. Further, we conclude that the public interest is not generally served by interservice cross-subsidization, but recognize that statutory and social policies may lend sanction to some intraservice subsidies. Finally, we make findings regarding proper cost standards, measures of cross-subsidization, and acceptable departures from cost of service as a criterion of the justness and reasonableness of return levels and relationships.

5. We hold that Bell's use of LRIC and, generally, its basic service philosophy do not satisfy the constructs of true marginal cost pricing principles. Indeed, we note that it is not possible to make a strict translation from neoclassical marginal costing theory to the pragmatic world of telecommunications. On the basis of these determinations, we have concluded that no "optimal" social welfare or beneficial public interest characteristics could be imputed to Bell's costing methodology. To the contrary, we find Bell's basic service philosophy merely a variant of a full costing approach.

6. We determine that an FDC costing approach is most consistent with our objectives and responsibilities under the Act, and should be the basic standard by which the justness and reasonableness of rates will be judged. Of the seven FDC methods of record, Method 7's historical cost causation basis of allocating costs is determined to be most consistent with our mandate to ensure just, reasonable and nondiscriminatory rates. However, we recognize that such factors as demand fluctuations and varying growth patterns between services could cause distortions between historical causation and actual cost patterns. For this reason, we require that revised Method 1 data be filed concurrent with that of revised Method 7 to document comparative current relative use cost patterns, and to establish the veracity of the cost patterns determined under the historical cost causation approach. Revisions are found to be necessary in the case of both Method 1 and Method 7 to correct certain infirmities in these methods as they have previously been implemented. These revisions are to be made before these methods are used as the basis of revised interstate rates, supportive data for subsequent rate changes, or continuing surveillance.

7. We find that Method 1 and Method 7, full cost data currently available from the record provide an adequate "zone of reasonableness" for purposes of drawing conclusions concerning the unlawfulness of Bell's past and present rate levels. On the basis of a zone of reasonableness defined by Method 1 and Method 7, data, we find the current WTS return level lawful under section 201(b), and that since 1969, at least, MTS has earned a level of return that has not been unduly excessive. Present WATS return levels appear, on the data in this record, excessive and indicative of the presence of cross-subsidization. Past WATS levels of return likewise appear excessive, inclusive of the period from the Seven-Way Cost Study (1964) to the present. However, as we note below, we are uncertain as to the actual costs of providing WATS and will await a refiling and cost justification of new WATS rates in accordance with our re-

[1] "Rate levels" and "return levels" are generally used interchangeably herein.

V41N197 OCT 8 76 UM

cent WATS decision. We also find that the present return levels for Bell's other services (Private Line Telephone, Private Line Telegraph, Audio/Radio, Television, and the "Other" services classifications) are deficient, and, as such, are being subsidized by other services. Past return levels for these services are generally also found to have been unlawfully low, although in some years the return level of certain services could have been considered to have approached the zone of reasonableness.

8. We have investigated the lawfulness of Bell's rate levels for its interstate services under section 202(a). Consistent with the Commission's TELPAK decision we find that the RD correctly recognized that competitive necessity may justify what might otherwise be considered as unlawfully discriminatory rates. However, we disagree with the RD's conclusion, relying on the Telpak Sharing proceeding, that discriminatory pricing based on competitive necessity is permissible only if the carrier meets the three criteria enunciated in that proceeding. We also depart from the RD by concluding that the competitive necessity criteria need not be applied to all Private Line Services.

9. We find that only two of the three competitive necessity criteria are pertinent and should be applied to Bell's TELPAK offering to determine if there are violations of section 202(a): (1) That those benefitting from the discrimination have an alternative supply source which will be utilized in the absence of discrimination and, (2) that the discrimination benefits users discriminated against. We find the record shows that the threat from private microwave and indeed from competing terrestrial and satellite carriers has not and still does not warrant the extent of discrimination manifested by Bell in its TELPAK category of service. There has been no showing that this specific TELPAK bulk rate response is commensurate with any real competitive threat. Nevertheless, we recognize that a bulk rate offering of some other nature and magnitude may be warranted. We therefore order Bell to refile its TELPAK offering.

10. Under our guidelines, we direct Bell to assign all extant facilities to its services to provide a facility "datum." Such a datum will provide the distributive basis for related cost assignments, and will ensure carrier accountability and nondiscriminatory treatment of all users. Nevertheless, we conclude that certain demand and supply conditions may warrant the offering of less than full cost ("discount") rates. This might be permissible if the carrier can make a definitive and clear showing of recovery of full recorded costs by the service involved within a reasonable time certain, and if such departures are in the public interest and consistent with the Commission's basic mandate. Further, we have directed Bell to develop acceptable forecasting techniques in conjunction with the Bureau Staff for use in Method 7 procedures, and that the Staff, in consultation with Bell, revise Method 7 and Method 1 procedures to correct certain infirmitives. These revisions will permit the use of these methods as the foundation of our basic evaluative procedures. Finally, we direct the staff to complete the methodological revisions within three months, and, direct Bell to file rates for all its services based on a revised Method 7 analysis (supplemented by revised Method 1 data) within eight months, both from the effective date of this order.

II. History of the Proceedings

11. This docket is an outgrowth and consolidation of several significant and complex proceedings before the Commission over the past fifteen years. Consequently, we believe it helpful to present an abridged case history to facilitate an understanding of its evolution. We note that the RD contains a more elaborate history.

12. On September 7, 1961, we instituted Docket No. 14251, an investigation into Bell's original TELPAK tariff.[3] TELPAK, a bulk private line offering, was filed in anticipation of competition from private microwave arising from our Above 890 decision.[4] On March 18, 1964, we issued our Tentative Decision in Docket 14251, concluding that:

(a) Services furnished under the TELPAK tariff and those furnished under the various other private line tariffs are like communications services.

(b) There are no material cost differences attributable to furnishing a number of channels of one customer under TELPAK as opposed to furnishing the same number of channels to several customers under the other private line tariffs.

(c) There is no justification for TELPAK A and TELPAK B in terms of competitive necessity, inasmuch as the rates for the equivalent number of channels offered under ordinary private line tariffs are reasonably competitive with the costs of private microwave systems.

(d) There is apparent justification for TELPAK C and D classifications in terms of meeting competition from private microwave systems having channel capacities comparable to those offered by such TELPAK classifications. However, we are unable to determine on this record that the rates for TELPAK C and D classifications are compensatory in relation to the costs of furnishing the services offered thereunder, and therefore are unable to find that the other users of AT&T services will benefit and not be burdened by the application of such rates.[5]

We affirmed these conclusions by a final decision, adopted December 23, 1964. However, we held that the record should be reopened to allow Bell to furnish probative cost data showing that the TELPAK C (60 voice-grade channels)[6] and TELPAK D (240 voice-grade channels) offerings are compensatory and do not burden other users of Bell's services. We ordered Bell to file tariffs to eliminate the unlawful discrimination found to exist between TELPAK A (12 voice-grade channels) and TELPAK B (24 voice-grade channels) and private line rates.[7]

13. In 1962, while the TELPAK proceeding was underway, we instituted Docket No. 14650, a broad inquiry into Western Union's domestic telegraph and other services.[8] In response to allegations by Western Union that Bell had historically used its monopoly voice services, to subsidize its competitive services, the Commission's Telephone and Telegraph Committees requested Bell to perform a study to ascertain Bell's interstate investment, revenues, and expenses, and net earnings among its seven categories of service: MTS, wide area telephone service (WATS), teletypewriter exchange service (TWX), private line telephone service, private line telegraph service, TELPAK, and all others.[9]

14. Bell submitted study results known as the "Seven-Way Cost Study," on September 10, 1965. The study showed that for the twelve month period ending August 31, 1964, the return on Bell's investment ranged from 10.1 percent for WATS to 0.3 percent for TELPAK. Further, Bell's return on its competitive services were significantly below its system-wide average, while its return on monopoly services, MTS and WATS, were above the average.[9] However, the Commission did not address the questions of compensativeness and cross-subsidy in Docket 14650.

15. As a result, in part, of the Seven-Way Cost Study we instituted Docket No. 16258 on October 27, 1965.[10] This proceeding was a general investigation into the rate levels and rate level relationships existing with respect to Bell's interstate services. We noted the importance of such investigation, stating that:

> Certain of the services involved are furnished by the Bell System in direct competition with services offered by other carriers. To the extent that these services may be underpriced by the Bell System, this may have a competitive impact on such other carriers.[11]

16. Following affirmation of our *Telpak* decision,[12] we terminated Docket No. 14251 and amended our designation order in Docket No. 16258 to include the issue of whether TELPAK C and D were compensatory. We ordered the record in Docket No. 14251 incorporated by reference into Docket No. 16258. We also stressed that if Bell were to submit additional tariff filings with respect to its TELPAK offerings, such filings should

be examined in a separate proceeding, not as a part of the general issues of Docket No. 16258.[13]

17. On March 25, 1968, Bell filed certain rate increases in its interstate private line TELPAK tariffs. By Order adopted April 10, 1968, we suspended such revised tariffs for the statutory period and instituted Docket No. 18128, an investigation into the lawfulness of the tariff increases.[14] By subsequent Order, adopted July 10, 1968, we further delineated the scope of this proceeding, distinguishing it from those issues in Docket No. 16258 (then designated as Phase 1–B) which was to establish a basis for the formulation of principles to govern the establishment and maintenance of overall rate levels for each of Bell's interstate services.[15] Additionally, we broadened the issues herein:

> Because TELPAK service is, in essence, a rate classification within the family of private line services offered by (Bell) appropriate consideration of the reasonableness of TELPAK rates requires simultaneous and coordinate consideration of respondents' private line tariffs. Accordingly, our Order herein will specify the issues in Docket No. 18128 to embrace all of the private line tariffs, except audio and video program transmission services, but including the charges for teletypewriter station equipment.[16]

Thus, while Docket No. 16258 was concerned with the general issue of the appropriate revenue contribution to be made by each interstate service to the overall revenue requirement, Docket No. 18128 was concerned with the lawfulness under sections 201(b) and 202(a) of the Act of each private line category, except audio and video. Additionally, at that time we imposed an accounting order and held the hearings in Docket No. 18128 in abeyance, pending the determination in Docket No. 16258 of appropriate ratemaking principles and resolution of the TELPAK sharing proceedings in Docket No. 17457.[17] Finally, the scope of this proceeding was broadened by further Order of the Commission on July 24, 1968 suspending tariff rate increases for Western Union's teleprinter station equipment. The issues related to the lawfulness of AT&T's rates were found applicable to Western Union's rates.[18]

18. As Docket No. 16258 proceeded, the Commission, acting through its Telephone Committee, initiated conferences among the parties in order "to facilitate the possibility of resolution of some or all of the pending issues by mutual agreement." [19] As a result of these conferences, the parties and the Chief, Common Carrier Bureau agreed to a "Statement of Ratemaking Principles and Factors." This "Statement," which was issued on May 28, 1969, declared certain ratemaking principles and factors to be acceptable to the parties and the Bureau.[20] It also suggested procedures to effectuate the ratemaking principles, including new studies to be made by AT&T, and possible rate changes, in conformity therewith. On July 29, 1969, we took note of the "Statement," without necessarily approving it, and adopted the recommended procedures except for the recommendation that the "Telpak Sharing" proceeding be reopened and consolidated with the proceedings herein. At the same time, we incorporated the record of Phase 1–B of Docket No. 16258, including the record of the original Telpak proceeding, Docket No. 14251, into this docket.[21] Thus, by July 1969, Docket 18128 had grown from the original investigation into the lawfulness of TELPAK rate increases to a general investigation of AT&T's and Western Union's private line tariffs, other than program transmission services, including issues as to the overall revenue contribution that should be made by each service and whether TELPAK C and D were compensatory.

19. As a result of the "Statement of Ratemaking Principles and Factors," Bell filed new proposed TELPAK tariff rate increases on October 1, 1969, based on updated studies. On October 29, 1969, these tariffs were suspended and set for hearing in this proceeding.[22] Additionally, we directed that the hearings herein be removed from deferred status and that they proceed as expeditiously as possible. Western Union matched AT&T's TELPAK increases; these rates were also suspended and set for hearing herein.[23]

20. On February 18, 1970, Phase 1–B of Docket No. 16258 was procedurally terminated. However, we stated that the various rate revisions made by Bell, allegedly in conformity with the "Statement of Ratemaking Principles," and the lawfulness of the rate levels of each of AT&T's service categories including MTS and WATS, would be reviewed in the context of this proceeding and in Docket No. 18684.[24]

21. Docket No. 18684 was instituted on September 24, 1969 as an investigation into the lawfulness of AT&T's revisd video transmission rates.[25] Bell also filed revised tariffs on September 25, 1969, for its audio program transmission service. These too, were set for hearing in Docket No. 18684.[26] Through informal conferences the issues concerning the audio services were resolved.[27] However, the lawfulness of the video private line services continued unresolved. On June 10, 1970, we consolidated Docket No. 18684 with this proceeding in order to "view the totality of costs for all of AT&T's interstate services so that the question of interstate burden can be examined and if necessary corrected * * *."[28] Hearings commenced on September 28, 1970 following three prehearing conferencse.

22. On November 20, 1970 AT&T filed tariffs designed to increase rates for MTS in order to achieve a higher overall return on total investment. At our request, Bell postponed the effectiveness of these tariff revisions pending an expedited rate hearing. As an interim measure the Commisison granted special permission to AT&T to file lesser rate increases. These were suspended and set for hearing with an accounting order in Docket No. 19129.[29] However, certain of the issues raised by the MTS rate increases were designated as issues to be determined herein. In particular, Bell was required to show that its claimed additional interstate revenue requirement should be met solely through increased charges to the MTS customer and further that the rate increase at issue in Docket No. 19129 did not involve cross-subsidization of any other service.[30]

23. On December 6, 1971, AT&T filed revised private line tariffs, increasing rates for TELPAK and private line telephone and telegraph services. These increases were suspended and the lawfulness of the revision designated for hearing in this proceeding.[31] Similar increased rates filed by Western Union were also placed in issue in this Docket.[32]

24. Bell also sought to revise its video program transmission tariffs. By Memorandum Opinion and Order released May 15, 1973, we designated aspects of the video tariff revision for oral argument on July 26, 1973, in Docket 18684.[33] Oral argument was held, after which the Chief of the Common Carrier Bureau held a number of settlement conferences with the parties. By stipulation signed November 27, 1973, the participants agreed to a two year experimental period during which certain stipulated rates and conditions would apply to video private line service. We approved this stipulation and terminated Docket No. 18684 on December 11, 1973.[34] However, although the rate structure issue in Docket No. 18684 is now moot, the issue of the rate level for the video program transmission service remains at issue herein.

[34] 44 FCC2d 525 (1973).

25. Evidentiary hearings herein began on September 28, 1970 and were concluded on August 8, 1972. Fifty-three witnesses presented testimony and evidence. There are now approximately 27,000 pages of transcript and exhibits before us in this docket alone, in addition to the record from Docket 16258. The Administrative Law Judges closed the record herein on December 11, 1972.[25] Proposed Finding of Facts and Conclusions were filed on March 12, 1973 and Replies thereto on May 14, 1973. The Recommended Decision of the Chief, Common Carrier Bureau was released on January 19, 1976. The parties' Exceptions and Supporting Briefs were submitted one month later. We entertained oral argument on July 14, 1976.

III. Issues To Be Resolved

26. As can be seen from the preceding summary of the history of this case, our present questions as to the legality of rate levels and rate level relationships arose initially from tariff submissions in Docket 18128 (with respect to the private line offerings of Bell and Western Union), in Docket 18684 (with respect to Bell's Audio and Television Program Transmission Services) and in Docket 19129 (with respect to MTS). As originally designated, the questions of lawfulness of these tariff submissions included not only a consideration of the rate levels of each service category, but also an examination of the internal rate structure of each such service category in light of the statutory language of Sections 201–205 of the Act. As the RD recognized, however, the broad inquiry into the lawfulness of the tariffs in this proceeding was subsequently narrowed.[26] Thus, in Docket Nos. 19129 and 18684, we ruled that the MTS, WATS and Audio/Video tariffs were to be considered herein, but only insofar as the lawfulness of the rate levels of each such class of service was concerned.[27] We have stated that this proceeding is to resolve the fundamental and important question:

> What should be the appropriate earnings relationship among the various interstate services offered by the Bell System? And, *how should the contribution to total earnings by each service be measured?* (33 FCC 2d 522, 524) (Emphasis added.)

27. We thus have before us the lawfulness of overall rate levels and the lawfulness of interservice rate level relationships with respect to the following interstate categories of service offered by Bell:

Private Line Telephone Service
Private Line Audio Program Transmission Service
Private Line Television Program Transmission Service (Video)
TELPAK Service
Private Line Teletypewriter Service (Private Line Telegraph)
Long Distance Message Telecommunications Service (MTS)
Wide Area Telecommunications Service (WATS)

and the following categories of service offered by Western Union:

Leased Line Telegraph Service
Leased Line Telephone Service
Leased Line Telpak (Broadband) Service
Telpak Bulk Rates for Leased Line Telephone & Telegraph Service

In statutory terms we have stated the issues herein as follows:

(a) Whether the rate levels for (1) message toll telephone service, (2) WATS, (3) private line telephone grade service, (4) private line telegraph grade service, (5) audio and video program transmission services, (6) TWX and (7) all other services are or will be just and reasonable within the meaning of section 201(b) of the Communications Act of 1934.

(b) Whether the rate levels for the above-mentioned services will subject any person or class of persons to unjust or unreasonable discrimination, or give any undue or unreasonable preference or advantage to any person, class of persons or locality, or subject any person, class of persons or locality to any undue or unreasonable prejudice or disadvantage within the meaning of section 202(a) of the Communications Act of 1934.

(c) Whether the Commission should prescribe just and reasonable rate levels with respect to any or all of the above-mentioned services placed at issue by this order, and, if so, what rate levels should be prescribed. (21 FCC 2d 495, 497).

Thus, in summary, we are concerned herein with the lawfulness of rate levels, interservice rate level relationships and with the appropriate basis for measuring same.

28. The RD proposed (par. 36) that ten questions be addressed in resolving the fundamental issues discussed above.[28] Bell, the Airlines, ARINC, and the Ad Hoc Telecommunications Committee[29] object to one or more of these questions. They argue that the questions do not fairly reflect the issues herein or that the questions assume answers to issues yet to be resolved. To the contrary, we believe that in general these questions do reflect the issues herein. However, while our resolution of the issues will, of necessity, provide answers to these questions, we do not intend to limit our discussion below to only these.

29. Western Union, Bell, and AIA except to the RD's failure to address the question of the propriety of Western Union's rate levels. The RD concluded that the Commission need only be concerned in this proceeding with the rate levels of Bell's service classifications. We agree with the RD that the primary purpose of this proceeding is to focus on Bell's offerings and that an indepth analysis of the lawfulness of Western Union's rate levels would unduly complicate this already complex and protracted proceeding, with no concomitant benefit. The record shows that Western Union's rate levels for its leased line and TELPAK services were based solely to be competitive with Bell's service offerings and that Western Union has neither adopted Bell's theory of ratemaking at issue herein nor supported the claim that Bell's rate levels are lawful. Thus, to the extent we find Bell's rate levels unlawful, we cannot find lawful the matching rate levels of Western Union. With regard to its prior filings, it is clear that Western Union's increases in its TELPAK and private line rates were justified and that no refunds would therefore be due. Accordingly, we are terminating the accounting orders issued herein with respect to Western Union's services.

---

[25] FCC 72M–1528.

[26] Exceptions have been raised with respect to the RD's failure to reach the lawfulness of various rate structure elements. Insofar as we agree with the RD that the issues herein were narrowed to encompass only return levels and inter-service return level relationships, we do not address any rate structure questions. Furthermore, because the parties have addressed themselves almost entirely to return level issues, the record herein is inadequate to make any findings with respect to rate structure.

[27] See also 34 FCC 2d 839, 840 (1972).

[28] These questions are:

(1) Whether and to what extent there is or will be any cross-subsidization among the aforementioned eight principle interstate service and rate categories of Bell;

(2) Whether and to what extent the "Long Run Incremental Cost" (LRIC), "burden test," and the "retrospective accountability" approaches and principles as proposed by Bell herein, are appropriate as a basis for the pricing of their services;

(3) Whether and to what extent the "Fully Distributed Cost" (FDC) principles, as proposed by certain parties, should be used as a basis for the pricing of these services;

(4) Whether and to what extent Bell should be permitted to earn in excess of its overall allowable interstate fair rate of return (currently 9.5 percent–10.0 percent) on investment allocated on an FDC basis to its monopoly MTS and WATS services;

(5) Whether and under what circumstances Bell should be permitted to price its competitive private line services individually, or as a group, at less than the interstate fair rate of return on its investment allocated on an FDC basis to such services;

(6) Whether the past and present disparities in the levels of bulk TELPAK and non-TELPAK rates for like Private Line Telephone and Telegraph Services constitute undue discrimination or preference in violation of section 202(a) of the Act;

(7) Whether and to what extent the past and present overall levels of Bell's bulk TELPAK rates for ordinary Private Line Telephone and Telegraph Services are now or have been noncompensatory or otherwise unjust and unreasonable under section 201(b) of the Act;

(8) Whether and to what extent the various tariff filings revising the rate levels for Private Line Telephone, Private Line Telegraph, Private Line Audio, TELPAK Broadband, Private Line Video Program Transmission Services, and TELPAK bulk rates have been justified by Bell;

(9) Whether and to what extent Bell's pricing practices with respect to the level of rates for its principal categories of service derogate against the regulatory policies and objectives of the Commission as set forth in its Specialized Common Carrier decision in Docket No. 18920; and

(10) Whether and to what extent the Commission should order revisions to be made in the rate levels of MTS, WATS, or of Bell's other principal categories of service in the light of the findings and conclusions reached on the above-stated issues.

[29] These and other parties are identified in Section IV, *infra*.

IV. Basic Positions of the Parties[40]

Bell System Respondents (Bell or AT&T)

30. We find that the Bell System fairly characterized its position in summary form in its Proposed Findings of Fact and Conclusions (pars. 1–17) and in its Exceptions to the RD (Bell Expt., pp. 25–27). The Bell System maintains that it seeks to obtain revenues from all its interstate services sufficient to meet its total interstate revenue requirement. It notes that each category of service should yield revenues to cover the costs incurred in furnishing the service, including the cost of capital, and in addition to make a contribution toward the coverage of common costs. Bell maintains that the relevant costs to be considered are long-run incremental costs (LRIC), not fully allocated or fully distributed costs. Bell stated that its LRIC studies "represent the full amount of the effect on the total cost to the firm resulting from a difference in one level of output compared with another level of output". (T. 2237). Bell maintains that although costs play an essential role in determining rate levels, rates cannot be based solely on costs. Incremental costs determine the minimum rates for a service category. Actual rates should exceed such minimums so that the aggregate revenues from all services yield the overall interstate revenue requirement.

31. In pricing its private line services, Bell states that it seeks to establish rate levels which are competitively effective and yield an "optimum" contribution to earnings. Bell notes that its objective is to keep MTS charges as low as possible and still meet its interstate revenue requirement. Relevant ratemaking factors such as market conditions and rate relationships may lead Bell to choose an "optimum" rate which does not make the maximum possible contribution. MTS and WATS rates are set to cover the portion of the overall revenue requirement not met by private line service revenues. "Contribution" from a service is defined as the difference between the service's total revenues and its incremental costs, counting, where appropriate, cost savings and revenues foregone. This defines what we term Bell's "basic service" philosophy.

32. In comparing alternative rate proposals, Bell maintains the basis of comparison should be forward looking LRIC and long-run incremental revenues. Such analyses should account for any material cross-elastic effects. Bell proposes a "burden test" to determine the existence of cross-subsidy. The burden test is performed as an incremental analysis which contemplates comparison between total overall costs and revenues with the service included and the total costs and revenues with the same service excluded. Bell claims that the burden test demonstrates that none of its private line services are burdening the users of MTS or any other service and that significant contributions are being made to its total revenue requirements by such services. Thus, Bell asserts that no service is cross-subsidizing any other service. Bell further claims that LRIC, the burden test and its "retrospective accountability" test (which will be described below) give the Commission a totality of information which will allow it to approve rates and monitor results. Bell contends that fully distributed cost studies used for ratemaking purposes do not provide a relevant measure of cross-subsidy or service rate levels. Thus Bell argues that the method proposed in the RD is anti-competitive and creates a protective umbrella for its competitors.

33. Bell claims that TELPAK is justified by competitive necessity and is compensatory and not a burden on MTS or any other service category. The rates under investigation are said not to be unjust, unreasonable, unlawful nor excessive and that such rates yield optimum contributions to earnings. Finally, Bell asserts that no basis has been shown for prescription by the Commission of any rates or regulations under Section 205 of the Act, and that there is no need to order refunds with respect to any rates under investigation herein which have been subject to accounting orders and possible refund.

The Airline Industry Parties (Airlines)

34. The Airlines agree that there should be no cross-subsidization, but they contend that it is neither necessary nor desirable for Bell to maintain the same relationships between revenues and costs, or the same rate of return, for each class of service. They note that cost-indicated rates are useful ratemaking tools. As a general rule rates should produce sufficient revenues to cover relevant costs, but cost is not the sole determinant of price. Appropriate consideration must also be given to other pertinent factors, especially as applied to a class of competitive service which is supplementary to the principal or monopoly services of the carrier. In order to assure the viability of the carrier and avoid the subsidization of one class of service by other classes, the Airlines state that rates should be "compensatory", i.e., the rates for a class of service should provide revenues sufficient at least to cover the "relevant" costs of furnishing that service, and that the "relevant" costs in determining whether rates are compensatory are "long-run incremental costs," defined as the increase in the total cost of investment and expenses, including a reasonable rate of return on capital, which would be incurred by the addition of a particular class of service, or of furnishing additional quantities of service in an existing service category, or, more stringently, "avoidable costs", the costs which would be saved, escaped, or not occasioned if the class of service were discontinued or not offered. (Airline Parties, Exh, No. 1, pp. 5–11).

35. It is asserted that properly measured long-run incremental costs determine the rate floor or minimum rate level of a class of service. If the rates of a service cover their LRIC, they are compensatory and cause no burden on other services (Airlines P.F., pp. 83–88). However, the Airline parties contend that Bell's meaning and definition of burden is different in that the Bell burden test is oriented toward cross-elasticity. The Airlines maintain that failing the Bell burden test does not mean that the service must be eliminated as non-compensatory (Airlines P.F., pp. 79–88).

36. As to the specific TELPAK rates at issue herein, the Airlines contend that the original TELPAK rates were probably compensatory and that the "interim" rates effective September 1, 1968 were clearly compensatory. The Airlines maintain that the TELPAK rates effective February 1, 1970 and May 4, 1972 are unreasonably high, unjust and unreasonable. The amounts collected above the interim rates (which the Airline parties claim should be a rate ceiling justified on the basis of costs of competitive alternatives) effective September 1, 1968 should be refunded pursuant to the accounting orders under which those rate increases were originally suspended. (Airlines P.F., pp. 70–75, Airlines BSE, pp. 60–65). Finally, the Airlines suggest that a new bulk rate communications offering would appear to be appropriate, based on competitive necessity and route density. (Airlines P.F., pp. 162–68). Bell's monopoly users would be protected by holding monopoly rates to a "ceiling" reflecting the company's revenue requirement minus the costs directly attributable to the competitive services, on the basis of retrospective cost-causing responsibility. (Airlines BSE, pp. 46–53; Airlines P.F., pp. 151–58).

Aeronautical Radio, Inc. (ARINC)

37. Arinc's position is generally the same as that of the Airlines. It contended that the bulk rates of the Telpak offering have stimulated the growth of the communications market, assisted the effective operation of the government, have promoted a major betterment in the conduct of major industrial and business enterprises, and have generally benefited the public at large through improved safety, services, and productivity. (Airlines, Exhs. 2–5, DOD, Exhs. 1–2, Ad Hoc Committee, Exh. 1)

38. Arinc contends that except where strong public interest considerations dictate a lower rate level, the rates for each service offered by a common carrier should be "compensatory." A service is compensatory if it covers the LRIC (or in some cases, the "avoidable" cost) of offering the services (Arinc P.F., pp. 32–5). No method of FDC analysis based on historical costs can test for compensativeness. FDC requires a distribution of costs which cannot be allocated by any rational principle. (Arinc P.F., pp. 35–40). Resort to an FDC method based on historic cost responsibility may be useful in setting maximum rates for monopoly services, but such analysis has no role in determining minimum rates. (Arinc P.F., p. 126, Airlines BSE, pp. 33–38).

39. Arinc argues that a rate may somewhat exceed the minimum level of com-

---

[40] The following parties have filed Proposed Findings of Fact and Conclusions of Law in this proceeding.

V41 I197 OCT 8 76 UM

pensativeness and remain reasonable. Rates in total should be high enough for the carrier to make a reasonable return on investment. Competitive service ratemaking must consider market conditions. Such rates must be low enough so that the carrier will be able to retain the business which would otherwise be lost. (Arinc P.F., pp. 126–127).

40. Arinc contends that the cost of comparable service from a private microwave system serves as an independent standard of the maximum rate level for the carriers. Further, TELPAK service has been shown to be compensatory at the original rate level. The "interim" TELPAK rates of September 1968, although less competitive than the original rates, are reasonably related to the cost of private microwave. Arinc asks that the rates of February 1970 and May 1972 be cancelled because they were substantially above the cost of competitive alternatives and thus unjustly and unreasonably high. TELPAK rates should be returned to their original level and the telegraph to voice equivalency should be returned to 12:1 (Arinc P.F., pp. 115–17) Arinc requests that increased charges for teletypewriter station equipment, private line terminals, installation charges and CCSA service have not been supported by Bell and should be rescinded. (Arinc Expt., pp. 87–103).

THE DEPARTMENT OF DEFENSE AND U.S. EXECUTIVE AGENCIES (DOD)

41. In behalf of the U.S. government executive agencies, DOD takes the position that the availability of a bulk rate offering, such as TELPAK, is required and justified by comeptitive necessity. Such an offering is essential to the efficient accomplishment of the tasks of the Federal executive agencies and its elimination would lead to a degradation of national defense capability. Lower TELPAK rates are justified and the elimination of TELPAK would force the government to consider private microwave since government policy requires procurement at the lowest cost (DOD P.F., pp. 8–10). DOD has maintained that long-run average cost (LRAC) techniques (versus LRIC) must be employed to assure that a rate is compensatory. DOD noted that for a particular interval of service and period of time, if all resource costs are included LRIC equals LRAC. DOD P.F., pp. 24–27). Where such long-run average cost analyses cannot be supplied a burden test, as an "equality" rather than an "inequality," must be used for a finding of compensativeness (DOD P.F., pp. 28–29, 79–80). It is further maintained that FDC cannot be used as a test for interservice subsidy and that FDC Method 1, in particular, is invalid, inaccurate and inapplicable as a cost mechanism, and its use would result in an anticompetitive umbrella. (DOD P. F., pp. 30–34). DOD notes that if the Commission feels bound to employ fully distributed costs, it should use Method 7 because it reflects economic reality to the maximum extent possible. DOD also finds Bell's market studies inaccurate and unreliable. (DOD Expt. No. 1; DOD P.F., p. 32).

AD HOC TELECOMMUNICATIONS COMMITTEE (AD HOC)

42. This party, in behalf of a number of large industrial users of private line services, concurs generally in the position of the Airline parties and contends that a differential between the TELPAK and non-TELPAK rates for regular private line telephone and telegraph services is justified by the volume needs of larger users and the carriers need to compete with private microwave systems. (Ad Hoc BSE, pp. 7–16). It is stated that TELPAK is compensatory and should be continued in essentially its present form. (Ad Hoc P.F., p. 45; BSE, p. 5.)

NATIONAL ASSOCIATION OF MOTOR BUS OWNERS (NAMBO)

43. NAMBO concurs in and adopts the position of the Airline parties and urges the Commission to roll back the TELPAK rates "at least to the levels proposed by the Airlines" and to order refunds to the users who paid in excess of such levels. (LAMBO P.F., p. 6; Expt. pp. 2–3.)

MICROWAVE COMMUNICATIONS INC. (MCI)

44. MCI argues that FDC Method 1 must be the principal working tool of the Commission for the determination of rate levels for Bell System services. This is a proper allocation method and the only methodology in the record which attempts to measure the costs of providing service on the basis of current actual usage of facilities. Bell's rates, according to MCI, must provide revenue to cover all costs of the service including the system-wide rate of return on net investment if such rates are to be compensatory and non-discriminatory. MCI asserts that in a competitive market the most efficient carriers will be identified and will succeed, if fully allocated costs are required and the distortions of subsidy are eliminated.

45. MCI contends that Bell's approach is not reliable or effective and should not supplant the Commission's traditional analytical tool of fully allocated or fully distributed costs. Bell's burden test cannot measure cross-subsidy from MTS and WATS to competitive services. It is further asserted that Bell's LRIC is substantially different from that found in economic theory and that the development of proper LRIC techniques and the training of regulatory personnel to handle filings based on LRIC analysis would be difficult and costly.

46. MCI contends that Bell's and Western Union's rates for TELPAK C and D, private line telephone, and private line telegraph should be raised forthwith to the levels indicated by the best presently available fully distributed costs studies and the rates for the monopoly services should be reduced correspondingly (MCI P.F., pp. 104–108; MCI BSE, pp. 3–5, 6–7).

DATA TRANSMISSION CO. (DATRAN)

47. Datran contends that Bell's application of long-run incremental costs (LRIC), if adopted by the Commission, would create a positive inducement to Bell to practice interservice cross-subsidization (Datran P.F., pp. 15–16). Monopoly rates are based on historical costs and competitive prices are based on forecasts. LRIC is inimical to full and fair competition since no other carrier has a monopoly service which under the LRIC theory remains as a catch-all and guarantor of support for Bell's competitive services (Datran P.F., p. 16).

48. Datran finds that Bell's application of LRIC deficient. Datran views LRIC as a planning concept for the selection of the best course of action before decisions are made and reflects only the differences in cost between two specific alternatives. Datran claims that there may be an infinite number of LRIC's depending on the judgments of the decision maker. The burden test is inappropriate as a measure of cross-subsidy because it assumes perfect knowledge of future alternatives. Thus the burden theory only measures Bell's expectations of whether a service is expected to be a burden under specifically defined circumstances. (Datran P.F., pp. 16–18).

49. Datran argues for the adoption of a fully distributed cost standard. The FDC standard would allow Bell at least as much pricing flexibility as any other carrier and spread advantages of economies of scale (if any) to all services. FDC is consistent with the criteria used in determining Bell's interstate revenue requirement and its use would add realistic cost benchmarks to the Commission's regulator information base. Datran notes that FDC should be adopted as the rate ceiling for Bell's monopoly services. (Datran P.F., pp. 18–19).

THE WESTERN UNION TELEGRAPH CO. (WESTERN UNION OR WU)

50. Western Union asks us to reject LRIC and other ratemaking principles advocated by Bell and accept fully distributed costs as the most reliable and practical basis for pricing Bell's services (WU P.F., pp. 55–58). It is contended that Bell should be allowed to make no more than a fair rate of return on MTS and WATS. Further, Bell's competitive services should be priced no lower than the fair rate of return on investment reasonably allocated to such services. Upon a showing of competitive necessity, Bell may price these services lower. However, such rates must permit Bell to recover its fully allocated revenue requirements for such services within a reasonably foreseeable future period. (WU P.F., pp. 57–8).

51. Western Union claims that the TELPAK service should be cancelled because it is non-compensatory and therefore unjust and unreasonable under Section 201(a) of the Act. Also, minimum rates should be prescribed for Bell's private line telephone and private line telegraph classifications which result in earnings (on a fully allocated basis) at the lower end of the allowed interstate return range. Bell should also lower its MTS and WATS rates so that they are

earning in the middle of the allowed range. (WU P.F., pp. 96–98)

THE NETWORK PARTIES (ABC/CBS/NBC) (NETWORKS)

52. The networks contend that FDC is inappropriate for ratemaking purposes. FDC, they claim, ignores economic circumstances which should be considered in determining rates for services to be provided in the future (Networks P.F., pp. 44–60). LRIC, on the other hand, meets all of the criticisms levied against FDC and attributed costs on an economically justifiable cost-causing responsibility basis. The forward looking LRIC analysis leads to an optimal allocation of resources while accounting for relevant future costs and demand elasticities as well as other applicable rate making and public interest considerations. LRIC is consistent with judicial and administrative precedent. (Networks P.F., pp. 78–83).

53. The Networks contend, however, that Bell's application of LRIC has erroneously led to the attribution of unduly high costs to the program transmission services. (Networks P.F., pp. 194–219). When excessive and unneeded plant is eliminated from the cost base attributed to the video services, the record shows that such services do not cause any burden to other Bell services. The Networks claim that even without such adjustments, private line video services are shown by AT&T's own data to provide a substantial annual contribution to the overall costs of the firm.

54. The Networks find that current rates discriminate unlawfully against contract service users in favor of occasional service users. They request generally lower rates for the future and appropriate refund of excessive contract charges paid to AT&T since October 2, 1969. (Network P.F., pp. 220–30). The Networks also point out that they already make extensive use of competitive alternatives and that further increases in Bell's rates will cause them to transfer even more of their business away from AT&T. (Networks Expt., p. 5).

HUGHES SPORTS NETWORK, INC. (HSNI)

55. HSNI opposes Bell's proposed rates for private line video program transmission services as violative of the Commission's rate structure decision in "Hughes Sports Network v. AT&T," 22 FCC 2d 550 (1970). It is argued that there is insufficient evidence of any real threat of competition to Bell. LRIC offers unique opportunities for Bell to impose its "bias" and "anticipatory view of competition" into its ratemaking approach. (HSNI P.F., p. 89). Sound policy requires responses by a carrier to only actual and demonstrated competitive consequences. AT&T, however, has been pressured to lower contract rates by the networks who have threatened to move their business to competitive alternatives. There is no record support for a competitive response by AT&T. (HSNI P.F., pp. 57–72). Further, the Commission should not allow AT&T to revise its tariff structure to the benefit of contractual users (and the detriment of occasional users) without any pretense of showing or justifying proper allocation of costs between the two groups of users. (HSNI P.F., pp. 50–52).

UNITED PRESS INTERNATIONAL (UPI)

56. UPI contends that the increased charges involved in the private line service rate revisions filed by Bell on December 6, 1971 are unjust and unreasonable; that these rate revisions were filed at a time when no determination had been made by the Commission in either this Docket or Docket 19129 of the need by AT&T for any increased revenues, and indeed without significant regard for any impact upon overall earnings level considerations; and that the objective asserted by Bell was, in part, to improve the contribution to earnings of the private line services for the benefit of the users of other services, such as MTS, by raising the level of rates to what Bell considers the "optimum" level under presently foreseeable market conditions—this in spite of the fact that the private line telephone services were already making a substantial contribution to earnings and were thereby benefiting the users of other services, including MTS. (UPI P.F., p. 14).

57. Further, UPI states that Bell made "selected" increases that were confined to the channel terminal components without any offsetting decreases in line haul charges and without any separate cost studies; that, therefore, a disproportionately large portion of the increases fell upon those customers, particularly the press wire services, whose communications systems involve multipoint network configurations with large numbers of service points, as distinguished from customers with point-to-point service and relatively few service points; and that the press was treated in an unfair and discriminatory manner, particularly by increases in the telephotograph services (Series 4000). UPI urges the Commission to conclude that the rates of December 6, 1971 are unlawful because they discriminate against press customers. (UPI P.F., pp. 15–17).

ASSOCIATED PRESS (AP)

58. AP contends that AT&T has largely ignored services other than TELPAK and has not justified the increases imposed on short haul circuits or the increases in the monthly and installation charges for single channel private line service terminals. Further, the increased monthly charges for service terminals result in relatively higher charges to AP, and the press generally, which have not been shown to correspond to the cost of serving the press (AP P.F., pp. 7–11). Consequently, AP argues that these increased charges constitute an unjust and unreasonable discrimination against the press and subject it to an undue and unreasonable prejudice or disadvantage. (AP P.F., pp. 3–4.) Moreover, AP states that if AT&T is capable in the future of convincingly demonstrating that short-haul charges must be increased, it would seem that the appropriate approach would be increases for those line haul mileage bands where AT&T can show that revenues do not cover long-run incremental costs. (AP P.F., p. 15.)

AEROSPACE INDUSTRIES ASSOCIATION (AIA)

59. AIA states that TELPAK is competitively justified, in fact some of its members have already turned to competitive alternatives (T. 15753). It is further urged that the Commission evaluate the contributions made by AT&T's private line services using the principles of long-run incremental costs (AIA P.F., p. 59) and that no rate prescription be made until a new cost study is performed by AT&T.

V. STATUTORY STANDARDS

60. We agree with the RD that sections 201, 202, 205, and 214 of the Communications Act provide the relevant statutory standards for resolution of the issues herein. Principally, we are guided by section 201 which requires that charges, practices, classifications and regulations shall be just and reasonable. And, in determining to what extent costs should be allocated among Bell's service categories, consideration is to be given Bell's obligation under the above sections to provide, upon reasonable request, service without regard to whether the service is characterized as monopoly or competitive. Furthermore, our decision herein maintains that a carrier has a duty to continue to provide an already existing service, unless the Commission permits discontinuance pursuant to section 214 of the Act. As the RD recognized, appropriate rate levels for Bell's service categories must also comply with the standards of section 202(a) of the Act. This section prohibits a common carrier from making any unjust or unreasonable discrimination in changes, practices, classifications, regulations, facilities, or service in connection with like communications services. Additionally, service is to be provided without any undue or unreasonable preference, advantage or disadvantage. These standards are discussed in greater detail below. It is also recognized that several statutory provisions (sections 201(b), 210(b), and 396(h)) expressly permit differential pricing by carriers for certain classes of communications under specified conditions.

61. The Airline parties, ARINC, and DOD have noted as an exception the RD's failure to specifically include Section 1 of the Communications Act as a relevant standard in resolving the issues in this proceeding. While our reading of the RD leads us to conclude that this section containing the Act's basic mandate was implicit as a standard, we here explicitly acknowledge our obligation to "* * * make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communications service with adequate facilities at reasonable charges, for the purpose of the national defense * * *."

V 41 N 197 OCT 8 76 UM

VI. LEGAL PRECEDENT

62. Several parties criticize the RD's reliance on "Northern Pacific Ry. v. North Dakota," 236 U.S. 585 (1915) and other decisions as support for the position that fully allocated costs are the appropriate standard in determining rates for individual service categories. These parties claim that Northern Pacific Ry. is inapposite since it pertains to a state's unlawful attempt to set maximum rates no greater than incremental costs in contrast to the instant proceeding, where a carrier's attempt to establish incremental costs as a pricing floor is at issue. These parties cite and rely upon another line of cases from which they argue that there exists regulatory and judicial approval for incremental costs as the appropriate ratemaking standard. It is correct that courts have found rates compensatory, when they are set above incremental costs.[41] However, our reading of these cases fails to reflect any manifestation of judicial preference for an incremental costing approach, as opposed to a fully allocated approach.

63. We do, however, take judicial guidance from "American Commercial Lines v. Louisville and Nashville R. Co.," 392 U.S. 571 (1968). This case concerned the question of whether incremental costing or a fully allocated costing methodology was the appropriate standard in determining inherent cost advantages between modes of transportation. American Commercial Lines stands for the proposition that in the absence of clear Congressional directives, it is within the sound discretion of a regulatory agency to establish appropriate economic policy to effectuate its legislative mandate.[42] We note that the Communications Act contains no express direction regarding the choice of a particular costing methodology. Consequently, in view of American Commercial Lines, we need not distinguish among the holdings of the cases relied on in the RD and by the various parties, nor need we consider any particular costing methodology to be judicially sanctioned. Our conclusions will, therefore, be based on the record, the mandate to ensure just, reasonable and non-discriminatory rates.

64. It is argued by a number of the parties that the RD's conclusion that FDC Method 1 is the appropriate costing approach is unwarranted and that any method that attempts to allocate common costs is inherently arbitrary inasmuch as there are any number of ways to allocate costs. We agree that there is no one perfect method by which to allocate costs of services.[43] But, this does not mean that we are precluded from choosing a reliable costing method that best reflects our policy objectives emanating from the Act.[44] (See Section VIII *infra*.) Thus it is within the exercise of our informed judgment to choose the methodology we find proper under the attending circumstances.[45] Many years ago the Supreme Court recognized that "* * * it is much easier to reject [costing formulas] as being misleading than to find one apparently adequate." [46] Yet, it is our responsibility to make such a choice by this decision.

65. For these reasons we conclude that we are not constrained, merely because other methods are also plausible, in the selection of the methodology we employ herein for determining appropriate rate levels and the presence of cross-subsidy among individual categories of interstate telephone service.

VII. PRIOR POLICY

66. The RD found prior Commission policy supports the following conclusions related to resolution of this case (RD, par. 95):

(1) Ascertainment of the actual cost of providing services underlies the requirement that rates be just, reasonable and nondiscriminatory;

(2) The public interest is not generally served by interservice cross-subsidization; and

(3) The Commission has previously dealt with the question of cross-subsidization, but in the context of fully distributed costs.[47]

Bell, the Airline parties, ARINC, AIA, and DOD have excepted to the appropriateness of one or more of these basic conclusions as reflecting prior Commission policy.

67. The importance of costs has long been recognized in our determination of the lawfulness of rates of telecommunications services.[48] It thus follows that our determination of the lawfulness of the rate levels of the major interstate service categories at issue herein, must be justified in relation to the cost of furnishing the particular service. This does not mean, however, that cost is necessarily the only criterion useful in determining whether rates are lawful under the Act. Prior cases have made it clear that besides using costs as the basis for setting rates, costs can be used as benchmarks to guide us in measuring the extent and lawfulness of any departure from actual costs, where non-cost considerations enter the ratemaking calculus.[49] Of course, departures from rates based directly on costs must be justified.[50]

68. There have been a limited number of circumstances where rates have been allowed to depart from costs. We previously, held, with respect to like communications services, that competitive necessity might justify differential pricing, even though the differential is not cost related provided certain conditions are met.[51] Likewise, the RD recognized that departure from costs in setting rates for press communications services might be warranted (RD, par. 93). However, to date no showing has been made before the Commission that would justify any non-cost differential pricing for press services.[52] It is also clear that where Congress has made special provision, rates for particular service categories may depart from costs. Thus, under section 396(h) of the Act, we have allowed Bell to provide private line service to educational television stations at reduced rates, even though the costs of such service were not fully recovered in the tariffed charges.[53] However, the extent to which non-cost considerations such as market demand and competitive factors should be taken into account in permitting departure from costs has not yet been settled.[54] This is one of the questions to be addressed herein. (In answer we set forth the guidelines to determine cost of service, as well as the basis for justifying departure therefrom. We make clear, however, as did the RD, that we will continue to entertain other appropriate bases of departure from the cost standards sanctioned herein, upon appropriate justification.)

69. We are in further agreement with the RD that our prior decisions reflect that cross-subsidization is generally not in the public interest. In the Private Line Rate Cases we stated:

[41] See, e.g., *ICC* v. *New York*, N.H. & H.R. Co., 372 U.S. 744 (1963).

[42] We are thus not bound by the Supreme Court's decision upholding the ICC's determination that under section 15a(3) of the Interstate Commerce Act, 49 U.S.C. 15a(3) (1970), fully distributed costs should be used respecting the particular intermodal rate controversy, pending a subsequent rulemaking. We do note, however, the Court's lengthy footnote, 392 U.S. at 586–89, n.16, wherein it raised serious questions concerning the economic rationale of a costing methodology that is conceptually similar to LRIC. However, the Court concluded that the resolution of such questions is within the discretion and expertise of the regulatory tribunal.

[43] See, e.g., *Colorado Interstate Co.* v. *FPC*, 324 U.S. 581 (1945).

[44] E.g., *Consolidated Gas Supply Corp.* v. *FPC*, 520 F.2d 1176 (D.C. Cir. 1975).

[54] We recognize that in the Private Line Rate Cases consideration was given to non-cost criteria including value of service and competitive effects in prescribing the appropriate rate levels for individual services. 34 FCC at 227; 34 FCC at 298. It is nevertheless clear that the cost of providing service was at the heart of that decision. 34 FCC at 228, 231; 34 FCC at 297, 300.

Care must be taken to avoid excessively high rates for a carriers' noncompetitive services (or for a noncompetitive classification) which tend to offset deficiencies resulting from unduly low rates for competitive services. 38 FCC at 301

Similarly in *Re WADS*[55] we expressed concern that there might be cross-subsidization between different classes of WADS service. More recently, we ruled that Bell had to demonstrate that there was no cross-subsidization among the distinct service elements of its "Hi-Lo" offering as well as between the Hi-Lo service and other services offered by the company.[56]

70. From the foregoing it is manifest that costs have played a predominent role in determining whether rates are just and reasonable under our statutory standards. But, in certain circumstances, other noncost criteria can be employed in the ratemaking process, provided we have full awareness of what the costs of services are, and the extent of departure therefrom. Furthermore, we have established that cross-subsidization between services is generally inimical to the public interest, but acknowledge that definitiveness and certainty are presently lacking in any definition of cross-subsidy.

71. We feel that these broad principles, which have served as the foundation of our ratemaking decisions for the past fifteen years, continue to be viable for purposes of resolution of the instant proceedings. Nevertheless, in view of the position taken by Bell and others we emphasize that we have not "prejudged" certain issues herein based on past holdings. We have examined de novo the issues and questions presented herein on the record. Thus, it still must be determined in this proceeding whether some form of fully distributed costs, marginal or long-run incremental costs or, indeed, some other variety or combination of costs should serve as the relevant costing standard. Furthermore, in determining the lawfulness of the rate levels at issue herein we must decide whether circumstances exist justifying a departure from a cost standard. Finally, we must define what constitutes cross-subsidization and whether cross-subsidization exists between the service categories under examination. Numerous orders in this proceeding,[57] as well as in proceedings dealing with related questions[58] make it clear that we have not resolved nor predetermined the issues posed herein.

VIII. STATUTORY OBJECTIVES AND RESPONSIBILITIES

72. Underlying resolution of the basic issues in this proceeding (the determination of the lawfulness of rate levels and rate level relationships of Bell's principal categories of service) are the objectives and responsibilities which evolve from our enabling statute and prior decisions. In the discussion above on prior Commission policy (Section VII), it was shown that our prior decisions held cross-subsidization generally undesirable. Furthermore, the recognition of costs as providing primary underlying support for determining the lawfulness of rates and rate structures has been established, but the determination of what constitutes "relevant" cost remains.

73. We emphasize that ascertaining relevant costs is essential to our primary ratemaking responsibilities under the Act—the determination of whether rates are just, reasonable and not unduly discriminatory. Likewise, knowledge of the cost of service permits identification of inter-service burdens and cross-subsidization. An understanding of relevant costs is directly related to carrier accountability for the rates, charges, rules and practices contained in its published tariffs.

74. Pursuant to sections 219 and 220 of the Communications Act of 1934, as amended, we are empowered to prescribe uniform accounting systems and depreciation charges, and to require submission of such records, reports, and studies as we deem necessary to carry out our legislative mandate. Likewise, the Commission may, under Section 218, inquire into the management of common carriers and keep itself informed as to the manner and method of management. Consequently, the Commission may make periodic inquiry of the carriers it regulates and establish appropriate reporting rules to facilitate determination of the justness and reasonableness of carrier rates, practices, classifications, and regulations. This is illustrated by the requirements of §§ 1.363 and 61.38 of the Commission's rules and regulations. Thus, our statutory mandate and our rules manifest our paramount responsibility to the public to ensure carrier accountability for the rates, charges, practices and rules published by the carriers.

75. Until the early 1960's, the Commission relied primarily on informal procedures termed "continuing surveillance" as the principal vehicle for carrying out its statutory responsibilities. This approach could best be characterized by the Commission regulating rates through "frank" and informal negotiations in lieu of rate investigation, hearing and prescription.

76. With the advent of declining costs resulting from recurring technological breakthroughs in transmission and switching, escalating demand, authorization of private microwave systems, and competition in the intercity private line market by terrestrial and satellite carriers, the need arose for more structured and formal rate regulation. Likewise, there also arose the commensurate need for reporting rules. Indeed, the sections of the Commission's rules cited above were developed in the period after the emphasis on carrier accountability had shifted from informal to more structured and formal procedures.[59] The current proceeding evolved in this era and the Commission's objective of ensuring carrier accountability became intertwined in the controversy surrounding the related issues of proper ratemaking principles and procedures.

77. Ensuring carrier accountability is one of our primary objectives and responsibilities. All parties appear to agree that an established carrier should be held accountable for its pricing and investment decisions. There is also agreement that the modern complex structure of the industry characterized by the importance of technology and controversy over appropriate capital structures requires that a formal approach to carrier accountability be taken. However, the parties do differ regarding proper pricing and costing methodologies as the same reflect on accountability. The parties also disagree as to proper forecasting and tracking procedures, and the appropriate data to be used for such purposes. Additionally, the parties do not concur regarding the role forecast data should play in setting rates, or how uniform the employment of forecasting and tracking procedures should be between services. Furthermore, they are ambiguous in their description of how acknowledged substandard performance should be handled, including the important matter of shortfalls in net revenues resulting from deviations between actual and projected results. Finally, the parties do not clarify whether the Commission should employ yearly or more frequent audits, single or recurrent evaluative references to base year forecasts, or adjusted (rolled forward) or fixed baseline projections.

78. The RD proposes ratemaking on the basis of historical FDC Method 1 costs and also the submission of forecasts on a basis consistent with Method 1. This dual use of Method 1 effectively circumvents incompatibility between forecasting and tracking procedures, and, assuming the acceptance of the Method 1 approach, makes detection of cross-subsidization somewhat perfunctory (see RD, par. 179). Comparisons of forecast and test year evidence would be submitted including forecast rates of return (except on wholly new services for which no test year data would be required) (RD, pars. 212–215). The RD acknowledged that retrospective comparisons of forecast and actual data have the inherent limitation of considering performance only opposite the alternative chosen (RD, Appendix B, pars. 20–39; CCB Exhs. 7 and 25). The RD also favors closer examination of the carrier's justification for not choosing other rate alternatives as part of the overall accountability process.

79. The RD's references to accountability are oriented toward the determination of full cost rate levels to cover historical revenue requirements. It is noted that "FDC study results by serv-

ice are useful for tracking the results of rate changes and all other influences that affect the revenue-cost relationship of major service categories" (RD, Appendix C, par. 85). The RD is concerned that any comparisons that would be made of forecasts with the results of operations should be as firmly founded in actual data as possible. It is partly for this reason that the RD held objectionable the suggestions of other parties that use be made of Methods 3 to 7 for tracking purposes. The RD relied on Method 1 rather than Method 7, for example, since it concluded that results under Method 7 are partly composed of data drawn from forecasts of the "near and distant future" (RD, Appendix C, par. 87).

80. The RD does not address several of the ambiguities regarding "accountability" referred to earlier. While its use of Method 1 provides for consistency between forecast and actual results, projected data need not have any actual part in setting rates. Indeed, the RD's conclusions suggest that forecast results would only be informational. Furtheremore, there are no provisions made for incorporating "rewards or penalties" into the RD's scheme of ratemaking to recognize disparities that might be found between actual and projected results. Shortfalls would presumably be covered by rate adjustments. Finally, the RD does not clearly delineate what it would consider to be proper procedures for a tracking or continuous surveillance program, as opposed to the more general projections currently required under § 61.38 of the rules.

81. The RD's recommendations on the use of forecast data and procedures are tied to its concern with cross-subsidization—especially as it might be accomplished through the vehicle of managerial judgment in cost allocation. The RD generally found that reliance upon such judgment in the ratemaking process is not in the public interest. To this end, only minimal importance is attached to such data for purposes of the ratemaking process.

82. The Bell System's most prominent reference to "accountability" was in connection with its "retrospective accountability" analysis. Bell maintained that there is no evidence of record supporting the validity or feasibility of projecting Method 1 data. Bell argued that such projections and any deviations in actual results from these projections have no import for ratemaking purposes (Bell Expt., pp. 3–5, and 120–121). Bell has also maintained that any proper test of cross-subsidization must be of an incremental, forward-looking nature such as the Burden Test proposed by its witness, Dr. Baumol (Bell Exh. 18, pp. 6–7). It was in addressing the objections of Common Carrier Bureau witness, Dr. William Melody, to such a test that Bell directed its attention to the issue of retrospective accountability (CCB Exh. 7, pp. 5–27). Bell acknowledges the Commission's need for historical cost based analyses to serve as "benchmarks" in evaluating interstate service rates (Bell BSE, pp. 47–54).

83. Dr. Melody testified (CCB Exh. 7, pp. 19–22, 32–25) that under Bell's incremental analysis the Commission would have no way of assuring itself that projected data was not biased. He also objected to the analysis in that it offered no information on actual performance. While not directly addressing the question of bias in an accountability context, Bell maintained that any forecast, including full cost projections, are susceptible to the bias criticism. Bell asserted that proper documentation and record keeping by the carrier can minimize the "nonobjective" aspects of forecasting (Bell Exh. 18, pp. 13–20). With regard to the needs of the Commission for results of actual performance, Bell concurs with Dr. Melody that a comparison of actual and projected results is appropriate in ensuring carrier accountability (Bell Exh. 20, pp. 13–19). It alleged, however, that only the directly attributable costs of a service should be compared with forecasted changes in revenue/cost relationships as estimated by incremental studies (Bell P.F., pp. 108–119).

84. We find that accountability for the Commission's purposes should involve comparative evaluations of forecast and actual costs, and should incorporate the findings of such analyses into the ratemaking process. This is in accord with our prior policy, as formulated in the Private Line and WATS cases wherein we stated that costs can be used as benchmarks in the ratemaking process.[40] While the parties' interpretations of accountability seem to approve use of more than simply the informational aspects of forecasting, there is no delineation of the specific means of implementing the results of the evaluative process. We deem the latter to be requisite. Additionally, we find that accountability should also involve consistency in forecast and actual methodology and in the dimensions of the data employed. Finally, we find that accountability should be implemented across all services and for anticipatory (continuous surveillance) as well as retrospective purposes. Thus, accountability is the touchstone of the "just and reasonable" provision of section 201.

85. Other statutory objectives and responsibilities include ensuring equitable and non-discriminatory treatment of all service users, (generally referred to herein as "equity"), promoting efficiency and technological innovation, and providing a precise and clear set of market rules for planning and decision making purposes. As indicated, these objectives collectively have a direct bearing on the major issues of lawfulness of return levels and relationships and also on the selection of proper costing methodologies and procedures for the future.

86. Equity can be viewed in a general framework, as follows: Users of the carrier's various offerings are entitled to non-discriminatory treatment with regard to the quality and diversity of service made available to them. This is true with respect to the carrier's definition, selection and allocation of costs, the type of facilities dedicated to various services, and the "relative weight" assigned by management to the myriad of other objective and implicit factors used in determining particular service rates. Furthermore, equity extends to such decisional areas as research and development and to facility construction program designs. These decisions must be commensurate or reconciled with the relative levels of earned return and benefits afforded users of Bell's various services.

87. The presence of competition in certain market segments raises certain equity questions concerning the compatibility of pricing philosophies designed to "meet competition" vis-a-vis those used to price monopoly services. The concept of equity is embodied in section 202(a) of the Act. This section specifies that it is unlawful for any carrier "to make or give any undue or unreasonable preference or advantage to any particular person, class of persons, or locality * * *." Further, section 201(b) of the Act specifies that "all charges, practices, classifications and regulations for and in connection with such communication services, shall be just and reasonable * * *." The Bell parties, as we have discussed, espouse a "basic service" philosophy of ratemaking, i.e., Bell alleges that it is reasonable to price competitive services on a "contributional" or marginal basis while simultaneously requiring monopoly service rates to cover all other costs; thus acting as guarantor that the overall revenue requirement is met (T. 15592–15609). Whether such a basic service theory of ratemaking is equitable and, indeed, lawful under sections 202(a) and 201(b) of the Act is at issue herein.

88. The RD concludes "that it is unjust and unreasonable to require users of any class of service * * * to contribute earnings on such services in excess of what the Commission has found, after hearing, to be reasonably necessary to meet the overall revenue requirements of the carrier" (RD, par. 183). Additionally, the RD maintains that our prior decisions reject the view that pricing monopoly services at higher levels than competitive services to prevent shifts between them is justified (RD, par. 87). Further, the RD states that we have found that the "bare fact that a service may be enjoying a more rapid rate of growth does not itself justify imposing artificial rate burdens on it" (Private Line Cases, 34 FCC 217, 228; RD, par. 86). However, the RD does acknowledge that we have stated "our intention to permit the existing carriers to price their competitive services in a fashion that will realistically and reasonably reflect economic advantages, if any, that are inherent in the plant and operations of those carriers" (Specialized Common Carrier Decision, 29 FCC 2d at 915; RD, par. 208).

89. On balance, what we have at issue with respect to equity among users when viewed in the perspective of sections 201(b) and 202(a) of the Act and our prior decisions is the lawfulness of the

[40] 34 FCC 217, 231 (1963); 59 FCC 2d 671, 678 (1976).

results of Bell's disparate pricing philosophy on the residual (monopoly) service ratepayer. As discussed in more detail below, it is not clear that Bell's ostensible efficiency-related rationale for its pricing approach coincides with the ratemaking objectives of the Commission. However, assuming arguendo, that we could accept the basic service philosophy of pricing as the appropriate economic means of reflecting Bell's economic advantages of scale and of being the "going concern" vis-a-vis its incipient competitors, could we properly hold lawful the corollary results of the basic service theory that may dictate higher rates for monopoly users? That is, should the Commission find Bell's economic arguments advanced for its pricing philosophy so persuasive that special treatment of competitive users as selected "marginal customers" overrides other precedental and statutory considerations?

90. The above discussion of underlying legal and economic factors was predicated on the assumption that the basic service philosophy was the proper pricing approach. As will be explained in reviewing the arguments respecting full and marginal costing, below, this assumption implies that monopoly users would have lower discounted revenue requirements for the time period including "the near and distant future" due to the special treatment afforded competitive customers. If, however, treating competitive and monopoly service users in a disparate fashion does not satisfy this assumption, the Bell position then stands to prejudice monopoly ratepayers.

91. Another objective of the Commission is to encourage efficiency and innovation in the provision of telecommunications services. Under the basic mandate contained in Section 1 of the Communications Act, we are to "make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communications service with adequate facilities at reasonable charges * * *." The RD related efficiency directly to production and costs and also to discrimination:

> Generally, rate regulation is intended to be a substitute for competition in special market situations where an essential service or good is produced and maximum efficiency (that is, minimum cost) can be achieved * * *. It is intended that rates be designed to cover the necessary costs at levels which allow no excess over the minimum cost of efficient operation and which reflect no undue discrimination * * * (RD, par. 97).

92. The RD and other parties recognize the interdependence of efficiency and other Commission goals and criteria:

> For a multi-service concern it is necessary to develop techniques for detecting and correcting cross-subsidization * * *. Effective regulation requires appropriate measures by which to gauge the overall performance of the regulated enterprise and a system of incentives which will pull the operation in the direction of maximum efficiency * * *. In this regard, one of the principal regulatory needs is to establish an accountability standard which provides the regulator and management alike the means for evaluating the overall effect of a myriad of interdependent decisions * * * (RD, par. 100).

93. Likewise, ARINC relates specification of costing methodolgy, as part of the spectrum of "fair competition" rules, to efficiency. Of course, ARINC's particular methodological advocations are not in juxtaposition with those of the RD. However, both appear to concur that improper specification of costing and ratemaking rules would negate desired efficiency and innovational benefits of competition at their inception. ARINC quotes the concurring statement of Commissioner Washburn in the *Hi-Lo* case to the effect that improper costing signals "create strong incentives which will tend to distort the efficient use of existing plant * * *." (ARINC BSE, pp. 31–32). The essence of ARINC's argument is that the dimensions of efficiency extend beyond isolation of the cost of factor inputs for a particular production function and operating constraints (both physical and procedural).

94. Bell has contended in this and other proceedings that rates related to marginal costing rather than FDC methods should be used for pricing its competitive services to ensure efficient use of its facilities and to avoid protecting inefficient specialized carriers (see, 29 FCC 2d at 899). Thus, Bell states that "reliance on an FDC criterion interferes with pricing decisions designed to achieve more efficient utilization of facilities and to foster lower unit costs of providing services to all classes of communications users" (Bell P.F., p. 145). Bell contends that only costs causally allocable to each service alone are relevant for ratemaking purposes, although, as discussed heretofore, Bell argues that other non-cost ratemaking factors are relevant as well. Others find fault with this philosophy. The RD, for example maintains that overall, incremental cost based rates do not cover total costs, and that by definition, allocation and selective application of such costs in determining rates involves unreasonable and unlawful levels of management judgment, contrary to the interests of all service users. These issues are discussed at length in later sections (see Sections IX–XI).

95. We find our obligation to promote efficiency and innovation to encompass cost definition, minimization, and allocation. Furthermore, we recognize the interdependence of efficiency and costing. We do not limit our consideration of efficiency only to measurable transactions, but realize that the public interest may be served by recognizing factors not directly traceable to the marketplace. Thus our concept of efficiency incorporates such considerations as equity and social welfare. It is, therefore, broader than that espoused by economists or individual carriers. Accordingly, our selection of a proper costing methodology from this standpoint will be determined by defining the term "optimal" in a fashion quite apart from the "relevant ratemaking factors" used by Bell.

96. A final major objective of the Commission is clarification of market rules. In general, these concern market entry and exit, proper supporting material for tariffs, rate level floors and ceilings, interservice rate relationships, and the myriad of other marketplace specifications needed by suppliers for proper decision making and planning. The Commission's prior decisions encouraging competition in certain markets were made to attract those firms which will prove over time to be viable and effective alternative sources of supply. Such firms should be able to accurately gauge the attractiveness of communications markets with full knowledge of the rules pertaining to their own and the established carriers' opportunities, responsibilities, and limitations. For example, in other proceedings, we have endeavored to provide rules regarding interconnection and service and equipment definitions. In this proceeding our attention is directed to ratemaking principles. Our findings and conclusions herein are intended to provide the rules necessary to properly relate costs and both relative rates and rate levels. They should dissuade both incipient and established suppliers from participating in a particular service area because of the presumption that "protective umbrellas" will offset any patent inherent economic shortcomings.

97. In our Specialized Common Carrier Services decision, 29 FCC 2d 870, 915–916 (1971) we declared that we favored fair competition between established carriers and their then incipient competitors for the intercity private line market. We noted the relevance of costs in this regard, but did not make a finding on what constituted a proper costing methodology, deferring that issue to this proceeding. We stressed (29 FCC 2d at 915–916) that it was, "our objective to promote and maintain an environment within which existing and any new carriers shall have an opportunity to compete fairly and fully in the sale of specialized services. Our ratemaking and regulatory policies and practices will be appropriately adapted to accomplish this objective * * *" in Docket 18128.

98. The Commission has also expressed itself on fair competition in other proceedings. In the area of interconnection, for example, the Commission held unlawful attempts by established carriers to maintain unduly restrictive tariff provisions violative of fair competition:

> In Specialized Common Carrier Services, the Commission authorized new specialized private line carriers and issued a broad directive to the established carriers to make available to such new carriers local distribution facilities on a reasonable and nondiscriminatory basis. 29 FCC 2d at 940. Although Bell provided local loop service to specialized common carriers, it would not interconnect its plant with [specialized carrier] facilities for the purpose of providing FX and CCSA services. In Bell System Tariff Offering, Bell argued that the interconnection policies enunciated in the Specialized Common Carrier decision did not require such interconnection. The Commission disagreed and, inter alia, ordered AT&T and the Bell System Companies to cease and desist from denying specialized carriers reasonable interconnection services similar to those provided to AT&T's Long Lines Department * * *. The Commission concluded that competition between Long Lines and the special-

V 41 197 OCT 8 76 UM

ized carriers in the interstate private line services market would not be *full and fair* if the specialized carriers were prevented from providing FX and CCSA services by reason of monopoly control by Bell and other telephone companies over local plant. Similarly, we believe that competition between Long Lines and specialized carriers on routes served by both cannot be *full and fair* if subscribers of Tariff 260 services cannot terminate those services at IRC and specialized carrier premises. (emphasis added) (Memorandum Opinion and Order, FCC 76–684, July 30, 1976.)

99. There is general agreement in principle with the objective of fair competition (RD, pars. 208–210; Bell BSE, pp. 29–36) and that any costing methodology selected by the Commission for use in evaluating tariff filings and rate levels and relationships should be consistent with such objective. There is no agreement, however, in the interpretation and delineation of what constitutes "fair competition."

100. The RD relies on the Private Line Rate Cases 34 FCC 244 (1961), 34 FCC 217, 231 (1963) in support of full cost pricing as the cornerstone of fair competition. The RD acknowledges that other pricing approaches may be warranted and, indeed, tendered for consideration by the Commission, but it notes that there must be special support in each such instance. Further, the RD holds that the burden of supporting specialized ratemaking always rests upon the applicant (RD, pars. 89–94). Within the context of full costing, the RD finds limitations on monopoly service earnings may be necessary to satisfy the requirements of Section 201(b) of the Act (RD, pars. 181–184). Without such limitations, the RD finds that cross-subsidization cannot be avoided, and that the Bell System would enjoy an unwarranted, anti-competitive "protective umbrella" (RD, pars. 208–210). Finally, within the context of fair competition the RD objects to any pricing approach that will not tend to provide maximum amelioration and coverage of revenue shortfalls that necessarily result from full cost pricing departures (RD, pars. 196–199).

101. The Bell System Respondents advocate that fair competition without cross-subsidization involves departures from full costing for certain services. However, full costs, appropriately defined, constitute part of Bell's overall approach. In this regard Bell advances its basic service philosophy as the ratemaking approach appropriate for the realization of fair competition (T. 15592–15600).

102. The apparent bases for Bell's pricing of services varies from service to service. For competitive (private line) service rates, Bell maintains that only long-run incremental costs are relevant. Bell suggests that its objective in employing a marginal cost based pricing approach is to minimize the share of total costs to be borne by monopoly (MTS and WATS) service users. Bell alludes to the theoretical efficiency of pricing in accordance with a service's marginal costs. However, Bell acknowledges that it uses a combination of cost, demand, and other factors in actually setting competitive service rates. (T. 15592–15604; Bell Expt., pp. 7–15, Bell P.F., pp. 26–39). Bell sets its monopoly service rates with the objective of meeting its aggregate revenue requirement (including cost of capital) for all its services. Since monopoly services are the "residual" or non-marginal offerings, Bell's objective of covering overall costs, in effect, makes these services responsible for covering costs not provided for by private line services.

103. Thus, the basic service philosophy of pricing provides an integral part of Bell's concept of full and fair competition. Under its view, prices related to incremental costs are to apply only to competitive services. However, Bell recognizes that investors presently view the firm as a whole, and that costs it regards for service category ratemaking as "economically irrelevant," (because of their historical nature) are in fact, "financially important" and if not recovered are reflected in its aggregate cost of capital. For this reason Bell asserts that these costs must be covered by the residual services (MTS and WATS), if Bell is to earn its allowed rate of return. Rates for these two services are, therefore, not viewed from a contributional standpoint as are competitive services. Basic service prices are set so that they cover the costs not contributed to by private line services revenues. (Bell P.F., pp. 26, 36).

104. Bell's conception of fair competition includes conclusions regarding "pricing flexibility" that can only be reached under its basic service philosophy. The RD generally does not support the contention that there is a need for flexibility in determining proper cost/price relationships among services, within the context of fair competition (RD, pars. 144–145, 157–159, and 185–187). However, whereas the RD held use of an FDC rate ceiling for MTS as necessary to avoid cross-subsidization, Bell finds this ceiling constitutes a limitation on its pricing flexibility and thus on the claimed contributional and efficiency related benefits all customers are alleged to derive from use of incremental cost related prices for other services (T. 15604–15606; Bell BSE, pp. 29–36). Bell maintains that such a ceiling for MTS defines a floor for other (especially competitive) services (Bell P.F., p. 51). This result naturally follows from Bell's stipulation that it must earn its overall revenue requirement (Bell P.F., pp. 50–52). To summarize, Bell advocates that it be given the flexibility to reflect the latest technological advances and factor market prices in its private line rates, only under the presumption that uncovered costs become the responsibility of its monopoly service users. We note that we believe reasonable pricing flexibility to be desirable, consistent with our findings and conclusions herein. However, as elaborated below, we cannot accept Bell's concept of pricing flexibility.

IX. The Costing Methodologies

A. Introduction

105. In Section VIII (Statutory Objectives and Responsibilities) we noted the existence of crtain common ground among the enumerated objectives, and also areas of interaction between these objectives and the costing principles at issue beneath the penumbra of the Act. Further, given the foundation of our objectives, embracing concepts of *both* law and economics, employment of these objectives can produce alternative judgments or conclusions which, in varying degrees, need not be reinforcing. Judgments emphasizing the more legally oriented equity and accountability objectives, for example, may conflict with economic concepts of efficiency and fair market rules. Indeed, we noted that in given situations there may be conflicting legal and economic interpretations concerning proper employment of even a single objective.

106. In this section we outline and explore the concepts and underlying characteristics of fully distributed cost methodologies and marginal costing. We delve, as did the RD, into the origins and evolution of relevant complex socio-economic theory. Also for the necessary purpose of deciding this case as rationally as possible within the statutory, legal, economic and other technical and interdisciplinary constraints (such as accounting and engineering) which influence performance of our regulatory functions, we explore fundamental elements of the foregoing; indeed, sometimes esoteric elements and postulations. On such bases we explore the advantages and disadvantages of FDC and marginal costing in light of the objectives and responsibilities previously delineated. Thus, in the ensuing discussion we will, for example, examine the alleged efficiency shortcomings of FDC as well as the equity and accountability deficiencies ascribed to marginal costing.[61] Likewise, we will discuss the suitability of FDC for determining the lawfulness of rates and rate level relationships and of marginal costing in certain contexts.

107. The RD sets forth the role of costing methodologies in the regulatory process as follows:

> Generally, rate regulation is intended to be a substitute for competition in special market situations where an essential service or good is produced and maximum efficiency (that is, minimum cost) can be achieved by allowing one large-scale producer to supply a given market area. Restricting production to one producer in the market is for purposes of gaining the alleged benefits of economies of scale, i.e., the lower unit costs which are sometimes realized as the volume or scale of production increases. In the aggregate, the regulated enterprise is supposed to operate at "cost," where the term "cost" includes the cost of capital. It is intended that rates be designed to cover the necessary cost at levels which allow no excess over the minimum cost of efficient operation and which reflect

[61] Although it has been suggested on the record that economists can pursue their ends wihtout the need to consider conflicting logic and data and without making value judgments (T. 10685–10695), the Commission is not so fortunate. We must decide this proceeding based upon a weighing of any number of factors, some of which may be at odds with each other.

no undue discrimination, either between classes of service or among different customers within a given service classification.

In some instances it may be both feasible and appropriate as a matter of public policy for a single producer to engage in both regulated monopoly and competitive markets. Here, a further objective of rate regulation is to prevent the presence of the integrated supplier from distorting the competitive market place, in order that the benefits of the full interplay of competitive market forces not be lost. This requires that the rates for competitive service offerings be set at appropriate compensatory levels, such that competitors are not subjected to unfair competition and the users of monopoly services are not required to subsidize the competitive service offerings of the integrated supplier.

In order to accomplish the various goals of regulation, certain tools and techniques are required. These include requirements for uniform systems of accounts and reports, audits, and related tests to ascertain the reasonableness of rate base elements and operating expenses including the costs of capital of the regulated enterprise. All of these elements taken together constitute a program of cost surveillance, since rates are to be designed to cover reasonable "costs." (RD, pars. 97–99).

In a firm which engages solely in competitive services, and where genuine competition exists for each service there is, of course, no public interest requirement to track the consequences of • • • management decisions; the free interaction of consumer choice and competitive response will automatically reward wise management decisions and penalize mistakes. Bell does not, however, fall in this category. The vast bulk of its service offerings enjoy monopoly or quasi-monopoly status, and are offered under uniform tariffs. The pricing of these services obviously cannot be and is not subject to the automatic corrections of the competitive marketplace. As Bell has eloquently argued in this and other proceedings, its monopoly and competitive services are provided via a single, integrated network involving extensive use of common facilities, personnel, management, and marketing resources. The allocation of proportionate use and value of these resources between monopoly and competitive services, and among classes of competitive services, constitute important management decisions not subject to the corrections of the competitive marketplace. Given the preponderance of its monopoly service demand, costs, and revenues, slight imperfections in these decisions will have little consequences for Bell's overall revenues and earnings; but for the same reason, even the slightest imperfection can have a major impact on the pricing of Bell's competitive services, with significant implications for both the users of those services and for Bell's competitors. In short, even small errors in management decisions in this area can result in significant underpricing or overpricing of Bell's competitive services, without a corresponding effect on its overall costs or revenues. This situation in turn can result in either predatory pricing or false entry signals for Bell's competitors (RD, par. 101).

B. Full Costing

108. Aggregate company full costs have historically had an important role in regulation and, indeed, were the primary regulatory cost concept in telecommunications prior to this proceeding. Previously we had focused almost exclusively on total revenue requirements and rate base related issues.[62] The carriers were allowed virtual autonomy in determining how revenue requirements were to be satisfied among various classes of service.[63]

109. Full costs of operations include current operating expenses such as wages, salaries, fuel, maintenance, advertising and research. They also include annual charges such as depreciation and operating taxes. Operating expenses parallel standard accounting concepts of costs. That is, costs generally are recorded at original or historical values and are recovered over time, hopefully, in a manner consistent with their associated revenue flows. It is consistent with the theory of regulation that rate base items and operating expenditures disallowed by a Commission for ratemaking purposes should, in effect, be charged to the firm's stockholders.[64] However, disallowances (such as the revenue shortfalls discussed earlier) eventually have impact on a firm's cost of capital, particularly the equity component. In this case the important question is from which service or services, if any, are such costs to be recovered when there is a shortfall? When a firm serves a number of classes of users, each with varying demand characteristics, rate adjustments stemming from upward costs pressures would logically be directed toward those classes of users with the most inelastic demand, e.g., monopoly service users. In the past, before competition in telecommunications came to the fore, the problem of how particular increases in costs were to be handled was less acute. Generally, there were other downward cost pressures, notably those resulting from rapid technological advances yielding more efficient and cost effective plant. Furthermore, there existed ameliorative exogenous factors such as the nation's low inflation rates and productivity increases, and the relative structural stability of the telecommunications industry itself. Problems of rate levels for particular services and interservice rate levels were considered as secondary to the determination of overall revenue requirements.[65]

110. When either a carrier's rate levels or interservice rate relationships are at issue the allocation of costs among services becomes essential to the performance of regulatory functions. Thus questions arise concerning the justness and reasonableness of relative rates vis-a-vis the cost of providing service. In this proceeding the major areas of contention center on the general appropriateness of FDC for such pricing and ratemaking purposes (especially the rationale for its use and its alleged compensativeness and efficiency consequences). There is also controversy herein concerning which specific FDC method(s) is appropriate under an accountability standard. In particular, should the historical nature of full costs and the alleged inherent arbitrariness of requiring distribution of certain common and joint operating costs according to FDC methods preclude their usefulness for ratemaking purposes? Furthermore, do efficiency and revenue contribution losses proximately result from such a distribution, and, if so, are these losses of a significant magnitude? Finally, when FDC methods are employed for accountability purposes, what distributive measure(s) constitute a proper basis for the assignment of costs?

111. The RD favors use of FDC for both ratemaking and accountability purposes. The RD describes FDC as follows:

> In a fully distributed cost (FDC) analysis, the totality of all historically recorded investment and operating costs for all services offered during a specified test period are first determined. In addition, the total historical volume of each service actually provided during the test period is determined from the carrier's records.
>
> Direct costs which can be identified for a a particular service offering are segmented and attributed to the relevant service. The remaining common and joint costs are allocated among the services according to statistical and/or judgmental determinations as to the *proportionate use* which each service made of the facilities, personnel, and operations supported by such costs. At the conclusion of the process, it is possible not only to compute a rate of return for each service, but also to establish *definitive unit costs* for each of the services offered during the test period, which can be used as a basis for determining the *appropriate cost-based price* for each service which would have satisfied the carrier's total revenue requirement—including cost of capital. The rates for each service may be computed so as to have contributed an equal rate of return on investment or each service rate may be computed to have produced different rates of return while the aggregate of all *satisfies the overall revenue requirement*. In all these calculations, appropriate factors for demand elasticities (including cross-elasticities among services) may be introduced. Finally, these *calculations may be used as a basis for setting future rates, with appropriate adjustments for market forecasts, projected demand elasticities, projected cost increments, etc.* (RD, pars. 106–107) (Emphasis added).

C. Marginal Costing and Pricing

112. Marginalist theories with their ties to "optimum social welfare" have a long history. Like most major evolutionary advances in conceptualization, these theories have evolved from the efforts of a number of writers. Clearly, the pioneering work of Jevons, Menger, and Leon Walras stand out regarding utility-oriented marginalism with its overtones for optimization. Jevon's followers, Edgeworth and Wicksteed, Weiser and Böhm-Bawerk of Menger's Austrian School, and Pareto of the Lausanne School's general equilibrium tradition, made notable con-

[62] Total revenue requirements are comprised of the full costs of operations (expenses) plus an allowed rate of return on net plant and other tangible and intangible assets in service. Communications Satellite Corp., 56 FCC 2d 1101, 1131 (1975).

tributions to marginalism, as did the Cambridge School of Marshall and such American writers as J. B. Clark.[66] What came to be addressed by some authors as the marginal cost pricing approach of neoclassical economics eventually tied together both demand and supply factors. Walras and Marshall were perhaps most noteworthy for their contributions to this synthesis. Within the context of general equilibrium, the relationships between demand and supply traced themselves through to the welfare of society as a whole: pricing theory and welfare were at last integrated. Economists often assume for conceptualization purposes that real world market situations closely parallel the constructs of the neoclassical competitive model. We note that under their assumed conditions, these scholars alone, apart from other social scientists and policymakers, would be in the unique position of being able to prescribe a social policy regarding pricing which was "best" not only for the firm or the individual, but for the aggregate public welfare as well. Unfortunately for economists, the constructs of neoclassical theory have not easily lended themselves to practical implementation. Underlying restrictive assumptions which lead to narrowly applicable results have subjected neoclassical theory to criticism of its precepts and, indeed, its relevance.

113. Despite inconsistencies with real world conditions, marginalism and marginal costing and their ties to social welfare still remain an intrinsic ingredient of the foundations of modern economic theory. Certain writers have adapted economic theory to more pragmatic conditions. However, others have furthered its hypothetical constructs. Writers like Robbins and Schumpeter went so far as to maintain that there exists a body of immutable "universal laws" of economic behavior that apply to all stages of capitalism. Such laws were unaffected by the particular social mores and institutions in existence at any particular time. Even those writers who were willing to bring cultural elements, externalities, and nonefficiency criteria into their analysis, still have the tendencies to embellish their recommendations with overtones of optimality.[67] Indeed, the RD maintained (to which Bell excepted) that "Bell's witnesses in this proceeding who have proposed LRIC as the appropriate basis for pricing do so in large part because of their view that it leads to a 'social optimum' " (RD, par. 102). In practice, of course, a compelling case can be made for any number of alternative professional approaches to pricing, such as accounting, financial, statistical, and legal. Moreover, policymakers concerned with legislative and other noneconomic criteria must well weigh these concerns in reaching yet other pricing alternatives.

114. The RD describes the theory of marginal costing and pricing generally as follows:

> Briefly, this theory holds that the most economically efficient allocation and use of society's resources will be achieved when the price of each individual unit of goods of services is set equal to the actual marginal or incremental cost of producing that particular unit. It is alleged that such a pricing scheme will best force consumers to weigh the value of a public utility good or service against its actual costs, thus limiting production to the minimum essential level which the aggregate of all consumers finds economically justifiable. It was recognized at the outset, of course, that any practical application of this theory would require its modification, since for reasons of administrative and operating efficiency as well as equity among utility consumers it would not be feasible to charge each user a different rate for essentially the same goods or services. The resultant necessity of identifying appropriate objectives short of the particular "social optimum" initially contemplated, and of finding practical methods of applying marginal cost pricing theories in a real world environment (both of which involve value judgments outside the realm of economic theory) remains a source of continuing controversy both among economists and between economic theory and other social sciences.
>
> Initially, the concept of marginal cost pricing was applied primarily to the study of investment decisions required to satisfy a constant or steadily expanding demand; the emphasis was thus placed on so-called "long-run" marginal cost • • •. The application of the theory of marginal cost pricing to the privately owned regulated utility has been very recent; and its application to the relevance for the pricing of a mix of services supplied under both monopoly and competitive market conditions by a single integrated firm is perhaps a case of first impression in this proceeding. As is evidenced by the record herein, there remains much controversy with respect to any practical application of these theories, but particularly so in the latter case of the private firm engaged in both monopoly and competitive markets.
>
> The short-run marginal cost pricing rule is normally expressed in terms of imposing on the customers who demand service at the peak period the full capital costs for plant and equipment of the system • • •. Application of short-run marginal cost pricing theory in this manner leads to one "social optimum", with higher rates being charged for service at the peak than for off-peak service. Regulated telephone utilities have thus far opposed general application of this form of marginal cost pricing, citing *practical limitations* due to administrative and operating problems, *overriding considerations of equity* among customers, and *other factors beyond the realm of economic theory.*
>
> There appears to be a general consensus among economists that once the plant has been built its capacity should be allocated for use by pricing the service at the short-run marginal cost. The consensus breaks down, however, with respect to the addition of new plant or the replacement of old plant. Some economists argue that where plant must be added to provide a service, the service should then be priced at the long-run marginal cost of the added plant. Others argue that the service should be priced at the short-run marginal cost associated with use of the added plant. Those in the latter group appear to believe that the added plant should be designed so that the short-run marginal cost (utilization cost) of the plant will be the same as the long-run marginal cost at the intended level of output, and that if output will vary over the plant life, the price should be set at short-run marginal cost in each period, being below long-run marginal cost when the plant has excess capacity and above long-run marginal cost when the plant capacity must be allocated among competing users. (RD, pars. 109–112) (Emphasis added).

115. In evaluating marginal costing and pricing, the RD (par. 115) notes that:

> Bell's principal witness, Professor Baumol, claims on the record herein that fully allocated costs do not have economic significance, and that only incremental or marginal costs should be considered by the manager of the regulated public utility in setting rates for various services. The LRIC pricing rule proposed by witnesses Baumol and Bonbright represent Bell's attempt to apply marginal cost pricing theory to the pricing of certain of its telecommunications services.

116. The RD further states that:

> There remains considerable controversy both among economists and between economists and members of other disciplines concerning the application of marginal cost pricing theory to situations and conditions which differ significantly from the publicly owned monopoly supplier of utility services, which was the situation assumed in the development of the theory • • •. There are several specific problems relating to the application of marginal cost pricing to the mixture of monopolistic and competitive telecommunications services offered by Bell.
>
> The economic theory underlying marginal cost pricing was developed in the context of a monopolistic industry. Taking the theory on its own terms and accepting, *arguendo* the value judgment that the particular social optimum that would result from the theory's application is somehow of particular merit, it is clear that the theory must be modified if it is to be applied to a competitive situation in telecommunications. According to the theory, if a monopoly charges its marginal cost for its output, the cost to society of producing that output is exactly equal to the price (for the last unit sold), and the equality maximizes some measure of benefit to society. If the firm is not a monopoly, no such maximization is necessarily made, for the simple reason that the marginal cost to the firm is not the same as the marginal cost to society.
>
> There are several reasons for the inequality of cost to the firm and cost to society in competitive industries: first, the several firms all produce different combinations of output, with plant designed for their particular outputs • • •. Clearly, if this be so, the cost to each carrier is different, and no carrier can claim that its cost for producing an incremental output is that of the industry as a whole. But even if all firms in a competitive industry had identical plants, the marginal cost to one need not be the marginal cost to the industry as a whole. Put simply, if one firm increases its output, it may assume it will have no effect on the prices of the goods it purchases from other industries, and its other factors of production.
>
> • • • • •
>
> As previously noted, efforts to apply marginal cost profit maximization theory to public utility firms also engaged in competitive enterprises are a relatively recent development, and remain the subject of considerable controversy. At the outset, we note that in the case of the regulated public utility, profit maximization would appear to be contrary to public policy. One of the principal functions of regulation is to prevent exploitation of consumers through the setting of excessive rates. Proper regulation thus specifically forbids profit maximizing behavior on the part of the utility and specifically requires that the utility establish prices which will provide the maximum quantity of service consistent with its allowed rate of return. Yet, to the extent that a carrier has monopoly power, the equating of marginal cost with marginal revenue for the purpose of profit maximization will yield a price greater than cost for the ultimate quantity of service provided.
>
> Economists do not generally agree on either the objectives of the managers of large unregulated firms, or the pricing rules managers use in meeting their objectives.
>
> • • • • •
>
> Theory of marginal cost pricing for utilities (setting marginal cost equal to price) attains the results its proponents claim (the "social optimum") only if other firms are maximizing profit, the utility prices all services according to the marginal cost rule, and there is no overall revenue requirement for the utility. If these conditions are not adhered to, the pricing rule must be modified in some way—price must differ from marginal cost.
>
> • • • • •
>
> Whatever the motivation and practices of the unregulated firm, it is clear that the regulated utility operates under a different set of incentives. It can be shown with the rigor of mathematics that a utility subject to rate of return regulation may find it profitable to expand output beyond the level which an unregulated firm would produce. (RD, pars. 116–122) (citations omitted)
>
> • • • • •
>
> [I]t has not been conclusively shown that marginal cost pricing can be applied to one service without a subsidy from some other service or source. When economists suggest (as in this proceeding) the use of "inverse elasticity rules" for price discrimination among services or classes of customers to allow the company to meet its overall revenue requirement, they are suggesting that those customers with inelastic demand subsidize those with elastic demand. While it has not been established by probative evidence in this or any other case of which we are aware, it is commonly assumed by economists that the demand for monopoly services is less elastic than is that for competitive services.
>
> • • • • •
>
> [T]he relevance and utilization of marginal cost pricing in both regulated and unregulated firms may be found in the accounting procedures employed. Effective use of marginal cost pricing clearly requires detailed information on both marginal costs and marginal revenues for each product or service. Yet standard accounting systems (including the ones used in the telecommunication industry) typically do not provide such data. At best, they provide data only on average unit costs for particular product lines. (RD, pars. 126–127).

117. The significance of this discussion relates to Bell's advocation of marginal costing and how such an advocation should be viewed. Bell is promoting an approach to competitive service pricing which is optimal in terms of Bell's viewpoint and which suits its pecuniary objectives. Thus, the "aura of optimality" associated with Bell's approach and theoretical marginal costing needs to be closely examined and understood. It is not at all clear that this has yet happened, despite the RD's entreaties along these lines (RD, pars. 102–105), and, indeed, Bell's own disavowal of ties between its approach and a social optimum (Bell Expt., pp. 46–49). In oral argument, for example, it was noted as part of a question posed by a Commissioner that "we could insist from a socially optimal *point of view* that it is efficient for all marginal costs to be identified in some way. All costs should be identified in terms of *marginal cost allocation* and that the prices [should] be set at or around that, and as long as the marginal costs are increasing that would be the correct decision would it not?" (T. 11598) (emphasis added). Bell's response emphasized that its "• • • objective is not to price at marginal costs or at Long-Run Incremental Costs. It is a method of analysis to determine the greatest contribution that you can make to the common costs." (T. 15598). Bell's "responses both in Brief and orally were found [,however] to be not totally satisfactory • • •" (T. 15600). The Commission recognizes that a ratemaking philosophy having just *some* aspects of an "optimal approach" need not be optimal at all.[68] The record amply demonstrates that Bell's LRIC is not faithful to the theoretical postulates of marginalist theory. (We shall discuss this in detail in Section X.) Again, we emphasize that the Commission must weigh all proposals in light of its statutory objectives, not those of individual parties. Where such objectives coincide, we feel confident that their pursuit is in the public interest. Where such objectives conflict, the broader interests, which we feel we represent, must prevail. In this instance, we cannot find that Bell's proposed LRIC meets our objectives of efficiency, nor does its proposal evidence properties which would otherwise serve the public interest, such as accountability. Even if a convincing case had been made that Bell's proposal would lead to greater economic efficiency, many other factors including those of a legal and social nature must be considered in our evaluation process.

118. Under the assumption that a faithful reproduction of LRIC *could* be constructed, it is well to examine LRIC's associated allocative features respecting their possible incorporation into a regulatory framework. The theoretical long-run involves a planning concept under which the firm is considered to be unencumbered by any of its historical investment or operating decisions. The firm can plan to employ whatever conceivable facilities and other resources it believes best suits its projected demand and managerial objectives. In the long-run the firm is in what is termed a "fully adapted position," That is, all inputs are variable, and all combinations of technology and factors of production are within its grasp. The firm is in a relatively unconstrained state. To be sure, common facilities exist in the long-run just as in the short-run. However, in the long-run these facilities are "common" only in a functional—not in a planning sense. They could be used for the expected demand of the various services in several manners. One could ask what additional facilities would be needed for the competitive services, assuming that monopoly service facilities were already constructed. Such questioning or logic, however, is irrelevant to cost allocation. The long-run planner is in the position of projecting demand by service when all costs are variable. He "knows" which services are expected to use which facilities and how much supportive activity ("overhead") is needed per unit of output. Finally, note that if total cost in this planning world is not projected to be covered by total revenue, the service in question would not be planned for. "Competitive necessity" in the short-run sense is of no consequence here. Moreover, all costs should be traceable, dollar for dollar, to each service without residuals. There are no direct costs. When actual events unfold, it is expected that these projected total costs "caused" by the individual services can be favorably compared to results from operations.

119. Of more concern is the problem of the allocation of "residual" costs resulting from pragmatic conditions. These residual costs may result, first, from differences between actual and forecast costs or, secondly, because the firm priced its services according to projected costs before it was in a "fully adapted" position (i.e., in the presence of existing fixed costs). In the first instance, operating performance may exceed or fall below that forecast. The marginal approach, being prospective and assuming perfect knowledge, does not suggest how the dollar value of revenue excesses or shortfalls generated by these circumstances should be accounted for in the determination of individual service rates, particularly for a multi-service, partially competitive firm. The latter instance, which we believe applies to Bell's marginal pricing methodology, ignores the vast existing plant of a carrier like Bell. The presence of fixed costs here implies a short-run situation. (As we noted before, in the theoretical long-run all costs are variable.) The long-run, "fully adaptive" theoretical rules are not applicable in the short-run. Nevertheless, existing fixed costs must be accounted for and recovered.

120. The Commission recognizes infirmities in the marginal cost, long-run approach to pricing, and finds that any strict translation of its procedures from theory to the practical telecommunications world infeasible. We find rates developed with only partial reference to a LRIC formulation to hold no particular advantages with regard to achievement of a social optimum. Additionally, we find that the freedom this approach grants Bell to allocate residual costs (resulting from deviations between forecast

[68] For discussion of this "second best" problem in a regulatory context, see, Alfred E. Kahn, *Economics of Regulation*, Vol. I, pp. 69–70, 195–98.

VOL 41 NO 197 OCT 8 76 UM

and actual conditions or between expected and existing plant) to the monopoly services to be violative of our accountability, equity and fair market objectives and responsibilities. We do find, however, long-run marginal costing's causational assignment of costs to be attractive from an accountability standpoint. In the sense that facility construction is undertaken to meet certain needs, we note that historical cost causation can be a measure of the acumen and efficiency of a carrier's operation when viewing actual results. Similarly, we find that the flexibility of the carrier to develop rates commensurate with expected costs aligns with the efficiency objective. These marginal costing features should be melded into any statement of proper ratemaking principles.

121. Short-run marginal costing and pricing received favorable treatment from both Bell and the RD, albeit for different applications. Bell recommended its LRIC (which is shown to be essentially an incremental, short-run concept below) and burden test for use as part of its basic service philosophy of pricing (Bell P.F., pp. 26–119). The RD, on the other hand, suggested that the "most direct and immediate application of the concept would appear to be in the peak/off-peak pricing of monopoly services * * *" (RD, par. 145). Of course, according to Bell, marginal costing should be a *pivotal* aspect of ratemaking, whereas the RD viewed marginal costing in a more corollary role to a basic FDC approach. No detailed discussion of short-run marginal costing is appropriate here since the concept and both of these viewpoints are explored more extensively in the next section. However, some further comments regarding the general efficiency, equity, and accountability aspects of short-run marginal costing should be made in concluding our discussion here.

122. Bell takes exception to the RD's examination of short-run marginal costing, especially with regard to peak-off-peak pricing. "While peak-off-peak pricing is of concern in the rate structure of network services, it has no application to dedicated full-time private line services * * *. Bell advocates off-peak pricing for MTS * * * where the MTS rate structure is at issue" (Bell Expt., p. 57). The Commission recognizes the difference between the choice of a marginal customer class by time of day where cost differences exist, and the arbitrary choice of classes of services to be treated as marginal users. In the first instance, the Commission may agree with differential pricing for peak-off-peak users. However, the arbitrary choice of a select group of (competitive) services which are treated as marginal users where users of other services are treated differently is patently discriminatory. In the latter case, we cannot approve the loading of short-run overhead, depreciation, and other fixed costs on "nonmarginal" users.[69]

123. We thus find disparate treatment of potential marginal customers to be unjust and unreasonable. We do not agree that the carrier should be free to choose any service it desires as the "marginal offering," nor will we accept an overall ratemaking philosophy which incorporates this freedom. In the interests of efficiency, we may permit preferred treatment of certain services if cost economies will be realized and can be demonstrated. However, a showing must be made that full costs will be covered within some reasonable time certain. Further, the relationships to full costs must also be established.

X. Bell's LRIC Versus Neoclassical Theory

124. The RD characterizes Bell's LRIC as follows:

> Bell's LRIC proposal is an attempt to apply marginal cost pricing principles on a selective basis to certain of its service offerings (e.g., private line services subject to competition). Bell does not, in either its LRIC proposal or its existing rate structure, attempt to apply marginal cost pricing to the type of services and for the purposes for which the theory was initially proposed and for which it has been brought to the most advanced stage of development; i.e., to the peak/off-peak pricing of monopoly public utility services so as to achieve the most economically efficient production of such services. Furthermore, Bell's LRIC proposal does not contemplate that the overall pricing of its monopoly services will be based on the same long run incremental cost basis as would its competitive services. Instead, the monopoly service prices would be set at whatever level is required to satisfy Bell's total revenue requirements (including all its historical costs as well as projected but non-allocated incremental costs), after the competitive service prices are set on the basis of forecast long run incremental costs and forecast "burden" analyses.
>
> * * * * *
>
> Bell's LRIC proposal contains certain features apparently intended to circumvent some of the more obvious practical problems (e.g., the proposed use of incremental cost forecasts to avoid the difficult if not impossible task of determining true marginal costs from Bell's books of accounts, and the proposed use of a "burden" test to alleviate concerns that the incremental pricing scheme inherently implies subsidization of one service by another). However, besides failing to satisfactorily resolve these problems, the LRIC proposal appears to erode some of the basic principles of marginal cost pricing and to further exacerbate its basic problems. (RD, pars. 128, 129).
>
> * * * * *
>
> A primary objective and responsibility of regulation, on the other hand, is to hold the carrier fully accountable to its customers for its investment, operating, and pricing decisions; and, if necessary, to disallow costs which are not justified or rates which are either excessive as compared to legitimate costs or are unlawfully discriminatory. Under the LRIC approach, virtually all effective methods for establishing and maintaining accountability would be eliminated. The Commission's role, in the first instance, would be to review Bell's future-oriented cost, demand, and revenue forecasts.
>
> * * * * *
>
> Stated somewhat differently, under conventional regulatory philosophy and statutes, both the right and the responsibility for important management decisions such as the choice of alternative investment strategies, service offerings, and rates are afforded, in the first instance, to the carriers' management. While the Commission is afforded some limited control over capital investments and proposed tariffs, its primary function as surrogate for the competitive market place is to conduct ex post facto evaluations of these management decisions as reflected in subsequent market and earnings developments, and to make such corrections to the carriers' ongoing programs as are found necessary, pursuant to these evaluations, to protect the public interest. These ex post facto evaluations require the existence of a record of actual vs. projected results, and a means for determining what changes if any would have been required in management's original decisions to have satisfied the requirement that tariff rates and conditions be just, reasonable, and non-discriminatory. (RD, pars. 131, 132).

125. The underlying principles of long-run incremental cost (Bell's application of marginal cost)[70] were described by Bell in Docket 16258 (Bell Exh. 25 and 26). Bell described incremental cost as referring to "the change in total cost occasioned by the supply of an additional output of service or a lesser amount of service" (Bell, Expt. p. 28). The measure of change is accomplished by discounting to present value the stream of estimated future net cash outlays made by the firm resulting from the commitment to supply a particular service over the "long-run." These principles stem from neoclassical (or marginalist) theory. An important step in the application of these principles, however, is defining what is meant by "long-run," since in theory, the

[69] We will carefully scrutinize Bell's dedications of facilities as "direct plant". Dedication of common facilities and resultant cost allocation implications do not impact on our evaluation of the equity of the cost distribution process, since clearly such dedications are subject to managerial discretion and manipulation. We will not, therefore, permit the carrier's dedication of facilities to various services to circumscribe our responsibility to evaluate allocations of so-called "directly attributed" plant.

[70] Incremental cost is a more general concept than marginal cost. Incremental cost is the cost ascribable to any specified change in volume of output, or service, whereas marginal cost is the limit of that increment, as the change in volume approaches zero. In economics, marginal cost reers to the chagne economics, marginal cost refers to the change in cost associated with the additional output of one unit. Thus for practical application, marginal cost considers a change in volume generally too small to be of any practical significance.

concept relates to that future point in time at which costs become variable, and for which there are no restrictions concerning the choice of any factors of production, including restrictions engendered by historical plant facilities.

126. It is manifest from the record that Bell's concept of "long-run" does not conform to this definition. Although the Bell concept includes estimates of capital costs required to permit adaptation of plant capacity to the size of the market (Docket 16258, Bell Exh. 24; Docket 18128, Bell Exh. 3), there are, nevertheless, inherited plant costs which are considered fixed and which are not planned to vary during the forecast period. Thus arise the terms "fungible" and "non-fungible," as well as "non-attributable" costs, which in effect, give recognition to the constraints that reality places on the corporate planner in estimating true long-run incremental costs (RD Appendix C, par. 45). As Dr. Melody testified in Docket 16258, the firm "sets prices in a state of partial adaptation to the capacity that it has inherited from the past; and therefore is not considering all the long-run effects of its decision to supply service." (CCB, Exh. 52).

127. As indicated in the RD (Par. 128), Bell proposed to apply its LRIC techniques only to its private line services. This results in a mixed approach to costing (i.e., Bell's basic service philosophy), with forecast costs being used in setting rates for competitive services and historical costs being used to determine monopoly rates. Since future costs are predicted by Bell to be lower than current and historical costs, incremental costs sum to less than total costs, and a shortfall in revenue is necessarily created when prices are set at Bell's LRIC (i.e., revenues covering only incremental costs would be insufficient to cover total costs, including cost of capital).[71] Further, under its basic service approach, Bell proposes to add a markup above the LRIC floor it determines for private line services. Rates are set at a level, which in Bell's judgment, will yield an "optimum contribution" to other services (RD, par. 113). Any portion of Bell's total revenue requirement not covered by revenues from the private line services becomes the responsibility of MTS and WATS ratepayers. Bell claims it relies on economic theory in support of its utilization of marginalist techniques (see Bell Expt., 89), but there is no theoretical or record support for selective application of these techniques.

128. Bell asserts that application of incremental analysis to private line services is designed to measure true "economic" costs, i.e., those costs which vary with a change in the level of output. Yet incremental analysis is not designed to address what is to be done with "unallocable" common or fixed costs.[72] When asked how the Commission should account for common costs which are unattributable to any specific service, Dr. Baumol responded: "by definition those unattributable common costs never enter into incremental costs, and therefore, they can cause no ambiguity in the incremental cost figure" (T. 10397). Bell stated in Exception 41 that a LRIC study determines the total changes in costs (including any effects on common costs) and revenues over the long run as a result of offering a service at a particular rate, as compared with alternative rates." Clearly, costs which remain unattributable as a result of not changing in response to alternative rates lie outside the theoretical construct of incremental costing. Thus, in determining the level of contribution which private line services make towards covering unallocable common fixed costs, Bell relies on judgment—not neoclassical theory. The level of contribution is described as "the largest contribution which is prudent or reasonably practicable, taking into account market conditions, rate relationships, and other relevant ratemaking factors" (Bell Expt., par. 39).

129. With these departures of Bell's LRIC from neoclassical theory in mind, we note a considerable difference in holding that "the vast weight of economic theory is clearly on the side of marginal or incremental costs . . ." (Bell Expt., par. 87), and saying that the vast weight of economic theory is clearly on the side of Bell's selective and judgmental application of incremental costing techniques. Accordingly, Bell's comment that the LRIC methodology "optimizes" contributions from the competitive services with "benefits" flowing through to the users of the basic services whose rates are thereby lower than they would otherwise be (Bell, P.F., par. 46), cannot draw support from neoclassical theory.

130. Even assuming, arguendo, that Bell presented acceptable explanations for its departures from neoclassical theory, there are still a number of questionable areas which would require further justification. One such area is the inability to provide the Commission and its staff with any acceptable means of verifying results. Bell claims that its "retrospective accountability analysis" serves this purpose by providing historical information to the Commission. Bell's retrospective accountability analysis involves assigning to a service category all directly attributable embedded costs on an incremental basis (i.e., those costs which would cease to occur under the hypothetical condition of discontinuance of service). The analysis is similar to FDC Method 7, except that Bell's retrospective accountability analysis does not redistribute the remaining unattributable costs (the "tenth category") to all services, as does Method 7.

131. Dr. Baumol testified that LRIC forecasts and retrospective accountability analysis do not come up with directly comparable figures. As he states, "[t]here is no way in which they could" (T. 10307). The purpose of this study is to provide some ability to monitor the differences between the attributed costs of a service and the revenues provided by that service—before and after a change in rates (T. 10308). Therefore, observation of the results for any time series during which there is no rate change would be of little significance for the purpose of accountability. Second, there would be little significance in any spread between revenues and attributable costs, because it must be remembered that no portion of common and fixed costs are allocated to the service being analyzed. In this regard, we note that one of the advantages of FDC is that it attempts to provide revenue and cost figures for individual services which can be compared for the purpose of evaluating the performance of the service over time, in relation to other services and to the firm as a whole.[73]

132. We note also the problems of forecasting in reality as opposed to forecasting in economic theory. Dr. Melody stated during oral testimony (T. 8731), that the application of marginal cost forecasting is hampered by all the constraints which history places on the ongoing firm. These include the existence of large amounts of ing investment decisions based on inherited plant. The need to depart from theory in making everyday business decisions dictates why, for example, it is uneconomical to immediately replace all older, low capacity high cost facilities with newer, high capacity lower cost facilities.

133. Other questions remain concerning the reliability of forecast costs in general due to the influence of exogenous factors, such as the results of future labor negotiations, inflation, the health of the total economy, oil embargos, and the like. These factors must be anticipated by the forecaster, and too often the subjective perceptions of the forecaster influence the results. Any unanticipated changes in these factors would cause shifts in the position of the long-run curve. The Commission, of course, could not hold a carrier accountable for such shifts. For example, Mr. Eastmond testified (T. 11579) that Bell preferred the use of expense to investment ratios for estimating certain future expenses, rather than actually projecting current trends for expenses into the future. To

[71] It is noted that the revenue shortfall from pricing at LRIC occurs either from making the assumption that economies of scale do exist or from a failure to consider inherited costs when the firm is a "going concern," or both.

[72] Examples of these costs include executive salaries, general advertising, some sales and marketing costs, printing, consultant fees, as well as plant items used in common by two or more services (such as poles, service equipment and vehicles), which are not attributable to any specific service.

[73] We find merit in Dr. Wein's often quoted phrase: "[a]t best, therefore, a FDC analysis provides a signal, a somewhat cloudy one to be sure, that rate levels of various services are out of line with the standard that each service should earn enough to cover its fully distributed costs plus a fair return on its rate base." (OCB, Exh. 50, p. 107, Docket 16258). We agree that FDC results are not precisely accurate.

V 41 N 197 OCT 8 76 UM

have performed the latter would "be anticipating future inflation, and Bell feels that improvement in productivity would offset the inflationary trends." This testimony was given by Mr. Eastmond in 1972. The assumption was made that inflation for the 1971–1974 period would be near that of the 1958–1968 period. In retrospect, the period from 1971–1974 was characterized by the most serious inflation since World War II. Other economists also were unable to forecast inflation during this period. Consequently, it is our conclusion that present forecasting techniques are not yet refined enough to provide reliable information to this Commission for carrying out its statutory mission.

134. Major inputs to Bell's long-run analysis are its market studies. The RD was critical of Bell's market studies. It concluded, in part, that "until Bell can show that it can provide market estimates which are consistently accurate, it is doubtful that the Commission can adopt a regulatory policy that relies exclusively upon such [incremental analysis] even if such a policy were otherwise desirable" (RD, Appendix B, par. 39). Bell maintains (Bell Expt., p. 160–1) that such a conclusion is unwarranted and unsupported by the record. Bell claims that its LRIC analysis does not depend wholly or rely exclusively on such market study results. While it appears that the statistical method of customer selection is technically satisfactory, the fact still remains that observations which comprise the survey are judgments of Bell Account Managers. We have no means of knowing what biases, if any, may exist in the estimates of the Account Managers or what non-sampling errors may have been introduced (T. 10065–67, 10089, 10091). Bell introduced testimony that the method employed is superior to direct customer surveys and that there was insufficient data for econometric analysis (Bell Exh. 17). We find this of little value. There is no proof that accuracy is improved by use of one method over another. The only recourse left to us is to review the actual versus forecast results, more than five years after the fact. Such review shows that portions of the forecasts vary in degrees of accuracy. However, the bottom line interstate Telpak revenues were overstated by more than ten percent. In fact, the expected level of interstate Telpak revenues was not realized until after 1973 (Monthly Report No. 4, December, 1971–74). We thus agree with the Recommended Decision (RD, Appendix B, pars. 37–39) that these errors are sufficient to merit skepticism.

135. As part of its incremental costing approach, Bell employs a "burden test" allegedly to determine whether cross-subsidization exists between services. The results of Bell's burden test, however, also depend upon a number of judgmental inputs.[74] Dr. Baumol provided a description of how the concept of the burden tests works (T. 10276): "[I]magine that a service is discontinued. Several things occur: costs that otherwise have been incurred disappear, revenues which would have otherwise been derived disappear, other services now obtain revenues which they otherwise would not have obtained. Costs which those services would not otherwise have incurred now are incurred. You take all of these into account and see if you come out ahead or behind to determine if there has been a burden." The determination of cross-elasticities between Bell's interstate services (and between Bell's services and those of other carriers) is critical to the results of the burden test. The record provides evidence that Bell is unable to measure cross-elasticities with reasonable accuracy [75] and the effect of underestimating cross-elasticities may result in a competitive service passing the burden test at a rate level that, in fact, would be non-compensatory (T. 12571). Bell also asserted that including the cross-elastic effects in the burden test necessarily makes the test harder to pass (T. 12187; 12517; 12571–2). Yet judgment influences results in this instance as well since, if it is determined that the diverted use to substitute services causes costs greater than the new revenues obtained by the substitute services or if other communication services are considered by Bell to be complements rather than substitutes, then including measures of cross-elasticity does not make the test harder to pass. Moreover, the decision as to which plant is designated as fungible or non-fungible will affect the burden test, because the more plant designated as non-fungible, the easier it will be for a service to pass the test (T. 10276).

136. Problems arise, in theory, from implementing a capacity cost concept, since it is not consistent with the theoretical notion of long-run which allows the planner to overcome constraints arising from inherited plant or large unit investment. Thus, there is validity in characterizing Bell's LRIC concept as being an "additive" concept (i.e., using capacity unit investment costs versus the development of a long-run total cost curve under differing assumptions). The record is also unclear as to what the correct plant fill factors should be. This measurement is important, because the higher the estimated fill factor, the lower the resulting average incremental cost. As Dr. Baumol indicated, there would be difficulty in deriving fill factors (for use in the burden test) for the system as configured under the alternative assumption of not having provided a service (T. 10323).

137. In summary, we find that Bell's modification of marginalist or neoclassical economic theory so as to incorporate the constraints imposed under a system of revenue requirements regulation significantly changes the assumptions made under theory. The long-run cost concept is primarily a planning concept—a guide to corporate planners for making the decision of what plant to set up in order to produce at minimum cost the expected level of output. Once investment decisions have been made and funds are tied up in fixed-capital equipment, the firm operates under short-run conditions. The existence of the large pool of embedded investment affords the Bell System little investment flexibility of the type envisioned under the theoretical long-run. Moreover, Bell's process is heavily dependent upon judgmental decisions which cannot be verified or tested by the Commission. The ability of the Commission to review, correct and change rates later based on another uncertain forecast, is not sufficient to meet our statutory responsibilities. In a regulatory environment, the risks of revenue shortfalls should not by design be borne by monopoly users.[77] Furthermore, we find that Bell's approach is violative of the objectives of fair and equitable treatment of all users, and cannot be reconciled with the objective of ensuring fair market rules.

XI. Evaluation of FDC

A. General

139. Accounting data and both unit and total costs developed from such accounting data, have historically provided the basis for the bulk of management's production decisions. Of course, decisions involving the evaluation of management's performance or the comparison of a project's actual and expected results have traditionally utilized accounting information. Dynamic decision making also has shown a similar dependence. Included here are decisions of both a current or "real time" nature, and those concerning

[74] It is a simple but sometimes overlooked point that the burden test does not measure whether a service is or has been a burden. It is not a test of actual events rather an estimated test as to what one might expect if all the estimates for future incremental costs are correct (T. 2102). The burden test, of course, cannot be faulted for what it was not designed to do, but in light of its name and this Commission's need to perceive the existence of cross-subsidy on the basis acceptable actual data, it is important to make this distinction.

[75] Several questions concerning the validity of the development of Bell of elasticities for WATS were raised in the recent Commission decision in Docket 19989 (*WATS*, 59 FCC2d 671 (1976)).

[77] DOD has proposed the use of long-run average costs (LRAC) as the appropriate reference point for determining compensatory rates which are not a burden on other services (DOD P.F., p. 25). DOD maintains that if all resource costs are included, LRAC should equal LRIC. We reject LRAC for many of the reasons that led us to reject LRIC. For example, it must be based on subjective forecasts of future events. Also, it differs from theory insofar as average costs are not defined for a multi-product firm (Docket 18128, T. 10301; Bell Exh. 20, p. A–5), and as described at DOD P.F., p. 25, it is not a true long-run concept. DOD itself admits that "it is extremely difficult to determine the LRAC for an individual service in a multi-service organization." (DOD P.F., p. 26). It is our finding that LRAC would be too unreliable for practical use.

future events based on projections and forecasts. Moreover, forecast data itself often consists of extrapolated historical conditions. Where pricing of an existing product is required, accountants have designed costing systems to generate unit costs for the most complex conditions. Indeed, major areas of accounting theory, such as process, job order, and standard costing, deal with the provision of the information needed for dynamic pricing decisions.

140. The realization that prices in private industry must be set before all costs were determined (i.e., historically recorded) was not an original thought of economists. Accountants and financial analysts have "looked backward" only when the decision involved necessitated that they do so. (They do not wear "historical blinders.") Although many accounting reports such as the balance sheet and income statement are intended as surveys of the results of operations and management's decision making other [78] accounting information provides part of the basis for these decisions.

141. The most widely used cost accounting methods and associated statements are designed to report the full costs of operations for the particular economic unit of interest. However, such "adjusted reports" as variable costing income statements and information provided by many managerial accounting techniques use less than full cost information, when needed for specialized decisional conditions.[79] Accountants recognize the value of such information on an intermittent basis. However, the expectation that either all recorded costs will eventually be covered by revenues or that these costs will accrue to the firm's shareholders remains.

142. Other professions also hold that all costs must be covered by revenues. MCI noted, for example, that "all responsible economist writers on the subject of determining the fully allocated costs of products or services in multi-product or multi-service firms readily acknowledge that, while the task is not free of difficulty, it must be done" (MCI R. E., p. 70). MCI pointed out that Nobel Laureat Paul Samuelson in his well-known text, Economics (1st ed., pp. 510–11), wrote:

> [Y]ou will turn to the cost experts and probably ask for the unit cost of producing each product in question * * *. There will be plenty of headaches in aiming at any sort of figure. For example, how shall the administrative and plant overhead costs be allocated between different products? Or if a given process simultaneously creates joint products like meat and hides, how shall the costs be allocated between them? Or if a building will last for many years, how much should be charged against current operations?
>
> Headaches, or no headaches, it is the duty of the accountants to come out with some sort of answer as to unit costs. (MCI R. E., 70, 71).

Similarly, MCI noted that Corwin Edwards in discussing the Robinson-Patman Act in The Price Discrimination Law (1959) (p. 586) said:

> When costs are relevant, the language of the statute circumscribes the discretion of the [Federal Trade] Commission and the courts as to the types of cost that can be considered and as to the permissible methods of analysis * * *. The purpose of this language was explained by the sponsors of the Act in the debate in Congress. Concerned lest a respondent might take certain business at prices based on the out-of-pocket costs of an additional increment of activity, those who drafted the bill sought to preclude any defense of such a price concession on the basis of a comparison of this incremental cost with a cost for other business computed to include all the overhead charges. Overhead costs were regarded as properly allocable on an equal basis to all business done.
>
> Many of the respondents in price discrimination cases were engaged in the sale of a considerable number of commodities, each bearing its own prices. When the price differences applicable to one of these commodities were challenged, a cost defense required a segregation of the cost pertaining to that particular commodity. (MCI R.E., p. 71)

143. As we have otherwise noted, Bell, despite its reliance on marginal costing for purposes of this proceeding likewise recognizes that full recorded costs must be covered. Indeed, its basic service philosophy may be viewed simply as a special, implicit approach to the distribution of full recorded costs. As noted above, elements of its arguments related to competitive services stress the efficiency of less-than-full cost pricing, but the substance of Bell's basic service philosophy is based on a full cost recovery constraint. For example, Bell disavows marginal cost pricing for all its services and, indeed, opposes strict use of this concept even for the pricing of competitive services. It is important to note that given a full cost recovery constraint, decisions regarding how much each service will contribute are equivalent to a division among such services of the full costs of operation. Whether such decisions are made through cost allocation procedures such as Methods 1 through 7 or through the basic service philosophy that Bell has proposed, the objective is still the same: all costs will be recovered (Bell Expt., pp. 25, 27, 30). In practice, Bell defers to the "discipline of full costs" both in its overall and individual service pricing designs. First, let us examine full costs as they relate to Bell's overall pricing philosophy. For the aggregate of its services, Bell's deference to the constraint of covering full recorded costs is illustrated by its statement on an FDC ceiling for MTS rates as suggested by other parties (see, CCB Exh. 7, Docket 18128 and FCC Staff Exh. 52, Docket 16258). In discussing the proposed MTS ceiling, Bell notes:

> In addition to the fundamental, theoretical, and conceptual flaws in any such use of fully distributed costs, there are *formidable practical objections* to these proposals by the Bureau witnesses. It is clear that if a carrier is to meet the essential objective of earning its overall allowed rate of return, a necessary corollary of the proposal to place an FDC ceiling on MTS is that the carrier must seek to establish rates for other categories of service, including competitive private line services, which will yield revenues for each such service equal to the allowed overall rate of return applied to the FDC investment for such service. In other words, FDC would then become the standard of propriety for the rate level for each service category, and it would be not only a *ceiling for MTS*, but also a *floor* for each of the other services, including the *competitive* services (Bell P.F., p. 51) (emphasis added).

It is manifest that Bell would not urge that limitations on monopoly services prices constitute both a ceiling on monopoly service rates and also a floor on competitive services charges unless it felt that recovery of full recorded costs was a binding priority or constraint on its price structure alternatives. This was confirmed at oral argument:

> Commissioner Robinson. * * * Should we put the rate of return constraint on the monopoly service and say none of the monopoly services can earn more than the system as a whole?
>
> Mr. Perlberg. If you do that then you are effectively putting a Fully Distributed Costs floor on the so-called non-monopoly services.
>
> Commissioner Robinson. Now how can that be? If you tell us they do not constitute a burden on the system, that presupposes that monopoly rates do not have to be higher by reason of the competitive services.
>
> If they do not have to be higher, then why should not we put a rate of return constraint on the monopoly services to make sure they are not earning more than they need to by virtue of these competitive services?
>
> Mr. Perlberg. It depends on how you determine that constraint.
>
> If you determine that constraint effectively by a Fully Distributed Costs study and basically have two pots, one dividing it between the monopoly services and the competitive services, then effectively you are making a Fully Distributed Costs study.
>
> Commissioner Robinson. No, it is not a floor. It is a ceiling. The ceiling is on the monopoly return or on the monopoly services, and then you can charge for the competitive services whatever you want, whatever is not burdensome for you.
>
> You can go down to Short-Run Incremental Costs or anything else.
>
> Mr. Perlberg. But that still effectively puts the Fully Distributed Costs floor *because you still have the background of a total, overall revenue requirement for the firm.* (T. 15604–15605) (Emphasis added.)

144. Let us now turn to the second situation noted above—that of Bell's individual service pricing. It is manifest that Bell is not a true "marginal cost pricer" with regard to setting individual service rates. If no ceiling were imposed on monopoly service rates, Bell could

[78] We take notice of such works as Hendrikson, Accounting Theory (Richard D. Irwin, 1970), Chs. 1–4, Neuner, Cost Accounting (Richard D. Irwin, 1973), Chs. 1–13, 16–24, Garrison, Managerial Accounting (Business Publications, Inc., 1976), Chs. 7–19, and Pyle and White, Fundamental Accounting Principles (Richard D. Irwin, 1975) Chs. 22–25, in assessing the historical and current relationships between accounting and managerial decision making.

[79] See Copeland and Dascher, Managerial Accounting, (1974), Chs 3–14; Drebin, Managerial Accounting (1972) Chs. 2–12.

V41N197 OCT 8 76 UM

look to these services for recovery of the bulk of their "residual costs." These residual costs would include all costs not recovered by its marginal cost based rates for competitive services. However, Bell recognized that even its monopoly customers have certain price limitations on their demand for services. Thus, in deference to these and other "relevant ratemaking factors," Bell disavowed any allegiance to true marginal cost pricing for competitive services:

> The RD inaccurately implies that Bell advocates setting prices equal to marginal costs for competitive services, even though Bureau witness Wein admitted that Bell witnesses were not advocating marginal cost pricing. In fact, Bell does not advocate setting prices for competitive services equal to marginal costs, but advocates setting rates for these services above LRIC so as to achieve the largest practicable contribution from these services to permit the basic MTS to be provided at rates as low as practicable (Bell Expt., p. 14) (Citations omitted.)

145. Hence, it may be seen that Bell is neither an overall nor an individual service advocate of the strict use of marginal costing for price determination. Furthermore, as has been demonstrated earlier, it cannot be inferred that there is anything particularly "nonarbitrary" in the obscure and judgmental pricing approach it does employ. On balance, Bell does adhere to the "discipline of full recorded costs recovery," albeit its unique approach to recovery of full costs differs from the classical design of cost accounting systems (under these systems the aliquot cost share for each service would be proportional).

146. Other parties besides Bell find the RD's adherence to full costing for all services somewhat onerous, and argue that the FDC methods are replete with "arbitrariness." These parties agree with the use of the "contributional logic" Bell proposes to apply to certain selected services.[80] For example, Bell noted that "various economic witnesses for the other parties testified regarding the invalidity and arbitrary nature of FDC allocations * * * These witnesses included * * * Dr. John W. Coughlan, a certified public accountant experienced in cost analysis procedures, including those for regulated industries (Docket 16258, NAB Exh. 3, pp. 1–18; T. 21200–05, 21215–17, 21345)" (Bell P.F., p. 148). Dr. Coughlan used a meat packing plant illustration where the basic carcass and most of the cost of preliminary work on it constituted "common" or "joint costs" (Docket 16258, NAB Exh. 3, p. 11). In discussing common costs Dr. Coughlan appeared to support Bell's contentions concerning "contribution:"

> It is by now commonplace in cost accounting that all allocations of the common costs among the various joint and by-products are arbitrary. It is by now widely accepted by cost accountants that the basic profit maximization criterion is that total revenues for all the products put together must exceed total costs by as much as possible. In deciding whether a particular joint or by-product is waste or scrap and therefore not worth further processing, cost accountants now generally compare the revenues to be derived from further processing of that product with the special processing costs: *Provided*, That such further revenues exceed such special processing costs they generally conclude that profit maximization requires continued processing of that product since the product at least covers its special processing costs and makes some contribution toward covering the common costs and earning a profit on the overall product line (Docket 16258, NAB Exh. 3, p. 12).

147. In the transcript cited by Bell, however, Dr. Coughlan also appeared to support Bell's ultimate deference to the "discipline of full recorded costs." On the one hand, Dr. Coughlan recommended that program transmission rates should not be charged "what the market will bear," but only a contribution. On the other hand, he agreed that "somebody has to pick up the tab:"

> Q. On page 12 of your testimony, Dr. Coughlan, in the first full sentence, you state that it is now widely accepted by cost accountants that the "basic profit maximization criterion" is that total revenues must exceed total costs by as much as possible.
>
> Would you apply that basic profit maximization criterion to the program services' rate levels?
>
> A. * * * I don't disagree with your point at all. (T. 21205).
>
> Q. But it is not your position that the Bell System should seek to obtain the maximum profit consideration from the program transmission service?
>
> A. Well, I suppose perhaps in the interests of the stockholders, the Bell System should try to obtain the maximum consideration, but as a regulatory prescription, I wasn't necessarily advocating that point at all. (T. 2120).
>
> PRESIDING EXAMINER. * * * I take it that you would *not advocate that Bell charge whatever the market will bear*, in terms of rates for program transmission service.
>
> The WITNESS. That is correct, sir.
>
> PRESIDING EXAMINER. All right. Now then, they should charge, in your opinion, something less than that.
>
> What are the criteria which you say militate that they charge less?
>
> The WITNESS. Well, let me put it this way, Mr. Examiner, that in providing a *valuable public service*, as broadcasting presumably does, if the Commission feels that is a very valuable public service, that the objective then ought not to be to squeeze the last dollar of profit out of that category of service * * *.
>
> PRESIDING EXAMINER. Well, do you think the airlines provide a valuable public service?
>
> The WITNESS. I would think they do, sir.
>
> The PRESIDING EXAMINER. And the railroads? And the public truckers? And steamship companies?
>
> The WITNESS. I would hope that they all provide a valuable public service.
>
> PRESIDING EXAMINER. Well, do you believe that they do?
>
> The WITNESS. Yes, sir.
>
> PRESIDING EXAMINER. I mean, are they in a similar public service category, as you have used the term?
>
> The WITNESS. Yes, sir.
>
> PRESIDING EXAMINER. And educational activities?
>
> The WITNESS. Yes, sir.
>
> PRESIDING EXAMINER. Well, then, would you expect also that the *same rules should militate in favor of lower rates*, that is, lower than the maximum which might be achieved for those entities and activities?
>
> The WITNESS. Well, Mr. Examiner, I just said that it might make sense for the Commission to do so, and you asked me if I *thought it would make sense in the case of broadcasters*, and I certainly agree with that, and there might be some of those other categories you mentioned, where it would certainly make sense to demand less than the very last dollar of profit that could be had for them, and I get the impression, for example, that the Commission tries to protect the MTT class of service in this same context.
>
> So I am agreeing that the Commission might well do exactly what you have said, sir.
>
> PRESIDING EXAMINER. Well, if the Commission takes care of all these special categories that we have enumerated, *somebody has to pick up the tab* which represents the difference between what is recovered and what is permitted as an overall revenue requirement by the regulatory agencies (T. 21207–09) (emphasis added.)
>
> The WITNESS. Yes, sir.
>
> By Mr. RASMUSSEN.
>
> Q. Dr. Coughlan, you would agree that *some service has to bear the fully allocated and the embedded costs*, wouldn't you?
>
> A. Well, that seems like a reasonable proposition, yes, sir (T. 21212) (emphasis added).

148. In summary, it appears that most of the parties concur that full recorded costs must be covered by Bell's various services, although they disagree regarding particular cost distributions among these services.[81] The RD favors proportional distribution, while Bell, NAB, and other parties follow a more "selective" approach.

149. We find recovery of full recorded costs to be consistent with the public interest as we have discussed above. Further, since we find no merit or basis which warrants the special treatment sought by a number of parties, we rule that a proportionate distribution of all recorded costs best furthers the underlying objectives of the Act. In the discussion below, we will consider the relative merits of the full cost methodologies in general in light of such objectives.

150. The RD addressed several of Bell's objections to FDC as a ratemaking standard (RD, par. 147). (For the most part Bell is in agreement with the RD that FDC methods are appropriate for accountability purposes, albeit each expresses different preferences regarding the particular FDC method to be employed.) To Bell's objection that full costs are historically derived (rather than estimated from forecast data), the RD states that FDC could be derived for a future period using projected data if these were found preferable for ratemaking. However, the RD maintained that forecast data " has been unreliable in the past, as evidenced by the DDS, TAT–5 and TAT–6 cost estimates (RD, par. 148). Pending improvements in forecasting techniques and data developments, the RD urged that historical data be used to provide the basis for cost estimates and rate level support. Regarding questions raised about the economic significance of average costs for a multiproduct firm, the RD noted that there is both theoretical support and extensive evidence of the use of average costs in decision making (RD, par. 149). To the criticism that FDC does not provide an infallible or unquestionable rationale for allocating common and joint costs among the various services on an economically sound basis, the RD maintained that such costs are inherently arbitrary (RD, par. 150). That is, all costing methods of record must contend with this difficulty not just FDC approaches. The fact that plausible alternatives exist does not, of itself, cast doubt on the RD's FDC (Method 1) approach. The RD alleged that, in general, FDC Methods are more explicit and unbiased, and result in more equitable distributions of common and joint costs than the Bell-proposed, marginal cost based (LRIC) alternative.

151. With respect to FDC's purported lack of economic significance, the RD notes that its suggested relative use allocation base finds considerable professional support, when applied in such circumstances as peak period distribution of costs (RD, par. 151). To the Bell argument that FDC fails to recognize the benefits of economies of scale and demand characteristics, the RD maintained that FDC intrinsically distributes scale benefits (to the extent they may be assumed to exist) in proportion to present relatives usage of facilities. Furthermore, the RD found that FDC methods can easily accommodate demand information to the extent that such information is available and technically sound (RD, pars. 152–153). The RD concluded its reply to these Bell criticisms by maintaining that Bell itself used FDC analysis for its precompetitive era tariff filings for other purposes. The RD noted that although Bell is currently advocating competitive service departures from full costing, it still retains the full cost approach for its interstate services in the aggregate. That is, Bell's basic service philosophy is based on a full cost design, even though it contains a marginal costing component for its competitive services. The RD also maintained that FDC studies can provide an ongoing, periodic point of reference for evaluation of the efficiency of resource allocations and for monitoring rate levels. Unlike marginal cost studies, the RD noted that FDC analyses have a supportive base in the data already available in the Uniform System of Accounts, and can best provide the measure of cost responsibility needed for accountability purposes.

152. Bell responded to the RD by emphasizing that its major objection to fully distributed costing was not its historical nature, which was emphasized by the RD, but FDC's failure to reveal *significant data* concerning future pricing alternatives (Bell Expt., p. 84). Bell noted that "not only must relevant cost data be prospective, but the record shows that *proper analysis* must appraise the effect that the rate under consideration would have on total operating costs * * *. The record shows that future costs are espoused by Bell because they are the *only* costs which are relevant for ratemaking purposes * * *" (Bell Expt., p. 84–85) (emphasis added). Bell alleged that FDC is inherently arbitrary and lacks a foundation in economic theory, and it must, therefore, be precluded from use as a ratemaking methodology. Finally, Bell included failure to recognize changes in cost resulting from changes in volume, and the absence of demand and cross-elasticities in its formulation as important deficiencies of FDC (Bell Expt., pp. 4–5).

153. Bell takes exception to the RD assertion that *both* LRIC and FDC involve arbitrary allocation decisions. As noted earlier, the RD stated that use of LRIC based prices for competitive services leaves a large residual of unattributable costs (including historical costs) which burden monopoly users, whereas FDC distributes these costs proportionately among the services (RD, par. 150). Bell replies that "there are *many* possible bases of [FDC] allocation which can lead to widely disparate results * * *" (Bell Expt., p. 89) (emphasis added). Furthermore, Bell alleged that the magnitude of such unattributable costs which must be borne by MTS users would be increased by use of full costing (Bell BSE, p. 13–16).

154. Bell does not directly address the need for a uniform costing methodology for all services that is implicit in the RD's arguments. To the contrary, Bell claims that its special treatment of competitive services results in efficiency and other benefits. Bell does not, for example, address the obvious question of why it does not make overall (aggregate) use of its long-run incremental cost philosophy. Nor does Bell state the reasons why monopoly users cannot be considered the "marginal customers." Bell acknowledges that it has not advocated strict use of marginal cost pricing for its competitive services, and that if its "interstate rates were [all] to be set merely at incremental costs, the resulting total revenues would fall short of meeting overall revenue requirements" (Bell Expt., pp. 52–53). "Strict marginal cost pricing insures that *every unit* consumed yields the purchaser benefits at least as great as the cost of the social recourses needed to produce the unit * * *" (Bell Expt., p. 55) (emphasis added). Implementation of this marginal theory by Bell would have efficiency overtones and would also imply it relies on a "social optimum" [82] objective. However, "*neither* this concept nor pricing at marginal cost are advocated by Bell" (Bell Expt., p. 55) (emphasis added). These incongruities in Bell's logic are important, since they leave serious doubts as to whether Bell's pricing philosophy can be any more economically efficient than other methods of ratemaking. This topic is discussed below.

155. The major assumption made in distinguishing between competitive and monopoly services for pricing purposes under Bell's basic service philosophy is that competitive customers would be lost without special pricing treatment. The result of this customer loss would be idle facilities and the loss of these customer's revenue contributions above incremental costs. However, let us assume, *arguendo*, that idle facilities once used by lost competitive customers would quickly become fully utilized through the growth of monopoly services, given the magnitude of these services and their historical expansion. The "per unit" marginal philosophy cited in reference to Bell's arguments earlier would then apply equally well to marginal units of such services. In such a situation the RD would be correct in its contention that the "arbitrariness inherent in *all* procedures for allocating such [residual] costs [is] both of less consequence and more properly treated in the FDC approach than in the LRIC approach" (RD, par. 150). That is, if the potential loss of a particular service's customers were not an overriding concern, then logically all customers should be treated alike. This logic would apply to the distribution of residual costs, and it is acknowledged that FDC results in a proportionate and more equitable spreading of such costs than marginal costing. Bell does not address this situation.

156. Also of significance is the fact that Bell does not trace its advocation of a marginal costing approach to a "social optimum" objective or to the fulfillment of the Commission's public interest responsibility. Bell's arguments rest on the aforementioned loss of competitive customers with the assumed result being idle facilities. Even if one agrees with

[80] As discussed above, Bell's approach may theoretically be of benefit to monopoly service users. This would occur if competitive service rates exceed marginal costs, and if the less than full cost level of these rates prevented the loss of competitive service customers and their contributions to common costs. Assuming arguendo that these conditions existed, they still would not, of themselves, constitute sufficient support for the Commission's adoption of Bell's basic service philosophy, because of the need to consider all of our objectives and responsibilities.

[81] A notable exception is the Airline parties "Accommodation Theory," discussed above, under which certain shortfalls may purportedly pass directly to Bell stockholders. (See Airlines BSE, pp. 46–52).

[82] "Optimality" or "social optimum" as used in the context of neoclassical economics connotes the existence of the highest levels of social welfare. Bell uses the term "optimum" to characterize the contribution Bell claims to obtain from private line users when it sets rates "in due regard for other ratemaking factors" (Bell Expt., p. 59). Bell considers this contribution to be the "maximum" that it can achieve. This is a subjective judgment since it depends on Bell's estimate of the importance of "ther ratemaking factors." Bell's "optimum" or "maximum" may not correspond to the numerically maximum contribution that can be achieved when rates are set in strict accordance with demand and supply functions.

[83] Forecast data is discussed in Sections X and XIII.

VOL 41 NO 197 OCT 8 1976 UM

Bell's assumption, only in the economic sense might the public interest possibly coincide with that of the Bell System. However, Bell acknowledges that it is not pursuing the optimal conditions of the lofty world of theoretical marginal costing (where LRIC provides a non-arbitrary allocation of *all* costs in the aggregate, and where heretofore unattainable levels of social welfare are reached). One cannot, therefore, ascribe any of the appealing results of theoretical economics to Bell's approach. Moreover, Bell has failed to treat all its customers equally under its pricing philosophy. It has down-played the contributions of the MTS and WATS services to its overall growth and the sustenance of technological advance derived from such services. The "arbitrariness"of FDC that Bell so frequently cites serves to describe its own pricing approaches as well."

157. As noted earlier Bell supports fully distributed costs for certain purposes but not others. This extends to its recommendation that FDC be part of a "sound regulatory framework" for assessing the reasonableness of interstate service rates (Bell BSE, pp. 47–57). Bell is "fully cognizant that the Commission needs appropriate benchmarks upon which to evaluate the reasonableness of the rate levels for the various interstate services" (Bell BSE, p. 47). However, Bell does not support a "rigid, mechanistic formula" which would produce "vast inefficiencies" and "greatly increased cost burdens" for all communications users. Thus, Bell believes FDC should be used as a "point of reference" or "signal" for the purpose of rate adjustments.

158. Bell supports reporting FDC results under both Method 2 (on a separations/relative use basis) and Method 7 (on a historical cost causation basis), so that the "Commission will be able to apply its judgment to the *range* of return levels indicated * * *" (Bell BSE, p. 53) (emphasis added). Bell, as we do, recognizes that ratemaking decisions require "the balancing of a number of factors relating to costs, demand, and other pertinent ratemaking considerations" (Bell BSE, p. 53). Thus, Bell, citing legal rather than economic support, suggests that a "zone of reasonableness" for rates and rate levels can be established which the Commission can employ in making an assessment of lawfulness. "The Commission cannot be wedded to a *single* criterion * * *" (Bell BSE, p. 54) (emphasis added). Bell in its own assessment of costing methodologies, in relation to our stated objectives, recognized the interplay of the legal and economic considerations we noted above. Hence, Bell appears willing to utilize full costing in overall methodological proposals in deference to the legally oriented accountability objective. It is here that both the RD and Bell appear to be on common ground. In passing, we note Bell's use of FDC Method 7 principles in performing its retrospective accountability analysis. An examination of both this analysis and Bell's reasons for support of Methods 2 and 7, in preference to Method 1, is left for the discussion below.

159. The Commission agrees with Bell (Bell BSE, pp. 52–57) that a "zone of reasonableness" can be established for the evaluation of rates and rate levels based on the results of the FDC methods of record and other factors. Indeed, we have relied on this nature of logic in making our findings below in Section XII. Further, we are in substantial agreement with Bell that assessment of the reasonableness of rate levels and relationships should not be wholly tied to a single methodolgy. However, for the reasons stated herein, we hold that FDC methods should be the *standard* of ratemaking, rather than merely a "benchmark" as Bell advocates. A proper FDC method or methods should establish rates which might then be adjusted commensurate with "other relevant ratemaking factors" properly documented and supported. We hold that tariff filings should reflect their overall impact and effects, and should be based on data employed in a consistent manner between services and over time. Bell must exhibit methodological consistency and supply comparable supportive materials for future rate filings of all the various Bell services in accordance with the guidelines established herein. To hold otherwise would be inconsistent with our accountability and equity objectives. We nevertheless recognize that there may be special circumstances which warrant a departure from our full cost standard. This is discussed below in Section XIII.

B. FDC Methods of Record

160. There were seven methods addressed in the record that overtly distribute the full recorded costs of operations. (As noted above, Bell's basic service philosophy is also a method of implicitly distributing full costs). Bell described the basic differences of the seven methods thusly:

> The procedures under Method I followed the basic methodology of the 1964 seven-way cost study, except that in the FDC studies subsequent to the 1964 study the allocations of costs for interexchange circuit plant were not based on an inventory of specific facility assignments to individual services. As agreed in meetings with the Commission Staff, the allocations for such plant (except for video and certain wideband services) were based instead on the embedded cost of types of facilities available for use by the various services, according to the length-of-haul characteristics of the individual services. The general approach of Method 1 corresponded to principles underlying the Separations Manual * * *.
>
> Method 2 involved several modifications of the allocation procedures followed in Method 1 with respect to the treatment of minor investment, certain expense, and miscellaneous revenue items * * *. Revised allocations methods were used for plant under construction, exchange plant costs of WATS access lines, general expenses, general department expenses, traffic engineering expenses, sales expenses, operating rents, and miscellaneous operating revenues. Such revised allocation procedures were also utilized in Methods 3 through 6, and in part for Method 7.
>
> *Methods 3 through 7* were approaches to the allocation of the embedded costs associated with the interexchange circuit plant on the *basis of the historical cost responsibility* of services. The measurement of historical cost responsibility involves determination of the extent to which increases in total embedded costs resulted from the provision of a particular service over the period of years such service was offered. *Methods 3 through 7, in their objective, were significantly different from the concepts underlying Methods 1 and 2*, which *are based on averaging techniques that essentially disregard historical cost causation*, particularly with respect to the incurrence of costs associated with the interexchange circuit plant.
>
> In Method 3 the costs for line haul and carrier terminal facilities were assigned to various non-MTS services on the basis of an estimate of the overall average of added costs for such facilities incurred per added circuit mile over a period from 1964. The approach of Method 5 was similar to Method 3, except that the effect of length-of-haul (mileage band) characteristics was reflected and additional refinements were made by including data on Associated Company (as well as Long Lines) plant. In Method 4 the costs associated with the older types of circuit facilities were allocated on the basis of an analysis of the estimated circuit requirements for the various services that existed at the time the circuit plant was originally constructed. Method 6 was a refinement of Method 4 in that it utilized the capacity costs of coaxial and radio systems as the basis of allocations to the non-MTS services of the costs for these facilities. Method 6 was thus designed to estimate the embedded costs of the additional plant that had been constructed to serve the additional facility requirements imposed as a result of providing these services.
>
> Method 7 represented an approach to the allocation of embedded costs which involved the initial assignment of directly attributable costs among the services and the segregation of certain costs of general applicability in an unassigned category. Initially, those historic costs directly attributable to the individual services were assigned to the respective service categories. The costs not so attributed, as indicated below, constituted the unassigned category. * * * In arriving at the results shown under Method 7 in the 1969 and 1971 FDC studies, this unassigned category of costs was allocated to the service categories according to the investment and expenses that had been directly attributed to the services. The costs in the unassigned category determined under the Method 7 procedures included: (a) the difference in interexchange investment for coaxial and radio facilities between total investment and capacity investment, and the related expenses and taxes; (b) all investment, and related expenses and taxes, for motor vehicles, other work equipment, and furniture; (c) testing expenses associated with commonly used plant; (d) certain commercial (e.g., sales and advertising) expenses; and (e) all general and general department expenses (Bell P.F., pp. 130–133). (Citations omitted.) (Emphasis added.)

161. As discussed above, Methods 1 and 2 follow the general approach corresponding to Separations Manual principles. The underlying allocative basis of these principles can be traced to the "relative" use concept. Like any other basis of allocation, relative use is not free from controversy or distortions in certain instances. However, analyses based on relative use do indicate demand patterns and facility assignments which provide valuable evaluative information. We will review certain objections raised by the parties against Method 1 and the relative use allocative base below as well as the attractiveness of such costing procedures.

[96] See Section X, *infra*.

162. The RD used Method 1 as the basis of the FDC studies it ordered Bell to conduct for all services (RD, pars. 216–219). Bell, as noted previously, is opposed to use of any FDC method for ratemaking purposes, although it does suggest use of certain FDC data as a point of reference for Commission decisions (Bell BSE, pp. 50–53). Bell does not consider FDC Method 1 appropriate, however, even for these purposes. In opposing use of Method 1, Bell objects primarily on the grounds that Method 1's relative use concept results in assignment of older facilities to newer and growing services (e.g., under Method 1, pre-1960's open wire, voice frequency cable, and K carrier facilities are assigned to TELPAK). (Bell P.F., pp. 134–36, Bell BSE, p. 41) Bell also states that Method 1 may be distorted by disproportionate growth factors that may develop between services, and may result in the generation of improper "signals" or incentives for management decision making. Most of these infirmities are described in the context of Bell's suggested historical cost causation basis of allocation and its particular emphasis on Method 7. From this perspective, Bell feels, for example, that Method 1 has little utility for "tracking" cost trends or for use as a "benchmark" of cost responsibility:

> Method 1 results in significantly distorted cost figures because it allocates a disproportionately large segment of the high cost older interexchange facilities to the private line services, although the construction of these facilities clearly antedated the initiation or principal growth of the private line services. (Bell BSE, p. 41) (Citations omitted.)
>
> * * * * *
>
> In an FDC study apportioning all the common costs between MTS and the private line services on the separations methods (under the so-called "relative use" or "relative output" standard), the portions of the overall rate base assigned to MTS would be affected by the relative rates of growth of the two types of services. Thus, there will be changes in the indicated FDC rate of return for MTS, not as a consequence of any change in the conditions of furnishing that service, but rather as a consequence of changes in the supply of other services. Hence if an FDC rate level standard were imposed, the Bell System, in deciding how far to promote the growth of the private line services, would need to take into account the effect of this growth on the assignment of costs to the MTS component of its overall rate base. This could interfere with management decisions on private line rates designed to achieve an optimum contribution to the MTS users and could result in higher, not lower, rates to MTS users. (Bell, P.F., p. 136) (Citations omitted.)

163. Bell noted certain specific characteristics of Method 1's allocative approach which it feels are "clearly infirmities." An example, Method 1's treatment of plant under construction, was referenced during oral argument by Mr. Perlberg:

> Now, you would think that you would construct a new plant to meet the growth requirements of services * * *. [The] television and the audio/radio services experienced negative growth for a considerable period of time.
>
> MTS and WATS are growing substantially. Now, if you are going to look at fully allocated costs, and if you are looking at historical cost causation, you would say, well, MTS and WATS should have the most plant under construction.
>
> You know, why do you construct plant? It is to anticipate your growth requirements, but these are the results under Method 1.
>
> Method 1 winds up irrationally allocating more plant under construction to television and audio/radio than to MTS and WATS.
>
> The Commission in the WATS case said WATS was the most rapidly growing of all the interstate services, and yet under some of the irrational procedures that ignore causation WATS gets the least proportionate amount of plant under construction. (T. 15622)

164. The Network Parties agree with Bell that Method 1 does not appropriately take cost causation responsibility into consideration. Similarly, they agree with the allegation that all FDC studies fail to account for future costs and use of facilities presently in place. Excepting Methods 6 and 7, the Network parties maintain that the FDC methods fail to give recognition to the capacity of plant in place, and in making an allocative determination do not consider what use may have been planned for the facilities in question: These methods therefore may result in present users of one service being charged with costs incurred to meet other services' *future* needs (Network Parties pp. 62–66). Referencing our decision in the *Private Line Cases*, the Networks, like Bell, point out that improper "signals" for management decision making will be generated if management must act in observance of Methods 1–5 procedures:

> If an approach such as Method 6 or 7 were not used, fairness would dictate that the carrier construct only for immediate requirements, an approach that, realistically, would make no sense operationally or from an economic viewpoint. *But the fact that it makes sense to construct for the future does not mean that current users should bear the full annual cost of such construction.* Indeed, this Commission has held that they should not * * *. (Emphasis in original.)

165. Finally, the Networks assert that "several of the [FDC] studies (particularly Methods 1 and 2) fail to measure 'actual' usage * * *" (Network Parties Br., p. 63). However, the Networks feel that Methods 6 and 7 achieve some success in correcting the following "obvious" (from their standpoint) misallocations of cost (Network Parties Br., p. 66):

> Whereas the 1967 FDC Method 1 study shows a high video interexchange investment (based on the so-called "separations" procedure), a special study conducted by AT&T in 1968 shows *actual* video usage to be much less; yet the subsequent FDC Method 1 studies—designed for jurisdictional purposes fail to take account of these special AT&T studies and continue to show the same large video interexchange investment as in 1967;
>
> Similarly, whereas the 1967 FDC Method 1 study shows a large investment in video local channels, the same 1968 AT&T special study of television shows *actual* local channel investment to be much less; yet again, the later FDC Method 1 studies continue to show the same high local channel investment. (Network Parties Br., p. 66) (Emphasis added.)

166. As indicated, Method 7 was the FDC approach that Bell found most compatible with its own ratemaking concepts. Bell, for example, employed certain Method 7 costs in conducting its retrospective accountability analysis. Bell also noted that "whereas the LRIC and burden studies were prospective in their orientation, it was recognized that it would be appropriate to provide historical information that would be of assistance to the Commission in determining how these prospective analyses have in fact worked out" (Bell P.F., p. 108).

167. Bell's retrospective analyses involved "a unifrom, periodic analysis of realized revenues and incurred costs directly attributable to the service categories" (Bell P.F., p. 108). Bell maintained that these directly attributable historical costs "may well include a substantial proportion of common costs, since it is generally agreed that it is possible to assign a large portion of the common costs on an incremental basis" (Bell P.F., p. 109). "The assignment of operating expenses and net investment to the service categories followed procedures for determining directly attributable embedded costs developed in connection with Method 7 * * *" (Bell P.F., p. 111). Bell only included the directly attributable costs developed in Method 7 for its retrospective accountability analysis. The unassigned category of costs was *not allocated* among the services. Bell felt its adapted use of Method 7 determined costs "provided the most sensitive method for *tracking* the revenue-cost relationship applicable to a given service" (Bell P.F., p. 111) (emphasis added).

168. Bell also found Method 7 attractive in making its recommendations for "assessing the reasonableness of the rate levels for the interstate service categories" (Bell BSE, p. 47). Bell suggested that "the Commission might wish to employ historical data using allocative techniques as part of its rate evaluation process * * *. Pending formulation of revised FDC procedures, the FDC methodology to be utilized in reporting to the Commission should consist of Method 2 (as representative of a "separations" approach) and Method 7 (as representative of historical cost causation for each service category)" (Bell BSE, p. 48). Bell, from its own perspective or vantage point, suggests that Method 7 be combined with a separations (relative use) approach for rate evaluation purposes. Bell also appears to believe that revisions to FDC procedures are in order.

169. In supporting Method 7, Bell said that it believed "that the Commission should have before it an FDC Method

V 41 N 197 OCT 8 76 UM

that is based on the principle of historical cost responsibility" (Bell BSE, p. 52). Bell felt that Method 1 could not be used to give evidence of this responsibility:

> We are recommending adoption of Method 7 because of the usefulness of its cost finding procedures for other pertinent ratemaking purposes. Under Method 7 the historic costs directly attributable to the individual services are assigned to those services, and the residue of unattributable costs is then allocated on the basis of the investment and expenses that have been directly attributed. The results obtained under Method 7, before the allocation of the unattributable residue, are useful for determining accountability on a retrospective basis and as one of the standards for the compensativeness of rate levels. Method 1, on the other hand, cannot be used for these purposes. (Bell BSE, pp. 52, 53) (citations omitted).

170. We find that FDC Methods based on historical cost causation are attractive for ratemaking and especially for "tracking" purposes. Where the procedures for determining causation are consistent between the planning (prospective) and evaluative (retrospective) periods, we feel that causational based methods can provide the basis for a program of "continuing surveillance." Based on the evidence before us, however, we find that, at best, Method 7's procedures must be made more consistent with a true historical causation allocative base, must be less susceptible to managerial interpretation and manipulation, and generally must be clarified and delineated to the Commission's satisfaction. These alterations and clarifications should be made in accordance with our discussion of Method 7, below.

171. The causational features of Method 7 appear ostensibly to incorporate some of the attractive characteristics of marginal costing. However, certain infirmities of Method 7 have been illustrated in the record that preclude its immediate use for these purposes. We have noted herein that theoretical LRIC would involve assignment of all expected facilities and costs according to projected service usage of input factors that management foresees on its "planning horizon." In this decision making mode no factors would be unassignable from a causational standpoint, although, functionally speaking, it is true that some plant and other factors would be used in common. (Likewise, on this "horizon," one could speculate that certain additional increments of plant would be needed for additional units of service, but such speculations would be irrelevant to the decision making process.) As we have discussed, this ability of marginal costing to intrinsically allocate common and other costs is attractive from an accountability standpoint. Method 7 shows promise of incorporating this feature of projected analyses into an FDC framework. However, it would appear illogical to characterize any method as having historic causational aspects if such method, in making an initial assignment of plant, did not do so in accord with its expected uses. Method 7 is deficient in this respect.

172. The RD, apparently observing the general logic of historical causation, concluded that Method 7 must involve projections. The RD noted that "since Method 1 is generally based on actual operating results, it does not have the uncertainties associated with forecasts of the near and distant future necessarily required by FDC Methods 3 through 7 and eliminates the questions of possible biases affecting such forecasts" (RD, Appendix C, par. 87) (emphasis added). Bell, however, maintains, in opposition to the conclusions of the RD, that Methods 3 through 7 "make use of actual data from past periods to measure historical cost responsibility, and to that extent are based more on 'actual operating results' than Method 1" (Bell Expt., p. 241). Bell insists that "the recommended decision is wrong. Method 7, they said, involves projections. All of these methods and all of the FDC Methods 1, 2, 6 and 7, they all involve historical costs and an allocation of total historical costs" (T. 15623).

173. If Method 7 does not involve projections of intended uses of facilities (and, perhaps, other features of historic causation such as fixed assignments of plant by service which are made at some point in time for later comparison, review, and possibly updating when compared to actual results), this method is really only masquerading as being based on historical causation. There is evidence in the record that Bell's actual assignment procedure is one of merely looking back from the present time to a past year and then making "Method 7 determinations" of directly attributable plant and costs "after the fact." An approach of this nature is totally unacceptable from the Commission's standpoint since it is violative of our accountability equity, and fair competition objectives. It is not based on current use (which can be immediately substantiated) or on currently projected use (which can be documented for later review). Furthermore, such assignments would, in part, reflect dedications of plant in accord with management's objectives (e.g., the "arbitrary" assignment of the least cost facilities and their associated revenue requirements to competitive services leaving the "residuals" to be covered by MTS customers). These "dedications" could, no doubt, conveniently change to reflect shifting company criteria in complete opposition to the aforementioned objectives and responsibilities of the Commission.

174. Initial questioning of Bell at oral argument regarding Method 7 indicated that this method did not, indeed, hold closely to the logic of historical causation. It was there shown that Method 7's basis of allocation was "current usage" determined by Bell on an "after the fact" basis:

> Mr. PERLBERG. * * * Method 7 says, look, we had certain directly attributed costs. This, in relationship to your question, Commissioner Robinson, we were able to attribute to the various services over 80 percent, 82, 83, and so on.
>
> Commissioner ROBINSON. What is the basis of the direct assignment?
>
> *Is this original causation?* I mean, some plant changes over time, presumably usage changes, some which might have been used predominantly for MTS might be used subsequently for private line services.
>
> Mr. PERLBERG. If it is switching used by private line service, it would be attributable to that private line service, *what you are doing right now.*
>
> Commissioner ROBINSON. Okay, so it is *not historical but it is current usage.* (T. 15623–24) (Emphasis added).

175. Bell also indicated that Method 7 plant assignments, prior to their reexamination by the Commission, do not exhibit the fixed nature that they must for Commission accountability purposes. Bell revealed that Method 7 was similar in certain respects to "relative use" methods which, of course, do not involve fixed plant assignments.

> Commissioner ROBINSON. What I am asking is if the books are changed when a plant is put in and allocated to a particular service, but then its *pattern of use changes,* say, after 10 years—then *are the books changed to reflect* current——
>
> Mr. PERLBERG. If it is *unique* to a particular service *and is used currently by that service, it is assigned to that service* under the directly attributable costs method.
>
> We do treat the circuit plant which is sometimes subject to change on a daily or monthly basis, and that circuit plant is assigned according to the length of [haul] characteristics of the particular service.
>
> That is the *same whether you use Method 1, 2, 6, or 7.* There is no difference in that. *All* these methods, incidentally, are the so-called *relative use methods.* We have the same number of circuit miles in 1, 2, 6, and 7. (T. 15624) (emphasis added)

176. Additional questioning at oral argument confirmed the variability of plant assignment infirmity of Method 7. Management appeared to have unwarranted "assignment flexibility" under Method 7, as it is currently employed, so as to be able to manipulate an individual service's dollar share and assignment of total plant. This could be accomplished, for example, by taking readings of current usage at selected points in time, or by management questioning itself concerning assignments in a certain preconceived fashion:

> Commissioner ROBINSON. It does not follow that if I have a piece of switching gear, and I know that *when I buy that it is basically going to be used, say, 50 percent for one service and 50 percent for another*—it does not automatically follow that that would be directly attributable to those two services on a *50–50 basis.*
>
> Mr. PERLBERG. *You have to ask the other question,* would I buy it in that size if I did not have that other service?
>
> But if you are ordering that piece of equipment specifically for serving two services, and it would be a *different size if you did not have that other service,* then it *would be indirectly attributable costs.*
>
> Commissioner ROBINSON. Then the whole thing would *fall under the common costs?*
>
> Mr. PERLBERG. No.
>
> Comisioner ROBINSON. I say if you cannot make that decision, it is a *meaningless question.* You have a piece of equipment that is designed to handle so much traffic, and let's say you just never asked the question, what kind of equipment you would get if you had only one of the two services.
>
> Mr. PERLBERG. Basically, you are able to attribute that under Method 7 to what we call directly attributable costs.
>
> Commissioner ROBINSON. The *second question,* if that *ratio changes over time,* does *that get adjusted?*
>
> Mr. PERLBERG. *Yes*
>
> Comissioner ROBINSON. It becomes 75/25 percent?
>
> Mr. PERLBERG. These analyses, we are now making them every year * * *. (T. 15626, 15627) (Emphasis added.)

177. Any FDC method or methods used for accountability purposes must also have a clearly defined allocative base in addition to the features mentioned heretofore. Since Bell maintains that "all of these methods 1, 2, 6 and 7 are relative use if you are going to use a broad term," it seems clear that what is meant by "relative use" and other allocative bases must be precisely delineated before surveillance procedures can be initiated. Furthermore, there must be clarification of the evaluative steps that will be involved in surveillance, along with techniques to be used for updating assignments if projected results are found to be grossly out of balance with actual results. Such requirements for exacting specifications of FDC methodology is clearly demanded by our objective of clarification of market rules.

178. We find that the need to update plant assignments and to provide indications of current usage under a program of continuing surveillance appears to require continued carrier submissions of Method 1 results. These Method 1 results will reflect current demand patterns which may be grossly at variance with historical assignments. Of special concern, of course, would be multi-use plant asigned, on a projected basis, to a particular service. Method 1 should, however, be reviewed to determine whether it might employ more appropriate "comparable use units" for the Commission's purposes. Refinements to the method should ameliorate its peculiar infirmities such as those discussed above regarding plant under construction and actual usage of facilities compared to relative usage.

179. For purposes of findings concerning the rate levels and rate relationships at issue before us, we find data submitted under Methods 1 and 7 to be sufficient to provide a "zone of reasonableness" which, when combined with other ratemaking factors, allows us to make a determination of lawfulness. For the reasons discused above, however, we find that Bell's services future rate levels and relationships (and changes thereto) must be supported by Method 7 data. Method 1 data, also will be required. Elaboration of guidelines for revisions of such procedures which will align Methods 7 and 1 with the objectives and responsibilities emanating from the Act is discussed in Section XIII.

XII. THE LAWFULNESS OF BELL'S RATE LEVELS

A. SECTION 201(b)

180. In light of the foregoing, we now decide whether the return levels for Bell's major interstate categories of service at issue herein have been and are just and reasonable within the meaning of section 201(b) of the Communications Act, excepting TELPAK (which is discussed in the context of section 202(a) below) and WATS (which is being refiled on November 8, 1976).

181. The RD concluded that the return levels for Bell's competitive services are unlawful insofar as they are below the level of its minimum overall cost of capital on a FDC Method 1 basis (RD, par. 204). Further, the RD held that MTS rates should be designed so that it yields earnings of no more than the lesser of the maximum currently allowed Bell rate of return, or the overall rate of return actually being realized. Private line rates should be designed to yield no less than the minimum allowable overall rate of return (RD, par. 217). Additionally, the RD concluded that it is unjust and unreasonable to require users of Bell's MTS and WATS services to contribute revenues in excess of the overall allowed return level so that the company may earn its total revenue requirement (RD, par. 183). This, according to the RD, defines cross-subsidization.

182. Bell and several user group parties except to the RD's reliance on FDC Method 1 as the sole basis for determining the justness and reasonableness of the return levels at issue herein. These parties argue that the Commission may properly utilize long-run incremental costs, or a variant thereof, to determine the lawfulness of return levels for Bell's competitive services under section 201(b).

183. We have found above that a strict marginal costing approach to pricing cannot be practically implemented under real-world telecommunications industry conditions. We have also found that Bell's LRIC analysis is neither theoretically acceptable nor commensurate with our statutory mandate to ensure just, reasonable and non-discriminatory rates. We must accordingly conclude that LRIC cannot be used to determine whether the return levels for Bell's major interstate categories of service are just and reasonable within the meaning of section 201(b).

184. The relative characteristics and merits of FDC Methods 1 and 7 were also outlined earlier (see Section XI). It was recognized that although not ideal, these two methods can provide a valuable guide for determining the justness and reasonableness of present and past return levels and relationships at issue herein. The results of analysis of return on investment in accordance with FDC Methods 1 and 7 provide a "zone of reasonableness" which enables us to evaluate the lawfulness of Bell's return levels. Although not necessarily perfect, these methodologies together are sufficient to identify cross-subsidization and provide carrier accountability. We find this approach consistent with long-standing Commission policy which recognizes the central role of costs in determining the lawfulness of rates, but which, where appropriate, also recognizes the role of other non-cost factors.[55] Accordingly, pending application of our guideline methodology employing Method 7 (discussed *infra.* in Section XIII), we will rely on FDC Methods 1 and 7 to delineate the bonds from which we may determine the justness and reasonableness and therefore the lawfulness of Bell's rate levels.[56]

185. Bell's most recent data in the record shows for the twelve-month period ending September 30, 1975 that an 8.5 percent return was earned on its total interstate investment.[57] During the same period the share of investment allocated to MTS earned 8.7 percent on Method 1 and 7.5 percent on Method 7. When compared to Bell's total interstate return on investment, it cannot be said that MTS customers are paying rates that are so excessive that they are patently unjust and unreasonable. On a Method 1 basis the MTS rate level is only slightly in excess of the overall level of return. Under Method 7 the MTS return is a whole percentage point less than the system-wide return. We recognize that in light of the relatively large percentage of revenues MTS generates vis-a-vis the other services, a small excessive MTS return could cross-subsidize competitive services. However, the record herein does not indicate that such cross-subsidization in fact exists. Accordingly, we conclude that based on the latest available figures Bell's MTS return level appears lawful under section 201(b) of the Act.[58]

186. With regard to the lawfulness of MTS rate levels for prior periods, we note that Method 7 studies were not available before 1969. The original Seven-Way Cost Study showed a 10.0 percent return on investment allocated to MTS for the twelve-month period ending August 1964.[59] The overall return on Bell's interstate investment was 7.5 percent. In light of this disparity there is substantial question as to whether the MTS rate level during that period was just and reasonable. However, by 1967 the MTS level of return decreased under Method 1 to 8.0 percent compared to an overall return of 7.5 percent,[60] and, by 1969 when Method 7 results first became available, MTS displayed a range of levels, relative to the system-wide average, comparable to those existing today. In that period MTS earned 8.4 percent under Method 1 and 7.1 percent under Method 7, com-

[55] *See* Private Line Rate Cases, 34 FCC 217 (1963); 34 FCC 244 (1964).

[56] The phrases, "return level," "rate of return," and "return" are used interchangeably with respect to a service category. They refer to the percentage return on investment allocated to the service. *See,* also fn. 1, *supra.*

[57] Bell BSE, Appendix A.

[58] We are, nevertheless, presently considering the exceptions to the Initial Decision of the Administrative Law Judge in Phase II of Docket No. 19129, FCC 76–44 (released August 2, 1976). This proceeding will determine, among other issues, the appropriateness of rate base investment items, allowable expenses and MTS rate structure.

[59] Docket 16258, FCC Staff Exh. 1, p. 4.

[60] Docket 18128, CCB Exh. 11, Attachment A, p. 1.

VOL 41 NO 197 OCT 8 76 UM

pared to a 7.8 percent overall return.[91] Accordingly, we conclude that between 1964 and 1969 MTS return levels appear to have been unreasonably high. However, since 1969, the difference between the MTS return level computed under Method 1 and the system-wide average has further narrowed. Likewise, the MTS level of return under Method 7 has consistently remained below the overall level. Thus, since 1969, at least, MTS has earned a level of return that has been just and reasonable, hence lawful, within the meaning of section 201(b) of the Act. Nevertheless, these results may have been affected by the necessity to offset residuals for services not recovering their full costs.

187. The return levels indicated for WATS present a different picture. For the year ending September 30, 1975, WATS showed an 11.6 percent return on investment allocated to it under Method 1 and 16.1 percent under Method 7.[92] Compared to Bell's 8.5 percent overall level of return, the WATS rate level, nearly double that of the system, is clearly excessive. (This level of return indicates the presence of cross-subsidization: the high level of return on WATS offsets low levels of return on other services which are earning less than full costs.) It also appears that the WATS return level has been unlawfully high during prior periods under investigation herein. For example, the original Seven-Way Cost Study showed a 13.4 percent return on investment allocated to WATS for the year ending August 1964, in contrast to 7.5 percent for the system.[93] In 1967 WATS was earning 11.9 percent compared to the system-wide average of 7.5 percent.[94] For 1969 (when Method 7 results first became available) the WATS return level was 10.4 percent under Method 1 and 18.1 percent under Method 7 compared to a 7.8 percent overall return.[95] Similarly, the 1971 results indicated 9.4 percent and 16.7 percent respectively under Methods 1 and 7 compared to a 7.8 percent overall level of return.[96]

188. Despite the foregoing, we do not require any specific actions be taken respecting WATS' return levels at this time, in view of our recent decision in Docket 19989, 59 FCC 2d 671 (1976). In the *WATS* proceeding we concluded, inter alia, that the existing WATS tariff was illegal insofar as Bell did not attempt to justify its rates on the basis of costs. Indeed, Bell did not provide any cost support for WATS rates. Instead, Bell attempted to show an "alignment" between WATS rates and those of MTS.[97] As a result of the WATS decision, Bell is to file a new tariff together with rate support cost justification by November 8, 1976.[98] Accordingly it does not appear prudent, in the public interest, to require changes in WATS rate levels at this time.[99]

189. With respect to Bell's other services, (excepting TELPAK which is discussed below) we note that for the year ending September 30, 1975, the return levels measured by Method 1 range from —3.5 percent for the Private Line Telegraph Service to 5.5 percent for Private Line Telephone. Likewise Method 7 results range from —0.6 percent, also for Private Line Telegraph, to 7.2 percent for Private Line Telephone.[100] Compared to the overall system level of return, 8.5 percent, we find the present return levels for Bell's Private Line Telegraph, Private Line Telephone, Audio/Radio, Television, and "Other" service classifications to be deficient since the rates for these services do not cover all relevant costs of furnishing service. This is true whether investment and expenses are allocated to each service according to Method 1 or Method 7. It thus appears that the low levels of return on these services are maintained through cross-subsidization. This we hold unlawful in the absence of express statutory authorization or compelling policy considerations. Accordingly, we conclude that the rate levels associated with these services are unjust and unreasonable, and therefore, unlawful, within the meaning of section 201(b) of the Act.

190. Past levels of return for these services have generally been unlawfully low, although in some years the level of return for some services could be considered to have approached the zone of reasonableness. In 1971, for example, Television Program Transmission Service (Video) earned 4.9 percent and 8.3 percent under Methods 1 and 7, respectively; at the time the overall level of return was 7.8 percent.[101] Similarly, Video service, as well as Private Line Telegraph and the "Other" service classification, showed adequate earnings levels in 1967 and 1969.[102] The fact still remains, however, that the remaining competitive services, including Private Line Telephone and Audio, did not earn a reasonable level of return on their allocated investment during these same years. More importantly, none of these competitive services are presently priced to earn levels of return that are just and reasonable and, therefore, not unlawfully low. Accordingly, our solution in this proceeding is designed to achieve return levels for these services whereby the earnings for each competitive service can sustain that service's viability without relying on cross-subsidization.

191. In summary, we find that while the application of present FDC Methods 1 and 7 does not constitute the perfect solution for determining the justness and reasonableness of future return levels, the record supports concurrent use of these methodologies as a valuable guide for ascertaining the lawfulness, within a zone of reasonableness, for present and past rate levels, as discussed above. We emphasize that we find that the existence of levels of return that are unjustly and unreasonably high or too low, indicate a return level relationship which embodies cross-subsidization. In the absence of proper justification we hold this cross-subsidization unlawful within the meaning of section 201(b); it must be eliminated. Moreover, in view of the low levels of return earned on private line services which indicate that they have not been recovering the cost of providing service, we conclude that the loss of these services would not burden MTS. Bell could employ its investment in these services for MTS and earn its authorized return.

B. SECTION 202(A) AND THE LAWFULNESS OF TELPAK

192. It remains to be resolved whether the rate levels for Bell's major interstate categories of service at issue herein are lawful under Section 202(a) of the Act. Consistent with our *Telpak* decision,[103] the RD recognized that competitive necessity may justify what would otherwise be unlawfully discriminatory rates (RD, par. 91). Also, relying on the Telpak Sharing proceeding,[104] the RD stated that the Commission has held, with court approval, that discriminatory pricing based on competitive necessity is permissible only if the carrier meets each of the following criteria:

(1) That those benefiting from the discriminatory pricing have an alternative of satisfying their communications requirements from a substitute source of supply and that they will shift to the substitute source unless the discrimination is maintained;

(2) That the discriminatory rate or preference is just sufficient to retain the business which would otherwise be lost;

(3) That the discrimination benefits the users of the carrier's services who are discriminated against, i.e., charges to other users are lower because of the discriminatory rate than they would be without such rates.

The RD states that although Telpak C and D have been found in compliance

[93] Docket 16258, FCC Staff Exh. 1, p. 4.

[94] Docket 18128, CCB Exh. 11, Attachment A, p. 1.

[95] Docket 18128, CCB Exh. 12, Attachment A, p. 1.

[96] Docket 18128, CCB Exh. 23, p. 5.

[97] The question as to whether Outward WATS and MTS are similar services is also extant and Bell is obligated to justify Outward WATS as a distince service (59 FCC 2d at 683).

[98] In accordance with Docket No. 19989 the WATS tariff revisions were to be filed on 60 days' notice, to be effective on January 7, 1977. In a September 16, 1976 letter Bell states that this effective date would entail the additional cost of reading customer meters mid-month and abnormal billing for a partial month (7 days). It suggests filing the revisions on 84 days' notice, to be effective February 1, 1977, which would facilitate the normal first of the month meter reading and billing cycle. Because the Bell suggestion would avoid unnecessary cost and disruptions in customer billing cycles, we shall permit the filing schedule as proposed by Bell. We reserve the right, of course, upon consideration of the revisions filed, to take action as may be appropriate including suspension or rejection of such revisions.

[99] We note that it is not clear whether WATS rates should be raised or lowered in order to achieve a proper level of return.

[100] Bell BSE, Appendix A.

[101] Docket 18128, CCB Exh. 23, p. 11.

[102] Docket 18128, CCB Exh. 11, Attachment A, p. 1; CCB Exh. 12, Attachment A, p. 1.

with criterion one,[105] it remains to be determined herein whether and to what extent Telpak C and D bulk rates conform to criteria two and three (RD, par. 92).

193. The RD applies the three above criteria to each of Bell's private line services to determine whether competitive necessity justifies the pricing of each such service at an earnings level less than the fully distributed costs, as measured under Method 1, of each service (RD, par. 187–188). Thus the RD determines that none of the private line services, including private line telephone, audio, video, Telpak, and private line telegraph, satisfy the first of the three criteria. The RD holds that neither private microwave facilities nor services provided by other communication carriers constitute a sufficient competitive threat to Bell to justify blanket, nationwide discriminatory pricing for any private line service. Additionally, the RD finds that none of the private line services satisfy the second and third of the above enumerated criteria (RD, pars. 189–203). Accordingly, it is concluded, in general, that as a result of the failure to meet the Telpak Sharing criteria, Bell's pricing of private line services below an earnings level corresponding to Bell's overall minimum cost of capital is in violation of section 202(a) of the Act, as well as Section 201(b) (RD, par. 204).

194. With particular reference to Bell's Telpak bulk offering, the RD states that although the Commission's 1964 holding in the *Telpak* decision found that the Telpak bulk offering satisfied the first of the three above criteria, serious doubt exists as to whether the Commission's *Telpak* decision is correct under current conditions. Reviewing the competitive threat to Bell's Telpak offering posed by private microwave systems, Western Union's private line offerings and those of the specialized carriers, the RD holds that these alternative sources of supply for Bell's Telpak customers are not sufficient to justify the blanket form of discriminatory pricing Bell maintains with respect to nationwide Telpak service (RD, pars. 197–198). Furthermore, the RD finds that rates for Telpak have not been set at a level that is just sufficient for Bell to retain business that would otherwise be lost in the absence of discriminatory pricing. Therefore, criterion two has not been met. Finally, it is stated that Bell has not shown, to the satisfaction of the third criterion, that the price discrimination maintained with respect to Telpak has benefited other users of Bell's services in the form of lower rates (RD, par. 199). As a result of the foregoing, the RD concludes that the rate differentials between Telpak and non-Telpak services constitute an undue discrimination or preference under section 202(a) of the Act. (Additionally, the Telpak tariff, as presently constituted, is found to be unjust and unreasonable within the meaning of section 201(b).) Therefore, the RD concludes that the Telpak tariff is unlawful and must be eliminated (RD, pars. 205–206).

195. Several parties have raised objections concerning the RD's discussion of the three criteria and the proper application of them in this proceeding. In general, these objections can be classified into three categories:

(1) Those concerning the validity of the three above criteria, in particular the second criterion requiring that the discriminatory rate or preference be just sufficient to retain business which would otherwise be lost, and the Commission's and court's approval thereof;[106]

(2) The RD's application of the three criteria to all private line services to determine whether pricing below the Method 1 FDC level can be justified by competitive necessity even though it is argued that only private line telephone and Telpak have been found, in the Telpak decision, to be "like" services within the purview of section 202(a);[107]

(3) Exceptions concerning the RD's findings that none of Bell's private line services, and in particular the Telpak offering, has met any of the three criteria.[108]

We turn now to a discussion of these objections:

(1) THE VALIDITY OF THE COMPETITIVE NECESSITY CRITERIA

196. In our Tentative Decision in the Telpak investigation, we concluded that Telpak and other private line services were like services and that while the need to meet competition from private microwave systems might justify the Telpak C and D classifications, there was insufficient evidence to determine whether the then existing Telpak rates were compensatory, i.e., whether the rates benefited other users of the carrier's services.[109] It is clear that only two standards were expressed in Telpak to justify pricing differentials between like services: (1) An existing need to meet competition and (2) a benefit to other users. These correspond to the first and third criteria enumerated above. In our Final Decision in the Telpak proceeding we confirmed the validity of these two tests and we allowed Bell the opportunity to show that the Telpak rates were compensatory.[110] As explained above, this is now an issue herein.

197. Five years later in the *Telpak* Sharing proceeding, the Recommended Decision of the Chief of the Common Carrier Bureau cited our Telpak decision as supporting a three criteria test which is applied in the RD herein.[111] The requirement that the discriminatory rate be just sufficient to retain business which would otherwise be lost was added to the two criteria expressed in Telpak to justify discriminatory pricing on an other than cost basis. In our Final Decision in Telpak Sharing we approved the three criteria test as being consistent with our holding in the original Telpak investigation, case law, and prior orders in the proceeding.[112] More recently, we applied the three criteria test in our Interim Decision in the "Hi-Lo" proceeding.[113]

198. Several parties except to the RD's conclusion that the three criteria test has met with Commission and court approval. Although we do not necessarily find that such approval is lacking, we hold that the application of the second criteria, requiring a showing that the discriminatory rates are just sufficient to retain business which would otherwise be lost, imposes an all but impossible burden on the carrier, at least under present circumstances. Accordingly, we will not apply this criterion in the present case and will reserve judgment on the applicability of the second criteria to other situations. Nevertheless, we hold that the two standards articulated in the original Telpak case, namely a showing of competitive necessity and of benefit to other users, control the determination of the lawfulness of Telpak rates herein.

(2) THE RD'S APPLICATION OF THE THREE CRITERIA TO ALL PRIVATE LINE SERVICES

199. As indicated, the RD applied the three criteria to all private line services to determine whether there is justification to price below an FDC Method 1 level. We believe, for the reasons discussed below, that these standards should apply only to a service which is found to be "like" another service and which is offered at a price differential purportedly to meet competition. This is consistent with our decision in the original Telpak proceedings.[114] Where charges for services are at issue, section 202(a) proscribes only unjust or unreasonable discriminations, involving substantially similar services. Cf., *Atchison, T. & S.F. Ry. Co.* v. *U.S.*, F. Supp. 359 (1963)

200 Before continuing, we make certain observations. First, we do not wish to imply that only services found to be "like" can be priced to meet competition. Consistent with our decision herein, rates for any private line service can be established that would place the carrier

VOL 41 NO 197 OCT 8 1976 UM

in an appropriate competitive position. We reiterate that it is our objective to provide the carrier with pricing flexibility within a framework of accountability and full and fair competition. In investigating the lawfulness of a rate differential between two or more services, it is only when the services are found to be "like," that the differential must be justified under section 202(a) of the Act. Second,it is not entirely clear, as some parties contend, that Telpak and other private line services have generally encompassed only voice-grade channels. Telpak C and D might be considered to be like other services offered by Bell. *American Trucking Ass'n. v. FCC*, 377 F. 2d 121, 131–132 (1976). In fact, we found in our Tentative Decision in the Telpak case that "• • • various private line services, on the one hand, and the Telpak 'derived channels,' on the other, are like communications services" (emphasis supplied).[115] Finally, we emphasize that our decision herein does not imply that violation of section 202(a) can never occur except with respect to differing charges for like services. Various other arbitrary and unreasonable actions and classifications on the part of carriers which do not necessarily involve rate level discrimination with respect to like services fall within the proscription of section 202(a). See e.g., *Chastain v. AT&T*, 43 FCC 2d 1079 (1973); "Hi-Lo" Decision, 58 FCC 2d 362 (1976).

201. In this proceeding, however, we are concerned with price level differentials between like communications services. We find that the two competitive necessity criteria we have heretofore found pertinent, should be applied only to Bell's Telpak offering to determine violation of section 202(a). Although other private line services face varying degrees of competition and although some or all of these other services can be considered "like" Telpak service, it was in fact Bell's introduction of Telpak which initially gave rise to the discrimination, and it is the continuation of Telpak which perpetuates it. Accordingly, we believe that section 202(a) does not require application of the competitive necessity test to all private line services.[116] We hold that a discrimination is not unjust nor unreasonable if the like service which is priced to meet competition can satisfy the competitive necessity test, or is otherwise justified with relation to the cost of providing service, or on the basis of other policy considerations.

(3) THE RD FINDINGS THAT BELL'S PRIVATE LINE SERVICES DO NOT MEET THE COMPETITIVE NECESSITY CRITERIA

(a) The Need to Meet Competition:

202. We indicated above that to justify a discrimination under section 202(a), the competitive necessity test is to be applied only to Bell's Telpak offering and that this test, under the circumstances herein, consists of two criteria: whether there is a need to meet competition and whether the established rates benefit other users. Our task here is to decide whether the pricing differentials between Telpak and like services are justified by the need to prevent Telpak users from shifting to substitute sources of supply. Additionally, it remains to be determined whether the rate level discrimination between Telpak and like private line services benefits users of Bell's other services.

203. The RD questioned the applicability of our holding in the *Telpak* decision that Bell has met the first competitive necessity criterion in light of the current competitive marketplace. The RD concluded that bulk Telpak service, to the extent it is differentiated from broadband service, lacks sufficient comparability to private microwave service to find private microwave a competitive substitute for Telpak (RD, par. 197). Additionally, the RD stated that specialized carriers do not pose a sufficient competitive threat to Bell to justify nationwide discriminatory Telpak pricing. The RD based its conclusion on the fact that specialized carriers are presently excluded from the Bell-Western Union agreement which enables a customer to obtain nationwide Telpak service from either Bell or Western Union, and obtain a rate as if only one carrier provided all the service. Furthermore, in the opinion of the RD, the specialized carriers cover such a limited geographical area that they cannot be considered a serious threat to nationwide Telpak service (RD, par. 198).

204. We are in substantial agreement with the RD's conclusions. There are significant differences between Telpak and private microwave which precludes a finding that on a nationwide basis private microwave is a viable alternative to Telpak. Private microwave construction requires a substantial capital investment with long-term resource commitment which is not necessary when a customer orders Telpak service. Thus, private microwave service cannot be easily terminated or readily extended like Telpak. Once private microwave facilities are in place, the bulk communications users incur substantial fixed costs, whether the facilities are utilized or not. Finally, although interconnection of private systems with carrier systems has been liberalized, certain restrictions remain on such interconnection. It thus appears that the permanent, more restricted nature of private microwave facilities constitutes an important consideration influencing the viability of Telpak vis-a-vis private microwave, even assuming the latter may be cost competitive over given routes.

205. In our Telpak Sharing decision we found that despite testimony from shared Telpak users as to their intentions to consider private microwave if Telpak sharing provisions were eliminated, the evidence therein suggested that nonsharing factors, such as user control, cost, greater flexibility, and the existence of rights-of-way, possibly played a determinative role in the users choice of whether to employ private microwave. We therefore found that it was not shown that shared private microwave offered a competitive alternative for certain user groups.[117] We find that the instant proceeding presents analogous circumstances. Consequently, we are unable to find that the Telpak offering as presently structured, constitutes a proper response to the extent of competition posed by private microwave. We nevertheless believe that a properly structured bulk rate offering, which would compete with private microwave or other alternatives along the routes where such competition exists and along the quality dimensions that make such other alternatives competitive, is justified. However, it is clear from the record herein, that the nationwide rate differential existing between Telpak and like private line service cannot be supported by alleged cost comparability between Telpak and hypothetical private microwave systems.

206. Further, we question the validity of the cost studies and statements made on the record herein that private microwave is cost effective when compared to Telpak. First, the cost studies are of questionable vintage and necessarily do not account for recent increases in building materials, construction and land costs. Second, we do not find persuasive the self-serving statements of Telpak users that they would abandon Bell if the rates they paid were increased. Despite the alleged cost effectiveness of private microwave and continuing increases in Telpak rates, such a wide scale shift has not occurred. This strengthens our conclusion that noncost factors play a significant role in a customer's decision to leave Bell in favor of constructing their own private microwave systems.

207. Finally, we agree that the specialized carriers do not present a sufficient competitive threat along their few routes to justify nationwide discriminatory pricing on the basis of competitive

[115] 38 FCC 370, 378–379 (1964).

[116] We recognize that apart from the problem of rate differentials for like services, it could be argued that section 202(a) would be violated if Bell used LRIC to price its private line services only and not MTS or WATS. In essence, a class of customers, i.e., of private line service, would receive an advantage denied another class of customers, i.e., the MTS and WATS users. However, in light of our findings herein, with respect to the justnesa and reasonableness of the various costing methodologies, we do not find it necessary to decide whether such advantage would be undue or unreasonable under section 202(a). Additionally, we found herein cross-subsidization existing between WATS and the non-Telpak competitive services. As the RD recognized, in the absence of express Congressional approval such cross-subsidization can constitute undue or unreasonable preference or disadvantage within the meaning of Section 202(a) (RD pars. 176, 186). Inasmuch as we have found the rate levels giving use to such discrimination unlawful under section 201(b), we need not address whether a 202(a) violation is justified by competitive necessity or otherwise.

[117] 23 FCC 2d 606, 618–620.

necessity. While growth in specialized carriers and satellites might justify such a competitive response in the future, this uncertain probability is not sufficient to justify the present Telpak offering. Bell's witness, Charles Miller, stated herein that Telpak rates are designed "to be competitive with future situations." (T. 842.) Such future contingencies are not enough to justify such a broad competitive response whether the alternative to Telpak under consideration is private microwave, specialized carrier or satellite. On appeal of our Telpak Sharing proceeding, the court rejected AT&T's contention that a mere probability of a shift to a substitute source justifies the discriminatory provision. The court held that such a criterion "is far too vague in relation to Section 202(a) of the Act." *"AT&T v. FCC,"* 449 F. 2d 439, 449–450 (2nd Cir. 1971). The court approved the Commission's standard requiring "a showing that those eligible to share Telpak would in fact shift to private microwave if the existing discrimination were not maintained" (emphasis in original) 449 F. 2d at 449. Clearly, the evidence herein cannot support a finding that present Telpak users would in fact shift to private microwave if the existing rate discrimination were not maintained. That such a shift would occur under the facts shown herein is nothing more than conjecture. Even if such a shift were to occur it could never justify the blanket nationwide discrimination inherent in the Telpak rates. Accordingly, we conclude that under current circumstances the Telpak discrimination is not justified by competitive necessity.

208. In sum the rate level differential existing between Telpak and other private line services constitutes an unlawful discrimination between like services under Section 202(a). We do recognize, however, the benefit to industrial, transportation and government users from a bulk communications offering. Accordingly, we are ordering Bell to eliminate its present bulk offering. Bell may file within the eight month period outlined below a new appropriately responsive bulk offering consistent with our guidelines herein, which can be supported on the basis of competitive necessity, costs, of other relevant factors.

(b) COMPENSATIVENESS AND SECTION 201(b)

209. We have found the discrimination existing with respect to Telpak and like private line services unlawful since Telpak as presently constituted is not justified by competitive necessity. Accordingly, we need not decide whether the Telpak rates are compensatory or whether they are lawful within the meaning of Section 201(b) of the Act. We note that Telpak for the twelve months ending September 30, 1975 allegedly earned 8.4 percent under Method 1 and 12.6 percent under Method 7.[118] Compared to the overall company return of 8.5 percent, these earnings appear to be within the zone of reasonableness. However, we question whether Telpak's return level can be substantially higher than that of private line services since Telpak has the same cost characteristics as such services and Telpak rates are lower. We recognize that demand factors might explain this discrepancy insofar as we have found that Telpak attracts customers who may not have substitute sources of supply. For such customers, Telpak is not justified by competitive necessity. Thus, Telpak's earnings level, as contrasted with that of other private line services, may result from an artificial and unwarranted service category structure.

c. PRESCRIPTION

210. In light of the foregoing findings, the remaining issue is whether the Commission should prescribe rate levels for various service classifications pursuant to section 205. For the reasons discussed above we believe it necessary to prescribe guidelines to govern the filing of future tariffs, rather than prescribe specific rate levels. We also require adjustment of rate levels and rate level relationships so as to eliminate the infirmities we have found.

211. Under the RD, Bell is ordered to file new rates designed to achieve return levels for its private line services equal to Bell's minimum overall cost of capital, on investment allocated under fully distributed cost Method 1. Similarly, the RD required Bell to make revisions in its MTS and WATS rates so the earnings level for each of these services would be no more than the maximum overall return permitted by the Commission, under Method 1 (RD, pars. 211, 127).

212. Section 205(a) of the Communications Act gives us authority to prescribe charges, classifications, regulations, and practices of communications common carriers.[119] Any such prescription can only be made after full opportunity for hearing and upon a finding that the action taken is just and reasonable as supported by evidence of record.[120] Several parties, in particular the Airlines and the Network parties, argue that the RD's recommendation of fully distributed cost Method 1 as the appropriate and sole standard for establishing rate levels for Bell's interstate categories of service, is a prescription which violates the above standards and is therefore unlawful. It is claimed that there is insubstantial evidence to make the findings of justness and reasonableness required for a section 205(a) prescription. It is further argued that there has not been a "full opportunity for hearing" on the various FDC methodologies. Thus, the parties state that FDC Method 1 cannot be the basis for determining the lawfulness of future rate levels.

213. Insofar as we are not relying on FDC Method 1, we do not find it necessary to discuss the parties arguments as they apply to the recommended order. However, we believe that the questions they raise are relevant to the validity of the guidelines we adopt.

214. The Network parties rely extensively on *Nader v. FCC*, 520 F. 2d 182 (D.C. Cir. 1975), to show that the adoption of FDC Method 1 for ratemaking purposes would be a prescription under section 205(a) of the Act. Nader was an appeal from our Decision in Phase I of Docket No. 19129 establishing an 8.5 percent overall rate of return for Bell and subsequent orders accepting Bell's rate increases designed to achieve that rate of return.[121] On appeal, MCI argued that such action constituted an unlawful prescription within the meaning of section 205(a).[122] Summarizing, the court held that the Commission's order, limiting prospectively Bell's rate of return to 8.5 percent, was a prescription under section 205.[123] The court concluded that although section 205 does not expressly authorize the Commission to prescribe rates of return, as opposed to individual rates, such authority is encompassed within the broad grant of regulatory power under section 4(i) of the Act, 47 U.S.C. 154(i) (1970).[124]

215. We would agree with the conclusion that our guidelines herein amount to a prescription. However, it is clear that the parties to this proceeding had ample notice that the Commission's prescription of a particular costing methodology was at issue herein. While we have phrased the prescription issue in terms of specific rate levels, there can be no doubt that the same embraces the prescription of a particular costing methodology.[125] It is evident that the parties have held a similar view. Several parties have proposed, during the hearing stage and in exception to the RD, various methodologies to be adopted by the Commission as alternatives to LRIC and FDC Method 1.[126] Furthermore, we read Nader to show that the prescription of our guidelines is valid pursuant to the authority vested in us by sections 4(i) and 205(a) of the Act.[127]

216. Finally, the parties have had a full opportunity to be heard including oral argument, and the action taken is just and reasonable as supported by the record. Our guidelines are predicated on FDC Method 7, modified to accommodate statutory needs and objectives, which we previously indicated emanate from our legislative mandate and prior decisions. As noted, these objectives have been recognized and discussed, in substantial part, by the parties to this proceeding. The parties had ample opportunity in this lengthy record to present their views on these matters. Thus, there is substan-

tial support for the finding that these objectives constitute just and reasonable criteria which may be incorporated into our proposed costing methodology.[120]

217. The relative merits of FDC Method 7 have also been explored extensively herein. For example, several parties support FDC Method 7, or the historical cost allocation procedures embodied therein, as part of alternatives to Bell's LRIC methodology.[121] The Network parties advocated Method 7 as the most rational of the full cost approaches.[122] Even Bell extols the virtues of FDC Method 7 vis-a-vis Method 1.[123] In particular, Bell states:

> Method 7 has a lot of merit because it faces up to the problem of directly attributable costs and unallocable common costs, and it gives you a means of tracking, and that it gives you another test for the compensativeness of rate levels.[122]

The Department of Defense urges us to adopt FDC Method 7 if we decide that a full-cost standard is appropriate.[123] Finally, the concept behind FDC Method 7 is inherent in Bell's "retrospective accountability" analysis.[124] Thus, it is clear that the parties have had adequate opportunity to air their views on historical cost causation and to test the views of others within a hearing framework. Likewise, there is substantial evidence to support our finding that historical causation is a just and reasonable method for allocating costs to the various categories of Bell's interstate services.

218. In conclusion, our guidelines are lawful as a prescription within the meaning of section 205(a) of the Act. The parties have had an opportunity to be heard with respect to the concepts embodied within our guidelines and the record supports our findings that such concepts are just and reasonable.

XIII: Guidelines for a "Proper Methodology"

A. General

219. We have previously discussed the methodologies of record and their appropriateness for determining the lawfulness of rate levels and relationships vis-a-vis applicable objectives and responsibilities. For such determinations, we have concluded that only a methodology designed to cover the full recorded costs of operations constitutes a proper standard. Nevertheless, we have found merit in marginal costing and we will consider such full cost departures under guidelines specified herein. Otherwise, we have found Bell's use of disparate and incongruous ratemaking concepts among its various services to be unlawful under the provisions of sections 201 through 205 of the Act. We have found that Bell's "basic service philosophy" of ratemaking constitutes an unlawful ratemaking concept. As discussed earlier, this or any other philosophy that results in disproportionate cost burdens among services would generally violate our objectives and responsibilities.

220. A corollary to our ruling on the use of disparate ratemaking concepts concerns the breadth of supportive materials required for tariff filings. We hold that revisions to any existing service rate level or rate relationship to other service's rates must be supported by a showing of the overall impact of such revisions. This showing is to include proper estimates of cost function changes and cross-elasticity data, the subsequent rate structure, and the rate base and revenue requirements (and changes in these factors) for each of the various Bell services. Data must herein be presented in a manner consistent with our guidelines concerning such matters as the proper ratemaking methodology and distribution of facilities among services. Recognition of the overall impact of such changes is consistent with our requirements below concerning establishment and updating of an assignment of all facilities, and use of a full recorded costs, historical causation basis of ratemaking.

221. For rates filed subsequent to this proceeding, we find that even with revisions to Methods 1 and 7, and our primary reliance on Method 7 procedures, we will nevertheless require an array of cost, demand and other information to make a determination of lawfulness. We find the Method 7 (employing revised procedures) will adequately mirror cost causation responsibility, while Method 1 (likewise employing revised procedures) will indicate the pattern of current demand and usage. We have also included below provision for the incorporation of prospective data into our evaluative processes. This information, taken together with public interest considerations and the relevant objectives and responsibilities, will encompass the basis of our decision making.

222. In the interest of providing a perspective for the specific guidelines discussed below, we have determined certain appropriate attributes of an overall ratemaking methodology. Heretofore, we have discussed the need for each service to cover its full recorded costs. Additionally, we discussed the attractiveness of determining these costs on historical causation basis (properly updated) in regard to the avoidance of cross-subsidization and for the provision of the foundation of a program of continuing surveillance. Inextricably interwoven with the cross-subsidization, cost allocation, and ratemaking issues, however, is the substantial magnitude of Bell's facilities and facility related costs. Indeed, determination of plant responsibility impacts directly on realization of Commission objectives and responsibilities. It is for this reason that our first guideline provides for the assignment of all existing facilities to Bell's various services. Additionally, we have indicated how new facilities and retirements should be treated in conjunction with the development of an initial assignment of facilities or "datum." It is shown that the datum can be adjusted to reflect evolving demand patterns and other considerations. We find that the development of a datum will allow the fulfillment of such basic considerations as accountability and clarification of market rules.

223. Other guidelines deal with permissible departures from rates determined on a full recorded costs, historical causation basis. We recognize that carrier pricing flexibility may be warranted in situations where less-than-full cost based rates will permit beneficial cost efficiencies and demand adjustments over time. Clearly, the Bell System respondents (if only for competitive services) and other parties support certain full cost departures (the offering of "discount" rates) (Bell, P.F., pp. 27–55), albeit they do not ostensibly consider such discounted rates as being derived from a full recorded costs standard.[125] The RD also considers discount rates to be plausible under certain circumstances, but holds that FDC methods should constitute the basic underlying support of primary (undiscounted) prices (see RD, pars. 162–164). We will thus entertain requests for waivers in connection with particular tariff filings which would permit full cost departures for a "reasonable time certain," provided that the carrier can make a clear and definitive showing of benefits to be realized by the body of Bell service users, and that such departures are consistent with the public interest (e.g., the objectives and responsibilities discussed in Section VIII). We further require that within such a reasonable time certain, the rates charged users benefiting from such discounts will be required to cover all recorded costs, including residuals.

224. Finally, we have delineated below guidelines concerning acceptable forecasting techniques, needed technical revisions to Method 1 and Method 7, and the future use of these methods in our evaluative processes. We have directed the carrier to incorporate our guidelines into its rates and rate relationships through the timely filing of revised tariffs. On balance, the guidelines themselves, our objectives and responsibilities, and the discussion and findings above constitute the scope of our decisional process. This process has deliberately not been defined in an all-encompassing, exacting and mechanical fashion. It is definitive, however, with respect to minimum materials required to support rate levels and departures from datum-based, full costs. Further, carriers may seek a waiver and support same with such additional materials as they consider proper. We recognize the dynamic, evolutionary

nature of telecommunications, and do not wish to foreclose unforeseen developments by constructing overly rigid requirements.

B. Plant Assignments

225. An assignment of existing facilities and plant under construction is consistent with our intended use of a historical causation, FDC methodology as our primary means of determining the justness and reasonableness of rate levels and relationships. In the interest of fair competition, it is also necessary for existing and potential competitors of Bell to be able to estimate Bell's facility costs in order to gauge their own cost effectiveness and market incentives. As long as Bell can construct many plausible facility assignments in response to competition, an individual service's costs will remain essentially "fluid" (i.e., open to management discretion) and unclarified. Under such circumstances, it is likely that the benefits of competition for all users, Bell, and entrant firms will be at least partially unrealized. Most importantly, the Commission itself, of course, cannot hope to achieve its accountability objective under conditions of "fluid facility assignment."

226. Firm facility assignments are also necessary to assure equity among users. A basic outgrowth of this objective is the idea that all customers of the firm should share in both the benefits and detriments that accrue from the firm's established market position. More than the other objectives, however, equity implies proportionate facility assignments. For example, where economies of scale exist, it cannot be determined that one customer group or another is responsible for such economies. It is the entirety of the customers which sustains the necessary level of output yielding increasing returns to scale when such returns, in fact, exist. In fairness, all customers should derive proportional benefits in such a situation. Such a philosophy extends to advantages the firm may offer such as an established and effective research and development program, management expertise, technological innovations, personnel training programs, ownership of strategically located properties, goodwill, an ongoing and positive relationship with the financial community, long standing and advantageous contractual agreements, accumulated knowledge and other such aspects of the firm's operations. Likewise, as we have previously noted, an existing firm's operation may also involve less attractive features. For example, if inertia, outmoded technologies, bureaucratic inefficiencies or ineffective management and poor past investment decisions impair operations, all customers must also share such disadvantages. This concept is especially critical to the assignment of the costs of facilities to the various services. As noted above, the loading of the costs of older (generally less efficient) facilities onto monopoly services through the use of disparate pricing methodologies is unreasonable. In accepting the concept of historical causation, we must assure ourselves that the practices used in the actual cost allocation procedure allow fulfillment of our mandate under the Act to ensure just, reasonable and nondiscriminatory rates.

227. The method to be used for the allocation of facilities costs, to the maximum extent possible, must be one of assigning such facilities on the basis of historical causation to all services. Of course, the carrier must provide evidence of causation for facilities currently in place that goes beyond mere initial usage. Projected usage is important here. This initial assignment will establish shares of directly attributable plant. Common plant will then be assigned to the pertinent services pro rata according to each service's share of the total directly attributed plant. (For the purposes of these guidelines "pertinent services" simply refers to a group of two or more services which may use a particular facility.) This process will constitute a "datum" which will provide the basis for future actions. As explained below, it is contemplated that Bell will undertake a diligent and thorough historical analysis of its interstate plant with the objective of matching facility cost assignments as closely as possible to the uses for which such facilities were placed.[126] As new facilities are completed, those portions which are directly attributable shall be assigned to the respective services. Newly completed common facilities shall be assigned to the pertinent service categories on the basis of the projected circuit use accounted for by each service. We believe that such a procedure most closely parallels the concept of historic cost causation.

228. Retirements of facilities and the removal of their associated costs from the "datum" plant shares shall, as closely as possible, correspond to the assignment of such facilities to the various services. Those facility retirements which cannot be directly associated with individual services shall be handled as common, and retired from all pertinent services based on each service's "datum" share (i.e., the portion of total plant allocated to each service).

229. The Commission recognizes that conditions may change and that modifications in the shares of plant may be necessary. Market demand shifts, restructuring or modification of existing services, the introduction of new services or the elimination of existing services are examples of such changes. We do not seek a system so rigid that the carrier's ability to adapt to such changes is unduly impaired. In line with this objective, reassignments of facilities will be approved upon a proper showing. The Commission itself will periodically compare Method 1—relative use based assignments of plant—to historical causation assignments for evidence of gross imbalances. However, carriers and other parties may submit other evidence, such as actual use, in support of proposed assignment revisions. Thus, in the final analysis, the Commission will determine the validity of plant assignments after each periodic evaluation.[127]

230. In establishing the initial allocation based on cost causation, it is suggested that the carrier consider beginning with the 1964 Seven-Way Cost Study assignments and then work forward to the current time. This would avoid the problem of constructing data series for older vintages of plant which find somewhat limited use in the rendition of services today. The effects of any infirmities that may have existed in that study would be minimized due to the large growth of plant since that time. Concomitantly, it would account for most of the telephone plant in service today, due to the fact that plant in service now is over three times that in service at the time of the Seven-Way Cost Study, and that substantial retirements of pre-1964 plant have occurred in the intervening periods. Further, such an approach would aid in the development of exact procedures for the handling of a discontinued service (such as the sale of TWX). We expect full documentation of the assignment study and rationalization of the selection of the starting point if it is any other than that suggested herein.

231. In general, the Commission views the use of this approach as a dynamic, continuous process. The establishment of the current, updated book cost "datum" described above should facilitate and expedite proceedings before us. The datum's periodic updating will aid in our continuing surveillance and go far toward meeting our objective of accountability. We expect that showings in support of changes of the allocation to be supported by material as required under Sections 1.363 and 61.38 of our Rules. Such showing should include rate effects on the service in quesiton as well as any effects on related service offerings. To the fullest extent possible, the disposition of both fungible and non-fungible plant must be demonstrated, particularly in the case of a discontinued service.

C. Departures From Full Recorded Costs

232. We have recognized that there are instances in which historical data may not form the complete basis for projections of future costs or demand. Indeed, it may be appropriate to depart from rates based on historical costs under exceptional circumstances in order to reach certain operating efficiencies or demand levels at which economies of operations may be realized. When a firm has achieved these more efficient conditions, historical trends might again serve as the basic supportive data for a service's rates. Under our guideline ratemaking methodology, the carrier would submit a historic cost causation based FDC analysis for tariff justification. This analysis would be complemented by relative use FDC information for comparative

[126] Specific facilities are actually to be assigned to specific services, to this extent, paralleling the Seven-Way Cost Study procedures.

[127] The actual period to be employed for reevaluation of plant assignments will be determined by the Chief of the Common Carrier Bureau.

V 41 N 197 OCT 8 76 UM

purposes. Despite the projected elements involved in the causational analysis and the fact that it is to be complemented by current relative use data, we recognize that required supportive materials retain an intrinsic "weighting" caused by embedded facilities. For this reason, we may find it reasonable to grant waivers to afford the carrier the flexibility to alter current rates based on forecasts of demand and costs as embodied in a forward looking, cost causation based analysis. This will be permitted provided that the carrier can make a clear and definitive showing that all shortfalls in meeting revenue requirements based on historical full recorded costs will be made up within a reasonable time certain, and that the departure will benefit the body of Bell's users. This requirement should not prove burdensome if the carrier will, in fact, realize the economies projected. As part of the showing, we expect the carrier to develop techniques which employ our guidelines in a prospective manner, with refined forecasting methodologies.

D. OTHER GUIDELINES

233. The Bell System has employed certain forecast data in developing its LRIC rates for private line services. We have discussed the infirmities of its forecasting techniques and methodology within the context of theoretical marginal costing. Bell, as noted herein, maintains that it makes no use of projected analyses in constructing its historical causation (Method 7) individual service costs. We find that projected uses of plant should be a part of the logic of historical cost causation. Therefore, Bell should incorporate such data into these analyses for our review. However, since we have no evidence in the record concerning proper forecasting techniques, we direct Bell to develop proper techniques in conjunction with the Common Carrier Bureau staff. In any event, we place Bell on notice that although the datum will partially contain prospective cost causation estimates, any variance from such projections will ultimately have to be reconciled, including the recovery of deviations in forecast accuracy.

234. Our primary FDC Methodology for the determination of the justness and reasonableness of rate levels and the rate relationships will be based on the logic of historical cost causation. However, in our FDC Methods discussion above (Section XI), we find that Bell's Method 7 procedures do not faithfully adhere to the principles of historical causation. We therefore, direct the Bureau staff (in consultation with the carriers) to correct such infirmities in Method 7 as we have discussed above. These deal with such problems as Method 7's failure to incorporate projected uses of plant into its allocative process, its incorporation of management "dedications" of common plant to certain services into its plant assignment procedures, and its ability to be manipulated by unwarranted reassignments of previously distributed facilities. Similarly, we direct that Method 1 be revised in accordance with our earlier discussion so that it too can be incorporated into our evaluative processes. Method 1 would be used in conjunction with a Method 7 analysis to indicate the results of a distribution of costs on a relative use basis. In particular, such results might indicate the need for a reassignment of plant to reflect varying growth rates of Bell's services and other demand factors.

235. We direct that the revision of Method 1 and Method 7 procedures be completed in accordance with our findings and conclusions herein, and reported to the Commission within three months from the effective date of this Decision. Furthermore, we require Bell to file rates based on the reconstructed Method 7 analysis (supplemented by revised Method 1 data) for all of its services within eight months of this Decision. Additionally, we will require like analysis to be submitted upon the filing of later tariff revisions in a manner which will disclose the effects of such revisions on the rates of all services. We also require these analyses to be submitted within a year after the completion of major construction programs and at such other times as we deem appropriate.

XIV. EXCEPTIONS TO RECOMMENDED DECISION

236. We have stated herein the bases for our decision and the extent to which we are in agreement or find it necessary to modify or elaborate on the findings and conclusions of the Recommended Decision. To the extent that the exceptions to the RD are in accord with our findings and conclusions herein, they are granted; otherwise they are denied. We shall issue in the near future a supplement to this document in which we shall dispose of each of the individual 1000 or more filed exceptions. In arriving at our decision we have given consideration to the exceptions, briefs in support thereof and argument made thereon. However, because of the large number of exceptions submitted, we deem it important that the exceptions comply with § 1.277(a) of our rules and regulations. In particular, in ruling on individual exceptions we will not hesitate to reject exceptions which contain argumentative matters and lengthy discussions of law, which do not provide reference to the record upon which the exception is based, or which do not otherwise comply with § 1.277(a).

XV CONCLUSIONS

237. Our conclusions herein are pursuant to sections 1, 4, 201–205, 210, 214, and 396 of the Act: The ascertainment of what constitutes the actual cost of providing a category or subcategory of service is essential to the performance of our regulatory functions. More specifically, in order to determine whether rate levels and rate level relationships are just, reasonable or not unduly discriminatory the actual full costs of providing service must be known and certain, irrespective of whether rates are in direct relationship to costs or depart therefrom. In the latter case the ascertainment of actual full costs still provides the relevant standard to aid in the determination of lawfulness of rates. (In the absence of such knowledge the Commission is unable to identify with certainty the presence of interservice cross-subsidization.) The major concern of the Commission in this proceeding as to past, present and future rate levels is to find the most appropriate basis or methodology to measure the costs actually and equitably attributable to providing service.

238. For the past and present rate levels and relationships at issue in this proceeding we employ a zone of reasonableness defined by FDC Methods 1 and 7 [138] to indicate lawfulness. On the record before us we hold these methods aceptable. However, future rate levels and relationships are to be established in accordance with the guidelines established herein as set forth in section XIII, supra. Rates filed in accordance with such guidelines will best fulfill our statutory mandate. Method 7 costs will form the primary basis for justification of all tariff filings, in conjunction with Method 1 data which will provide us with a comparative benchmark of present relative use. Upon a proper showing, as described previously, we will consider waivers to depart from the prescribed methodology.

239. With regard to the carriers' past and present rate levels and rate relationships our conclusions are in accordance with that stated in Section XII.

XVI. ORDER

240. Accordingly, in view of our findings and conclusions herein and pursuant to sections 4, 201–205 and 403 of the Act: *It is ordered*, That revised rate levels for the major categories of interstate service at issue herein shall be filed within eight (8) months from the effective date hereof and in accordance with costing guidelines and methodologies specified in Section XIII, supra.

241. *It is further ordered*, That in accordance with Section XIII hereof, Bell and Western Union shall consult with the staff of the Common Carrier Bureau to revise FDC Methods 1 and 7 procedures and forecasting techniques, the results of same to be reported to the Commission within three (3) months from the effective date hereof;

242. *It is further ordered*, That within eight (8) months from the effective date hereof, Bell shall terminate its existing TELPAK offering, but may file a replacement bulk offering consistent with our findings and guidelines herein.

243. *It is further ordered*, That all extant accounting orders herein are hereby TERMINATED; and

[138] We conclude that the LRIC and marginal costing methodologies of record are inadequate to allow us to perform our statutory functions for the reasons setforth in Sections IX–XI.

244. *It is further ordered*, That these proceedings are terminated.

FEDERAL COMMUNICATIONS COMMISSION,[139]
VINCENT J. MULLINS,
Secretary.

[Report No. 826]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

OCTOBER 4, 1976.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's rules and regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (see 309(c) of the Communications Act), applications filed under Part 68, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by which ever date is earlier (a) The close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. (See § 1.227(b)(3) and 21.30(b) of the Commission's rules.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[139] Additional views of Chairman Richard E. Wiley, dissenting statement of Commissioner Benjamin L. Hooks, and statement of Commissioner Abbott Washburn, concurring in part and dissenting in part, filed as part of the original document.

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

22891-CD-P/ML-76, Edward C. Smith d.b.a. AnsweRite Professional Telephone Service (KQZ713). C.P. to relocate facilities operating on 152.24 MHz to be located at Westminster Towers, 70 W. Lucerne Street, Orlando, Florida.

22892-CD-MP-76, Empire Paging Corporation (KEC933). Modification of C.P. to change antenna system and relocate facilities operating on 454.150 MHz at Loc. No. 3 to be located at Westchester Community College, Valhalla, New York.

22893-CD-P-76, Stockbridge and Sherwood Telephone Company (KWH347) C.P. to change antenna system operating on 152.84 MHz located on State Hwy. No. 55, South of Village Limits, Sherwood, Wisconsin.

22894-CD-P-(2)-76, Charlotte Message Center, Inc. (KIQ513). C.P. to change antenna system and replace transmitter operating on 152.21 MHz and for additional facilities to operate on 454.100 MHz located on US Hwy. No. 17, 1 mile East of Center of city, Punta Gorda, Florida.

22895-CD-P-76, Charlotte Message Center, Inc. (New) C.P. for a new 1-way station to operate on 152.24 MHz to be located on US Hwy. No. 17, 1 mile East of Center of city, Punta Gorda, Florida.

22896-CD-P-76, Telepage, Inc. (KLF605) C.P. to relocate control facilities operating on 158.61 MHz at Loc. No. 2 to be located at 1609-B Broadway, Bellingham, Washington.

22897-CD-P-(14)-76, Hawaiian Telephone Company (KLF527). C. P. to change antenna system and for additional facilities to operate on 152.84 MHz to be located at: Loc. No. 1: Aiea Switching Center, 98-333 Kaamilo St., Aiea, Hawaii; Loc. No. 2: Puuloa Switching Center, Nimitz and Main St., Honolulu, Hawaii; Loc. No. 3: Moanalua Yard, 1021 Kikowaena Place, Honolulu, Hawaii; Loc. No. 4: 1177 Bishop St., Honolulu, Hawaii; Loc. No. 5: Ilikai Bldg., 1777 Ala Moana Blvd., Honolulu, Hawaii; Loc. No. 6: Kaimuki Switching Center, 1103 9th Avenue, Honolulu, Hawaii, Loc. No. 7: Koko Head, 9 miles SE. of Honolulu, Hawaii; Loc. No. 8: Puu Papaa Radio Station, 2.2 miles NW. of Kailua, Puu Papaa, Hawaii; Loc. No. 9: Kahuku Radio Station, 2.3 miles NW. of Kahuku, Hawaii; Loc. No. 10: Waialua Center Office, 66-489A Waialua Beach Rd., Haleiwa, Hawaii; Loc. No. 11: Wahiawa Center Office, 252 Koa St., Wahiawa, Hawaii; Loc. No. 12: Nanakuli Center Office, 89-210 Farrington Hwy., Nanakuli, Hawaii; Loc. No. 13: Makaha 84-1130 Kaulawaha Rd., Makaha, Hawaii; Loc. No. 14: Corner of Makakilo Dr. & Nohohale St., Makakilo, Hawaii.

22898-CD-R-76, Clifton Telephone Company (KLB579). Renewal of license expiring December 10, 1976. Term: December 10, 1976 to July 1, 1978.

22899-CD-P-76, Anserfone of St. Lucie County, Inc. (KIG838). C.P. to change, antenna system operating on 454.100 MHz located at 200 South 7th Street, Fort Pierce, Florida.

22901-CD-P-76, Radiotelephone Company of Indiana, Inc. (KUC846). C.P. to change antenna system and relocate facilities operating on 152.24 MHz to be located at 1 Indiana Square, Indianapolis, Indiana.

22902-CD-TC-76, Fidelity Telephone Company. Consent to Transfer of Control from Katherine K. Davis, Transferor to Katherine K. Davis, et al., Transferees. Station: KDN401, Sullivan, Missouri.

22904-CD-P-76, Beep Communication Systems, Inc. (KEC739). C.P. to change antenna system and relocate facilities operating on 152.12 MHz to be located at 2.5 miles SW. of Coram, New York.

22905-CD-MP-76, Empire Paging Corporation (KGI778). Modification of CP to replace transmitter, change antenna system and relocate facilities operating on 454.275 MHz to be located at 1 Fairchild Avenue, Plainview, New York, Loc. No. 4.

22906-CD-AP-76, Stanger's Telephone Answering Service, Inc. Consent to Assignment of CP from Stangers Telephone Answering Service, Inc., Assignor to Digital Paging Systems of Toledo, Inc., Assignee. Station: KWU348, Toledo, Ohio.

CORRECTIONS

22824-CD-P-(2)-76, Aircall. Correct to add call sign (KIY395). All other particulars to remain as reported on PN No. 825 dated September 27, 1976.

MAJOR AMENDMENT

21845-CD-P-(6)-76, R.C.S., Inc., San Luis Obispo, California (KMD689). Amend repeater frequency 2129.2 MHz to read 2110.8 MHz at Loc. No. 1. Change control frequency 2179.2 MHz to 2160.8 MHz at Loc. No. 2, control frequency 2110.8 MHz to 2129.2 MHz at Loc. No. 3, and control frequency 2160.8 MHz to 2179.2 MHz at Loc. No. 4. All other particulars to remain as reported on PN No. 803 dated April 26, 1976.

APPLICATIONS ACCEPTED FOR FILING

RURAL RADIO SERVICE

60464-CR-P-76, Continental Telephone Company of the West (New). C.P. for a new rural subscriber station to operate on 158.04 MHz to be located at 4 Corners No. 6 Mine, 12 miles West and 1 mile North of Green River, Utah.

60465-CR-P/L-76, The Mountain States Telephone and Telegraph Company (New). C.P. for a new rural subscriber station to operate on 157.77 MHz to be located 48.8 Km (30.3 miles) South of Bitter Creek, Wyoming.

60466-CR-P/L-76, Puerto Rico Communications (New). C.P. and License for new Rural Subscriber Fixed facilities to operate on 459.375, 459.400, 459.425, 459.450, 459.475, 459.500, 459.525, 459.550 MHz at 32 sites as follows:

International and Satellite Radio Applications Accepted for Filing

OCTOBER 4, 1976.

The Applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications if, upon further examination, it is determined they are defective and not in conformance with the Commission's rules, regulations, or its policies. Final action will not be taken on any of these applications earlier than 31 days following the date of this notice. Section 309(d)(1).

INTERSTATE COMMERCE COMMISSION

[Notice No. 165]

ASSIGNMENT OF HEARINGS

OCTOBER 5, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

Correction

MC 111729 (Sub-No. 571), Purolator Courier Corp. now assigned October 18, 1976, at Kansas City, Missouri, instead of Omaha, Nebraska, and will be held in Room 609, Federal Office Building, 911 Walnut Street.

ROBERT L. OSWALD,
Secretary.

[Rule 19; Ex Parte No. 241; 26th Rev. Exemption No. 10]

ATCHISON, TOPEKA AND SANTA FE RAILWAY CO. ET AL.

Exemption Under Mandatory Car Service Rules

It appearing, That the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register,[1] L.C.C.–R.E.R. No. 400 issued by W. J. Trezise, or successive issues thereof, as having

VOL 41 NO 197 OCT 8 1976 UM

mechanical designation "XM", with inside length 44-ft. 6 in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

[Rule 19; Ex Parte No. 241; 26th Rev. Exemption No. 10–A]

MANDATORY CAR SERVICE RULES

Exemption

Upon further consideration of Twenty-sixth Revised Exemption No. 10 issued September 23, 1976.

It is ordered, That, under authority vested in me by Car Service Rule 19, Twenty-sixth Revised Exemption No. 10 to the Mandatory Car Service Rules ordered in Ex Parte No. 241 be, and it is hereby, vacated and set aside.

This amendment shall become effective 12:01 am, October 7, 1976.

[Notice No. 132]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

OCTOBER 4, 1976.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 28088 (Sub-No. 21TA), filed September 27, 1976. Applicant: NORTH & SOUTH LINES, INC., 2710 South Main St., Harrisonburg, Va. 22801. Applicant's representative: John R. Sims, Jr., 915 Pennsylvania Bldg., 425 13th St., N.W., Washington, D.C. 20004. Reeves, District Supervisor, 211 Main, Suite 500, San Francisco, Calif. 94105.

No. MC 140421 (Sub-No. 10TA), filed September 27, 1976. Applicant: ACTION MOTOR EXPRESS, INC., PO Box 29102, 8303 Old Gentilly Road, New Orleans, La. 70189. Applicant's representative: Sandra H. Roberson (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plywood and lumber*, from the plantsite of U.S. Plywood, New Orleans, La., to points in Mississippi *and return loads*, from the plantsite of Delta Pine Plywood Co., at Beaumont, Miss., to points in Louisiana east of the Mississippi River, and points in the commercial zones of New Orleans and Baton Rouge, La., under a continuing contract with U.S. Plywood and Delta Pine Plywood Company, for 180 days. Supporting shippers: U.S. Plywood, PO Box 29447, New Orleans, La. 70189; Delta Pine Plywood Company, Box 247, Beaumont, Miss. 39423. Send protests to: Ray C. Armstrong, Jr., District Supervisor, 701 Loyola Ave., 9038 U.S. Postal Service Bldg., New Orleans, La. 70113.

No. MC 141133 (Sub-No. 1TA), filed September 27, 1976. Applicant: STANLEY A. KNAPPENBERGER, 217 New St., Walnutport, Pa. 18088. Applicant's representative: Marshall Kragen, 805 McLachlen Bank Bldg., 666 Eleventh St., NW., Washington, D.C. 20001. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Scrap metals, scrap iron, scrap steel and crushed automobiles*, between points in Berks, Bradford, Bucks, Carbon, Columbia, Dauphin, Lackawanna, Lehigh, Luzerne, Mifflin, Monroe, Montour, Northampton, Northumberland, Pike, Schuykill, Susquehanna, Wayne, and Wyoming Counties, Pa., on the one hand, and, on the other, Auburn and Long Island City, N.Y., and Burlington, Florence, Jersey City, Phillipsburg, Newark, and Sayreville, N.J., under a continuing contract with Wallace I. Putkowski Co., for 180 days. Supporting shipper: Wallace I. Putkowski Co., RD No. 1, Lehoghton, Pa. 18235. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 142356 (Sub-No. 1TA), filed September 24, 1976. Applicant: J. S. BRYANT TRUCKING COMPANY, INC., Route 3, P.O. Box 214C, Lynchburg, Va. 24504. Applicant's representative: Michael L. Rigsby, 200 West Gract St., Suite 415, Richmond, Va. 23220. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Scrap iron and shredded scrap steel*, between Kernersville, Statesville and Winston-Salem, N.C., on the one hand, and, on the other, Lynchburg, Radford and Roanoke, Va., under a continuing contract with Brenner Iron & Metal Company and L. Gordon Iron & Metal Company, for 180 days. Supporting shippers: Brenner Iron & Metal Company, 3415 Gleen Ave., Winston-Salem, N.C. 27015. L. Gordon Iron & Metal Company, Salisbury Road, Statesville, N.C. 28677. Send protests to: Danny R. Beeler, District Supervisor, Interstate Commerce Commission, Bureau of Operations, P.O. Box 210, Roanoke, Va. 24011.

By the Commission.

FOURTH SECTION APPLICATION FOR RELIEF

OCTOBER 5, 1976.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before October 26, 1976.

FSA No. 43247—*Pipeline Rates—Petroleum Products from and to the Southwest.* Filed by Kaneb Pipe Line Co. (KPL), (No. 3), for interested carriers. Rates on petroleum products, as described in the application, from points in Kansas and Oklahoma, to Milford, Iowa.

Grounds for relief—Carrier competition.

Tariff—Kaneb Pipe Line Co. tariff 1–G, I.C.C. No. 11. Rates are published to become effective on November 1, 1976.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[Rule 19; Ex Parte No. 241; 23d Rev. Exemption No. 12]

ATLANTIC AND WESTERN RAILWAY ET AL.

Exemption Under Mandatory Car Service

It appearing, that the railroads named herein own numerous plain boxcars; that under present conditions there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, that pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.–R.E.R. No. 400, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

[I.C.C. Order No. 176 Under Revised Service Order No. 994]

NORFOLK AND WESTERN RAILWAY CO.

Rerouting and Diversion of Traffic

In the opinion of Lewis R. Teeple, Agent, the Norfolk and Western Railway Co. is unable to transport traffic over its line between Ottumwa and South Ottumwa, Iowa, because of bridge damage.

It is ordered, That: (a) The Norfolk and Western Railway Co., being unable to transport traffic over its line between Ottumwa and South Ottumwa, Iowa, because of bridge damage, that carrier and its connections are hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the division of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 10:00 am, September 23, 1976.

(g) *Expiration date.* This order shall expire at 11:59 pm, October 31, 1976, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the FEDERAL REGISTER.

Issued at Washington, DC, September 23, 1976.

FRIDAY, OCTOBER 8, 1976

PART II:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

GRANTS

Simplification of Procurement Standards

V 41 197 OCT 8 76 UMI

Title 45—Public Welfare

SUBTITLE A—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, GENERAL ADMINISTRATION

PART 74—ADMINISTRATION OF GRANTS

Simplification of Standards for Procurements Under Grants and Other Amendments

The Department of Health, Education, and Welfare (HEW) hereby amends 45 CFR Part 74 as set forth below.

Part 74 of Title 45 of the CFR constitutes HEW's Department-wide grants administration regulation. It was published primarily to implement Office of Management and Budget (OMB) Circular No. A–102, "Uniform Administrative Requirements for Grants-In-Aid to State and Local Governments". Circular No. A–102 has since been replaced, with only minor change, by Federal Management Circular (FMC) 74–7 (34 CFR Part 256). Two other FMC's affecting grants are also implemented by 45 CFR Part 74: FMC's 73–8 and 74–4 (34 CFR Parts 254 and 255).

The general purpose of these amendments is to reflect amendments to FMC 74–7 that have been promulgated since the original issuance of Part 74 on September 19, 1973, at 38 FR 26274.

Summary of principal amendments. The principal effects of these amendments are as follows:

1. Heretofore, certain standards pertaining to a procurement made by a grantee under a grant applied only if the aggregate amount of the procurement exceeded $2,500. The figure is raised to $10,000. This amendment is pursuant to FMC 74–7 Supplement 1, issued on June 20, 1975, at 40 FR 26031.

2. The definition of State and local governments is extended to include Federally recognized Indian tribal governments. This amendment is pursuant to FMC 74–7 Supplement 2, issued on November 3, 1975 at 40 FR 51038.

3. A reduction is made in the number of reasons for which the Department may place restrictions on grantees which will limit public access to the grantee's records or to records of their subgrantees or contractors. This amendment reflects a change from OMB Circular No. A–102 made when that circular was replaced by FMC 74–7.

Applicability. This part, by its own terms, applies to HEW grants to State and local governments. However, pursuant to § 74.4(a)(2) much of this part, including some of the provisions affected by these amendments, has been made applicable, by individual HEW granting agencies, to grants to other types of grantees as well.

Timing. These amendments shall apply to new, continuation, or renewal grants which begin on or after the effective date of the amendments. In addition, the recipient of a currently active grant may, at its option, apply to that grant any or all of the pertinent amendments as of their effective date.

Effective date. As these amendments either conform the regulation to existing Government-wide policy or make minor technical changes only, notice of proposed rulemaking procedures and delay in effective date are unnecessary. These amendments shall therefore become effective on the date of their publication in the FEDERAL REGISTER: *Provided, however,* That with respect to programs administered by the Office of Education and the National Institute of Education, these amendments shall become effective upon adoption or implementation in regulations issued by, respectively, the Commissioner of Education and the Director of the National Institute of Education, with the approval of the Secretary of Health, Education, and Welfare.

Dated: October 1, 1976.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

45 CFR Part 74 is amended as follows:

1. The authority statement following the table of sections is amended by deleting all the words following "5 USC 301."

§ 74.3 [Amended]

2. Section 74.3 is amended as follows:

(a) By inserting the following definition before the definition for "Grant":

The term "Federally recognized Indian tribal government" means the governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any Native village as defined in Section 3 of the Alaska Native Claims Settlement Act, 85 Stat. 688) certified by the Secretary of the Interior as eligible for the special programs and services provided by him through the Bureau of Indian Affairs.

(b) By revising the definition for "Grant" to read as follows:

"Grant" means money, or property provided in lieu of money, paid or furnished by the Federal Government to an eligible recipient under programs that provide financial assistance. The term includes such financial assistance when provided by contract, but does not include any Federal procurements subject to the procurement regulations in 41 CFR, nor does it include technical assistance which provides services instead of money or other assistance in the form of revenue sharing, loans, loan guarantees, interest subsidies, insurance, or direct appropriations. Also, the term does not include a fellowship or other award of a fixed amount of funds which the recipient is not required to account for on an actual cost basis.

(c) By revising the definition for "local government" to read as follows:

The term "local government" means a local unit of government including specifically a county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments, "sponsor or sponsoring local organization" of a watershed project (as defined in 7 CFR 620.2, 40 FR 12472, March 19, 1975), any other regional or interstate government entity, or any agency or instrumentality of a local government exclusive of institutions of higher education and hospitals.

(d) By inserting the following definition after the definition for "State":

The terms "State and local governments" and "State or local government(s)" include Federally recognized Indian tribal governments as well as States and local governments.

(e) By revising the definition of "Subgrant" to read as follows:

"Subgrant" means money, or property provided in lieu of money, paid or furnished by a grantee to an eligible recipient as financial assistance under a grant. The term also includes such financial assistance paid or furnished under a Federal grant by the recipient of such a subgrant, and so on. The term includes financial assistance when provided by contract, but does not include procurements; nor does it include any form of assistance which is excluded from the definition of "grant" in this section.

(f) By revising the definition for "Subgrantee" to read as follows:

"Subgrantee" means the organization or person to which a subgrant is made and which is accountable to the party awarding the subgrant for the use of the funds provided.

3. Section 74.20 is amended by revising the introductory paragraph to read as follows:

§ 74.20 Length of retention period.

HEW will not impose record retention requirements over and above those established by the grantee except that financial records, supporting documents, statistical records, and all other records pertinent to an HEW grant shall be retained for a period of three years. This requirement applies to the pertinent records and documents of grantees, subgrantees, and recipients under grants or subgrants of negotiated contracts (or subcontracts) exceeding $10,000. The requirement is qualified as follows:

* * * * *

4. Section 74.23 is amended by revising Paragraph (b) to read as follows:

§ 74.23 Access to records.

* * * * *

(b) In the case of a subgrant (or negotiated contract or subcontract exceeding $10,000) under a HEW grant, the grantee, HEW, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the subgrantee (or contractor or subcontractor) which the grantee, HEW, the Comptroller General of the United States, or any of their duly authorized representatives determine are pertinent to the specific HEW grant, for the purpose of making audit, examination, and transcripts.

5. Section 74.24 is amended by deleting Paragraph (d) and revising paragraphs (b) and (c) to read as follows:

§ 74.24 Restrictions on public access.

* * * * *

(b) To comply with an executive order or statute which specifically requires the records to be kept secret; or

(c) To protect commercial or financial information obtained from a person or firm on a privileged or confidential basis.

6. Subpart P is revised to read as follows:

Subpart P—Procurement Standards

§ 74.150 Scope of subpart.

(a) This subpart provides standards for use by grantees in establishing procedures for the procurement of supplies, equipment, construction, and other services whose cost is borne in whole or in part as a direct charge by HEW grants. These standards are furnished to insure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal law and Executive Orders. No additional procurement standards will be imposed by HEW upon grantees unless specifically required by Federal law or Executive Orders.

(b) Except where indicated otherwise in § 74.159, the requirements of this subpart are applicable only to procurements, and not to subgrants or other forms of financial assistance provided by grantees to third parties.

§ 74.151 General.

(a) Grantees may use their own procurement policies provided that procurements whose cost is borne in whole or in part as a direct charge by HEW grants adhere to the standards set forth in this subpart.

(b) The standards contained in this subpart do not relieve the grantee of the responsibilities arising under its contracts. The grantee is the responsible authority regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements that are subject to this subpart. This includes but is not limited to: Disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State, or Federal authority as may have proper jurisdiction.

§ 74.152 Code of conduct.

The grantee shall maintain a code or standard of conduct which shall govern the performance of its officers, employees, or agents in awarding and administering procurements that are subject to this subpart. The grantee's officers, employees or agents, shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. To the extent permissible under State or local law, rules or regulations, or if the grantee is not a State or local government to the extent that the grantee determines that it has the legal and practical capacity for enforcement, such standards shall provide for appropriate penalties, sanctions, or other disciplinary actions to be applied for violations of such standards either by the grantee's officers, employees, or agents, or by contractors or their agents.

§ 74.153 Free competition.

All procurement transactions of the grantee regardless of whether negotiated or advertised and without regard to dollar value shall be conducted in a manner so as to provide maximum open and free competition. The grantee should be alert to organizational conflicts of interest or noncompetitive practices among contractors which may restrict or eliminate competition or otherwise restrain trade.

§ 74.154 Procedural requirements.

The grantee shall establish procurement procedures which provide for, as a minimum, the following:

(a) Proposed procurement actions shall be reviewed by appropriate grantee officials to avoid purchasing unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(b) Invitations for bids or requests for proposals shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement, and when so used, the specific features of the named brand which must be met by offerors should be clearly specified.

(c) Positive efforts shall be made by the grantees to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts to be performed under Federal grants.

(d) The type of procuring instruments used (i.e., fixed-price contracts, cost reimbursable contracts, purchase orders, incentive contracts, etc.), shall be appropriate for the particular procurement and for promoting the purposes of the grant project or program involved. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(e) If the grantee is a State or local government, formal advertising, with adequate purchase description, sealed bids, and public openings shall be the required method of procurement unless negotiation pursuant to § 74.155 is necessary to accomplish sound procurement. However, procurements of $10,000 or less need not be so advertised unless otherwise required by State or local law or regulations. When formal advertising is employed by the State or local government:

(1) The awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the State or local government grantee, price and other factors considered. Factors such as discounts, transportation costs, and taxes may be considered in determining the lowest bid.

(2) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the State or local government grantee.

(3) Any or all bids may be rejected when it is in the State or local government grantee's interest to do so, and such rejections are in accordance with applicable State or local law, rules, and regulations.

§74.155 Negotiated procurements by State or local governments.

(a) Procurements may be negotiated by State or local government grantees if it is not practicable or feasible to use formal advertising. Generally, procurements may be negotiated if one or more of the following conditions prevail:

(1) The public exigency will not permit the delay incident to advertising;

(2) The material or service to be procured is available from only one person or firm; all contemplated sole source procurements where the aggregate expenditure is expected to exceed $5,000 shall be referred to the granting agency for prior approval if such approval is required by the granting agency;

(3) The aggregate amount involved does not exceed $10,000;

(4) The contract is for personal or professional services, or for any service to be rendered by a university, college, or other educational institution;

(5) The material or services are to be procured and used outside the limits of the United States and its possessions;

(6) No acceptable bids have been received after formal advertising;

(7) The purchases are for highly perishable materials or medical supplies, for material or services where the prices are established by law, for technical items or equipment requiring standardization and interchangeability of parts with existing equipment, for experimental, developmental or research work, for supplies purchased for authorized resale, or for technical or specialized supplies requiring substantial initial investment for manufacture;

(8) Negotiation is otherwise authorized by applicable Federal, State, or local law, rules or regulations.

(b) Notwithstanding the existence of circumstances justifying negotiation, competition shall be obtained to the maximum extent practicable.

§ 74.156 Contractor responsibility.

Contracts shall be made by grantees only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources, and accessibility to other necessary resources.

V 41 I 197 OCT 8 76 UMI

§ 74.157 Records for negotiated procurements by State or local governments.

The procurement records or files of State or local government grantees for negotiated purchases in amounts in excess of $10,000 shall include the following pertinent information: justification for the use of negotiation in lieu of advertising, contractor selection, and the basis for the cost or price negotiated. Justification for the use of negotiation in lieu of advertising may be provided on a class basis or on an individual contract basis.

§ 74.158 Contract administration system.

A system for contract administration shall be maintained by the grantee to assure contractor compliance with terms, conditions, and specifications of the contract or order, and to assure adequate and timely follow up of all purchases.

§ 74.159 Contract and subgrant provisions.

(a) *General.* The grantee shall include provisions to define a sound and complete agreement in all contracts and subgrants which it awards when the contract or subgrant costs are to be borne as a direct charge in whole or in part by an HEW grant.

(b) *Contracts under HEW grants.* (1) If the grantee is a State or local government, its contracts shall contain contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such remedial actions as appropriate.

(2) All contracts awarded by State or local government grantees in excess of $10,000 shall contain suitable provisions for termination by the grantee including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall set forth the conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(3) In all contracts for construction or facility improvement in excess of $100,000 awarded by grantees or subgrantees, the bonding requirements set forth in Subpart C of this part shall be observed.

(4) All negotiated contracts and subcontracts (except those of $10,000 or less) awarded under grants or subgrants shall include provisions giving access to, and requiring retention of, the contractor's records in accordance with §§ 74.20, 74.21, and 74.23(b).

(5) When required by the HEW grant program enabling legislation, all construction contracts awarded by grantees and subgrantees in excess of $2,000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a–7) as supplemented by Department of Labor regulations (29 CFR Part 5). The grantee shall report all suspected or reported violations to the granting agency.

(6) Where applicable, all construction contracts exceeding $2,000 awarded by grantees and subgrantees, and all other contracts awarded by them which exceed $2,500 and which involve the employment of mechanics and laborers, shall include a provision for compliance with sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as implemented by Department of Labor regulations (29 CFR Part 5).

(c) *Contracts and subgrants under HEW grants.* (1) Provisions for compliance with Executive Order No. 11246, entitled, "Equal Employment Opportunity," as supplemented in Department of Labor regulations (41 CFR Part 60) shall be included in all contracts and subgrants awarded by grantees or subgrantees to which they are applicable.

(2) All contracts and subgrants in excess of $2,000 for construction or repair awarded by grantees or subgrantees shall include a provision for compliance with the Copeland "Anti-Kick Back" Act (18 U.S.C. 874) as implemented in Department of Labor regulations (29 CFR Part 3). The grantee shall report all suspected or reported violations to the granting agency.

(3) All research or development agreements, whether contracts or subgrants, awarded by grantees or subgrantees shall contain a notice to the effect that rights to inventions conceived or first actually reduced to practice in the course of or under the agreement shall be governed by the Department's Patent Regulations (Parts 6 and 8 of this title), implementing terms and conditions of the HEW grant, and any pertinent regulations or other requirements consistent therewith issued by the grantee. The grantee or subgrantee shall assure that the performer of the research or development work either is given all necessary information regarding these matters, or is advised as to the source of such information. This subparagraph shall also apply to nonresearch and nondevelopment awards in fields of science or technology in which there has been little significant experience outside of work funded by the Federal Government.

(4) Contracts and subgrants in excess of $100,000 awarded by grantees or subgrantees shall contain a provision which requires the recipient to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act of 1970 as amended (42 U.S.C. 1857b. et seq.). Suspected violations shall be reported by the grantee in writing to the regional office of the United States Environmental Protection Agency, with a copy to the granting agency

FRIDAY, OCTOBER 8, 1976

PART III:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

PRIVACY ACT OF 1974

Interim Rule and Amendment to Notice of Systems of Records

V 41 1 197 OCT 8 76 UMI

Title 24—Housing and Urban Development

SUBTITLE A—OFFICE OF THE SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R–76–350]

PART 16—IMPLEMENTATION OF THE PRIVACY ACT OF 1974

Interim Rule

Notice is hereby given that the Department of Housing and Urban Development, (hereinafter referred to as the "Department"), is adopting an interim rule amending Part 16 of Subtitle A of Title 24 of the Code of Federal Regulations in order to allow departmental Privacy Officers to deny access to records contained in Privacy Act Records Systems whenever a Privacy Act "specific exemption", provided for at 5 U.S.C. 552a (k), is applicable.

Section 16.6 of the Department's Privacy Act Regulations sets forth the grounds upon which departmental Privacy Officers may deny access to records contained in HUD Privacy Act Records Systems. This section presently allows Privacy Officers to deny access based upon a determination that the record is subject to a "general exemption" described in § 16.14, but fails to provide a basis for denial when a "specific exemption" is applicable under § 16.15.

The public interest dictates that this amendment be made effective immediately, because publication as a proposed rule could require the Department to disclose materials, which if disclosed could seriously interfere with the Department's ability to perform its functions properly. Furthermore, the Department has previously afforded the public an opportunity to comment on its exercise of "specific exemptions" by publishing these as part of the Department's Notice of Systems of Records (40 FR 39738 et seq., 40 FR 47345). The Secretary has, therefore, determined that comment and public procedure prior to adoption of this Amendment is unnecessary and good cause exists for making this Amendment effective October 8, 1976. However, interested persons are encouraged to submit written comments, views or data regarding this Interim Rule promulgated hereby to the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410. Communications should be identified by the above docket number and title. All submissions received on or before Monday, November 8, 1976, will be considered before an adoption of a final rule. A copy of this communication will be available for public inspection during regular business hours at the above address.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the address set forth in the preceding paragraph.

Therefore, Part 16 of Subtitle A of Title 24 of the Code of Federal Regulations is amended, as follows:

Section 16.6(a) (1) is revised to read, as follows:

§ 16.6 Initial denial of access.

(a) *Grounds.* Access by an individual to a record which pertains to that individual will be denied only upon a determination by the Privacy Officer that:

(1) The record is subject to an exemption under § 16.14, § 16.15 or to an exemption determined by another agency noticing the systems of records;

* * * * * * *

(5 U.S.C. 552a, 88 Stat. 1896, P.L. 93–579; Sec. 7(d), Department of HUD Act (42 U.S.C. 3535 (d), P.L. 89–174).)

Effective date. This amendment shall be effective October 8, 1976.

(It is hereby certified that the economic and inflationary impacts of this proposed rule have been carefully evaluated in accordance with OMB Circular A–107.)

JOHN B. RHINELANDER,
Under Secretary of Housing and Urban Development.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N–76–506]

PRIVACY ACT OF 1974

Proposed and Final Amendments of Notice of Systems Records

On August 28, 1975, in accordance with the Privacy Act of 1974, the Department of Housing and Urban Development (hereinafter referred to as "the Department" or "HUD"), published its proposed Notice of Systems of Records (40 FR 39738 et seq.). The notice was adopted on October 8, 1975, at 40 FR 47435.

On April 22, 1976, the Department published at 41 FR 16850 certain Proposed Amendments of its Systems of Records Notices pursuant to the Privacy Act of 1974, Pub. L. 93–579. By correction published at 41 FR 18901 on May 7, 1976, the period in which interested persons were given the opportunity to comment on the Proposed Amendments was extended through May 30, 1976. No comments were received.

The Proposed Amendments which are adopted by the Department herein included: (1) The addition of a General Routine Use applicable to all the Department's Privacy Act Records Systems that makes available to a Member of Congress or staff, acting upon the Member's behalf, Privacy Act records requested at the request of the individual who is the subject of the Record, and (2) the addition of a routine use applicable only to Systems HUD/DEPT–34 (Pay and Leave Records of Employees) for disclosure of information concerning pay, leave, benefits, retirement deductions and other information to the Civil Service Commission to the extent necessary for the Commission to carry out its Government-wide personnel functions. In addition to adopting the above amendments, the Department proposes:

1. Amendment of the Statement of Routine Uses for the systems of records designated HUD/DEPT–34 (Pay and Leave Records of Employees) by adding a routine use for disclosure to State and local taxing authorities concerning compensation to employees for personal services.

Interested persons may submit written data, views, or arguments in regard to this proposed routine use to the Rules Docket Clerk, Office of the Secretary, 10141, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410 on or before Monday, November 8, 1976. All written comments received through said date will be considered by the Department in determining whether publication of this proposed routine use would be in the public interest.

2. Addition of a specific exemption, applicable to System HUD/DEPT–15 (Equal Opportunity Housing Complaints), by adding a specific exemption which will allow the Departemnt to withhold records compiled and maintained for the purpose of enforcing Title VI of the Civil Rights Act of 1964 and Title VIII of the Civil Rights Act of 1968. The premature disclosure to the subject individuals or their representatives of investigatory materials compiled in advance of conciliation contained in this System would interfere with the ability of the Department to perform its functions properly in connection with enforcement of these laws. Interested persons may submit written data, views, or arguments in regard to this proposed specific exemption to the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410 on or before Monday, November 8, 1976. All written comments received through said date will be considered by the Department in determining whether publication of this proposed specific exemption would be in the public interest.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the Office of the Rules Docket Clerk at the address set forth in the preceding paragraph.

Therefore, the Department of Housing and Urban Development adopts and proposes the following changes:

1. The Department adopts the following General Use:

Routine Use—Disclosure Pursuant to Congressional Inquiry. Disclosures may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

2. HUD Privacy Act System of Records HUD/DEPT–34 is amended to read as follows:

HUD/DEPT–34

System name: Pay and Leave Records of Employees.

System location: Department Central Office:

Categories of individuals covered by the system: HUD employees.

Categories of records in the system: Name, Social Security number and employee number, grade, step and salary; organization, retirement or FICA data as applicable; Federal, state and local tax deductions; regular and optional Government life insurance deduction(s), health insurance deduction and plan or code; cash award data; jury duty data; military leave data; pay differentials; union dues deductions; allotments, by type and amount; financial institution code and employee account number; leave status and data of all types (including annual, compensatory, jury duty, maternity, military, retirement disability, sick, transferred, and without pay); time and attendance records, including number of regular, overtime holiday, Sunday and other hours worked; pay period number and ending dates; cost of living allowances; mailing address; co-owner; and/or beneficiary of bonds, marital status and number of dependents; and "Notification of Personnel Action".

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Routine Uses paragraphs in prefatory statement. Other routine uses: transmittal of data to U.S. Treasury to effect issuance of paycheck to employees and distribution, of pay according to employee directions for savings bonds, allotments, financial institutions and other authorized purposes. Annual reporting of W–2 statements to Internal Revenue Service and the individual. To the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry on its Government-wide personnel functions.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage: Manual, machine-readable and magnetic media.

Retrievability: Name of employee; Social Security Number.

Safeguards: Physical, technical, and administrative security is maintained with all storage equipment and/or rooms locked when not in use. Admittance, when open, is restricted to authorized personnel only. All payroll personnel and computer operators and programmers are instructed and cautioned on the confidentiality of the records.

Retention and disposal: Retained on site until after GAO audit, then disposed of, or transferred to Federal Records Storage Center in accordance with fiscal records program approval by GAO, as appropriate, or General Record Schedules of GSA.

System manager(s) and address:

Director, Office of Organization and Management Information, Department of Housing and Urban Development, 451 Seventh Street S.W., Washington, D.C. 20410.

Notification procedure: For inquiry about existence of records, contact the Privacy Officer at the appropriate location, in accordance with procedures in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Officer at the appropriate location. A list of all locations is given in Appendix A.

Record access procedures: The Department's rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Officer at the appropriate location. A list of all locations is given in Appendix A.

Contesting record procedures: The Department's rules for contesting the contents of records and appealing initial denials, by the individual concerned, appear in 24 CFR Part 16. If additional information or assistance is needed, it may be obtained by contacting: (1) in relation to appeals of initial denials, the HUD Departmental Privacy Officer, Office of Organization and Management

V 41 197 OCT 8 76 UMI

Information. Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

Record source categories: Subject individuals, supervisors, timekeepers, official personnel records, and IRS.

3. The Department proposes to amend the routine uses of system HUD/DEPT-34 to read as follows:

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Routine Uses paragraphs in prefatory statement. Other routine uses: transmittal of data to U.S. Treasury to effect issuance of paycheck to employees and distribution, of pay according to employee directions for savings bonds, allotments, financial institutions and other authorized purposes. Annual reporting of W-2 statements to Internal Revenue Services and the individual and taxing authorities of States, the District of Columbia, territories, possessions, and local governments, except Social Security numbers will be reported only to such authorities that have satisfied the requirements set forth in Section 7(a)(2)(B) of the Privacy Act of 1974. To the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry on its Government-wide personnel functions.

4. The Department proposes to amend system HUD/DEPT-15, by adding a specific exemption, to read, as follows:

Systems exempted from certain provisions of the Act: Pursuant to 5 U.S.C. 552a(k)(2), all investigatory material, including conciliation files, in records contained in this System which meet the criteria of these sub-sections is exempted from the notice, access, and contest requirements (under 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f)) of the agency regulations in order for the Department's Fair Housing and Equal Opportunity and legal staffs to perform their functions properly.

* * * * *

(It is hereby certified that the economic and inflationary impacts of this proposed rule have been carefully evaluated in accordance with OMB Circular A-107.)

Issued at Washington, D.C., September 30, 1976.

JOHN B. RHINELANDER,
Under Secretary of Housing and Urban Development.

FRIDAY, OCTOBER 8, 1976

PART IV:

COMMODITY FUTURES TRADING COMMISSION

COMMODITY OPTIONS

Interim Rules and Amendments

V 41 1 97 OCT 8 76 UMI

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

COMMODITY OPTIONS

Interim Rules

The Commodity Futures Trading Commission ("Commission") is considering adopting regulations under the Commodity Exchange Act, as amended ("Act"), 7 U.S.C. 1 et seq., relating to commodity options. The regulations are to be adopted in two stages. The first stage involves adoption of the interim regulations that accompany this notice as a new Part 32 of the Commission's regulations. The interim regulations are to become effective November 22, 1976, and will remain in effect thereafter, except to the extent amended by the second stage of the regulations. However, as indicated below, the Commission encourages comments on the proposed interim regulations in order to determine whether they should be modified prior to their adoption. The Commission anticipates the second stage of regulations will become effective in approximately 90 days.[1]

Under the two-stage procedure, the Commission plans to adopt comprehensive regulations for a limited, rigidly-controlled three-year (or shorter) test program that ultimately will require commodity options to be purchased and sold on or through the facilities of Commission-designated boards of trade in the United States or Commission-recognized foreign commodities exchange systems which satisfy stringent self-regulation requirements. The test program will be designed to determine the nature and extent of the impact of commodity option trading on the underlying futures and cash markets, the economic utility of commodity option trading and the capability of the exchanges to conduct adequate market surveillance and to assure orderly markets. The Commission believes that the test program will enable the Commission to obtain sufficient data on which to base a permanent regulatory program concerning commodity options or, if necessary, to determine to prohibit trading in commodity options in the United States. The details of the test program will be provided at the time that the second stage of the regulations is proposed.

The principal authority of the Commission to regulate commodity option transactions is contained in Section 4c of the Act.[2] Section 4c(a)(B) of the Act prohibits the offer and sale of certain commodity options—generally those relating to agricultural commodities.[3] Under Section 4c(b) of the Act, however, it is unlawful to offer or sell an option involving any other commodity regulated under the Act contrary to such rules and regulations as the Commission may prescribe.[4] Section 4c(b) provides in pertinent part as follows:

> No person shall offer to enter into, enter into, or confirm the execution of, any transaction subject to the provisions of subsection (a) of this section involving any commodity regulated under [the Act], but not specifically set forth in section 2(a) of [the Act] prior to the enactment of the Commodity Futures Trading Commission Act of 1974, which is of the character of, or is commonly known to the trade as, an "option", "privilege", "indemnity", "bid", "offer", "put", "call", "advance guaranty", or "decline guaranty", contrary to any rule, regulation or order of the Commission prohibiting any such transaction or allowing any such transaction under such terms and conditions as the Commission shall prescribe. * * *

Thus, the Commission is empowered under section 4c(b), to determine if and under what circumstances commodity option trading will be permitted. For example, the Commission could (a) prohibit all commodity option trading, (b) permit all commodity option trading "under such terms and conditions as the Commission shall prescribe," or (c) permit some forms of trading, subject to Commission rules and regulations, and prohibit others.

Prior Proposals

On October 22, 1975, the Commission announced that it was considering the adoption of rules to regulate—or perhaps forbid—transactions in commodity options, including the promulgation of a temporary rule pending the adoption of a definitive regulatory program. See 40 FR 49360 (October 22, 1975).[5]

On February 20, 1976, the Commission proposed comprehensive regulations governing off-exchange commodity option transactions, including the so-called "dealer options". See 41 FR 7774 (February 20, 1976). The Commission has determined that, by the time of implementation of its second stage of regulations, only designated boards of trade and recognized foreign commodities exchange systems offering commodity options will be permitted, thereby, in effect, banning dealer options. Thus, the Commission has determined not to adopt the previously proposed regulations.[7]

In its release on the proposed regulations, the Commission invited interested persons to submit comments and to participate in oral hearings which were held in Washington, D.C., on March 8, 1976. The Commission also noted in its release that it was considering delaying the adoption of comprehensive regulations until it had an opportunity to study the recommendations of its Advisory Committee on the Definition and Regulation of Market Instruments. That Advisory Committee was assigned the responsibility, among other things, to submit a report and recommendations to the Commission on appropriate regulations or restrictions concerning commodity options.[8] At the time of its proposal concerning off-exchange commodity option transactions, the Commission stated:

> [A]lthough the proposed regulations relate to transactions which are not entered into on a contract market, the Commission is affirmatively considering permitting commodity option transactions to be traded on or subject to the rules of a contract market which have been approved by the Commission as adequate to effectuate the purposes of the Act. . . . Ultimately the Commission may adopt regulations which restrict commodity option transactions to trading on contract markets.[9]

The Commission, after carefully considering the comments received on its prior proposals, the presentations made at its oral hearing, and the report and recommendations of its Advisory Committee, has determined in large measure to do just that—to implement a test program for commodity option transactions, the effect of which will be to restrict commodity option transactions, other than certain specified "trade option" transactions, to domestic boards of trade or foreign commodities exchange systems designated or recognized by the Commission. As explained in more detail below, the proposed interim regulations have been primarily designed to provide adequate customer protections in the offer and sale of commodity options. However, in order to avoid any undue hardships on affected persons, the implementation of this regulatory program will be phased in gradually so that commodity option transactions lawfully entered into prior to the effective date of the proposed interim regulations will not be affected, and, during the period in which only the interim regulations are in effect, commodity option transactions will be permitted to be entered into in accordance with the terms of the interim regulations. Nevertheless, the Commission wishes to emphasize that, when the second stage of the Commision's regulations becomes effective, it will no longer be permissible to offer or to sell commodity options or to enter into commodity option transactions in the United States except in accordance with those regulations, i.e., only on or through designated domestic boards of trade or recognized foreign commodities exchange systems.

At the outset the Commission wishes to stress certain points concerning the proposed interim regulations and how they will interact with the second stage regulations which the Commission will shortly propose:

1. Section 32.2(b) of the proposed interim regulations provides that commodity option transactions involving commodity futures contracts traded on or subject to the rules of Commission-designated contract markets or involving the prices of such contracts are prohibited except under such terms and conditions as the Commission shall prescribe. The Commission believes that, under the Act, particularly sections 4c (a)(C) and 4h, it is unlawful to trade options involving domestically traded futures contracts or the prices of such contracts otherwise than by or through a member of a contract market and subject to the rules thereof. However, since the Commission has been advised that such commodity option transactions are being offered and entered into in the United States, in order to avoid any question with respect to this issue, the Commission has decided to set forth an express codification of the Commission's view in proposed § 32.2(b). The Commission recognizes that the effect of proposed § 32.2(b) would also be to prohibit commodity option transactions effected even on or subject to the rules of contract markets, since the Commission has not yet prescribed the terms and conditions under which such trading will be permitted. Such terms and conditions will be the subject of the second stage of regulations to be proposed by the Commission. Trading in commodity options involving domestically traded futures contracts on any contract market will not be permitted until there are comprehensive regulations in effect and the contract market has complied with such regulations. Thus, the Commission's proposed interim regulations prohibit all commodity option transactions involving domestically traded futures contracts or prices of such contracts, including those traded on or subject to the rules of a contract market.

2. The interim regulations are designed to regulate those commodity option transactions which are not otherwise prohibited (i.e., not otherwise set forth in proposed § 32.2). At the present time, the Commission is aware that so-called "London options"[10] are being offered in the United States, as well as the so-called "dealer options" on physical commodities. Briefly, the interim regulations will have the following effect on these types of commodity option transactions:

A. Under proposed § 32.3(a), on and after January 17, 1977 (approximately 105 days from the date of publication of this notice), it will be unlawful for any person to accept funds or other property from an option customer as payment of the purchase price of a commodity option unless the person is registered as a futures commission merchant under the Act. Until such time, of course, persons may continue to accept funds or other property without being so registered.

B. Under proposed § 32.3(b), on and after January 17, 1977, it will be unlawful for a person to solicit or accept orders for commodity options or for an individual to be associated with any such person, unless registered as a futures commission merchant or an associated person of such futures commission merchant, respectively, under the Act.

The Commission wishes to emphasize that the Commission fully intends to implement these regulations and that the registration process [See (A) and (B) above] takes time. Therefore, as explained in more detail below, the Commission suggests that affected persons file their registration applications as soon as possible and not defer filing until the effective date of the regulations.

The Commission points out that, upon adoption of proposed § 32.3 (a) and (b), writers of commodity options or other persons assuming financial responsibility for commodity options may offer or sell commodity options in the United States only through registered futures commission merchants and their registered associated persons. In this connection, the Commission wishes to advise affected persons that regulation § 1.19—which prohibits a futures commission merchant from issuing or otherwise assuming financial responsibility for a commodity option transaction—will not be repealed by the proposed interim regulations.[11] Consequently, it will continue to be unlawful for a futures commission merchant to assume financial responsibility, whether by contract or by operation of law, for a commodity option transaction. The Commission will consider the repeal of § 1.19 in connection with the proposed second stage of its regulations. If repealed, futures commission merchants would then be permitted to issue or otherwise assume financial responsibility for commodity option transactions in accordance with the terms of those regulations.

C. Immediately upon the effective date of the interim regulations, under proposed § 32.6 any person which receives funds or property from an option customer as payment of the purchase price for a commodity option must segregate from its assets, and treat as belonging to the option customer, all such funds and property received, including any amounts characterized as sales commissions or similar fees. The funds and property must be segregated (i) in the United States and (ii) until the option expires or, if the customer exercises the option, until the customer's rights under the option have been satisfied. As noted above, on and after January 17, 1977, only registered futures commission merchants may receive funds or property from option customers in connection with a commodity option transaction. Thus, writers and other persons who assume financial responsibility for commodity options may receive such funds and property from an option customer only until January 17, 1977, but must segregate and treat those assets as provided in proposed § 32.6. After January 17,

---

[1] The basic thrust of the Commission's proposals and the time within which they are to be implemented were announced at a public meeting of the Commission held in Washington, D.C. on September 13, 1976.

[2] 7 U.S.C 6c (Supp. IV, 1974). The Commission also has general rule-making authority under section 8a of the Act, 7 U.S.C. 12a (Supp. IV, 1974). The Commission points out also that section 2(a)(1) of the Act, 7 U.S.C. 2 (Supp. IV, 1974), provides that the Commission shall have "exclusive jurisdiction" with respect to "accounts, agreements (including any transaction which is of the character of, or is commonly known to the trade as, an 'option' * * *), and transactions involving contracts of sale of a commodity for future delivery * * *." The interim rules announced today are effectuated pursuant to this authority as well as that contained in sections 4c and 8a of the Act.

[3] 7 U.S.C. 6c(a)(B) (Supp. IV, 1974). So that all regulations concerning commodity options will be in one place, for convience, the Commission has incorporated the prohibition contained in section 4c(a)(B) as § 32.2(a) of the proposed interim regulations. Section 4c(a)(B) expressly forbids option transactions relating to those commodities which were regulated under the Act prior to the enactment of the Commodity Futures Trading Commission Act of 1974 (Pub. L. No. 93-463, October 23, 1974), thereby continuing the Act's prohibition with respect to those commodities. Those previously-regulated commodities were: "* * * wheat, cotton, rice, corn, oats, barley, rye, flaxseed, grain sorghums, mill feeds, butter, eggs, onions, Solanum tuberosum (Irish potatoes), wool, wool tops, fats and oils (including lard, tallow, cottonseed oil, peanut oil, soybean oil, and all other fats and oils), cottonseed meal, cottonseed, peanuts, soybeans, soybean meal, livestock, livestock products, and frozen concentrated orange juice * * *." Section 2(a)(1) of the Act.

[4] Section 4c(b) governs options involving the newly-regulated commodities, namely "all other goods and articles [except onions] * * * and all services, rights and interests in which contracts for future delivery are presently or in the future dealt in * * *." Section 2(a)(1) of the Act.

[5] 7 U.S.C. 6c(b) (Supp. IV, 1974). Section 4c(b) also provides that, if possible, rules were to be adopted within one year after the effective date of the section. However, the Commission advised Congress, in accordance with the provisions of section 4c(b), that it would be unable to meet the one-year time period ending April 21, 1976, within which to have comprehensive commodity option regulations in effect and that additional time would be required to carry out the Congressional mandate contained in section 4c(b). See 41 FR 16685 (April 21, 1976).

[6] Previously, on June 24, 1975, the Commission had adopted a broad antifraud rule applicable to commodity option transactions. See 40 Fed. Reg. 26506 (June 24, 1975). That rule, 17 C.F.R. § 30.01, will be redesignated as § 32.9 of the proposed interim regulations.

[7] Those proposed rules basically would have made it unlawful for any commodity option dealer, as defined in the rules, to offer to enter into, enter into or confirm the execution of any transaction subject to the proposed rules unless the dealer met certain financial requirements and registered with the Commission as a commodity option dealer. Registration as a commodity option dealer would have entailed the filing of detailed information in the form of an application. Both financial data and information about business practices were required. Also, the proposed rules required a dealer, in connection with offers to enter into commodity option transactions, to inform each prospective purchaser that the dealer had filed an application in connection with its registration with the Commission containing information about the dealer, the dealer's business and its financial condition and that copies of such filings were available for public inspection at all offices of the dealer and at the Commission's offices in Washington, D.C.

[8] See 40 FR 32866 (August 5, 1975). The Advisory Committee's report, which was transmitted to the Commission on July 8, 1976, is published as a special supplement numbered 26 to the CCH Commodity Futures Law Reporter (July 15, 1976).

[9] 41 FR 7774 (February 20, 1976).

[10] London commodity exchange options cleared through the International Commodities Clearing House and commodity options written by or through the individual members of the London Metals Exchange.

[11] Because the repeal of § 1.19 would necessitate substantial revisions of regulation § 1.17 (in order to assure the financial responsibility of futures commission merchants), the Commission did not feel that these revisions could be made without additional study and therefore determined not to propose the repeal of § 1.19 as part of the proposed interim regulations. See 17 C.F.R. §§ 1.17 and 1.19.

V41I197 OCT 8 76 UMI

1977, such persons may not receive the funds or property except from a futures commission merchant which accepted them from the option customer and then only after the segregation requirements have been satisfied by the futures commission merchant. The Commission is aware that proposed § 32.6 may, in certain cases, require "double segregation." For example, in the case of the sale of London options, a person receiving the funds from an option customer in the United States as payment for the option may not remit those funds to London in order to obtain or maintain the option position with a London broker. The Commission believes that the proposed segregation requirements are an essential customer protection to be afforded commodity option customers in the United States. The Commission recognizes, however, that its proposed segregation requirements may impose a financial hardship on some affected persons, and as noted in more detail below, requests specific comments on these requirements, particularly alternatives which could provide substantially equivalent customer protections.

D. Upon the effective date of the proposed interim regulations, § 1.17 of the regulations will be amended to provide that a futures commission merchant engaged in commodity option transactions must have an adjusted working capital which at a minimum equals $50,000. As indicated above, the Commission anticipates that when the second stage of its regulations becomes effective, there will be additional, substantial amendments to § 1.17 in order to assure the financial responsibility of futures commission merchants engaged in commodity option transactions.

E. Under proposed § 32.5, upon the effective date of the interim regulations, persons soliciting or accepting orders for commodity option transactions must make summary disclosure to option customers, prior to the entry into the commodity option transaction, of various aspects of the transaction, including information regarding all fees and charges to be paid by the option customer in the transaction, such as premiums, mark-ups on premiums, and sales commissions. The Commission anticipates that the second stage of its regulations regarding commodity options will impose additional, more detailed, disclosure requirements on such persons.

A section-by-section explanation and the text of the Commission's interim regulations are set forth below:

Definitions

Section 32.1 of the proposed rules defines certain terms used in the rules. For convenience, the terms "commodity option transaction" and "commodity option" are each defined in § 32.1(a) to mean any such transaction or agreement in interstate commerce which the Commission is authorized to regulate under sections 2(a)(1) and 4c(b) of the Act.[13] Section 32.1(b) defines "interstate commerce" to have the same meaning as set forth in sections 2(a) and 2(b) of the Act.[14] Section 32.1(c) defines "option customer" as any person who, directly or indirectly, purchases or otherwise acquires for value any interest in a commodity option,[15] but does not include a person required to register as a futures commission merchant in accordance with the proposed rules. Futures commission merchants were excluded from the definition of "option customer" to avoid the implication that futures commission merchants are "option customers" of their principals—who may be option writers—when acting in an agency capacity in commodity option transactions. If the definition of option customer were construed to include futures commission merchants, then in accordance with the provisions of proposed § 32.3(a),[16] a writer of an option, for example, who markets such options through a futures commission merchant, would technically be required to register as a futures commission merchant at the time he received from an option customer—the futures commission merchant—either money, securities or property as payment of the purchase price in connection with the commodity option transaction. As a result of the retention of § 1.19 of the regulations, the Commission does not intend that option writers be required to register as futures commission merchants under the interim regulations. Accordingly, it has excluded futures commission merchants from the definition of option customer.

Proposed § 32.1(d) defines "purchase price" to mean the total actual cost paid or to be paid, directly or indirectly, by an option customer for entering into and maintaining an interest in a commodity option transaction, by whatever name called. Subsumed within the definition of purchase price are the premium, mark-ups on the premium, as well as the costs, fees, and other charges comprising the purchase price. Proposed § 32.1(e) defines "striking price" to mean the price at which an option customer may purchase or sell the commodity or the contract of sale of a commodity for future delivery which is the subject of a commodity option transaction.

Prohibited Transactions

As indicated above, in order to have commodity option requirements self-contained in one set of regulations, proposed § 32.2(a) of the interim regulations incorporates the existing statutory prohibition on the offer or sale of commodity options involving previously regulated commodities. And, as previously explained, proposed § 32.2(b) expressly prohibits the offer or sale of commodity options involving domestically traded futures contracts.

Unlawful Commodity Option Transactions

Proposed § 32.3(a) provides that on and after January 17, 1977, it shall be unlawful for any person to accept any money, securities, or property (or to extend credit in lieu thereof) from an option customer as payment of the purchase price in connection with a commodity option transaction unless such person is registered as a futures commission merchant under the Act.[18] Proposed § 32.3(b) provides that on and after January 17, 1977, it shall be unlawful for any person to solicit or accept orders (other than in a clerical capacity) for the purchase or sale of any commodity option, or to supervise any person or persons so engaged, unless such person is (1) registered as a futures commission merchant under the Act, or (2) if such person is an individual, registered as an associated person of a specified futures commission merchant under the Act. In addition, it shall be unlawful for any futures commission merchant to permit an individual to become or remain associated with such futures commission merchant in specifically enumerated capacities if such futures commission merchant knew or should have known that such individual was not registered as an associated person.

The Commission wishes to stress that the registration requirements apply to all persons who accept orders for commodity options, irrespective of whether the order is accepted directly from an option customer. Thus, if a futures commission merchant utilizes the services of another firm in order to arrange for the execution of the order of an options customer, the other firm is also required to register as a futures commission merchant.

The Commission realizes that the term futures commission merchant in section 2(a)(1) of the Act is not defined to include persons engaged in commodity option activities, and it is not intended to require that persons registering as futures commission merchants in accordance with the provisions of the interim regulations be required to solicit or accept orders for the purchase or sale of any commodity for future delivery on or subject to the rules of a contract market. Rather, the Commission has determined, pursuant to its plenary power to regulate commodity option transactions in sections 2(a)(1) and 4c(b) of the Act, to entrust option activities only to futures commission merchants and associated persons of specified futures commission merchants, inasmuch as these are categories of registrants with which the Commission and the public are already familiar. This will allow the Commission to regulate commodity option activities in a less complicated fashion. For example, the proposed interim regulations would automatically pick up the standards for registration and denial of registration contained in the Act and the Commission's interpretation thereof; they would automatically make applicable the reparation procedures under the Act; and they would allow for the incorporation of financial standards and related requirements in the context of revisions to § 1.17 of the regulations.

The Commission is also mindful of the fact that it proposes to exclude associations, partnerships, corporations, trusts and any other entities from the category of persons who may register as associated persons in order to comply with the provisions of section 32.3(b). The Commission believes that entities engaged in soliciting or accepting orders for the purchase or sale of commodity options should be registered as futures commission merchants, and that the associated person category of registrant in the commodity options area should be limited to individuals employed by such entities, irrespective or whether they may presently be classified as associated persons or agents of futures commission merchants under Section 4k of the Act, 7 U.S.C. 6k (Supp. IV, 1974).

It should be noted that the anticipated effective date of these rules is November 22, 1976. The registration provisions, however, do not go into effect until 60 days thereafter. This is to allow persons sufficient time to submit, and for the Commission to process, applications for registration. Processing of applications normally take approximately 60 days. Therefore, as indicated above, the Commission urges persons wishing to register as futures commission merchants or associated persons to submit their applications promptly. A person who defers filing an application until the effective date of the regulations runs the risk that the application may not be processed on a timely basis; a person who does not file an application until after the effective date increases the risk that the application will not be processed by the time the registration requirements go into effect. The Commission intends to expedite the processing of such applications, and a prompt filing will enable the Commission to do so on a timely basis.

Section 32.3(c) provides that persons required to register as futures commission merchants or as associated persons in accordance with §§ 32.3 (a) and (b), which furnish the services specified in that portion of section 2(a)(1) of the Act defining the term "commodity trading advisor", shall not be included in the term "commodity trading advisor", if, at the time such services are furnished, such person is registered as a futures commission merchant or as an associated person under the Act and the furnishing of such services is solely incidental to the conduct of such person's activities requiring such registration. The Commission has previously expressed the view that generally persons who are offering commodity options to the public should register with the Commission as commodity trading advisors.[17] In CFTC Staff Interpretative Letters Numbered 76–13 and 76–13a,[18] the Commission's Office of General Counsel stated that the Commission's view applied to futures commission merchants. In view of the fact that persons soliciting or accepting orders for commodity options are to be required to register either as futures commission merchants or associated persons under the proposed interim regulations, the Commission has determined that, once such persons are in fact registered, the registration of such persons as commodity trading advisors would serve no additional public interest. Accordingly, while the Commission believes that the staff interpretation is a correct interpretation of existing law, compliance with that interpretation will not be necessary upon the adoption of the interim regulations, and, pending such adoption, the Commission has determined that it will not take any enforcement action against any futures commission merchant, based solely on its failure to register as a commodity trading advisor in compliance with such interpretation from and after the date of the publication of this notice.

Those persons which are already registered as futures commission merchants or associated persons under the Act, and which would be required to register as such by virtue of these proposed rules, need not re-register in those categories, but should immediately notify the Commission in writing, specifying the date such person commenced or intends to commence engaging in activities otherwise requiring registration under these proposed rules. This provision is set forth in proposed § 32.3(d).

Exemptions

The Commission previously indicated that no public interest would be served by regulatory provisions governing commercial commodity option transactions with certain users, producers or consumers, and previously proposed a "trade option" exemption for such persons.[19] The Commission has again considered this issue in light of the comments received on its prior proposal, as well as the recommendations from its Advisory Committee on Market Instruments, and has concluded that there is no substantial public interest to be served by requiring the registration of certain producers, processors, commercial users, or merchants who engage exclusively in commercial-type transactions. The Commission believes that its antifraud rule governing commodity option transactions achieves the full regulatory objective in such cases. Accordingly, except for the provision of its antifraud rule (§ 32.9) and otherwise prohibited transactions (§ 32.2), the Commission has determined to exempt from the operation of these rules the offer of commodity option transactions by a person who has a reasonable basis to believe that the option is being offered to a purchaser referred to in proposed § 32.4(a) and that the purchaser is being offered or acquires such option for purposes related to its business. Of course, to the extent that a person offers or sells commodity option transactions to persons other than, or in addition to such purchasers, compliance with these rules would be required.

The Commission intends to monitor the effect the trade option exemption contained in § 32.4(a) has in the marketplace to ascertain whether it is necessary or appropriate. The Commission wishes to re-emphasize that the exemptive provisions expressly do not exclude any person from the proscriptions in the Commission's general antifraud rule governing commodity option transactions presently in effect, which is to be redesignated as § 32.9 of the proposed rules. The existing antifraud rule applies, and will continue to apply, to all offers and sales of commodity option transactions subject to Commission regulation whether or not these transactions are subject to or exempt from the provisions of any of the Commission's rules affecting commodity options.

Additionally, proposed § 32.4(b) provides that the Commission may, by order, upon written request or upon its own motion, exempt any other person, either unconditionally or on a temporary or other conditional basis, from any provisions of these rules, other than those of §§ 32.2 (prohibited transactions), 32.8 (unlawful transactions) and 32.9 (antifraud rule), if it finds, in its discretion, that it would not be contrary to the public interest to grant such exemption. At the present time, the Commission contemplates no additional exemptions but has inserted this provision in the proposed regulations to permit maximum Commission flexibility. Since the ultimate purpose of the Commission's regulations will be to implement a rigidly controlled option test program, exemptions would be considered only in the most extraordinary of circumstances.

Disclosure

Proposed § 32.5 sets forth the disclosure which a person soliciting a commodity option transaction must provide to an option customer not less than 24 hours prior to the entry into the commodity option transaction. Commodity option customers are required to be provided with a summary disclosure statement setting forth (1) the actual amount of the purchase price and the method by which the premium is established, including a separate listing of the premium, mark-ups on the premium, costs, fees and other charges comprising the purchase price; (2) a statement of (i) the services to be provided for the separate elements comprising the purchase price, (ii) the striking price and the method by which the striking price is established, (iii) the total quantity or quality of the commodity which may be purchased or sold upon exercise of the commodity option or which underlies the contract of sale for future delivery which may be purchased or sold upon exercise

V41197 OCT 8 76 UMI

of the commodity option, and (iv) any and all additional costs which may be incurred by the option customer if the option is exercised, including storage costs, interest charges, commissions (whether denominated as sales commissions or otherwise), and all similar fees and charges; (3) the price level that the underlying commodity or the underlying contract of sale for future delivery must reach during the life of the option for the option customer to realize a profit in the commodity option transaction, together with an explanation of the effect of applicable foreign currency fluctuations; (4) a bold-faced statement on the first page of the disclosure statement setting forth certain, specific cautions regarding commodity option transactions; and (6) a statement of certain risks to be considered by the customer before entering into the commodity option transaction. The Commission wishes to emphasize that this disclosure should be clear, intelligible and understandable to any person reading it. This disclosure statement is required to be furnished to option customers in advance of purchase so as to familiarize them with certain aspects of the option transaction. The Commission is aware that a significant number of commodity option transactions currently are being offered and sold through the use of high-pressure sales tactics to persons who are relatively unfamiliar with the commodities markets generally, and with commodity options in particular. The Commission is also aware that at the present time even when disclosure is made to option customers, it is often inaccurate or misleading, either in content, presentation, or both. Given the interim nature of the proposed rules, the disclosure statement required to be furnished by § 32.5 is by no means intended to convey the impression that the items contained therein are the only things which need be disclosed to prospective customers, and the Commission would encourage persons soliciting prospective option customers to provide them with sufficient information to evaluate the transaction more fully and the futures commission merchant and/or associated person through whom such customers are dealing, as well as their financial conditions. In this connection, as noted above, when the Commission proposes the second stage of its regulations, it expects to require additional, more detailed information to be disclosed to prospective option customers.

The Commission understands that if an option customer purchases an option on a contract of sale of a commodity for future delivery which is traded on a foreign commodity exchange, the solicitor of such option would not always be able to provide the option customer with certain "price" information until the trade is executed. In that event proposed § 32.5 (b) provides that to the extent the actual price information called for by paragraphs (a) (1), (2) and (3) of § 32.5 is not known at the time the disclosure statement is to be delivered to the prospective option customer, a good faith estimate of such information should be provided as part of the disclosure statement, and upon execution of the commodity option transaction for the option customer, the person required to deliver the disclosure statement shall immediately provide all actual price information in writing to the option customer.

Segregation

The Commission has provided in proposed § 32.6 that any person which accepts money, securities or property from an option customer as payment of the purchase price in connection with a commodity option transaction shall segregate such money, securities and property in the United States and shall treat and deal with such assets as belonging to such option customer until expiration of the term of the option or, if the option customer exercises the option, until all rights of the option customer under the commodity option have been fulfilled. The Commission wishes to emphasize that § 32.6 requires that assets must be segregated in the United States, so that such assets will not be subject to the attachment or other laws or requirements of any other nation. The Commission views these requirements as essential to protect at least the basic investment of commodity option customers as well as to assure, to the extent feasible, the financial integrity of option transactions. In the Commission's view, these segregation requirements are a cardinal tenet of commodities regulation, and will help to prevent fraud. Absent segregation, these assets could be used by a person in its general operations. In addition, absent segregation, these assets might be subject to the claims of general creditors of the person accepting them. As noted above, the Commission is aware that the segregation requirements could result in "double segregation," particularly where futures commission merchants or other persons are engaged in the offer and sale of London options. The Commission is further cognizant of the fact that this segregation requirement may impose a financial strain upon the vast percentage of persons presently engaged in the offer and sale of commodity options. Accordingly, the Commission encourages interested persons, particularly those engaged in the offer and sale of London commodity options, to submit comments on the Commission's segregation proposals and to suggest alterations which will provide adequate customer protections. In submitting any alterations, commentators should be aware that, in the Commission's view, what is of paramount importance in its fundamental customer protection aspects. In submitting any alternative proposals, commentators should be aware that, in the Commission's view, what is of paramount importance is that option customers be assured, at the very least, that the assets which they put up to purchase the option will be safe during the term of the option and be available to be refunded to option customers in the event that an option customer exercises the option but is unable to obtain satisfaction of the obligations owing to him because of the insolvency of the futures commission merchant or its principals.

The provisions of § 32.6 are patterned essentially after the requirements for segregation of customer funds in section 4d(2) of the Act and regulation §§ 1.20 (a) (customers' money, securities, and property to be segregated and separately accounted for), 1.25 (investment of customers' funds), 1.26(a) (deposit of obligations purchased with customers' funds), 1.27(a) (record of investments), 1.28 (appraisal of obligations purchased with customers' funds), 1.29 (increment or interest resulting from investment of customers' funds), and 1.32 (segregated accounts; daily computation and records).[28]

The Commission had originally intended to permit futures commission merchants to exclude sales commissions from the assets required to be segregated. Because of the difficulty of defining "premium" and "commissions", this might have permitted unscrupulous persons to characterize the major portion of the purchase price as a "sales commission" and thereby tend to encourage attempts to evade the segregation requirements. The alternative would have been to impose a maximum percentage on the amount of permissible sales commissions, but the Commission believes that it should not engage in this practice. Accordingly, the Commission has decided that it is in the public interest that futures commission merchants segregate all assets received from customers as payment of the purchase price in connection with a commodity option transaction and treat such assets as belonging to option customers. The Commission specifically requests comments on whether it should permit some portion of the purchase price not to be segregated, and if so, how that portion could be determined.

The Commission is further aware that its segregation requirements may have to be modified in its second stage regulations to take into account option trading on boards of trade designated by the Commission and on recognized foreign commodities exchange systems.

Books and Record Keeping

Proposed § 32.7 (a) and (b) require persons receiving the purchase price for a commodity option from an option customer to maintain full, complete and systematic records of all such transactions. Among other things, such persons are required to keep: all orders, signature cards, books of record, journals, ledgers, cancelled checks, copies of all statements of purchase, exercise or lapse, and reports, letters, disclosure statements required by proposed § 32.5, solicitation or advertising material, and all other literature or written advice distributed to option customers or prospective option customers; the true name and address of each commodity option customer or prospective commodity option customer solicited; and the true name and address of each maker, underwriter, issuer or other person who

[28] 17 CFR §§ 1.20(a), 1.25, 1.26(a), 1.27(a), 1.28, 1.29 and 1.32.

assumes or purports to assume any financial responsibility for the fulfillment of any commodity option transaction engaged in by such person. Under proposed § 32.7(c), persons accepting orders from persons other than an option customer (for example, a corresponding futures commission merchant of a futures commission merchant dealing directly with an option customer) must keep similar records to the extent necessary to reflect their participation in the transactions.

In addition, under proposed § 32.7(d) each person which accepts an order for a commodity option, whether from an option customer or any other person, must prepare a written record of that order, including an account identification and order number and must record the date and time the order is accepted, is transmitted for execution, and, if the order is executed, the date and time of execution. And each such person which accepts the purchase price of the commodity option from the option customer must, upon receipt of confirmation that the order was executed, notify the option customer of the date that the order was executed.

Under proposed § 32.7(e), all the records required to be maintained must be kept for the period specified in regulation § 1.31,[29] which is five years, and must be open to inspection at all times during such time by any authorized representative of the Commission of the United States Department of Justice.

The Commission believes that the records and bookkeeping requirements are important so as to enable the Commission to examine the records of all aspects of commodity option transactions offered and sold to option customers, and to assure that persons maintain proper internal control of their financial operations.

Unlawful Representations

Proposed § 32.8 makes it unlawful for any futures commission merchant or associated person engaging in commodity option transactions to claim that the Commission, by declaring a registration effective or otherwise, has approved either the registrant or any commodity option transaction to be engaged in by the registrant. While the Commission will seek to prevent the dissemination of false or misleading information by registrants, it cannot conduct an investigation in every instance to determine the accuracy or adequacy of the information contained in an application for registration or in the disclosure statement required by proposed § 32.5 of the interim regulations. Consequently, registration with the Commission cannot, and does not, indicate Commission approval of the registrant or of the transactions in which it may engage. This rule does not preclude a futures commission merchant or associated person from stating that it is registered, if that is true, and if such statement is not misleading under the circumstances in which the statement is made.

[29] 17 CFR 1.31.

Antifraud

Proposed § 32.9, the Commission's antifraud rule governing commodity option transactions, has been included as a part of the proposed interim rules so that all the rules affecting commodity option transactions will be in one place in the Code of Federal Regulations. This section is the same rule that is presently in effect, contained in 17 CFR 30.01, modified to incorporate certain of the definitions set forth in the proposed interim rules. The proposed redesignation of § 30.1 as § 32.9 is technical only; it will have no substantive effect on fraudulent activity prior to, on, or after the effective date of § 32.9.[30]

The Commission wishes to advise affected persons that, upon adoption of the proposed interim regulations, it would view any attempt to evade their requirements—such as an attempt to avoid the segregation requirements by soliciting options customers in this country and suggesting to the customers that they deal directly with a foreign affiliate of the registrant or other person located outside the United States—as a violation of the antifraud provision.

Option Transactions Entered Into Prior to the Effective Date of the Proposed Interim Regulations

Proposed § 32.10 makes clear that the proposed rules are to have prospective effect only and do not apply to commodity option transactions lawfully entered into prior to the effective date of the rules. However, to the extent stated above, §§ 32.2 and 32.9 are codifications of the prohibitions of existing law, so that nothing contained in § 32.10 should be construed to imply that the transactions referred to in § 32.2 or 32.9 could have been or may be lawfully entered into prior to the effective date of the interim regulations.

Amendments to § 1.17

The Commission proposes to amend § 1.17 to require that any futures commission merchant engaging in commodity option transactions referred to in Part 32 of the proposed regulations would be required to have and to maintain at all times adjusted working capital equal to or in excess of whichever of the following is greater: (1) $50,000 or (2) the sum of the safety factors described in § 1.17 with respect to both proprietary and customers' accounts plus five percent of the applicant's aggregate indebtedness. A futures commission merchant who is exempt from the financial requirements of § 1.17(a) would also be required to maintain minimum adjusted working capital of at least $50,000, computed in accordance with the bylaws, rules, regulations or resolutions of the contract market which serve as the basis for such exemption.

The Commission believes that the $50,000 adjusted working capital requirement for futures commission merchants engaged in options activity is necessary to provide a cushion against losses which could arise as a result of any number of factors, such as dishonesty, incompetence, insufficient or inadequate segregation.

The Commission also proposes to amend § 1.17 to add a new paragraph (c)(9) defining the term "customer" to include an "option customer" as defined in the proposed rules. This is necessary to make § 1.17 applicable to commodity option transactions.

* * * * * *

In consideration of the foregoing, the Commission, pursuant to its authority contained in sections 2(a)(1), 4c(a), 4c(b) and 8a of the Act, 7 U.S.C. 2, 6c(a), 6c(b) and 12a (Supp. IV, 1974), hereby proposes to amend Chapter 1 of Title 17 of the Code of Federal Regulations effective November 22, 1976, by amending §§ 1.3(p) and 1.17, by deleting § 30.01 and by adding a new Part 32 as follows:[31]

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. Section 1.3(p) is amended by adding a "(1)" after the word "means" and before the word "individuals", by deleting the period and adding the word "and" after the word "therefrom" and by adding the following:

§ 1.3 Definitions

* * * * *

(p) * * *

(2) shall include any person required to register as a futures commission merchant under the Act by virtue of Part 32 of this chapter.

2. Section 1.17 is amended to revise paragraphs (a) and (b) and to add paragraph (c)(9) as follows:

§ 1.17 **Minimum financial requirements.**

(a) Except as provided in paragraphs (b)(1) and (b)(2) of this section, no person applying for registration as a futures commission merchant shall be so registered unless he has adjusted working

[30] Judicial interpretations of § 31.01 would, of course, continue to be applicable to new section 32.9. See *CFTC* v. *J. S. Love & Associates Options, Ltd.*, CCH Com. Fut. L. Rep. ¶20,198 (S.D.N.Y. Aug. 12, 1976).

[31] In proposing the regulations hereinafter set forth, the Commission has, in accordance with section 15 of the Act, 7 U.S.C. 19 (Supp. IV, 1974) taken into consideration the public interest to be protected by the antitrust laws. While it recognizes that the financial, segregation and other criteria imposed as prerequisites to allowing a person to enter into or continue in the commodity options business, may result in some lessening of competition, the Commission believes that the proposed rules are a necessary minimum for effectuating the purposes and policies of the Act which require that the Commission assure the financial solvency of option transactions and prevent fraud or manipulation. The Commission has determined that minimum financial and other requirements are essential to public protection under the Act. Accordingly, the Commission believes that, in imposing the minimum financial requirements and the other requirements of the proposed regulations, it has taken the least anticompetitive means of achieving the objectives, policies and purposes of the Act.

V41I197 OCT 8 76 UMI

capital equal to or in excess of whichever of the following is greater: (1) $10,000 or (2) the sum of the safety factors hereinafter prescribed in this section with respect to both proprietary accounts and customers' accounts plus 5 percent of the applicant's aggregate indebtedness; and each person registered as a futures commission merchant shall at all times continue to meet such financial requirements.

(b)(1) Except as provided in paragraph (b)(2) of this section, no person registered as a futures commission merchant shall engage in commodity option transactions referred to in Part 32 of this chapter unless he has adjusted working capital equal to or in excess of whichever of the following is greater: (1) $50,000 or (2) the sum of the safety factors hereinafter prescribed in this section with respect to both proprietary accounts and customers' accounts plus 5 percent of the applicant's aggregate indebtedness; and each such person registered as a futures commission merchant shall at all times continue to meet such financial requirements.

(2) The requirements of paragraphs (a) and (b)(1) of this section shall not be applicable if the applicant for registration or registrant is a member of a contract market and conforms to minimum financial standards and related reporting requirements set by such contact market in its bylaws, rules, regulations or resolutions approved by the Commission, *Provided, however*, That such a futures commission merchant who engages in option transactions referred to in Part 32 of this chapter shall at all times maintain a minimum capital of $50,000 computed in accordance with the applicable bylaws, rules, regulations, or resolutions of such contract market which have been approved by the Commission.

(c) * * * (9) The term "customer" shall include an "option customer" as defined in Part 32 of this Chapter.

* * * * *

PART 30—FRAUD IN CONNECTION WITH COMMODITY TRANSACTIONS

§ 30.01 [Removed]

1. Section 30.01 is removed.

PART 32—REGULATION OF COMMODITY OPTION TRANSACTIONS

2. Part 32 is added to read as follows:

Sec.

32.1 Definitions.
32.2 Prohibited transactions.
32.3 Unlawful commodity option transactions.
32.4 Exemptions.
32.5 Disclosure.
32.6 Segregation.
32.7 Books and recordkeeping.
32.8 Unlawful representations.
32.9 Fraud in connection with commodity option transactions.
32.10 Option transactions entered into prior to the effective date of this Part.

AUTHORITY: Secs. 2(a)(1), 4c(a), 4c(b), 8a, Commodity Futures Act (7 U.S.C. 2, 6c (b) and 12a (Supp. IV, 1974)).

§ 32.1 Definitions.

As used in this Part—

(a) "Commodity option transaction" and "commodity option" each means any transaction or agreement in interstate commerce which is or is held out to be of the character of, or is commonly known to the trade as, an "option", "privilege", "indemnity", "bid", "offer", "put", "call", "advance guaranty", or "decline guaranty" involving any commodity regulated under the Act other than wheat, cotton, rice, corn, oats, barley, rye, flaxseed, grain sorghums, mill feeds, butter, eggs, onions, Solanum tuberosum (Irish potatoes), wool, wool tops, fats and oils (including lard, tallow, cottonseed oil, peanut oil, soybean oil and all other fats and oils), cottonseed meal, cottonseed, peanuts, soybeans, soybean meal, livestock, livestock products and frozen concentrated orange juice;

(b) "Interstate commerce" shall be construed and have the same meaning as set forth in sections 2(a) and 2(b) of the Act;

(c) "Option customer" means any person who, directly or indirectly, purchases or otherwise acquires for value any interest in a commodity option, but shall not include a person required to register as a futures commission merchant in accordance with this part;

(d) "Purchase price" means the total actual cost paid or to be paid, directly or indirectly, by an option customer for entering into and maintaining an interest in a commodity option transaction, by whatever name called; and

(e) "Striking price" means the price at which an option customer may purchase or sell commodity or the contract of sale of a commodity for future delivery which is the subject of a commodity option transaction.

§ 32.2 Prohibited transactions.

No person may offer to enter into, confirm the execution of, or maintain a position in, any transaction in interstate commerce involving—

(a) Wheat, cotton, rice, corn, oats, barley, rye, flaxseed, grain sorghums, mill feeds, butter, eggs, onions, Solanum tuberosum (Irish potatoes), wool, wool tops, fats and oils (including lard, tallow, cottonseed oil, peanut oil, soybean oil and all other fats and oils), cottonseed meal, cottonseed, peanuts, soybeans, soybean meal, livestock, livestock products and frozen concentrated orange juice, or

(b) Any contract of sale of any commodity for future delivery traded on or subject to the rules of any contract market or involving the prices of such contracts, except under such terms and conditions as the Commission shall prescribe;

if the transaction is or is held out to be of the character of, or is commonly known to the trade as, an "option", "privilege", "indemnity", "bid", "offer", "put", "call", "advance guaranty", or "decline guaranty".

§ 32.3 Unlawful commodity option transactions.

(a) On and after Januar y17, 1977, it shall be unlawful for any person to accept any money, securities, or property (or to extend credit in lieu thereof) from an option customer as payment of the purchase price in connection with a commodity option transaction unless such person is registered as a futures commission merchant under the Act and such registration shall not have expired, been suspended (and the period of suspension has not expired) or revoked.

(b) On and after January 17, 1977, it shall be unlawful for—

(1) Any person to solicit or accept orders (other than in a clerical capacity) for the purchase or sale of any commodity option, or to supervise any person or persons so engaged, unless such person is—

(i) Registered as a futures commission merchant under the Act, or

(ii) If such person is an individual, registered as an associated person of a specified futures commission merchant under the Act;

and such registration shall not have expired, been suspended (and the period of suspension has not expired) or revoked; and

(2) Any futures commission merchant to permit an individual to become or remain associated with such futures commission merchant as a partner, officer or employee (or in any similar status or position involving similar functions) in any capacity involving such solicitation, acceptance or supervision if such futures commission merchant knew or should have known that such individual was not registered as an associated person or that such registration has expired, been suspended (and the period of suspension has not expired) or revoked;

(c) A person required to register as a futures commission merchant or as an associated person in accordance with this Part which furnishes the services specified in that portion of section 2(a)(1) of the Act defining the term "commodity trading advisor" shall not be included in the term commodity trading advisor if:

(1) At the time such services are furnished, such person is registered as a futures commission merchant or as an associated person under the Act, and such registration shall not have expired, been suspended (and the period of suspension has not expired) or revoked; and

(2) The furnishing of such services is solely incidental to the conduct of such person's activities requiring such registration.

(d) A person registered as a futures commiission merchant or an associated person under the Act, who is required to register as such by virtue of this Part, need not re-register as such but shall immediately notify the Commission in writing, specifying the date such person commenced or intends to commence engaging in activities otherwise requiring registration under this part.

§ 32.4 Exemptions.

(a) Except for the provisions of §§ 32.2 and 32.9, which shall in any event apply to all commodity option transactions, the provisions of this Part shall not apply to a commodity option offered by a person which has a reasonable basis to believe that the option is offered to a producer, processor, or commercial user of, or a merchant handling, the commodity which is the subject of the commodity option transaction, or the products or by-products thereof, and that such producer, processor, commercial user or merchant is offered or enters into the commodity option transaction solely for purposes related to its business as such.

(b) The Commission may, by order, upon written request or upon its own motion, exempt any other person, either unconditionally or on a temporary or other conditional basis, from any provisions of this Part, other than §§ 32.2, 32.8 and 32.9, if it finds, in its discretion, that it would not be contrary to the public interest to grant such exemption.

§ 32.5 Disclosure.

(a) Prior to the entry into any commodity option transaction, each prospective option customer shall be furnished with a summary disclosure statement by the person soliciting the order therefor not less than 24 hours prior to the entry into the commodity option transaction. Expect as provided in paragraph (b) of this section, the disclosure statement shall contain the following:

(1) The actual amount of the purchase price and the elements comprising the purchase price, including a separate listing of the premium, markups on the premium, costs, fees and other charges, as well as the method by which the premium is established.

(2) A statement of:

(i) The services to be provided for the separate elements comprising the purchase price,

(ii) The striking price, and the method by which the striking price is established,

(iii) The total quantity and quality of the commodity which may be purchased or sold upon exercise of the commodity option or which underlies the contract of sale for future delivery which may be purchased or sold upon exercise of the commodity option, and

(iv) Any and all additional costs which may be incurred by the option customer if the option is exercised, including, but not limited to, the amount of storage, interest, commissions (whether denominated as sales commissions or otherwise) and all similar fees and charges;

(3) The price level which the underlying commodity or the underlying contract of sale for future delivery must reach during the life of the option in order that the option customer realize a profit in the commodity option transaction, together with a clear explanation of the effect of any foreign currency fluctuations if the option is to be executed on or through the facilities of a foreign board of trade;

(4) The following boldface statement on the first page of the disclosure statement:

Because of the volatile nature of the commodities markets, the purchase of commodity options are not suitable for many members of the public. A person should not purchase a commodity option unless he is prepared to sustain a total loss of the purchase price of the commodity option. Such transactions should be entered into only by persons who are aware of the potential for loss and who understand the nature and extent of their rights and obligations. These commodity options have not been approved or disapproved by the Commodity Futures Trading Commission nor has the Commission passed upon the accuracy or adequacy of this statement. Any representation to the contrary is a violation of the Commodity Exchange Act and the regulations; thereunder; and

(5) Statements to the effect that:

(i) Specific market movements of the commodity or contract of sale of a commodity for future delivery underlying the option cannot be accurately predicted, and

(ii) Generally, an option customer will be unable to sell his option in any market to recover any of the purchase price, but rather may only liquidate by exercising the option before the expiration date of the option or by entering into an offsetting transaction.

(b) To the extent that any of the actual price information required to be disclosed by the relevant portions of paragraphs (a) (1), (2) and (3) of this section is not known at the time the disclosure statement is to be delivered to the option customer, the person required to deliver the disclosure statement shall deliver as part of the disclosure statement, at the time specified, all the other information required by paragraph (a) of this section, as well as a good faith estimate of such price information, and shall provide all actual price information in writing to the option customer immediately upon the execution of the commodity option transaction for the option customer.

§ 32.6 Segregation.

(a) Any person which accepts money, securities or property from an option customer as payment of the purchase price in connection with a commodity option transaction shall treat and deal with such money, securities and property as belonging to such option customer until expiration of the term of the option or, if the option customer exercises the option, until all rights of the option customer under the commodity option have been fulfilled. Such money, securities and property (1) shall be separately accounted for and segregated as belonging to such option customer, (2) shall be kept in the United States, and (3) shall not be commingled with the money, securities or property of any other person, including the money, securities or property received by a futures commission merchant to margin, guarantee or secure the trades or contracts of commodity customers (as defined in § 1.3(k) of this chapter) or with the money accruing to such commodity customers as the result of such trades or contracts: *Provided, however*, That the money, securities or property treated as belonging to an option customer may for convenience be commingled with the money, securities or property treated as belonging to any other option customer and deposited in the same account or accounts with any bank or trust company in the United States. Such money, securities and property, when so deposited with any bank or trust company, shall be deposited under an account name which will clearly show that it contains money, securities or property, segregated as required by this Part. Each person depositing such money, securities or property shall obtain and retain in its files for the period provided in § 1.31 of this chapter an acknowledgment from such bank or trust company that it was informed that the money, securities and property therein are being treated as belonging to option customers and are being held in accordance with the provisions of this Part. Such bank or trust company shall allow inspection of such accounts at any reasonable time by representatives of the Commission.

(b) No money, securities or property deposited in accordance with paragraph (a) of this section shall be held, disposed of, used or treated as belonging to the depositing person or any person other than the option customers of such person: *Provided, however*, That such money may be invested in obligations of the United States, and in obligations fully guaranteed as to principal and interest by the United States. Such investments shall be made through an account or accounts used for the deposit of money, securities or property received from option customers and proceeds from any sale of such obligations shall be redeposited in such account or accounts. Each person which invests money belonging to option customers in obligations as described in this paragraph (b), shall separately account for such obligations and segregate such obligations as belonging to such option customers. Such obligations may only be deposited with a bank or trust company in the United States and shall be deposited under an account name which will clearly show that it contains obligations treated as belonging to option customers, segregated as required by this Part. Each person depositing such obligations shall obtain and retain in its files an acknowledgment from such bank or trust company that it was informed that the obligations are treated as belonging to option customers and are being held in accordance with the provisions of this Part. Such acknowledgment shall be retained for the period provided in § 1.31 of this chapter. Such bank or trust company shall allow inspection of the obligations at any reasonable time by representatives of the Commission.

(c) Each person which invests money treated as belonging to option customers as permitted hereunder shall keep a record showing the following: (1) The date on which such investments were

V41I197 OCT 8 76 UMI

made, (2) the name of the person through which such investments were made, (3) the amount of money so invested, (4) a description of the obligations in which such investments were made, (5) the identity of the depositories or other places where such obligations are segregated, (6) the date on which such investments were liquidated or otherwise disposed of and the amount of money received on such disposition, if any, and (7) the name of the person to or through which such investments were disposed of.

(d) Persons which invest money in obligations described in paragraph (b) of this section shall include such obligations in segregated accounts at values which at no time shall be greater than current market value, determined as of the close of the market on the last preceding market day.

(e) The deposit and/or investment of money as provided in paragraphs (a) or (b) of this section shall not operate to prevent the person so depositing and/or investing such money from receiving and retaining as its own any increment or interest resulting therefrom.

(f) The amount of money, securities and property which is and which must be in a segregated account in order to comply with the requirements of this part shall be computed by each person required to segregate such money, securities and property as of the close of each business day. A record of such computation shall be made and kept, together with all supporting data in accordance with the provisions of § 1.31 of this chapter. Such computation shall be made prior to the opening of business on the next business day.

§ 32.7 Books and record keeping.

(a) Each person which accepts any money, securities or property (or extends credit in lieu thereof) from an option customer as payment of the purchase price in connection with a commodity option transaction shall keep full, complete and systematic records together with all pertinent data and memoranda of or relating to such transactions. Such records shall at least include all orders (filled, unfilled or cancelled), signature cards, books of record, journals, ledgers, cancelled checks, copies of all statements of purchase, exercise or lapse, and reports, letters, disclosure statements required by § 32.5 of this Part, solicitation or advertising material, circulars, memoranda, publications, writings, and all other literature or written advice distributed to option customers or prospective option customers. Upon the request of an authorized representative of the Commission, such person shall furnish the true name and address of each commodity option customer or prospective commodity option customer solicited.

(b) Each person referred to in paragraph (a) of this section shall also keep a record in permanent form which shall show the true name and address of each maker, underwriter, issuer or other person who assumes or purports to assume any financial responsibility for the fulfillment of any commodity option transaction solicited or accepted by such person.

(c) Each person which accepts an order for a commodity option transaction from a person other than an option customer, shall keep full, complete and systematic records together with all pertinent data and memoranda of or relating to the transaction. Such records shall at least include the items set forth in paragraph (b) of this section and, to the extent necessary to reflect such person's participation in the transaction, shall include all items set forth in paragraph (a) of this section.

(d) Each person which accepts an order for a commodity option shall immediately upon receipt thereof prepare a written record of such order, including an account identification and order number, and shall record thereon by time-stamp or other device, the date and time, to the nearest minute, that (1) the order is accepted, (2) the order is transmitted for execution, and (3) the order is executed. Each such person which accepts any money, securities, or property (or extends credit in lieu thereof) from an option customer as payment of the purchase price in connection with the commodity option transaction shall, upon confirmation that the order was executed, notify the option customer of the date that the order was executed.

(e) All records, memoranda and other documents required to be maintained by paragraphs (a) through (c), and to be prepared by paragraph (d), of this section shall be retained for the period specified in § 1.31 of this chapter, and each person required to maintain such records will be required to produce the same for inspection and furnish true and correct copies thereof and information and reports as to the contents or meaning thereof, when and as requested by any authorized representative of the Commission or the United States Department of Justice.

§ 32.8 Unlawful representations.

It shall be unlawful for any person required to be registered with the Commission in accordance with this Part expressly or impliedly to represent that the Commission, by declaring effective the registration of such person or otherwise, has directly or indirectly approved such person, or any commodity option transaction solicited or accepted by such person.

§ 32.9 Fraud in connection with commodity option transactions.

It shall be unlawful for any person directly or indirectly—

(a) To cheat or defraud or attempt to cheat or defraud any other person;

(b) To make or cause to be made to any other person any false report or statement thereof or cause to be entered for any person any false record thereof;

(c) To deceive or attempt to deceive any other person by any means whatsoever;

in or in connection with an offer to enter into, the entry into, or the confirmation of the execution of, any commodity option transaction.

§ 32.10 Option transactions entered into prior to the effective date of this part.

Nothing contained in this part shall be construed to apply to any commodity option transaction lawfully entered into prior to the effective date of this part.

Interested persons are invited to submit written comments on the proposed rules to the Commission: 2033 K Street NW., Washington, D.C. 20581, Attn: Secretariat. All submissions received prior to November 8, 1976 will be considered by the Commission in determining whether to revise or modify the proposed rules prior to their adoption or thereafter. Issued in Washington, D.C. on October 4, 1976.

By the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

PART V:

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Procedures for Federal Financial Assistance Under Sections 505 and 511

V 41 1 9 7 OCT 8 76 UMI

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No.76-01]

PART 258—REGULATIONS GOVERNING APPLICATIONS UNDER SECTION 505 OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Establishment of Part

• The purpose of these regulations is to set forth procedures for application by railroads for Federal financial assistance under section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 (the "Act"), concerning the purchase of redeemable preference shares. •

On October 1, 1976, Congress passed S. 3131, the Rail Transportation Improvement Act ("RTIA"), which is pending enactment as of the date of publication of these regulations. If and when the President signs the RTIA and it becomes law, we will undertake to revise these regulations as quickly as possible to bring them into conformance with the provisions of the RTIA pertaining to sections 505 and 511 of the Act. In keeping with our policy to initiate the programs covered by these final regulations, we have determined that these regulations should be published immediately in the current form.

Title V of the Act directs the Secretary of Transportation (the "Secretary") to study the rail transportation system and capital needs of the Class I railroads and creates two programs to provide financial assistance to the railroads. The Secretary has delegated his powers and duties under Title V, except those contained in section 506(c), to the Administrator of the Federal Railroad Administration (the "Administrator").

Proposed regulations governing the procedures to be used in applying for financial assistance under sections 505 (a)(1) and 511 of the Act were published in the FEDERAL REGISTER on June 1, 1976 (41 FR 22222). A public meeting to discuss these proposed regulations was held on June 11, 1976. In addition, interested parties were invited to submit on or before July 1, 1976, their written comments on the proposed regulations.

Numerous persons, organizations, and governmental entities either participated at the public meeting or filed comments in response to the proposed regulations, and each comment was given due consideration by the Federal Railroad Administration ("FRA"). As a result of these comments, numerous changes have been made in the regulations. In addition, the regulations have been expanded to permit the filing of applications for facilities rehabilitation and improvement financing under section 505(a)(2) of the Act. These changes and the reasons therefor are discussed below. Since the information requirements for applications under sections 505 and 511 are identical in many respects, comments which are applicable to both sets of regulations are addressed herein. Comments applicable only to the section 511 regulations are discussed in the preamble to those regulations.

These regulations establish procedures for applying for assistance under section 505 of the Act. In order to provide policy and program guidance to potential applicants with respect to the manner in which FRA will evaluate the applications and make the determinations of public benefits and costs, FRA will make available to potential applicants, at a later date, a statement of policy that is more detailed than this preamble. Submission of applications need not await the policy statement.

APPLICATIONS FOR FACILITIES REHABILITATION AND IMPROVEMENT FINANCING UNDER SECTION 505(a)(2)

Section 505(a)(2) of the Act provides that the Secretary shall not act finally on any application for facilities rehabilitation and improvement financing until the date of publication of the final standards and designations under section 503 of the Act. However, in order to facilitate the consideration of such applications, the current regulations have been expanded to permit them to be filed prior to the publication of the final standards and designations. In particular, the statutory requirements listed in section 505(b)(1) of the Act, which were not contained in the proposed regulations, have been incorporated in §§ 258.7(a)(4) and 258.9k of the regulations.

PUBLIC COMMENTS AND REVISIONS TO THE REGULATIONS

The public comments related to the following general areas: (A) The priorities for determining which projects provide the greatest public benefits; (B) consideration of the availability of section 511 guarantees in evaluating section 505 applications; (C) the cost of the financing to the railroads; (D) definitions; (E) preapplication and application procedures; (F) form and content of applications; and (G) the eligibility of small business concerns to secure financing. Each of these areas is discussed below.

A. PRIORITIES FOR DETERMINING WHICH PROJECTS PROVIDE THE GREATEST PUBLIC BENEFITS

Under section 505(b)(2) the Administrator may approve applications if he "determines that the requested financial assistance is in the public interest." In making such a determination, the Administrator is required to consider "the public benefits to be realized from the project to be financed in relation to the public costs of such financing and whether the proposed project will return public benefits sufficient to justify such public costs." The preamble to the proposed regulations set forth a priority schedule that would ensure the improvement of essential freight service.

While some commenters agreed with this priority schedule, others stated that section 505 was intended primarily to assist rail carriers in curing their deferred maintenance and to improve the efficiency of their fixed plant and was not intended to facilitate consolidation or coordination of rail facilities or to facilitate competition. It was also stated that encouragement of mergers and consolidations is a repudiation of the free enterprise system, and that a shrinkage of facilities will not lead to a revitalization of the railroads.

We do not disagree that the primary purpose of financial assistance under section 505 to is to rehabilitate and improve deteriorated rail facilities. In approving applications for assistance, however, the Administrator must weigh the public benefits against the public costs. The public benefits associated with each project will vary according to many factors. Projects that address the dual problems of excess rail capacity and deteriorated rail facilities will normally produce greater public benefits than those that address only deterioration and do little to relieve the continuing financial burden of excess operating, maintenance and investment costs. Consolidation and coordination projects, particularly those located in corridors of excess capacity identified pursuant to section 503 of the Act, will be prime candidates for funding under section 505.

FRA recognizes that final implementation of mergers, even under expedited procedures, may well extend beyond the period in which section 505 assistance is available. We believe, however, that federal assistance can effectively be used to eliminate redundancy in the rail system by giving a high priority to applications that emphasize unification or coordination projects involving two or more railroads that achieve a partial system rationalization short of mergers, such as: (1) The elimination of duplicative or overlapping operations and facilities; (2) the reduction of switching operations; (3) utilization of the shortest, or most efficient and economical routes; (4) the exchange of trackage rights; and (5) the combining of trackage and of terminal or other facilities. Priority will also be given to acquisition, rehabilitation, and improvement projects on high density mainlines that would not be incompatible with any subsequent restructuring efforts, including merger or consolidation proposals which have been proposed to the Interstate Commerce Commission under sections 5 (2) or (3) of the Interstate Commerce Act ("IC Act") or to the Administrator under section 5(3) of the IC Act. In assessing the eligibility of projects involving track rehabilitation, the Administrator will consider the classifications and designations made pursuant to section 503 of the Act.

While some commenters expressed opposition to facilitation of competition as a priority, others supported it and asked that it be broadened to include intermodal competition. By stimulating service improvements and efficient operations, competition produces substantial public benefits and is therefore a necessary consideration in determining the public interest. Intermodal competition must be part of this consideration. Congress recognized this in its declaration in section 101(b)(2) of the Act that it is a policy of the Act to—

> Foster competition among all carriers by railroad and other modes of transportation, to promote more adequate and efficient transportation service, and to increase the attractiveness of investing in railroads and rail-service-related enterprises.

That policy statement recognizes the interrelationship between competition, service, and economic viability. By applying Federal financial assistance to those types of projects which make the applicant more competitive, service improvements by all modes in the affected market should be stimulated, with each mode performing effectively those services for which it is inherently suited.

While intermodal competition is indeed an important transportation issue, the focus of the Act is on the more serious problem of reduced competition due to deterioration in railroad plant and service. In certain cases the continuation of competitive rail service in major markets may be threatened by such deterioration. Therefore, consistent with the Secretary of Transportation's statement on National Transportation Policy in support of at least two competing rail lines between major industrial points, cities and seaports, it is appropriate to afford priority to projects which support that objective.

A lesser priority is general in nature and includes projects that would increase the ability of applicants to provide rail transportation services at safe and adequate levels, result in lower costs of services, improve economic efficiency and productivity, and address specific safety, environmental, energy and defense problems. The final report to be issued under section 503 of the Act will be a primary guide in determining which projects will be funded.

B. CONSIDERATION OF THE AVAILABILITY OF SECTION 511 GUARANTEES IN EVALUATING SECTION 505 APPLICATIONS

As previously noted, section 505(b)(2) requires the Administrator, in determining whether a project is in the public interest, to consider the "availability of funds from other sources at a cost which is reasonable under principles of prudent railroad financial management in light of the railroad's projected rate of return for the project to be financed." The preamble to the proposed regulations indicated that in determining whether funds are available from other sources at a reasonable cost the Administrator will—

> compare the anticipated rate of return on the project itself to the cost of any available capital and will evaluate the overall financial strength of the applicant in order to assess the applicant's ability to afford available capital. The Administrator will consider such factors as the timing of the anticipated flows of costs and benefits from the project compared to the schedule for repayment of other financing means as well as any terms governing repayment of capital from sources other than section 505. Other sources of funds that applicants should explore include public or private placement of funded or unfunded debt, bank loans or loans from shippers and manufacturers, advances from parent companies, sales of assets, and equity financing. An additional factor the Administrator will review in deciding whether other funds are available at a reasonable cost is *whether a project could be financed if a guarantee or commitment to guarantee were extended under section 511 or if sections 505 and 511 were used in combination. Applicants must therefore examine thoroughly the possibility of financing their project in whole or in part with the assistance of a section 511 guarantee and must demonstrate that financing available in the private capital markets either cannot be obtained at a reasonable rate of interest or is otherwise inappropriate for the project.* (Emphasis added.)

Some comments supported the consideration of the practicality of using section 511 financing as a condition precedent to approving a section 505 application. Others objected to the coupling of the two sections, contending that the coupling will result in a frustration of the Congressional intent that rehabilitation funding be provided at a low cost.

The underscored language above does not require, nor will we require, an applicant to apply for assistance under section 511 before applying for assistance under section 505. However, each applicant will be required to demonstrate that the cost of financing all or part of a project under section 511 is not reasonable under principles of prudent financial management in light of the railroad's projected rate of return for the project to be financed.

The objectors fail to recognize that Congress intended that funding under both section 505 and section 511 be used for rehabilitation and improvement. If the revitalization of the rail system is to be achieved, maximum efficient use must be made of the total Federal funding authorization at the lowest cost to the taxpayer. As stated in the preamble to the proposed regulations:

> [e]xtending obligation guarantees whenever possible will maximize public benefits first by providing financial assistance for railroad projects at the lowest cost to the public and second by applying funds available under section 505 to projects that are in the public interest but cannot be financed at a reasonable rate of interest. Only through the appropriate use of assistance from both sections 505 and 511 can the assistance available to the railroads through Title V be maximized.

C. COST OF THE FINANCING TO THE RAILROADS

Several commenters argued against the policy statement in the preamble to the proposed regulations that the Administrator will establish terms on the preference shares which will, by combining the schedules for dividend and redemption payments, result in a financial cost to the applicant equal to the cost of money to the government. The preamble to the proposed regulations stated that FRA may deviate from these terms when the public benefit from the project warrants a lower financial cost to the applicant. The commenters argued that this is inconsistent with the Congressional intent of providing low cost financing for rail rehabilitation and improvement.

We disagree with the commenters. The Act clearly provides the Administrator with discretion in setting the terms and conditions for preference share financing. Section 506(a)(3) provides that dividends, when added to the amount of mandatory redemption payments "shall return to the Fund *not less than* 150 percent of the aggregate par value thereof • • •." (Emphasis added.) In addition, section 505(b)(2) provides the Administrator with discretion to determine whether the project is in the public interest. As stated earlier, in determining the public interest, the Secretary is required to consider the public benefits in relation to the public costs of the financing. When sections 505 and 506 are considered together, the FRA policy, which we believe to be a correct interpretation of the Act, provides the Administrator with the ability to establish terms and conditions for repayment based on the benefits which the public derives from the project and the applicant's ability to repay. In essence, the FRA policy establishes the ceiling for repayment at "cost of money to government" while the legislation sets the floor at "150 percent of the aggregate par value."

FRA is aware of the critical financial problems affecting certain marginal railroads and fully intends to give careful consideration to financing projects at the lowest cost levels. However, in assessing the use of preference share financing for projects that fall within the priorities established by the Administrator, it must be recognized that there will be combinations of participating railroads in varying financial condition and projects varying in public benefit. Therefore, it is only prudent management of public funds to set a range within which financing terms can be established. When an applicant receives substantial economic benefits from projects financed under the Act, such projects should be financed without unnecessary costs to the taxpayers.

D. DEFINITIONS

A few comments were received on the adequacy of certain definitions. One commenter stated that the term "automatic data processing systems," used in sections 258.3(f)(2) and 260.3(f)(2) of the proposed regulations, should be defined to include "software or program packages." It is our view that automatic data processing systems may include the software necessary to the functioning of the system.

One commenter requested that the definition of "equipment" in sections 258.3(e) and 260.3(e) of the proposed regulations include freight cars which, though somewhat specialized, are in general use by the railroad industry. In particular, the commenter recommended the inclusion of DF boxcars and rapid-unloading covered hopper cars. It is our view that such cars are not limited to any specialized purpose and so fall within the definition as it is presently worded. TOFC-COFC flatcars are not included, however, since particular features of the car limit their purpose to the transportation of highway trailers. A potential applicant could request such a designation, since the Act permits the Administrator to designate other cars as equipment upon a written finding, with reasons therefor, that such designation is consistent with the purposes of the Act.

V41197 OCT 8 76 UMI

E. PREAPPLICATION AND APPLICATION PROCEDURES

Comments concerning the preapplication and application procedures urged generally that the requirements be simplified or that the time within which all the information had to be supplied be postponed until the applicant had some reasonable indication that the proposed project would be favorably considered. Another commenter suggested the setting of a specific time frame for decisions on projects. Additionally, the comments pointed to the need for confidentiality in the preapplication process.

It is possible that not all of the information specified in the regulations will be necessary for the consideration of each application. For this reason, provisions have been made (§ 258.11(a) and § 260.11(a)) for a preliminary conference prior to the submission of a formal application. A discussion of the information that must be submitted in support of a proposed project will be included as part of the preapplication conference. While applicants are not requested to prepare a draft application or other special information for the preapplication conference, they should be prepared to discuss information which management used in making its initial decision to seek financial assistance.

An estimate of the time period required for a decision can also be provided at the preapplication conference. In view of the varying degrees of complexity of projects to be considered and the length of time required for analysis of such projects, we do not believe it is practical to set a rigid time frame for decisions within the six month requirement set forth in section 505(b)(2) of the Act.

Provisions for maintaining confidentiality of information submitted in applications are included in the regulations in § 258.17 and § 260.17. The confidentiality of preapplication information will similarly be maintained to the extent permitted by law.

Comments from State officials requested that they receive notice of proposed projects and that the States be afforded an opportunity to comment on the proposals. We agree that a mechanism for informing States and other interested persons of applications is desirable. A notice of the filing of each application will therefore be published in the FEDERAL REGISTER and interested persons will be afforded an opportunity to comment (see § 258.9(l)).

There also was a suggestion that the Title V program be used to attract state and local public funds to the railroads. We agree that to the extent possible, total available funds, including those from States and private sources, should be used to finance projects. The initiative in identifying potential funds for a project, however, should be that of the applicant and not of the Administrator.

F. FORM AND CONTENT OF APPLICATION

Comments on the amount, content and format of the financing and operating information required for applications under sections 505 and 511 of the Act, showed that respondents were generally concerned with the volume of information requested, the possibility of submitting regularly published reports rather than drafting separate schedules of data when practicable, and changes of language where it was felt that clarity or simplification was needed.

A major effort has been made to simplify the information requirements contained in the proposed regulations in light of these comments. Where the information requested is available from other Federal agencies, for example, the requirement has been deleted. Approximately one-half of the exhibits required in the proposed regulations have been deleted from the final regulations.

Section 101(a)(5) states that the purpose of the Act be achieved, in part, through "auditing, accounting, reporting, and other requirements to protect Federal funds and to assure repayment of loans and financial responsibility." In most cases, considerable information will be required to evaluate the financial soundness of a project and to monitor the applicant's financial viability on a regular basis. There may be instances in which more information than is specified in the regulations is needed to complete the evaluation and monitoring functions. Under § 258.19 and § 260.19 of the regulations, the Administrator, upon good cause shown, may make any additional requirements he deems necessary. Information may also be requested under § 258.7(a)(10) and § 260.7(a)(14).

Other more specific requests and suggestions were:

(1) Sections 258.7(a)(8)(A) and 260.7(a)(12)(A) now require "• • • [a] statement of other Federal activities in the area of the project which are known or should be known to the applicant." It was suggested that the underscored language be included, and it has been.

(2) Concern was expressed that due to the difficulties inherent in forecasting, projections of financial data may prove meaningless. It is recognized in this regard that forecasts are only as good as the assumptions on which they are based. Nonetheless, in order that an evaluation of the applicant's ability to continue to provide necessary transportation services in the public interest can be made, it is essential that the best available information on the applicant's prospective financial condition be considered. Applicants will be expected to make every reasonable effort to provide reasonable forecasts based on the soundest assumptions possible.

(3) A request was made that the statement of economic impact of the project on the railroad's employees contained in § 258.7(a)(10) and § 260.7(a)(14) of the proposed regulations be deleted, and it has been. However, a statement of the status of labor negotiations required by section 516 of the Act is still required.

(4) It was suggested that the rate of return concept in § 258.7(a)(4)(C) and § 260.7(a)(7)(A) of the proposed regulations is uninformative and inappropriate for rehabilitation and safety projects. While FRA recognizes fully the difficulty of applying the rate of return concept to certain types of projects, the information is required to meet certain statutory requirements. The Act requires the rate of return to be considered in evaluating projects under section 505. With respect to projects under section 511, rate of return is useful in determining whether the funds will be "economically" utilized, as required in section 511(h)(4).

For approximately one year, the Department of Transportation has been examining the way in which railroads calculate rate of return on railroad investment projects as a basis for developing a standard methodology for use by the railroad industry. Final results of that study are not expected for some time. In the interim, FRA is developing an initial set of broad guidelines for the calculation of rate of return in connection with Title V applications. When the guidelines and later the final standard methodology become available, FRA will make them available to applicants for use in subsequent applications and recalculate in accordance with the guidelines or final methodology the rate of return included in applications already submitted by the applicant but not yet acted upon finally by FRA. In order that the submission of applications not be delayed while the guidelines or final methodology are being developed, applicants filing applications prior to the date of publication of the guidelines should perform rate of return calculations according to their internal and existing corporate methodology, setting forth the assumptions and bases for the calculations in accordance with § 258.7(a)(4)(E) and § 260.7(a)(7)(A) of the regulations.

G. ELIGIBILITY OF CLASS II RAILROADS AND SMALL BUSINESS CONCERNS TO SECURE FINANCING

The Small Business Administration and others requested that consideration be given to changes in the proposed rules to enable "maximum feasible eligibility and participation by small business concerns". Specifically, clarification was requested as to the eligibility of Class II railroads and non-rail businesses for section 505 assistance.

Eligibility under section 505 is specifically limited to "railroads". The term "railroad" is defined in section 102(7) of the Act and includes Class II railroads, but not small businesses per se. As previously stated, assistance under section 505 will be provided for those projects that best serve the public interest by increasing the ability of the rail system to provide adequate and efficient transportation services, rather than maintaining the status quo. Most commenters supported the use of the line classifications and designations under section 503 of the Act to evaluate applications under section 505 of the Act. Class II railroads will not be prejudiced thereby, as the necessary public interest determination will also include consideration of other factors, such as preservation of competition, safety,

energy conservation, and similar significant benefits.

In consideration of the foregoing, 49 CFR, Chapter II is amended by adding a new Part 258 to read as follows:

Sec.
258.1 Applicability.
258.3 Definitions.
258.5 Eligibility.
258.7 Form and content of application.
258.9 Required exhibits.
258.11 Preapplication and application procedure.
258.13 General instructions.
258.15 Record, audit, and examination.
258.17 Information requests.
258.19 Waivers and modifications.

AUTHORITY: Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210; the Department of Transportation Act, 49 U.S.C. 1651 et seq., Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

§ 258.1 Applicability.

This part prescribes the requirements and procedures governing applications by railroads for financial assistance pursuant to section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976. These requirements and procedures also govern applications for assistance for the purpose set forth in section 517 of that Act, improvement of intercity rail passenger service on lines owned by the applicant and located outside the Northeast Corridor, being the properties acquired by the National Railroad Passenger Corporation pursuant to Title VII of the Act and described in section 701(a)(4) of that Act.

§ 258.3 Definitions.

As used in this part—

(a) "Act" means the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210, February 5, 1976).

(b) "Administrator" means the Federal Railroad Administrator, or his delegate.

(c) "Applicant" means any railroad that submits an application for financial assistance pursuant to this part.

(d) "Commission" means the Interstate Commerce Commission.

(e) "Equipment" means any type of new or rebuilt standard gauge locomotive, caboose, or general service railroad freight car the use of which is not limited to any specialized purpose by particular equipment, design, or other features, or any other type of car designated by the Administrator upon a written finding that such designation is consistent with the purposes of the Act. General service railroad freight car includes a boxcar, gondola, open-top or covered hopper car, and flatcar.

(f) "Facilities" means—

(1) track, roadbed, and related structures, including rail, ties, ballast, other track materials, grading, tunnels, bridges, trestles, culverts, elevated structures, stations, office buildings used for operating purposes only, repair shops, enginehouses, and public improvements used or usable for rail service operations;

(2) communication and power transmission systems, including electronic, microwave, wireless, communication, and automatic data processing systems, electrical transmission systems, powerplants, power transmission systems, powerplant machinery and equipment, structures, and facilities for the transmission of electricity for use by railroads;

(3) signals, including signals and interlockers;

(4) terminal or yard facilities, including trailer-on-flat-car and container-on-flat-car terminals, express or railroad terminal and switching facilities, and services to express companies and railroads and their shippers, including ferries, tugs, carfloats, and related shoreside facilities designed for the transportation of equipment by water; or

(5) shop or repair facilities or any other property used or capable of being used in rail freight transportation services or in connection with such services or for originating, terminating, improving, and expediting the movement of equipment.

(g) "Final Standards" means the Final Standards, Classification and Designation of Lines of Class I Railroads in the United States, to be published by January 30, 1977, pursuant to section 503(e) of the Act.

(h) "FRA" means Federal Railroad Administration.

(i) "Including" means including but not limited to.

(j) "Preliminary Standards" means the Preliminary Standards, Classification and Designation of Lines of Class I Railroads in the United States, published by the United States Department of Transportation on August 3, 1976, pursuant to section 503(b) of the Act.

(k) "Project" means the purpose for which the applicant seeks financial assistance under this part, including acquisition or maintenance of facilities or equipment, rehabilitation or improvement of facilities or equipment, and new construction of facilities.

(l) "Railroad" means a common carrier by railroad or express as defined in section 1(3) of Part I of the Interstate Commerce Act (49 U.S.C. 1(3)), and includes the National Railroad Passenger Corporation and the Alaska Railroad.

(m) "Railroad in reorganization" means a railroad being reorganized under section 77 of the Bankruptcy Act (11 U.S.C. 205).

(n) "Redeemable preference shares" means shares acquired by the Administrator under section 505(d) of the Act that conform to the requirements set forth in section 506 of the Act.

(o) "Trustee" means the trustee, or trustees if more than one trustee has been appointed, of a railroad in reorganization.

(p) "Trustee certificates" means certificates issued under section 77(c)(3) of the Bankruptcy Act (11 U.S.C. 205(c)(3)).

§ 258.5 Eligibility.

Any railroad may apply to the Administrator under section 505 for such financial assistance as the Administrator may approve.

§ 258.7 Form and content of application.

(a) Each application shall include, in the order indicated and identified by applicable section numbers and letters corresponding to those used in this part, the following information:

(1) Full and correct name and principal business address of the applicant;

(2) Date of applicant's incorporation, and name of the government, state, or territory under the laws of which it was incorporated or organized. If applicant is a trustee, the name and address of the reorganization court under the direction of which the applicant is acting, and the docket number of the proceeding;

(3) Name, title, and address of the person to whom correspondence regarding the application should be addressed;

(4) Detailed description of the amount and timing of financial assistance that is being sought and its purpose or purposes, including—

(i) A description of all facilities and the physical condition of such facilities included in or directly affected by the proposed project and a description of the project;

(ii) Each part or sub-part into which the project may reasonably be divided, and the priority and schedule of financial assistance needed for each part or subpart;

(iii) Total amount of financing required to complete the proposed project, in total and for each part or sub-part identified pursuant to paragraph (a)(4)(ii) of this section, and the amount and kind of Federal financial assistance required by applicant in order to complete the proposed project;

(iv) Total amount of financing being requested in the application, date or dates on which applicant desires to have the funds made available, and schedule according t which applicant desires to redeem preference shares purchased pursuant to this part and make dividend payments thereon;

(v) Estimated rate of return on the project calculated in accordance with the applicant's internal, corporate methodology, and where practicable, by determining the discount rate for which the present value of the stream of annual benefits associated with and over the life of the project equals the present value of the stream of annual costs associated with and over the life of the project. The detailed stream of annual project costs (including any increase in labor costs that will result from the labor protection arrangements required by section 516 of the Act) and annual project benefits used to calculate the rate of return and a statement of the assumptions and bases for calculations supporting each of the items of the detailed stream must be provided. At such time as FRA develops general guidelines and later a standard methodology for computing rate of return, FRA will recalculate the resulting discount rate in accordance with the guidelines or the standard methodology (if available) and will make the guidelines or standard

V41 I197 OCT 8 76 UMI

methodology available to railroads for use in subsequent applications under this Part;

(vi) Evaluation of the expected impact of the project on the applicant's ability to provide essential rail services; and

(vii) Statement of whether the project involves another railroad or other participant, through joint execution, coordination, or otherwise; if so, description of the relative participation of applicant and such other railroad or participant, including statement of financing arrangements of each participant, portion of the work to be performed by each, and contemplated level of usage of the equipment or facility by each participant when the work is completed, along with a statement by a responsible officer or official of the other railroad or participant that the information provided reflects their agreement on these matters;

(5) Full and complete statement, together with supporting evidence, of the public benefits to be realized from the project. Public benefits include providing essential freight or passenger services at safe and adequate levels, decreased costs of service (through joint use of tracks or coordination between carriers, mergers, consolidations, or other means), and improved economic efficiency and productivity;

(6) Statement as to how the project will contribute to or enhance the safe operation of the railroad, considering such factors as the occupational safety and health of employees and the improvement of physical or other conditions that have caused or may cause serious injury or loss of life to the public and to users of the railroad's services;

(7) Statement as to whether the project can be funded, in whole or in part, from any other public or private source, including shippers, affiliated companies, or through the guarantee or commitment to guarantee obligations under section 511 of the Act, and, if so, upon what terms. If the project cannot be funded in whole or in part by other sources, a statement as to the efforts which have been made to secure alternative funds, the reasons for the inability to secure alternative funds, and full details of all negotiations undertaken;

(8) Detailed statement as to whether the project will involve a major change in land use or will result in a major change in the intensity of railroad related activities on existing corridors or at other locations, and, if so, assessment of the impact of the project on the environment, including—

(i) Description of the environment in the area of the project before commencement of such project, together with statement of other Federal activities in the area which are known, or should be known, to the applicant;

(ii) Statement of population and growth characteristics of area and of any population and growth assumptions made by applicant in planning the project. Such statement should use the rates of growth in the projection compiled for the Water Resources Council by the Bureau of Economic Analysis of the Department of Commerce and the Economic Research Service of the Department of Agriculture;

(iii) Statement of the project's relationship to proposed land use plans, policies, and controls of affected communities. Where the project is inconsistent with any such plans, policies, or controls, the statement should describe and explain the reasons for such inconsistency in detail;

(iv) Statement of the positive and negative effects of the project on the environment, including effects on air and water, soil quality, and noise level;

(v) Statement of relationship to any applicable Air Quality Implementation Plan under the Clean Air Act (42 U.S.C. 1857);

(vi) Description of any alternatives to the project that have been considered with respect to impact on the environment;

(vii) Discussion of problems and objections raised by other Federal, State or local agencies, and citizens with respect to impact of the project on the environment;

(viii) Statement of the relationship between local short-term uses of the environment by the project and the long-term effects on the environment; and

(ix) Statement of any irreversible or irretrievable commitments of resources, including impact on public parks, recreational areas, wildlife refuges, historic sites, and similar areas referenced in section 4(f) of the Department of Transportation Act;

(9) Statement of the status of negotiations between applicant and representatives of its employees for labor protection agreements required by section 516 of the Act; and

(10) Any other information which the Administrator may deem necessary concerning an application filed under this part.

(b) When applicant is a trustee and the form of proposed assistance is purchased by the Administrator of trustee certificates, the application shall provide all of the information required in paragraph (a) of this section, and in addition shall provide:

(1) Statement on behalf of the trustee, together with supporting evidence, that such certificates cannot otherwise be sold at a reasonable rate of interest;

(2) Full and complete statement, together with supporting evidence, demonstrating that the project can reasonably be expected to be maintained as a part of a financially self-sustaining railroad system; and

(3) Full and complete statement, together with supporting evidence, that the probable value of the assets of the railroad in the event of liquidation provides reasonable protection to the United States.

§ 258.9 Required exhibits.

There shall be filed with and made a part of each application and copy thereof the following exhibits, except that exhibits filed with the Administrator pursuant to some other statutory provision or regulation which are in the same format as the following exhibits may be incorporated in and made part of the application filed under this Part by reference. While an application is pending, when actual data becomes available in place of the estimated or forecasted data required in exhibits under this Part, such actual data must be reported promptly to the Administrator in the form required in the appropriate exhibit.

(a) *Exhibit A.* (1) Copies of resolutions of stockholders or the board of directors, or duly authorized committee thereof, authenticated by a proper officer of applicant, designating by name and for that purpose the executive officer by whom the application is signed, verified, and filed on behalf of the applicant; and

(2) If applicant is a trustee, a certified copy of the order of the court having jurisdiction authorizing the filing of the application. All documents required by this exhibit must be certified by the appropriate officer of the applicant.

(b) *Exhibit B.* Opinion of counsel that he is familiar with the corporate powers of the applicant and that the applicant is authorized to make the application. Such opinion shall also cover whether the applicant is authorized to execute and deliver the redeemable preference shares and the priority of such shares. If the charter, articles of incorporation, or by-laws do not permit the execution or delivery of redeemable preference shares, the opinion shall so state and shall list the actions necessary to obtain authorization for such execution or delivery. Any amendments to the charter, articles of incorporation, or by-laws, and all resolutions of the board of directors, executive committee of the board of directors, or stockholders, that will be required to execute and deliver the redeemable preference shares shall be provided to the Administrator as soon as they are available.

(c) *Exhibit C.* Map of applicant's existing railroad with location of project indicated, if appropriate.

(d) *Exhibit D.* Statement showing to the latest available date but in any event to a date no less recent than the end of the third month preceding the date of filing of the application:

(1) Maximum number of locomotive units out of service during each quarter due to business conditions; maximum number of such units out of service during each quarter due to mechanical defects; and ratio of each to total ownership quarterly for each of the last three calendar years but not earlier than the quarter ending June, 1974, and the current calendar year; and

(2) Maximum number of general service freight cars out of service during each quarter due to business conditions; maximum number of such cars out of service during each quarter due to mechanical defects; and ratio of each to total number of general service freight cars owned by applicant quarterly for each of the last three calendar years but not earlier than the quarter ending June, 1974, and the current calendar year.

(e) *Exhibit E.* A copy of applicant's general balance sheet as of a date no less recent than the end of the third month preceding the date of filing of the application, in account form and detail as required in schedule 200 of the Commission's annual report R–1 or R–2, as appropriate, together with the following schedules (where changes in accounts from the end of the prior year to date of the application have not been significant, copies of the appropriate schedules in the prior year's R–1 or R–2 with marginal notations listing the changes may be submitted):

(1) Particulars of account 704, Loans and Notes Receivable, in form and detail as required in schedule 201 of annual report R–1 for the Class I railroads, and in similar form for the Class II railroads except that for Class II railroads loans and notes receivable that are each less than $25,000 may be combined into a single amount;

(2) Particulars of investments in affiliated companies and other investments in form and detail required in schedules 205 and 206 of annual report R–1, or schedules 1001 and 1002 of annual report R–2, as appropriate;

(3) Particulars of balances in accounts 741, Other Assets, and 743, Other Deferred Charges, in form and detail required in schedule 216 of annual report R–1 or schedule 1703 of annual report R–2, as appropriate;

(4) Particulars of loans and notes payable in form and detail required in schedule 223 of annual report R–1, or schedule 1701 of annual report R–2, as appropriate, as well as information as to bank loans, including the name of the bank, date and amount of the original loan, current balance, maturities, rate of interest, and security, if any;

(5) Particulars of long-term debt in form and detail required in schedules 218 and 219 of annual report R–1 or schedules 670, 695, 901, 902 and 1702 of annual report R–2, as appropriate, together with a brief statement concerning each mortgage, pledge, and other lien, indicating the property or securities encumbered, the mortgage limit per mile, if any, and particulars as to priority;

(6) Particulars of balance in account 784, Other Deferred Credits, in form and detail required in schedule 225 of annual report R–1 or schedule 1704 of annual report R–2, as appropriate; and

(7) Particulars as to capital stock in form and detail as required in schedules 228, 229, and 230 of annual report R–1 or schedule 690 in R–2, as appropriate.

(f) *Exhibit F.* A spread sheet showing comparative income statement data for each month of the year in which the application is filed in account form similar to that required in column (a) of schedule 300 of annual report R–1 or R–2 as appropriate. For those months preceding and ending upon the date of the balance sheet presented in Exhibit I, the income statement data shall be reported on an actual basis and so noted. For those months between the dates of the balance sheet and the filing of the application, the income statement data should be reported on an estimated basis and so noted. For those months between the date of the application and the end of the year, the income statement data should be presented on a forecasted basis and so noted.

(g) *Exhibit G.* A spread sheet showing forecasted income statement data for each of the four years subsequent to the year in which the application is filed both before and after giving effect to the proceeds of the assistance requested in the application, in account form and detail similar to that required in column (a) of schedule 300 of annual report R–1 or R–2, as appropriate, together with a statement setting forth the bases for such forecasts.

(h) *Exhibit H.* A spread sheet showing changes in financial position for the year in which the application is filed in account form and detail as required in schedule 309 of annual report R–1 or R–2 as appropriate, as follows:

(1) For that period ending on the date of the balance sheet in Exhibit E, based upon actual data; and

(2) For that period from the balance sheet date to the end of the year, based upon estimated and forecasted data.

(i) *Exhibit I.* A spread sheet showing forecasted changes in financial position for each of the four calendar years following the filing of the application, both before and after giving effect to any funds requested in the application and including a statement showing the bases for such estimates, in account form and detail as required in schedule 309 of the annual report R–1 for Class I railroads and in similar form and detail for Class II railroads.

(j) *Exhibit J.* With respect to equipment proposed to be rehabilitated, improved, maintained, or acquired in the application, a statement indicating number of units and in-service or out-of-service status and, as appropriate:

(1) For locomotives, service type, age, size, horsepower, name of builder, description of work, and unit cost of proposed work; and

(2) For freight cars or intermodal equipment, information as to service type (box, gondola, flat, etc.), age, capacity, description of work, and unit costs of proposed work. Such statement shall show the total cost of the project, types and quantities of work items, unit cost of each item, and distribution of such cost by primary accounts of the Commission's Uniform System of Accounts separated where applicable between material, labor, and other; the ownership of all equipment which is the subject of the project; and the dates on which work is to be commenced or completed. Direct labor, supervision, material costs, contingencies, and any applicable overhead expenses that are included in the total cost of the project should be shown separately and identified.

(k) *Exhibit K.* With respect to the maintenance, rehabilitation, improvement, acquisition, or construction of facilities proposed in the application, a statement showing, as appropriate:

(1) Track Class, as defined by the FRA Track Safety Standards in Part 213 of this chapter, and maximum allowable speed under which each line, or sub-part of a line, on which maintenance, rehabilitation, improvement, acquisition or construction is proposed has been and is being operated and the reasons therefor; the highest track class and maximum allowable speed at which each such line, or subpart of a line, will be designated when the proposed project is completed; and the track class, maximum allowable speed, and signal requirements necessary in the judgment of the railroad to provide safe, reliable and competitive rail services over each line, or subpart of the line, included in or directly affected by the project, together with applicant's recommendations as to:

(i) The most economical method of rehabilitating or improving the physical condition of each line, or subpart of each line, referred to above, to achieve and maintain such line to the track class and maximum allowable speed deemed necessary by the applicant;

(ii) The cost of rehabilitating or improving each line, or subpart of each line, specified above, to meet the minimum safety requirements as defined by the FRA in Part 213 of this chapter for the track class and maximum allowable speed deemed necessary by the applicant and the cost of installing, rehabilitating, improving, maintaining, and repairing, as necessary, block signal systems, interlockings, automatic train stop, train control, cab signal devices or other similar appliances, methods, and systems in accordance with the FRA requirements in Parts 233, 234 and 236 of this chapter; and

(iii) An economic analysis of the cost of installing, rehabilitating, and improving facilities described in subparagraph (ii) above.

(2) The identification number of each grade crossing on each line, or sub-part of a line, included in the project, as provided in the United States Department of Transportation/Association of American Railroads Crossing Inventory, and the safety standards, signal and other requirements necessary in the judgment of the railroad to prevent loss of life and serious accident or injury at such grade crossings.

(3) Dates on which project is proposed to be commenced and completed; and dates on which each part or sub-part into which the project may reasonably be divided is proposed to be commenced and completed.

(4) Types and quantities of work items, unit cost of each item, cost of project in total and by parts or sub-parts into which the project may be reasonably divided, and distribution of such costs by primary accounts of the Commission's Uniform System of Accounts, separated where applicable between material, labor and other. Direct labor, supervision, material costs, contingencies, and any applicable overhead expenses that are included in the costs of the project should be shown separately and identified.

V41I197 OCT 8 76 UMI

(1) Exhibit L. A draft notice of filing, to be published by the Administrator in the FEDERAL REGISTER, which shall contain a brief summary of the project(s) proposed to be funded, including as applicable:

(1) The name and address of applicant;

(2) A brief description of the project(s) proposed to be funded, the total cost of such project(s), and the amount of Federal financial assistance sought;

(3) A brief description of the facilities to be acquired, rehabilitated or improved, including city or county and state location, termini, and approximate distance in miles;

(4) The justification for the project(s); and

(5) A final paragraph which shall read as follows:

Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street, S.W., Washington, D.C. 20590, not later than 30 days after the date on which this notice is published in the FEDERAL REGISTER. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor.

The comments will be taken into consideration by the Federal Railroad Administration in evaluating the application. However, formal acknowledgment of the comments will not be provided.

NOTE.—The account forms referred to in the exhibits are those of the Commission's Uniform System of Accounts for Railroad Companies in use on August 31, 1976. However, the information required in any of the exhibits shall give effect to any modification of the Commission's Uniform System of Accounts for Railroad Companies in effect on the date of filing the application.

§ 258.11 Preapplication and application procedure.

(a) When a railroad has developed plans for a project for which it may wish to seek assistance under this Part, a responsible official of the railroad may request a meeting with the Associate Administrator for Federal Assistance of the FRA to discuss those plans. Upon receipt of such request, the Associate Administrator will promptly schedule a meeting at which the railroad will present to representatives of the FRA the project and discuss with them information which must be submitted in the application and the type of terms and conditions and financing documents that will be utilized in connection with financial assistance provided under section 505. Applicants are not required to prepare a draft application or other special information for the preapplication conference; however, applicants should be prepared to discuss information which management has used in making its initial decision to seek assistance.

(b) The following procedure shall govern the execution and filing of the application:

(1) The original application shall bear the date of execution and be signed with ink by or on behalf of the applicant and shall bear the corporate seal in the case of an applicant which is a corporation. Execution shall be by all partners if a partnership, unless satisfactory evidence is furnished of the authority of a partner to bind the partnership, or if a corporation, an association or other similar form of organization, by its president or other executive officer having knowledge of the matters therein set forth. Persons signing the application on behalf of the applicant shall also sign a certificate in form as follows:

_____ certifies
(Name of official)
that he is the _____
(Title of official)
_____ of the _____;
(Name of railroad)
that he is authorized on the part of said applicant to sign and file with the Administrator this application and exhibits attached thereto; that the consent of all parties whose consent is required, by law or by binding commitment of the applicant, in order to make this application has been given; that he has carefully examined all of the statements contained in such application and the exhibits attached thereto and made a part thereof relating to the _____
(Name of railroad)
_____; that he has knowledge of the matters set forth therein and that all such statements made and matters set forth therein are true and correct to the best of his knowledge, information, and belief.

_____
(Name of official)
_____
(Date)

(2) There shall be made a part of the original application the following certificate by the Chief Financial Officer of the applicant:

_____ certifies
(Name of officer)
that he is _____
(Title of officer)
of _____; that he
(Name of railroad applicant)
has supervision over the books of account and other financial records of the railroad applicant and has control over the manner in which they are kept; that such accounts are maintained in good faith in accordance with the effective accounting and other orders of the Interstate Commerce Commission; that such accounts are adequate to assure that proceeds from the financing being requested will be used solely and specifically for the purposes authorized; that he has examined the financial statements and supporting schedules included in this application and to the best of his knowledge and belief those statements accurately reflect the accounts as stated in the books of account; and that, other than the matters set forth in the exceptions attached to such statements, those financial statements and supporting schedules represent a true and complete statement of the financial position of the railroad applicant and that there are no undisclosed assets, liabilities, commitments to purchase property or securities, other commitments, litigation in the courts, contingent rental agreements, or other contingent transactions which might materially affect the financial position of the railroad applicant.

_____
(Name of official)
_____
(Date)

(3) The original application and supporting papers, and ten (10) copies thereof, shall be filed with the Associate Administrator for Federal Assistance of the Federal Railroad Administration, 400 7th Street, S.W., Washington, D.C. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, but the signatures in the copies may be stamped or typed.

§ 258.13 General instructions.

(a) If the application is approved by the Administrator, the following documents must be deposited with the Administrator before the transaction is closed:

(1) Certified copies of resolutions of the board of directors and, where necessary, of the executive committee of the board of directors and the stockholders, and certified copies of the minutes of the meetings at which those resolutions were adopted, and any necessary amendments to the charter, articles of incorporation, or by-laws, authorizing the execution of a financing agreement with the Administrator and the issuance and delivery of such redeemable preference shares as are incident to the application thereof, in conformity with such terms as may be prescribed by the Administrator, and authorizing the designated officers to receive and give a receipt for the proceeds from the purchase of the redeemable preference shares;

(2) Certified statement by the applicant that it has complied with the provisions of sections 516 and 905 of the Act dealing respectively with employee protection and nondiscrimination; and

(3) In respect of assistance to a trustee, certified copies of the court orders and decrees authorizing him to execute and deliver the trustee certificates or redeemable preference shares.

(b) After the documents required in paragraph (a) of this section have been deposited with the Administrator, the Administrator will enter into an agreement with the applicant to provide financing at such times and in such amounts as the Administrator deems necessary to meet the reasonable cost of the project. Such agreement shall contain such terms and conditions as the Administrator deems necessary or appropriate to assure that the financing will be used only in the manner, and for the purposes, approved by the Administrator, including a requirement that funds received from the sale of redeemable preference shares be placed in and disbursed from a separate account.

§ 258.15 Record, audit, and examination.

(a) Each recipient of financial assistance under this Part, whether in the form of redeemable preference shares, trustee certificates, contracts, subcontracts, or other arrangements, shall keep such records as the Administrator and the Comptroller General shall prescribe, including records that fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project in connection with which such assistance was given or used, the amount of that portion of

the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Administrator and the Comptroller General of the United States, or any of their duly authorized representatives shall have access for the purpose of audit and examination to any accounts, books, documents, papers, reports, files and records of such receipts which in the opinion of the Administrator or the Comptroller General may be related or pertinent to the redeemable preference shares, trustee certificates, contracts, or other arrangements referred to in paragraph (a) of this section. Representatives of the Administrator or the Comptroller General shall be afforded full facilities for verifying the transactions.

§ 258.17 Information requests.

If an applicant desires that any information submitted in an application or supplement thereto not be released by the Administrator upon request from a member of the public, the applicant must so state and must set forth any reasons why such information should not be released, including particulars as to any competitive harm which would probably result from release of such information. The Administrator will keep such information confidential as permited by law.

§ 258.19 Waiver and modification.

The Administrator, upon good cause shown, may waive or modify any requirement of this part not required by law, or make any additional requirements he deems necessary.

Effective date: This part becomes effective on October 8, 1976.

NOTE.—I certify that the inflationary impact of the regulations implementing section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 has been evaluated in accordance with Executive Order 11821 of November 21, 1974, and Department of Transportation Order 2050.4 of February 2, 1976.

Dated: October 6, 1976.

ASAPH H. HALL,
Administrator,
Federal Railroad Administration.

[FR Doc.76-29755 Filed 10-7-76;8:45 am]

[Docket No. 76-02]

PART 260—REGULATIONS GOVERNING SECTION 511 OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Establishment of Part

• The purpose of these regulations is to set forth procedures for application by railroads for Federal financial assistance under section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 (the "Act"), concerning the guarantee of obligations. •

On October 1, 1976, Congress passed S. 3131, the Rail Transportation Improvement Act ("RTIA"), which is pending enactment as of the date of publication of these regulations. If and when the President signs the RTIA and it becomes law, we shall undertake to revise these regulations as quickly as possible to bring them into conformance with the provisions of the RTIA pertaining to sections 505 and 511 of the Act. In keeping with our policy to initiate the programs covered by these final regulations, we have determined that these regulations should be published immediately in the current form.

Title V of the Act creates two programs under which the Secretary of Transportation (the "Secretary") may provide financial assistance to railroads, one through the purchase of redeemable preference shares issued by railroads (section 505) and the other through the guarantee of obligations (section 511). The Secretary has delegated his powers and duties under Title V, except those powers contained in section 506(c), to the Administrator of the Federal Railroad Administration (the "Administrator").

The Administrator is publishing separately regulations concernihg procedures to be used by railroads in applying for financial assistance under section 505 of the Act.

Proposed regulations governing the procedures to be used in applying for a commitment to guarantee and guarantee (hereinafter both a commitment and a guarantee are referred to jointly as a "guarantee") of obligations under section 511 of the Act, and the standards under section 511(1) governing the maintenance of facilities by recipients of guarantees of obligations were published in the FEDERAL REGISTER on June 1, 1976 (41 FR 22228). These proposed regulations also applied to applications under section 511 for guarantee of obligations of the Consolidated Rail Corporation ("ConRail") for electrification of high-density mainline routes, as provided in section 211(1) of the Regional Rail Reorganization Act of 1973, as amended ("RRRA"), and for guarantee of obligations to improve intercity rail passenger service on lines owned by the applicant and located outside the Northeast Corridor (defined in section 701(c) of the Act), as provided in section 517 of the Act. Applications for the purposes set forth in section 517 may also be filed under section 505 of the Act.

A public meeting to discuss these proposed regulations was held on June 11, 1976. In addition, interested parties were invited to submit on or before July 1, 1976, their written comments on the proposed regulations. Numerous persons, organizations, and governmental entities either participated at the meeting or filed comments in response to the proposed regulations, and each comment was given due consideration by the Federal Railroad Administration ("FRA"). As a result of these comments, several substantive changes are being made in the regulations, which are discussed after a summary of section 511.

SUMMARY OF SECTION 511

A. OBLIGATIONS THAT MAY BE GUARANTEED

Under section 511, the Administrator can guarantee the payment of the principal balance of, and any interest on, an obligation of an applicant prior to, on, or after the date of execution or disbursement of such obligation if the proceeds of such obligation shall be or have been used to acquire or to rehabilitate and improve facilities or equipment used in rail services. Section 511(a) provides for the Administrator to grant applications for such guarantees, in whole or in part, if he determines that the obligation is eligible for such guarantee.

Section 501(6) defines an obligation as a bond, note, conditional sale agreement, equipment trust certificate, security agreement, or other obligation issued or granted to finance or refinance equipment or facilities acquisition, construction, rehabilitation or improvement. Because this definition specifically mentions among eligible obligations those that are issued to finance or refinance construction, guarantees may be extended for such obligations.

"Applicant" is defined by section 501 (1) to mean any railroad or other person (including a governmental entity) which submits an application to the Administrator for the guarantee of an obligation under which the applicant is an obligor (the debtor under the obligation and any successor or assignee of such obligor who is approved by the Administrator). Under this definition of "applicant", State and local governments may apply for and receive guarantees.

B. PREREQUISITES TO GUARANTEES

Section 511(c), (e)(2), and (h) list the prerequisites to guarantees. Section 511 (c) provides that prior to making a guarantee of an obligation, the Administrator shall make a determination of the value of the facilities or equipment to be financed or refinanced by the obligation. If enacted, the RTIA would eliminate this requirement.]

Section 511(e)(2) provides that obligations may be guaranteed for the purpose of improving the Northeast Corridor if the proceeds shall be or have been used to acquire or rehabilitate and improve facilities or equipment in a manner that returns the most public benefits for the costs involved.

Section 511(h) lists as prerequisites to any guarantee six findings the Administrator must make in writing:

(1) That an obligation for equipment acquisition, rehabilitation, or improvement is secured by such equipment;

(2) That payment of the obligation is, by the terms of such obligation, required to be made within 25 years from the date of its execution;

(3) That the financing is justified by present and probable future demand for rail services to be rendered by the applicant and will serve to meet demonstrable rail service needs and to provide shippers with improved service;

(4) That the applicant has given reasonable assurances that the facilities or

V 41 1976 OCT 8 76 UMI

equipment being acquired, rehabilitated, or improved with the proceeds of the obligation will be economically and efficiently utilized;

(5) That the probable value of any equipment or facilities to be improved, rehabilitated or acquired is sufficient to provide the United States with reasonable security and protection in the event of default by the obligor, in the case of repossession by the holder of the obligation, or in the case of possession or purchase by the Administrator; and

(6) That the transaction will result in an improvement in the ability of any affected railroad to transport freight or passengers. [If enacted, the RTIA would modify the findings required in paragraphs (1) and (5).].

C. SECTION 511(I) STANDARDS

Section 511(i) requires that recipients of guarantees shall, consistent with their capital resources, maintain their facilities in accordance with standards to be issued by the Administrator.

D. SECTION 511(J) CONDITIONS

Section 511(j). requires that before a guarantee of an obligation may be approved the obligor must agree in writing that so long as any principal or interest is due and payable on such obligation:

(1) There will not be any increase in discretionary dividend payments over the average ratio which such payments bore to earnings for the applicable fiscal period during the five years preceding such proposed increase without the prior approval of the Administrator;

(2) The obligor will not use any assets or revenues (except cash) related to or derived from railroad operations in non-rail enterprises without the prior approval of the Administrator; and

(3) The obligor will take all reasonable and practicable steps possible to improve the equitable distribution and efficient and expeditious use of all equipment and facilities to improve rail service in accordance with guidelines established by the Administrator.

Approval of an increase in dividend payments or use of assets and revenues related to or derived from railroad operations in non-rail enterprises under paragraph (1) and (2), respectively, may be granted if the Administrator makes a written finding, after a public hearing, that such increase in dividends or use of assets or revenues will not materially affect the ability of the obligor to comply with the requirements of section 511. [If enacted, the RTIA would modify the section 511(j) conditions.]

E. CHARGES TO BE ASSESSED AND RATE OF INTEREST

Section 511(1) provides that the Administrator shall charge each applicant an amount he deems reasonable for the investigation of any application, for appraisal of the value of the equipment or facilities involved, and for making determinations and findings necessary under this part. Such charges may not aggregate more than one-half of one percent of the principal amount of the obligation for which a guarantee is sought.

In addition, section 511(m) provides that the Administrator shall assess and collect from the obligor an annual premium charge on each obligation guaranteed in an amount not to exceed an annual rate of one percent on the unpaid principal balance of such obligation at the time payment is due. Payment is due initially when the obligation is guaranteed, and, thereafter, on the anniversary date of such guarantee.

Section 511(f) provides that the rate of interest (exclusive of premium charges and service fees) which shall be paid on the unpaid principal balance of each obligation guaranteed shall not exceed an annual percentage rate which the Administrator determines to be reasonable, taking into consideration the prevailing interest rates for similar obligations in the private market.

F. FINANCING AGREEMENT

If the Administrator approves an application under section 511, the section requires that he agree to guarantee an obligation under such terms and conditions and pursuant to such regulations as he deems appropriate, consistent with the purposes of Title V. Guarantees must be extended in accordance with the provisions of sections 511 through 513 of Title V and with such rules as the Administrator may deem necessary to protect the interest of the United States.

Section 511(d) permits the Administrator to approve any modification of any provision of a guarantee of an obligation, including the rate of interest, payment schedule of interest or principal, security, or any other term, if he finds in writing that such modification is equitable and in the overall best interests of the United States under Title V and that the holder of the obligation consents to such modification.

G. AMOUNT OF OBLIGATIONS WHICH MAY BE GUARANTEED

The aggregate unpaid principal amounts of obligations which the Administrator may guarantee may not excede $1 billion at any one time, of which not to exceed $150 million may be guaranteed to finance improvements in the Northeast Corridor. Section 606 of the Act provides that within the $1 billion of guarantee authority up to $200 million in obligations of ConRail may be guaranteed for the electrification of high-density mainline routes upon request by ConRail pursuant to section 211(i) of the RRRA, when such electrification will return operating and financial benefits to ConRail and will facilitate compatibility with existing or renewed electrification systems. Finally, the Administrator is authorized by section 517 to provide financial assistance, in the aggregate sum of up to $200 million, through the financial assistance provisions of and within the authorizations of Title V, either under section 505 or section 511, to any railroad for the purpose of improving intercity rail passenger service on any lines of such railroad which are located outside of the Northeast Corridor, as defined in 701(c) of the Act.

PUBLIC COMMENTS AND REVISIONS TO THE REGULATIONS

Comments that were applicable to requirements that are contained in both the regulations to section 505 and the regulations to section 511 are addressed in the preamble to the section 505 regulations. Those comments that are applicable only to section 511 and the regulations issued thereunder are discussed herein.

Many of the comments were critical of requirements in the regulations that are imposed by statute. For example, it was felt the dividend payout ratio restrictions will hamper an applicant's ability to raise equity capital on its own and there was an objection to the requirement of a public hearing before the Administrator can approve an increase in dividend payments or the use of assets or revenues derived from railroad operations in non-railroad enterprises. It was also suggested that an obligor, with the approval of the Secretary, be permitted to substitute or provide additional equipment, facilities, securities, or future earnings as security for section 511 guarantees. The Department has proposed amendments to Congress which would meet these concerns. However, absent the enactment of amendments to section 511, such as those contained in the RTIA, the statute cannot be construed nor can the regulations be changed to meet these concerns.

Other public comments received fell into the following general areas: (A) eligibility of a party other than a railroad; (B) eligibility of different types of transactions; (C) use of traffic density to determine project eligibility; (D) maturity period of the guarantee; (E) applicability of section 20a of the Interstate Commerce Act; (F) form and content of applications; and (G) terms and conditions of the financing documents.

A. *Eligibility of a party other than a railroad.* One commenter questioned whether a party other than a railroad may apply for a guarantee under section 511 if the obligation for which the guarantee is sought is incurred to finance the acquisition of railroad operating equipment. An applicant for purposes of section 511 can be any railroad or other person (including a governmental entity) which submits an application for the guarantee of an obligation under which the applicant is an obligor. The application must, of course, meet the other requirements of section 511 and the regulations.

While the definition of applicant for section 511 purposes is extremely broad, it should be noted that in order for the Administrator to guarantee an obligation under section 511, he must be able to make the findings under subsection (h) and the conditions of subsections (i) and (j) must be agreed to. The provisions of subsections (h), (i) and (j) effectively require that either the applicant be a railroad or that the railroad

directly affected by the obligation either join in the application or enter into side agreements with the applicant which allow the provisions of section 511 to be met.

B. *Eligibility of different types of transaction.* Commenters raised the questions of whether guarantees would be approved in connection with (1) leveraged leases or other leasing transactions, (2) bonds issued to reimburse the railroad for expenditures used to acquire, rehabilitate or improve facilities or equipment, (3) 100 percent loans for the purchase of new rolling stock, and (4) preference shares.

The first issue raised is whether leases will be guaranteed under section 511 and in particular leveraged leases. Section 511(a) permits the Administrator to guarantee "obligations" whose proceeds are used "to acquire or to rehabilitate and improve facilities or equipment" used in rail service. The term obligation is defined in section 501(6) broadly enough to include leases. Since railroads commonly utilize leases to acquire needed facilities or equipment, leases (other than leveraged leases) are construed as falling within the definition of the term "acquisition" and, therefore, will be eligible for guarantees. However, since most railroads are able to obtain necessary equipment without Federal guarantees and since the primary problem facing the rail industry is the need to consolidate and upgrade the railroads' physical plant, the Administrator will not guarantee equipment leases absent a strong showing of need for such a guarantee.

With respect to leveraged leases, the President's Economic Policy Board has concluded that it is improper for government assisted loans to be used as debt capital in leveraged leases, except for the MARAD shipbuilding program. The rationale for this decision is the very high cost of such arrangements to the government due to the revenues foregone as a result of tax sheltering.

A second issue raised was whether guarantees would be made of bonds issued to reimburse a railroad for expenditures used to acquire, rehabilitate or improve facilities or equipment. Section 511(a) does not authorize the guarantee of obligations unless the proceeds of such obligations have been or will be used to acquire or to rehabilitate and improve facilities or equipment; this would exclude guarantees to reimburse a railroad for previous expenditures where proceeds of the obligation to be guaranteed were not to be used to fund such expenditures directly. To qualify for a guarantee, any financing or refinancing must, of course, meet the other requirements of section 511.

Another commenter questioned whether guarantees would be available for 100 percent of the acquisition cost of new equipment. Such a guarantee could be made so long as the other provisions of section 511 were met.

Finally, one commenter questioned whether preference shares, either issued under section 505 or otherwise, would be eligible for guarantees. The Administrator will not guarantee preference shares purchased by the Administrator pursuant to section 505 since such guarantees would result in unnecessary depletion of the funding authorized under Title V. Other types of preference shares would qualify for guarantees under section 511 only if such shares were determined by the Administrator to be debt as opposed to equity obligations.

C. *Use of traffic density to determine project eligibility.* One commenter requested that traffic density not become a prime criterion for determining project eligibility for funding under section 511. Section 511(h)(3) requires that a finding be made that "the financing or refinancing is justified by the present and probable future demand for rail services • • •." Clearly, existing traffic density data is highly relevant to this finding, but it is not the sole criterion. Information as to "probable future demand" would also be an important consideration.

This commenter also suggested that the financing program should not exclude lines which are of particular significance to the transportation needs of less populated areas. The Department does not intend to administer the section 511 program to preclude financing for projects which have a high priority in a limited geographical area even though not a major factor in the National system. Sections 511(h)(3) and (6), which are discussed earlier, clearly indicate that one of the conditions for eligibility is the requirement that the transaction meet demonstrable rail service needs and enable the affected railroad to better transport freight or passengers. Relationship of the project to the national transportation system will be considered but is not a determining factor in the eligibility of a project for financing under section 511.

D. *Maturity period of the guarantee.* One commenter raised the question of how the 25 year maximum maturity time is to be measured. Section 511(h)(2) clearly provides that "payment of the obligation is required by its terms to be made within 25 years from the *date of its execution*" (emphasis added).

E. *Applicability of section 20a of the Interstate Commerce Act.* One commenter questioned whether securities issued under section 511 will be exempt from section 20a of the Interstate Commerce Act. While section 510 of the Act provides an exemption from section 20a of the Interstate Commerce Act in the case of preference shares issued under section 505, no such exemption is provided for obligations guaranteed under section 511.

F. *Form and content of applications.* One commenter requested that the term "affected railroad," which is used in several places in the proposed regulations, be clarified. The regulations have been amended to meet this concern.

Another commenter suggested that the term "affiliated entity" in § 260.7(a)(5) of the proposed regulations be defined so that it excludes officers of the railroad applicant or non-transportation affiliates of the railroad or the railroad's parent. While the Department is not concern with personal obligations to or claims against the United States by officers of the applicant, it is interested in knowing of obligations or claims relating to the non-transportation corporate entities of the applicant and the applicant's parent. Accordingly, § 260.7(a)(5) has been amended to indicate clearly that it applies only to affiliated corporate entities of both the applicant and the applicant's parent.

One commenter inquired whether a standardized valuation formula would be established for purposes of section 511 financing. The Department does not intend at this time to adopt a standardized valuation methodology but rather will apply the requirements of sections 511(c) and (h)(5) on a case-by-case basis.

Another commenter questioned the need for the information requested about the holder or prospective holder in § 260.7(a)(11) of the proposed regulations. The information requested is needed to insure that there has been a full arms length negotiation between the holder and the obligor and that the rate of interest on the obligation is reasonable.

Another commenter requested that section 511(i) be interpreted as imposing maintenance requirements with respect to only those facilities that are the subject of the obligation being guaranteed. The Department has so interpreted section 511(i) and the proposed regulations (§ 260.21) so reflected this interpretation. The Department does, however, continue to be concerned that an applicant maintain all its facilities and equipment.

One commenter suggested that in interpreting the provisions of section 511(j)(2) the Administrator look to property or enterprises owned by the obligor the earnings of which may accrue to the obligor as being rail or rail related enterprises. The Department feels that it would be more appropriate to apply the provisions of section 511(j)(2) on a case-by-case basis rather than establish an interpretation which might not be applicable to the variety of holding companies and investment practices which exist in the railroad industry.

Another commenter suggested that the requirement of section 511(j)(3) is vague and needs further interpretation. Section 511(j)(3) requires that the

> obligor will take all reasonable and practicable steps possible, in accordance with such guidelines as may be established by the Secretary, to improve the equitable distribution and efficient and expeditious use of all equipment and facilities in order to improve rail service.

As was indicated in the preamble to the proposed regulations, guidelines governing distribution and use of equipment and facilities will be negotiated and placed in the terms and conditions of the guarantee agreements. These terms and conditions must, of necessity, take into consideration the particular operations of each railroad applicant.

V 41 1976 OCT 8 76 UMI

Another commenter suggested that the language in § 260.7(a)(5)(A) of the proposed regulations be changed from "all market analyses and studies that have been performed" to "a market analysis and study". We see no justification for such a change. In determining whether a demonstrable need for rail service will be met by the proposed financing, the Administrator should have access to all market analyses and studies which bear on this point.

G. *Terms and conditions of the financing documents.* One commenter questioned whether section 511 loan guarantee agreements will have penalties for prepayment or refinancing. This will, of course, be a matter which will have to be negotiated between the obligor and the lender.

Another commenter suggested that section 511(d) be construed to mean that the consent of the obligor as well as the consent of the holder of an obligation must be obtained prior to any modification of a guarantee of that obligation. This is a matter which is best left to be addressed in the financing documents.

Inflationary impact analysis. The Administrator has determined that the obligation guarantee program created by section 511 is not a major proposal under Executive Order 11821, November 27, 1974, or Department of Transportation Order 2050.4, February 2, 1976, requiring an inflationary impact evaluation.

In consideration of the foregoing, 49 CFR, Chapter II is amended by adding a new Part 260 to read as follows:

Subpart A—Procedures for Application for Commitment to Guarantee or Guarantee of Obligations

Sec.

260.1 Applicability.
260.3 Definitions.
260.5 Eligibility.
260.7 Form and content of application.
260.9 Required exhibits.
260.11 Preapplication and application procedure.
260.13 General instructions.
260.15 Information requests.
260.17 Records, audits, and examinations.
260.19 Waivers and modifications.

Subpart B—Standards for Maintenance of Facilities by Recipients of Obligation Guarantees

260.21 Applicability.
260.23 Definitions.
260.25 Standards.
260.27 Inspection and reporting.

AUTHORITY: Railroad revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210; The Department of Transportation Act, 49 U.S.C. 1651 et seq., Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

Subpart A—Procedures for Application for Commitment to Guarantee or Guarantee of Obligations

§ 260.1 Applicability.

This subpart prescribes the procedures governing applications for a commitment to guarantee or a guarantee of the payment of the principal balance of, and any interest on, an obligation of an applicant under section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("Act"). Applications for a commitment to guarantee or a guarantee of obligations of the Consolidated Rail Corporation for electrification of high-density mainline routes must be filed in accordance with these procedures, as provided in section 211(1) of the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 721(1)). These procedures also govern applications for a commitment to guarantee or guarantee of obligations incurred for the purpose set forth in section 517 of the Act, improvement of intercity rail passenger service on lines of the applicant located outside the Northeast Corridor, being the properties acquired by the National Railroad Passenger Corporation pursuant to Title VII of the Act and described in section 701(a)(4) of the Act.

§ 260.3 Definitions.

As used in this part—

(a) "Act" means the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210, February 5, 1976).

(b) "Administrator" means the Federal Railroad Administrator, or his delegate.

(c) "Applicant" means any railroad, or other person (including a governmental entity) that submits an application to the Administrator for the guarantee of an obligation under which it is an obligor or for a commitment to guarantee such an obligation.

(d) "Commission" means the Interstate Commerce Commission.

(e) "Equipment" means any type of new or rebuilt standard gauge locomotive, caboose, or general service railroad freight car the use of which is not limited to any specialized purpose by particular equipment, design, or other features, or any other type of car designated by the Administrator upon a written finding that such designation is consistent with the purposes of the Act. General service railroad freight car includes a boxcar, gondola, opentop or covered hopper car, and flatcar.

(f) "Facilities" means—

(1) Track, roadbed, and related structures, including rail, ties, ballast, other track materials, grading, tunnels, bridges, trestles, culverts, elevated structures, stations, office buildings used for operating purposes only, repair shops, enginehouses, and public improvements used or usable for rail service operations;

(2) Communication and power transmission systems, including electronic, microwave, wireless, communication, and automatic data processing systems, electrical transmission systems, powerplants, power transmission systems, powerplant machinery and equipment, structures, and facilities for the transmission of electricity for use by railroads;

(3) Signals, including signals and interlockers;

(4) Terminal or yard facilities, including trailer-on-flat-car and container-on-flatcar terminals, express of railroad terminal and switching facilities, and services to express companies and railroads and their shippers, including ferries, tugs, carfloats, and related shoreside facilities designed for the transportation of equipment by water; or

(5) Shop or repair facilities or any other property used or capable of being used in rail freight transportation services or in connection with such services or for originating, terminating, improving, and expediting the movement of equipment.

(g) "FRA" means Federal Railroad Administration.

(h) "Including" means including but not limited to.

(i) "Holder" means the obligee or creditor under an obligation, except that when a bank or trust company is acting as agent or trustee for such an obligee or creditor pursuant to an agreement to which the obligor is a part, the term refers to such bank or trust company.

(j) "Obligation" means a bond, note, conditional sale agreement, equipment trust certificate, security agreement, or other obligation issued or granted to finance or refinance equipment or facilities acquisition, construction, rehabilitation, or improvement.

(k) "Obligor" means the debtor under an obligation, including the original obligor and any successor or assignee of such obligor who is approved by the Administrator.

(l) "Project" means the use of the proceeds of the obligation for which a guarantee or guarantee commitment is sought.

(m) "Railroad" means a common carrier by railroad or express as defined in section 1(3) of Part I of the Interstate Commerce Act (49 U.S.C. 1(3)), including the National Railroad Passenger Corporation and the Alaska Railroad.

(n) "Trustee" means the trustee, or trustees if more than one trustee has been appointed, of an applicant in bankruptcy.

§ 260.5 Eligibility.

Under section 511 the Administrator may guarantee and make commitments to guarantee the payment of the principal balance of, and any interest on, an obligation of any applicant prior to, on, or after the date of execution or the date of disbursement of such obligation, if the proceeds of such obligation shall be or have been used to acquire or to rehabilitate and improve facilities or equipment.

§ 260.7 Form and content of application.

(a) Each application shall include, in the order indicated and identified by applicable section numbers and letters corresponding to those used in this part, the following information:

(1) Full and correct name and principal business address of the applicant;

(2) Date of applicant's incorporation, or organization if not a corporation, and name of the government, state or territory under the laws of which it was incorporated or organized. If applicant is a trustee, the name and address of the reorganization court under the direction of which applicant is acting, and the docket number of the proceeding. If applicant is a partnership, association, or other form of organization other than a corporation, a full description of the organization should be furnished;

(3) Name, title, and address of the person to whom correspondence regarding the application should be addressed;

(4) Certified copy of proposed or executed obligation agreement, including any related agreements or other documents, and detailed description of the obligation and of the series or issue of which the obligation is a part, including—

(i) Total amount of the obligation;

(ii) Detailed description of the project and its purpose or purposes, including—

(A) A description of all facilities or equipment and the physical condition of such facilities or equipment included in or directly affected by the proposed project and a description of the project;

(B) Each part or sub-part into which the project may reasonably be divided, the priority and schedule of expenditure for each part or sub-part;

(C) Estimated timing of the expenditure of the proceeds of the obligation; and

(D) Statement of whether the project involves another railroad or other participant, through joint execution, coordination, or otherwise; if so, description of the relative participation of applicant and such other railroad or participant, including statement or financing arrangements of each participant, portion of the work to be performed by each participant, and contemplated level of usage of the equipment or facility of each participant when the work is completed, along with a statement by a responsible officer or official of the other railroad or participant that the information provided reflects their agreement on these matters;

(iii) Effective date;

(iv) Schedule for repayment of principal;

(v) Description of the interest in facilities or equipment to be financed or refinanced by the obligation for which a guarantee is sought that would be pledged to the Administrator, and applicant's opinion of the value of this security interest and the basis for such opinion; and

(vi) Where the obligation for which a guarantee is sought is outstanding, actual effective rate of interest; or where the applicant has discussed with a potential holder the terms of an obligation to be issued, the proposed effective rate of interest;

(5) Statement, in summary form, showing financial obligations to or claims against the United States or obligations for which the United States is guarantor, if any, by applicant or any affiliated corporate entity of the applicant or the applicant's parent as of the date of the application, including:

(i) Status of any claims under litigation; and

(ii) Any other debits or credits existing between the applicant and the United States, showing the department or agency involved in such loans, claims and other debts;

(6) An anlysis that includes:

(i) Statement, together with supporting evidence including copies of all market analyses and studies that have been performed to determine present and future demand of rail services, that the financing is justified by present and future demand for rail services, will meet existing needs for such services, and will provide shippers with improved service;

(ii) Description of the impact of the financing upon the projected traffic to be originated, terminated, or carried by the obligor for at least the five years immediately following completion of the project; and

(iii) Description of any other benefit which would accrue to the applicant from the proceeds of the obligation;

(7) Statement, together with supporting evidence, that the facilities or equipment being acquired, rehabilitated or improved will be efficiently and economically utilized, including:

(i) Estimated rate of return on the project calculated in accordance with the applicant's internal, corporate methodology, and where practicable, by determining the discount rate for which the present value of the stream of annual benefits associated with and over the life of the project equals the present value of the stream of annual costs associated with and over the life of the project. The detailed stream of annual project costs (including any increase in labor costs that will result from the labor protection arrangements required by section 516 of the Act) and annual project benefits used to calculate the rate of return, and a statement of the assumptions and bases for calculations behind each of the items of the detailed streams must be provided. At such time as FRA develops general guidelines and later a standard methodology for computing rate of return, FRA will recalculate the resulting discount rate in accordance with the guidelines or the standard methodology (if available) and will make the guidelines or standard methodology available to potential applicants for use in subsequent applications under this part;

(ii) Explanation of the manner in which the project will increase the economical and efficient utilization of equipment and facilities; and

(iii) Documentation of any other improvements in service as a result of the project, including service reliability between origin and destination point pairs and reduction in time from load to load car cycle by car type;

(8) Statement, together with supporting evidence, that the transaction will improve the ability of any affected railroad to transport passengers or freight;

(9) Statement of applicant's maintenance program for its entire rail system and planned maintenance program for the equipment or facilities financed by the proceeds of the obligation;

(10) Certified statement that applicant will pay the Administrator whatever investigation fees the Administrator assesses with respect to investigation of the application, appraisal of the value of the equipment or facilities involved, and any necessary determinations or findings, up to a ceiling of one-half of one percent of the obligation for which a guarantee is sought;

(11) With respect to each existing holder or proposed prospective holder, a statement as to:

(i) Full and correct name and principal business address;

(ii) Reference to applicable provisions of law and the charter or other governing instruments conferring authority on the holder to accept the obligation;

(iii) Brief statement of the circumstances and negotiations leading to the agreement by the holder to take the proposed obligation;

(iv) Brief statement of the nature and extent of any affiliation or business relationship between the existing or prospective holder and any of its directors, partners, or principal executive officers, on the one hand, and, on the other, the applicant and any of its directors, partners, or principal executive officers, or any person or persons whose name is required to be furnished under paragraph (a)(11)(v) of this section; and

(v) Full and complete statement of all sums to be given by the holder in connection with the proposed obligation including:

(A) Name and address of each person to whom the payment has been made or will be made and nature of any affiliation, association, or prior business relationship between any person named in this paragraph and the holder or any of its directors, partners, or officers;

(B) Amount of the cash payment, or the nature and value of other consideration; and

(C) Any condition upon the obligation of the obligee to make such payment;

(12) Detailed statement as to whether the project will, directly or indirectly, cause a major change in land use or a major change in the intensity of railroad related activities on existing corridors or at other locations, and, if so, an assessment of the impact of such use on the environment, including—

(i) Description of the environment in the area of the project before commencement of the project, together with statement of other Federal activities in the area which are known or should be known to the applicant;

(ii) Statement of population and growth characteristics of the area and any population and growth assumptions made by applicant in planning the project. Such statement should use the rates of growth in the projection compiled for the Water Resources Council by the Bureau of Economic Analysis of the Department of Commerce and the Economic Research Service of the Department of Agriculture;

(iii) Statement of the relationship of the project to proposed land use plans, policies, and controls of affected communities. Where such project is inconsistent with any such plans, policies, or controls, the statement should describe

V 41 I 197 OCT 8 76 UMI

and explain the reasons for such inconsistency in detail;

(iv) Statement of the positive and negative effects of the project on the environment, including effects on air and water, soil quality, and noise level;

(v) Statement of the relationship to any applicable Air Quality Implementation Plan under the Clean Air Act (42 U.S.C. 1857);

(vi) Description of any alternatives to the project that have been considered with respect to impact on the environment;

(vii) Discussion of problems and objections raised by other Federal, State or local agencies, and citizens with respect to impact of the project on the environment;

(viii) Statement of the relationship between local short-term uses of the environment by the project and the long-term effects on the environment; and

(ix) Statement of any irreversible or irretrievable commitments of natural resources, including impact on public parks, recreational areas, wildlife refuges, historic sites, and similar areas referenced in section 4(f) of the Department of Transportation Act;

(13) Statement of the status of negotiations between applicant and representatives of its employees of local protection agreements required by section 516 of the Act; and

(14) Any other information which the Administrator may deem necessary concerning an application filed under this part.

(b) When applicant is a trustee, the application shall provide all of the information required in paragraph (a) of this section, and in addition shall provide a full and complete statement, together with supporting evidence, demonstrating that applicant can reasonably be expected to become self-sustaining within a reasonable period of time.

§ 260.9 Required exhibits.

There shall be filed with and made a part of each application and copy thereof the following exhibits, except that exhibits filed with the Administrator pursuant to some other statutory provision or regulation which are in the same format as the following exhibits may be incorporated in and made part of the application filed under this part by reference. While the application is pending, when actual data become available in place of the estimated or forecasted data required in the exhibits under this Part, such actual data must be reported promptly to the Administrator in the form required in the appropriate exhibit.

(a) *Exhibit A.* (1) Copies of resolutions of stockholders or the board of directors, or duly authorized committee thereof, authenticated by a proper officer of applicant, designating by name and for that purpose the executive officer by whom the application is signed, verified, and filed on behalf of the applicant;

(2) If applicant is not a corporation, documentary evidence showing authorization of the obligation and designation of the individual signing, verifying, and filing the application on behalf of the applicant;

(3) If applicant is a trustee, certified copy of the order of the court having jurisdiction authorizing the filing of the application; and

(4) If applicant is a state or local public body or agency thereof, copy of resolution of the appropriate body together with a copy of the applicable laws and regulations permitting applicant to incur such obligation.

All documents required to be submitted in this exhibit shall be certified by the appropriate official of applicant.

(b) *Exhibit B.* Opinion of counsel that he is familiar with the corporate or other organizational powers of the applicant and that the applicant is authorized to make the application. Such opinion shall also cover applicant's authority to incur the obligation and to enter into an agreement with the Administrator for the commitment to guarantee or the guarantee of such obligation. If the charter, articles of incorporation, or by-laws do not permit the issuance of the proposed obligation, the opinion shall so state and shall list the actions necessary to obtain authorization for such issuance. Any amendments to the charter, articles of incorporation, or by-laws, and all resolutions of the board of directors, executive committee of the board of directors, or stockholders, that will be required for issuance the obligation shall be provided to the Administrator as soon as they are available.

(c) *Exhibit C.* Map of applicant's existing railroad with location of project indicated, if appropriate.

(d) *Exhibit D.* Statement showing to the latest available date but in any event to a date no less recent than the end of the third month preceding the date of filing of the application:

(1) Maximum number of locomotive units out of service during each quarter due to business conditions; maximum number of such units out of service during each quarter due to mechanical defects; and ratio of each to total ownership quarterly for each of the last three calendar years but not earlier than the quarter ending June, 1974, and the current calendar year; and

(2) Maximum number of general service freight cars out of service during each quarter due to business conditions; maximum number of such cars out of service during each quarter due to mechanical defects; and ratio of each to total number of general service freight cars owned by applicant quarterly for each of the last three calendar years but not earlier than the quarter ending June, 1974, and the current calendar year.

(e) *Exhibit E.* A copy of applicant's general balance sheet as of a date no less recent than the end of the third month preceding the date of filing of the application, in account form and detail as required in schedule 200 of the Commission's annual report R–1 or R–2, as appropriate, together with the following schedules (where changes in accounts from the end of the prior year to date of the application have not been significant, copies of the appropriate schedules in the prior year's R–1 or R–2 with marginal notations listing the changes may be submitted):

(1) Particulars of account 704, Loans and Notes Receivable, in form and detail as required in schedule 201 of annual report R–1 for the Class I railroads, and in similar form for the Class II railroads except that for Class II railroads loans and notes receivable that are each less than $25,000 may be combined into a single amount;

(2) Particulars of investments in affiliated companies and other investments in form and detail required in schedules 205 and 206 of annual report R–1, or schedules 1001 and 1002 of annual report R–2, as appropriate;

(3) Particulars of balances in accounts 741, Other Assets, and 743, Other Deferred Charges, in form and detail required in schedule 216 of annual report R–1 or schedule 1703 of annual report R–2, as appropriate;

(4) Particulars of loans and notes payable in form and detail required in schedule 223 of annual report R–1, or schedule 1701 of annual report R–2, as appropriate, as well as information as to bank loans, including the name of the bank, date and amount of the original loan, current balance, maturities, rate of interest, and security, if any;

(5) Particulars of long-term debt in form and detail required in schedules 218 and 219 of annual report R–1 or schedules 670, 695, 901, 902 and 1702 of annual report R–2, as appropriate, together with a brief statement concerning each mortgage, pledge, and other lien, indicating the property or securities encumbered, the mortgage limit per mile, if any, and particulars as to priority;

(6) Particulars of balance in account 784, Other Deferred Credits, in form and detail required in schedule 225 of annual report R–1 or schedule 1704 of annual report R–2, as appropriate; and

(7) Particulars as to capital stock in form and detail required in schedules 228, 229, and 230 of annual report R–1 or schedule 690 in annual report R–2, as appropriate.

(f) *Exhibit F.* A spread sheet showing comparative income statements data for each month of the year in which the application is filed in account form similar to that required in column (a) of schedule 300 of annual report R–1 or R–2 as appropriate. For those months preceding and ending upon the date of the balance sheet presented in Exhibit I, the income statement data shall be reported on an actual basis and so noted. For those months between the dates of the balance sheet and the filing of the application, the income statement data shall be reported on an estimated basis and so noted. For those months between the date of the application and the end of the year, the income statement data shall be presented on a forecasted basis and so noted.

(g) *Exhibit G.* A spread sheet showing forecasted income statement data for each of the four years subsequent to the year in which the application is filed

both before and after giving effect to the proceeds of the assistance requested in the application, in account form and detail similar to that required in column (a) of schedule 300 of annual report R–1 or R–2, as appropriate, together with a statement setting forth the bases for such forecasts.

(h) *Exhibit H.* A spread sheet showing changes in financial position for the year in which the application is filed in account form and detail as required in schedule 309 of annual report R–1 or R–2 as appropriate as follows:

(1) For that period ending on the date of the balance sheet in Exhibit E, based upon actual data; and

(2) For that period from the balance sheet date to the end of the year, based upon estimated and forecasted data.

(i) *Exhibit I.* A spread sheet showing forecasted changes in financial position for each of the four calendar years following the filing of the application, both before and after giving effect to any funds requested in the application and including a statement showing the bases for such estimates, in account form and detail as required in schedule 309 of the annual report R–1 for Class I railroads and in similar form and detail for Class II railroads.

(j) *Exhibit J.* With respect to equipment proposed to be rehabilitated, improved, maintained, or acquired in the application, a statement indicating number of units and in-service or out-of-service status and, as appropriate:

(1) For locomotives, service type, age, size, horsepower, name of builder, description of work, and unit cost of proposed work; and

(2) For freight cars or intermodal equipment, information as to service type (box, gondola, flat, etc.), age, capacity, description of work, and unit costs of proposed work.

Such statement shall show the total cost of the project, types and quantities of work items, unit cost of each item, and distribution of such cost by primary accounts of the Commission's Uniform System of Accounts separated where applicable between material, labor, and other; the ownership of all equipment which is the subject of the project; and the dates on which work is to be commenced or completed. Direct labor, supervision, material costs, contingencies, and any applicable overhead expenses that are included in the total cost of the project should be shown separately and identified.

(k) *Exhibit K.* With respect to the maintenance, rehabilitation, improvement, acquisition, or construction of facilities proposed in the application, a statement showing, as appropriate:

(1) Track Class, as defined by the FRA Track Safety Standards in Part 213 of this chapter, and maximum allowable speed under which each line on which maintenance, rehabilitation, improvement, acquisition or construction is proposed has been and is being operated and the reasons therefor, the track class, maximum allowable speed, and signal requirements necessary in the judgment of the railroad to provide safe, reliable and competitive rail services over such lines, and the highest track class and maximum allowable speed at which each such line will be designated when the proposed project is completed;

(2) Dates on which project is proposed to be commenced and completed; and dates on which any part or sub-part into which the project may reasonably be divided is proposed to be commenced and completed;

(3) Types and quantities of work items, unit cost of each item, cost of project in total and by parts or sub-parts into which the project may be reasonably divided, and distribution of such costs by primary accounts of the Commission's Uniform System of Accounts, separated where applicable between material, labor and other. Direct labor, supervision, material costs, contingencies, and any applicable overhead expenses that are included in the costs of the project should be shown separately and identified.

(l) *Exhibit L.* A draft notice of filing, to be published by the Administrator in the FEDERAL REGISTER, which shall contain a brief summary of the project(s) proposed to be funded, including as applicable:

(1) The name and address of applicant;

(2) A brief description of the project(s) proposed to be funded, the total cost of such project(s), and the amount of Federal financial assistance sought;

(3) A brief description of the facilities or equipment to be acquired, rehabilitated or improved, including where appropriate, city or county and state location, termini, and approximate distance in miles;

(4) The justification for the project(s); and

(5) A final paragraph which shall read as follows:

Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street, S.W., Washington, D.C. 20590, not later than 30 days after the date on which this notice is published in the FEDERAL REGISTER. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor.

The comments will be taken into consideration by the Federal Railroad Administration in evaluating the application. However, formal acknowledgment of the comments will not be provided.

NOTE.—The account forms referred to in the exhibits are those of the Commission's Uniform System of Accounts for Railroad Companies in use on October 1, 1976. However, the information required in any of the exhibits shall give effect to any modification of the Commission's Uniform System of Accounts for Railroad Companies in effect on the date of filing the application.

§ 260.11 Preapplication and application procedure.

(a) When a railroad or any other person has developed plans for a project for which it may wish to seek assistance under this part, a responsible official of the railroad or other person may request a meeting with the Associate Administrator for Federal Assistance of the FRA to discuss those plans. Upon receipt of such request, the Associate Administrator will promptly schedule a meeting at which the railroad or other person will present to representatives of the FRA the proposed project and discuss with them information which must be submitted in the application and the type of terms and conditions and financing documents that will be utilized in connection with financial assistance provided under section 511. Applicants are not required to prepare a draft application or other special information for the preappliction conference; however, applicants should be prepared to discuss information which management has used in making its initial decision to seek assistance.

(b) The following procedure shall govern the execution and filing of the application:

(1) The original application shall bear the date of execution, be signed with ink by or on behalf of the applicant, and shall bear the corporate seal in the case of an applicant which is a corporation. Execution shall be by all partners if a partnership, unless satisfactory evidence is furnished of the authority of a partner to bind the partnership, or if a corporation, an association or other similar form of organization, by its president or other executive officer having knowledge of the matters therein set forth. Persons signing the application on behalf of the applicant shall also sign a certificate in form as follows:

---------- certifies that he is the
(Name of official)
---------- of the ----------;
(Title of official) (Name of applicant)

that he is authorized on the part of the applicant to sign and file with the Administrator this application and exhibits attached thereto; that the consent of all parties whose consent is required, by law or by binding commitment of the applicant, in order to make this application has been given; that he has carefully examined all of the statements contained in such application and the exhibits attached thereto and made a part thereof relating to the aforesaid ----------; that
(Name of applicant)

he has knowledge of the matters set forth therein and that all such statements made and matters set forth therein are true and correct to the best of his knowledge, information, and belief.

(Name of official)

(Date)

(2) There shall be made a part of the original application the following certificate by the Chief Financial Officer or equivalent officer of the applicant:

---------- certifies that he is
(Name of officer)
---------- of
(Title of officer)
----------; that he
(Name of applicant)

has supervision over the books of accounts and other financial records of the affected applicant and has control over the manner in which they are kept; that such accounts are maintained in good faith in accordance with the effective accounting and other orders of

V 41 1976 OCT 8 76 UMI

the Interstate Commerce Commission; that such accounts are adequate to assure that proceeds from the financing being requested will be used solely and specifically for the purposes authorized; that he has examined the financial statements and supporting schedules included in this application and to the best of his knowledge and belief those statements accurately reflect the accounts as stated in the books of account; and that, other than the matters set forth in the exceptions attached to such statements, those financial statements and supporting schedules represent a true and complete statement of the financial position of the applicant and that there are no undisclosed assets, liabilities, commitments to purchase property or securities, other commitments, litigation in the courts, contingent rental agreements, or other contingent transactions which might materially affect the financial position of the applicant.

(Name of official)

(Date)

(3) The original application and supporting papers, and ten copies thereof for the use of the Administrator, shall be filed with the Associate Administrator for Federal Assistance of the Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Each copy shall bear the dates and signatures that appear in the original and shall be compete in itself, but the signatures in the copies may be stamped or typed.

§ 260.13 General instructions.

(a) After a complete application and supporting exhibits have been filed with the Administrator, together with any other information the Administrator may request, the Administrator will—

(1) Place a notice of the filing of such application in the FEDERAL REGISTER and afford interested persons an opportunity to submit comments on such application; and

(2) Make a determination of the value of the facilities or equipment to be financed by the obligation, as required by section 511(c) of the Act.

(b) The Administrator will charge an applicant for expenses incurred in investigating an application, including appraisal of equipment or facilities to be secured and making the necessary determinations and findings. Such charges will be assessed and collected as expenses are incurred during the period in which the application is being reviewed.

(c) If the Administrator determines that an application is eligible for a guarantee or guarantee commitment, the following documents must be deposited with the Administrator before the transaction is closed:

(1) Certified copies of resolutions of the board of directors and, where necessary, of the executive committee of the board of directors and the stockholders, and certified copies of the minutes of the meetings at which those resolutions were adopted, and any necessary amendments to the charter, articles of incorporation, or by-laws, authorizing the obligation in conformity with such terms as may be prescribed by the Administrator, and authorizing the designated officers to receive, and give a receipt for, the proceeds from the obligation and to enter into the agreement for guarantee of the obligation;

(2) Certified statement that applicant will comply with the maintenance of facilities standards set forth in subpart B of this part;

(3) Certified statement by the applicant that, if a guarantee or commitment to guarantee an obligation is approved, granted or extended, as long as any principal or interest is owing on such obligation:

(i) There will be no increase in discretionary dividend payments by the applicant over the average ratio which such payments bore to the earnings of the applicant for the applicable fiscal period during the five years preceding such proposed increase, without prior written approval of the Administrator;

(ii) The applicant will not use assets or revenues (other than cash) related to or derived from railroad operations in non-railroad enterprises, without prior written approval from the Administrator; and

(iii) The applicant will take all reasonable and practicable steps possible, in accordance with such guidelines as may be established by the Administrator in the guarantee agreement, to improve the equitable distribution and efficient and expeditious use of all equipment and facilities in order to improve rail service; and

(4) Certified statement by the applicant that it has complied with the provisions of sections 516 and 905 of the Act dealing respectively with employee protection and nondiscrimination.

(d) If a guarantee or commitment to guarantee is extended, the Administrator will enter into an agreement with the applicant. That agreement shall contain the terms and conditions the Administrator deems appropriate to carry out the purposes of section 511 and to secure adequately the interests of the United States, including a maintenance schedule for the equipment or facilities financed by the guaranteed obligation. The agreement will require that the proceeds of the obligation be placed in and disbursed from an account separate from other funds of the recipient. The Administrator will also assess and collect from the obligor an annual premium charge which will not exceed one percent of the principal balance outstanding at the time the payment is due. Such charge will be payable when the guarantee is made and annually thereafter.

§ 260.15 Record, audit, and examination.

(a) Each recipient of financial assistance under this part, whether in the form of guarantee of obligations, contracts, subcontracts, or other arrangements, shall keep such records as the Administrator and the Comptroller General of the United States shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project in connection with which such assistance was given or used, the amount of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Administrator and the Comptroller General of the United States, or any of their duly authorized representatives shall have access for the purpose of audit and examination to any accounts, books, documents, papers, reports, files and records of such receipts which in the opinion of the Administrator or the Comptroller General may be related or pertinent to the guarantee of the obligation, or to contracts, or other arrangements referred to in this part. Representatives of the Administrator or the Comptroller General shall be afforded full facilities for verifying the transactions with the balances or securities held by depositories, fiscal agents, and custodians. All such property of such person or entity shall, to the extent practicable, remain in the possession and custody of such person or entity.

§ 260.17 Information requests.

If an applicant desires that any information submitted in an application or supplement thereto not be released by the Administrator upon request from a member of the public, the applicant must so state and must set forth any reasons why such information should not be released, including particulars as to any competitive harm which would probably result from release of such information. The Administrator will keep such information confidential as permitted by law.

§ 260.19 Waivers and modifications.

The Administrator may, upon good cause shown, waive or modify any requirement of this part not required by law or make any additional requirements he deems necessary.

Subpart B—Standards for Maintenance of Facilities by Recipients of Obligation Guarantees

§ 260.21 Applicability.

This subpart prescribes standards governing the maintenance of facilities, as defined in subpart A of this part, that are being acquired, rehabilitated, improved, or construed with the proceeds of a guaranteed obligation, by the recipient of such guarantee for the period during which any portion of the principal or interest of such obligation remains unpaid.

§ 260.23 Definitions.

The terms defined in subpart A of this part shall have the same meaning for the purposes of this subpart that such terms are given in § 260.3 of this part.

§ 260.25 Standards.

(a) When the proceeds of an obligation guaranteed by the Administrator are used to acquire, rehabilitate, improve or construct track, roadbed, and related structures, the guarantee recipient shall, as long as any portion of the principal or interest of such obligation remains unpaid, maintain such facilities in at least the highest track Class, as defined by FRA Track Safety Standards in Part 213 of this chapter, as that Class in which the rehabilitated, improved, acquired, or constructed track is to be operated upon completion of the project for which the obligation was guaranteed unless a waiver is granted in accordance with § 260.29.

(b) When the proceeds of an obligation guaranteed by the Administrator are used in facilities, including those mentioned in paragraph (a) of this section, the recipient shall, during the period in which any portion of the principal or interest in such obligation remains unpaid, maintain such facilities in a manner consistent with sound engineering and maintenance practices and in a condition that will permit the level of use that existed upon completion of the acquisition, rehabilitation, improvement or construction of such facilities unless a waiver is granted in accordance with § 260.29.

§ 260.27 Inspection.

(a) The facilities subject to the provisions of this subpart shall be inspected at such regular intervals as the Administrator deems necessary to assure compliance with the standards set forth in § 260.25. Each recipient shall permit representatives of the FRA to enter upon its property to inspect and examine such facilities at reasonable times and in a reasonable manner. Such representatives shall be permitted to use such testing devices as the Administrator deems necessary to insure that the maintenance standards imposed by this subpart are being followed.

(b) Each recipient shall submit to the Administrator annually financial records and other documents detailing the maintenance performed and the inspections conducted which demonstrate that the recipient has complied with the standards in § 260.25.

§ 260.29 Waiver.

Any recipient of a guarantee may petition the Administrator in writing for relief from any or all requirements imposed by this subpart. The Administrator may, for good cause shown, waive or modify any requirements of this part. Good cause may include, but is not limited to, insufficient capital resources of the recipient to comply with these maintenance standards or changes in the level of service required for any facility subject to this subpart.

§ 260.31 Impact on other laws.

Standards issued under this subpart shall not be construed to relieve the recipient of any obligation to comply with any other Federal, State, or local law or regulation.

§ 260.33 Penalties.

If the Administrator finds that a guarantee recipient has violated the requirements of this subpart, such recipient will be subject to civil action for injunction to cease activities which violate this subpart and for any other appropriate civil or criminal relief, including termination, suspension, and punitive damages.

Effective date: This part becomes effective on October 8, 1976.

Dated: October 6, 1976.

ASAPH H. HALL,
Administrator, Federal Railroad Administration.

PART VI:

DEPARTMENT OF LABOR

Employment Standards Administration

■

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

V41 I197 OCT 8 76 UMI

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secertary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931. as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders, 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

LABORERS: HEAVY & HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pensions	Vacation	Education and/or Appr. Tr.
GROUP 1	6.79	.35	.35		
GROUP 2	7.04	.35	.35		
GROUP 3	7.09	.35	.35		
GROUP 4	7.69	.35	.35		

Group 1 - Laborers: Asphalt plant laborers, concrete laborers, asphalt laborers, storm and sanitary sewer laborers, carpenter tenders, cement mason tenders mesh handlers and placers, landscaping and seeding, planters and tree trimmers, sign, guard rail and fence installers, grade checkers, ageing and curing of conorste, truck spotters and dumpers, flagmen, riprap and grouters, dredging laborers, right-of-way laborers, wrecking and demolition laborers, drill helpers, and all hand digging and hand back filling, batch truck dumper

Group 2 - Wagon drill, jackhammers, paving breakers, chain saw, concrete saw, paving joint machine, vibrator operator, power driven Georgia buggy or wheelbarrow, sandblaster and concrete chippers, green concrete cutting, brickmason tenders and mortar mixers, pipe layers, joint maker, batter board man (sanitary and storm sewer), dry cement handlers, concrete rubbers, walk-behind tamper machine, surface grinderman, hand operated grouter and grinder machine, deckhand scow man, burner and welder, walk behind trenching machine

Group 3 - Powderman and blasters, side rail setters including metal rail paved ditches, tunnel laborers (free air), gunnite operators and mixers man, gunnite nozzleman, asphalt luteman and rakeman air tract driller (all types), grout pump operator

Group 4 - Tunnel blaster, tunnel muckers (free air), miners and drillers (free air), caisson workers (free air)

KY76-1114 - (Cont'd)

HEAVY CONSTRUCTION

POWER EQUIPMENT OPERATORS:	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
CLASS A	9.65	.35	.35		.05
CLASS B	7.51	.35	.35		.05
CLASS C	6.89	.35	.35		.05

CLASS A

Auto patrol, batcher plant, bituminous paver, cableway, central compressor plant operator, clamshell, concrete mixer (21 cu. ft. or over), concrete pump, crane, crusher plant, derrick, derrick boat, ditching and trenching machine, dragline, dredge engineer, elevator, (regardless of ownership when used for hoisting any building material), elevating grader and all types of loaders, hoe-type machine, hoisting engine, locomotive, LeTourneau or carry-all scoop, bulldozer, mechanic, mechanic welder, orangepeel bucket, piledriver, power blade, roller (bituminous), scarifier, shovel, tractor shovel, truck crane, winch truck, push dozer, high lift, fork lift (regardless of lift height), all types of boom cats, core drill, tow or push boat, A-Frame winch truck, concrete paver, gradeall, hoist (two or more drums), hyster, pumpcrete, ross carrier, side boom, tail boom, rotary drill, mucking machine, rock spreader attached to equipment, scoopmobile, KeCal loader, tower cranes (French, German and other types), hydrocrane, backfiller, gurries, subgrader.

CLASS B

All air compressors (over 900 cu. ft. per min. or greater capacity), bituminous mixer, concrete mixer (under 21 cu. ft.), welding machine, form grader, roller (rock), tugger, tractor (50 H.P. and over), bull bloat, finish machine, outboard motor boat, well points, flexplane, fireman, boom type tamping machine, truck crane oiler, greaser on grease facilities servicing heavy equipment, switchman or brakeman, joint sealing machine, mechanic helper, whirley oiler, tractair and road widening trencher, grout pump, electric vibrator compactor/self-propelled compactor, throttle valve, elevator (one drum or buck hoist), power sweeper (riding type), core drill and caisson drill helper (truck mounted).

CLASS C

Bituminous distributor, cement gun, conveyor, mud jack, paving joint machine, pump, roller (earth), tamping machine, tractors (under 50 H.P.), vibrator, oiler, concrete saw, burlap and curing machine, hydro seeder, power form handling equipment, deckhand steerman, hydraulic post driver, core drill and caisson drill helper (track or skid mounted).

HEAVY & HIGHWAY CONSTRUCTION

TRUCK DRIVERS:	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
GROUP I	6.96	a	b		
GROUP II	7.07	a	b		
GROUP III	7.25	a	b		
GROUP IV	7.28	a	b		
GROUP V	7.35	a	b		

GROUP I: Truck helper and warehousemen

GROUP II: Driver, 3 tons and under, greaser, tire changer and mechanic helper

GROUP III: Truck mechanic, driver, over 3 tons, distributors, dump truck and tandem axle, semi-Trailer or pole trailer when used to pull building material or equipment

GROUP IV: Driver on mixer trucks (all types)

GROUP V: Driver, euclid and other heavy earth-moving equipment and low boy, fork lift truck when used to transport building materials, pavement breakers, winch truck and A-Frame truck when used in transporting materials

FOOTNOTES:

a. $14.50 per week for each employee who has been employed a minimum of twenty (20) work days within any ninety (90) consective day period for that employer

b. $16.00 per week for each employee who has been employed a minimum of twenty (20) work days within any ninety (90) consecutive day period for that employer.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:
a. Holiday: E, provided the employee works the day after the holiday.
b. Holidays: A thru F.
c. Employer contributes 4% of basic hourly rate for 5 years or more of service or 2% of basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.
d. Holidays: A thru F, Washington's Birthday, Good Friday and Christmas Eve, providing employee has worked 30 full days during the 90 days prior to the holiday, and the regularly scheduled work days immediately preceeding and following the holiday.
e. Holidays: A thru F; Washington's Birthday, Election Day for the president of the United States and Election of Governor of New York (provided the employee works the day before and the day after the holiday).
f. One week vacation after one year's work; 2 weeks after 5 years work.
g. Holiday: Thanksgiving Day provided employee reports for work the day after the holiday.
h. Employer contributes $15.00 per year to an apprentice training program.
i. Holiday: D & E, plus two hours on Election Day.
j. Paid Holidays: Labor Day & Memorial Day.

PAID HOLIDAYS:

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;
E-Thanksgiving Day; F-Christmas Day; G-Columbus Day; H-Day after Thanksgiving

FOOTNOTES:

a. Employer contributes $7.00 per day to Annuity and Security Benefit Fund.
b. Holidays: A through H; Election Day; Employee's Birthday;
c. Holidays: A through F; Lincoln's Birthday; Washington's Birthday; Columbus Day; Election Day; Armistice Day.
d. Employees with 6 months or more but less than 5 years service receive 2 weeks vacation, 5 or more years of service receive 3 weeks vacation.
e. Employees with 6 months or more but less than 5 years service receive 2 weeks vacation, 5 or more years but less than 15 years service receive 3 weeks vacation, 15 or more years receive 4 weeks vacation.

BUILDING, HEAVY AND HIGHWAY CONSTRUCTION

FOOTNOTES: (Cont'd)

f. Holidays: A through F; Washington's Birthday; Christmas Eve and Good Friday, providing the employee has worked 30 full days during the 90 calander days prior to the holiday, and regular schedule work days immediately preceding and following the holiday.
g. Employer contributes $4.50 per day to an Annuity Fund.
h. Paid Holiday: St. Patrick's Day.
i. Paid Holidays: A through F provided the employee works a full half day preceding the holiday.
j. Employer contributes $7.00 per day to Annuity Fund.
k. Holidays: A through F, Lincoln's Birthday, Washington's Birthday, Columbus Day, Election Day, Veteran's Day, provided the employee works two days in the calander week in which the holiday falls and each remaining work day during such calander week.
l. For each 15 days worked within the contract year an employee will receive one day's vacation with pay, with a maximum vacation of 3 weeks per year.
m. Holidays: B, C, D, E, Election Day, Columbus Day, providing employee works at least 1 day in the week in which the holiday occurs.
n. Employer contributes $3.56 per day to an additional Security Benefit Fund.
p. Work on X-mas Eve and New Year's Eve will terminate at 12 noon, but employee will receive a full day's pay.

Class 2: Mine hoist and cranes

Class 3: Gradalls, Keystones, Cranes (on land or water with digging buckets including sand rock cranes, Bridge cranes, Clamshells, Draglines, Trenching machines)

Class 4: Piledriving cranes (when driving piles), Piledriving rigs (when driving piles), Cranes (under direction of a dockbuilder foreman), Derrick boats, Tunnel shovels, Concrete Plant (on site only)

Class 5: Cherrypicker (20 tons and over)

Class 6: Tunnel mucking machines, Back filling machines, Cranes (including but not limited to those utilizing scale boxes and mucking buckets), Paver dual drums

Class 7: Elevator (manually operated), Pavers, Cableways, Land derricks, Power houses (which contain low air pressure units), Asphalt spreaders, Autogrades (C.M.I. and machines of similar nature)

Class 8: Power houses (other than above), Portable compressors (used for steel eraction), Compressors (3 or more in battery), Driving of truck mounted compressors, Double drum hoist, Concrete pumps, Well point pumps, Tugger machines (compressed air caissons), Drilled in caissons, Soil solidification equipment, Welding machines (used for steel erection)

Class 9: Rollers (irrespective of motor power), Concrete mixers

Class 10: River cofferdam pumps, Welding machine (1 operator 2 through 5 machines, 2 operators 6 through 10 machines except where ARC is operated by members of L-15), Concrete breaking machines, portable compressors (1 or 2 in battery not over 100' apart), High pressure boilers, Single drum hoist, Locomotives (over 10 tons), Push-button machines, Stationary engineers (car, operating and maintenance of conveyor roller and plant equipment in asphalt plants)

DECISION NO. NY76-3256

POWER EQUIPMENT OPERATORS (Cont'd)
HEAVY and HIGHWAY CONSTRUCTION

Class 11: Long Boom Land Cranes:
a - 100' - 149'
b - 150' - 249'
c - 250' - 349'
d - 350' - 450'

Class 12: Junior engineers (when operating loaders rubber-tired and/or tractor type with a manufacturer's minimum rated bucket capacity of 6 cubic yards and over)

Class 13: Junior engineers (when operating the following equipment and attachments): Scrapers, Turn-a-pulls, Tugger hoists (used exclusively for handling excavated material), Tractors (rubber-tired and/or track type), Hysters and roustabout cranes, Back scratchers, Cherrypickers (all capacities, including the crew requirement for a manufacturer's minimum rated capacity of cherrypicker twenty tons and over), Austin Western and machines of a similar nature, Basin machines, Stetco silent hoist and machines of a similar nature, Vac-all, Meyers machines, John beam and machines of a similar nature, Bulldozers, Loaders (rubber-tired and/or tractor type with a manufacturer's minimum rated bucket capacity or less than 6 cubic yards), Conveyors, Motor graders, Curb and gutter pavers and machines of a similar nature, Ross carriers and travel lifts and machines of a similar nature

Class 14: Junior engineers when operating the following pieces of minor equipment: Tractors, Locomotives (10 tons and under), Post hole diggers, Ditch winch (walk behind), Motor generators, Road finishing machines, Mixers (16S and under with or without loading devices), Rollers (5 tons and under), Tugger hoists, Dual purpose trucks, Fork lifts, Dempster dumpers, Firemen (tending to); Steam operated shovels, Power boilers, Steam operated pile drivers, Steam operated derrick boats, Steam operated water rigs

Class 15: Apprentice engineers and oilers (all gasoline, electric, diesel, or air operated), Shovels, Cranes, Draglines, Backhoes, Keystones, Gradalls, Pavers, Trenching machines, Concrete pumps, Gunite machines, Compressors (3 or more in battery), Power houses, there duties shall be to assist the engineer in oiling, greasing and repairing of all machines, giving signals when necessary, chaining buckets and scale boxes, driving truck cranes, driving and operating fuel and grease truck

UMI 41 FR 44648-44649 10-8-76

DECISION NO. NY76-3257

PAID HOLIDAYS:

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day; G-Columbus Day; H-Day after Thanksgiving

FOOTNOTES:

a. Employer contributes $7.00 per day to an Annuity & Security Benefit Fund.

b. Holidays: A through H.

c. Holidays: A through F; Lincoln's Birthday; Washington's Birthday; Columbus Day; Election Day; Armistice Day.

d. Employees with 6 months or more but less than 5 years service receive 2 weeks vacation, 5 or more years of service receive 3 weeks.

e. Employees with 6 months or more but less than 5 years service receive 2 weeks vacation, 5 or more years but less than 15 years receive 3 weeks, 15 or more years receive 4 weeks.

f. PAID HOLIDAYS: St. Patricks Day.

g. Holidays: A through F; Washington's Birthday; Christmas Eve and Good Friday, providing employee has worked 30 full days during the 90 calendar days prior to the holiday, and regular schedule work days immediately preceding and following the holiday.

h. $4.50 per day contribution for each man to a specialy annuity fund.

i. Paid Holidays: A through F, providing the employee works a full half day preceeding the holiday.

j. Employer contributes $7.00 per day to an Annuity Fund.

k. Holidays: A through F, Lincolns Birthday; Washington's Birthday; Columbus Day; Election Day; Veteran's Day, providing the employee works two days in the calendar week in which the holiday falls and each remaining work day during such calendar week.

l. For each 15 days within the contract year an employee will receive one days vacation with pay, with a maximum vacation of three weeks per year.

m. Holidays: B, C, D & E, Election, Columbus Day, providing employee works at least 1 day in the week in which the holiday occurs.

n. Work on X-mas Eve and New Year's Eve will terminate at 12 noon, but employee will receive a full days pay.

p. Employer contributes $3.56 per day to an additional Security Benefit Fund.

DECISION NO NY76-3257

NY-1-PEO-1-E

BUILDING CONSTRUCTION POWER EQUIPMENT OPERATORS	Basic Hourly Rates	Fringe Benefits Payments				
		H & W	Pensions	Vacation	App. Tr.	Others

LABORERS

Site Preparation Excavation and Incidential Paving (except Walsh County)

Group 1: General Construction Laborer (Chip Spreader Leverman, Fine Grader, Form Grader, Landscape Worker; Pump Operator (prewater) Tunnel Worker, Sign Erector); Reinforced Steel Setter; Sack Shaker (cement and mineral filler); Pipe Handler; Drill Runner Helper; Salamander Heater and Blower Tender

Group 2: Semi-skilled Laborer (Joint Filler Machine Operator, Chip Spreader Operator); Bulk Cement Handler; Conduit Layer, telephone or electrical; Form Setter (pavement); Gas,Electric or Pneumatic Tool Operator (Chipping Hammer, Grinders and Paving Breakers, Tamper (dirt), Concrete Vibrator Operator; Chain Saw Operator; Concrete Curing Man (not water); Bituminous Worker (Shoveler, Dumper, Raker and Floater); Kettleman (bituminous or lead); Concrete Bucket Signalman; Power Buggy Operator; Brick and Mason Tender; Multiplate Pipe Layer; Culvert Pipe Layer

Group 3: Caisson Work; Bottom Man, (sanitary sewer, storm sewer, water, and gas lines); Concrete Mixer Operator (one bag capacity); Mortar Mixer

Group 4: Pipe Layers (sanitary sewer, storm sewer, water, and gas lines); Drill Runner (including Wagon Churn or Air Track); Powderman, Gunite and Sandblast, Nozzleman

POWER EQUIPMENT OPERATORS

Site Preparation Excavation and Incidential Paving (except Walsh County)

Group 1: Cableway Operator; Crane Operator with over 135' boom; Derrick (Guy and Stiff Leg), (power), (skids and stationary); Front End Loader over 10 cu. yds.; Gantry Crane Operator; Mole Operator, including power supply or tunnel mucking machine; Power Shovel and/or other equipment with shovel type controls 3½ cu. yds.

Group 2: Concrete Mixer Stationary Plant Operator over 34E; Dredge Operator or Engineer, Dredge Operator (power) and Engineer; Elevator Grader Operator; Locomotive, Crane Operator; Master Mechanic; Mixer (paving) Concrete Paving Operator, road; Power Shovel and/or other equipment with shovels and/or other equipment with shovel type controls up to 3¼ cu. yds.; Scraper Tandem; Tandem Pusher, Quad 9 or similar; Tractor Operator (pipeline); Side boom; Truck Crane Operator; Hydrocrane Operator, 15 ton and over

POWER EQUIPMENT OPERATORS (Cont'd)

Site Preparation Excavation and Incidential Paving (except Walsh County)

Group 3: Dope Machine Operator (pipeline); Drill Rigs, heavy duty Rotary or Churn or Cable Drill; Front End Loader Operator, 6 cu. yds. and over; Locomotive, all types; Pipeline wrapping, cleaning and bending Machine Operator; Power actuated Horizontal Boring Machine over 6" Operator (Pipeline); Pumpcrete Operator; Refrigeration Plant Engineer; Slip Form Operator (power driven) (paving); Tandem Scraper - twin engine, 50 cu. yds. struck and over

Group 4: Asphalt Paving Machine Operator; Asphalt Plant Operator and Console Board Operator; CMI Grading Operator; Crushing Plant Operator (gravel and stone or gravel washing crushing and screening plant operator); Front End Loader Operator, 1 cu. yd. up to 6 cu. yds.; Grader or Motor Patrol, Finishing Earth Work and Bituminius; Mechanic or Welder (heavy duty); Rubber-tired Industrial Tractor with Backhoe attachment (water main sanitary sewer and storm sewer, truck line construction); Scraper Operator; Tractor type Dozer D-6 and over; Trenching Machine Operator, sewer and water, (except Ditch Witch or similar use oiler rates); Turnapull Operator, (or similar type)

Group 5: Bituminous Spreader and Finishing Operator (power); Concrete Distributor and Spreader Operator, Finishing Machine Longitudinal Float Operator, Ft. Machine Operator and Spray Operator; Concrete Mixer Operator on job site 16S or over; Paving Breaker or Tamping Machine Operator, including machne with power shovel attachments (power driven); Power actuated Augers and Boring Machine Operator; Power actuated Jacks Operator; Power Plant Engineer, 100 K.W.H. and over; Push Tractor; Self-propelled Traveling Soil Stabilizer; Soil Cement Stabilizer; Truck Mechanic

Group 6: Concrete Saw Operator (multiple blade) (power operated); Fine Grade Operator; Roller, Steel and self-propelled rubber, on Hot Mix; Asphalt Paving; Tractor type Dozer under D-6 H.P.; Distributor Operator

Group 7: Brakeman or Switchman; Concrete Batch Plant Operator (cement, rock and sand) Electronic; Concrete Mixer Operator on job site under 16S; Crane Truck Oiler; Grader Operator (Motor Patrol) (haul road); Gravel Screening Plant Operator (portable not crushing or washing); Greaser (truck or tractor); Gunnite Operator Gunall; Hoist Engineer (power); Launchman (Tankerman or Pilot License); Pick-up Sweeper, 1 yd. and over hopper capacity; Shouldering Machine Operator (power Apsco or similar type) including self-propelled Sand Chip Spreader; Flaherty or similar; Sheepsfoot Roller or Compactor (self-propelled)

POWER EQUIPMENT OPERATORS (Cont'd)

Site Preparation Excavation and Incidential Paving (except Walsh County)

Group 8: Crawler type Tractor pulling Compactor or Areating Equipment; Farm type Rubber-tired Tractor with Backhoe attachment; Self-propelled Vibrating Packer Operator Pad type (35 hp and over); Off Road self-propelled watering equipment; Boom Truck Operator; Roller, steel and self-propelled rubber, on other than Hot Mix

Group 9: Bituminous Spreader and Bituminous Finishing Machine Operator (helper) (power); Concrete Batch Operator (cement, rock and sand) (manual); Form Trench Digger (power); Front End Loader Operator up 1 cu. yds.; Hyster Carrier of Forklift; Leverman; Mechanics' Helpers or Greaser Helper; Oiler (power shovel, crane, dragline); PUGMILL Operator; Pump Operator (well points); Self-propelled Broom

Group 10: Conveyor Operator; Curb Machie Operator (manual); Dredge Deck Hand; Farm Tractors, Rubber-tired for Compacting and Areating; Front End Loader Operator (farm type rubber tired tractor); Stump Chipper Operator; Tie Tamper and Ballast Machine Operator

Group 1: Cable Splicer; Lineman; Tractor dozer operator (D-4 and larger) all rigs erecting steel tower and "H" fixtures, also tension pulling machines	$ 9.05	.35	1%		1/2%
Group 2: Groundman - operating special equipment hold digging machines; Aerial baskets on energized circuits; Tractor s (D-4) and larger; Transmission line pole hauling; All Fifth wheel trucks and other setting and assembly equipment excluding steel tower and "H" fixture erection	7.29	.35	1%		1/2%
Group 3: Groundman - truck or tractor driver (with winch); Operators of trucks up to and including 2½ tons; Tractor including D-2 and smaller; including wheel tractors and crawler tractors	6.08	.35	1%		1/2%
Group 4: Groupman - truck or tractor driver (without winch); Operators of trucks up to and including 2½ tons; D-2 and smaller; including wheel tractors and crawler tractors; Groundmen	5.59	.35	1%		1/2%

SUPERSEDEAS DECISION

STATE: South Carolina COUNTY: See below*
DECISION NUMBER: SC76-1115 DATE: Date of Publication
Supersedes Decision No. SC75-1004 dated January 17, 1975 in 40 FR-3154.
DESCRIPTION OF WORK: Residential construction consisting of single family homes and garden type apartments up to and including 4 stories.

Counties: Anderson, Greenville, Oconee, & Pickens

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Air conditioning mechanic	4.25				
Bricklayers	5.50				
Carpenters	4.50				
Cement masons	5.00				
Drywal finishers	4.50				
Drywall hangers	4.75				
Electricians	4.61				
Insulators	3.90				
Ironworkers, structural & ornamental	3.50				
Laborers:					
Laborers	2.64				
Asphalt raker	2.70				
Mason tenders	2.75				
Mortar mixers	3.50				
Painters, bursh	4.46				
Plumbers & pipefitters	5.25				
Roofers	5.00				
Sheet metal workers	4.00				
Soft floor layers	5.25				
Tile setters	5.50				
Truck drivers	2.90				
Welders - Rate for Craft.					
POWER EQUIPMENT OPERATORS:					
Backhoe	3.16				
Bulldozer	3.25				
Motor grader	2.70				
Pan operator	3.25				
Paving Machine operator	2.65				

SUPERSEDEAS DECISION

b. Per month per employee on payroll 30 days or longer.

DECISION NO. WI76-2119

POWER EQUIPMENT OPERATORS

CLASSIFICATIONS:

Group 1: Bituminous paver or plant, Concrete breaker (truck mounted, heavy), Crane, Derrick, Dragline, Dredge, Piledriver, Power shovel, Material hoist, Mixer or paver 21 cu. ft. or over, Roller over 5 ton, Self-propelled stabilizing mixer, Trenching machine, Tractor (side boom, heavy), Concrete pavement spreader (heavy duty) Rubber tires, Hydraulic back hoe, Asphalt Plane engineer; Automatic slipform concrete paver, Automatic concrete subgrader, Batch mixer, portable, Caisson rigs, Central Mixer concrete, Dredge engineer, Concrete batch plant engineer, Central mix plant concrete, Percussion or rotary drill machine, Grader or motor patrol, Loading machine (conveyor), Mechanic or welder (heavy duty equipment), Tractor (scraper, dozer, pusher, loader), Tugger, End Loader, Asphalt heater and planer, Boatman, Bump cutter and grooving machine, Shoulder widener, Winches and "A" frames, Tube finisher

Group 2: Concrete mixer less than 21 cu. ft., Concrete pump, Steel roller, 5 tons or less

Group 3: Screed (bituminous paver), Shouldering machine, Self-propelled chip spreader

Group 4: Concrete breaker and tamper (light), Concrete spreader, Finishing machine, Mechanical float, Curing machine, Power subgrader, Joint sawer (multiple balde), Launch, Roller (pneumatic tired) Self-propelled tractor (mounted or towed compactors and light equipment), Light rubber tired tractor - end loader, Fork-lift, Belting machine, Burlap machine, Jeep digger, Mulcher, Texturing machine

Group 5: Fireman, Evironmental burner

Group 6: Air compressor, Drilling or boring machine (mechanical heavy), Greaser (heavy equipment) Lead-man, Tank car heaters, Stump chipper, Curb machine, Concrete proportioning plant, Generators, Mud jacks

Group 7: Crusher or screening plant, Automatic belt conveyor and surge bin, pneumatic tired roller farm tractor towed, Pug mill

Group 8: Oiler, Rump over 3", Surge bin, Drilling machine helper

TRUCK DRIVERS

Group 1: Truck Drivers, 2 Axle - Mehcanics helper, truck

Group 2: Truck Drivers, 3 or more axle trucks - Euclid ror Dumpster type hauling units - Mechanic, truck

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Oct. 11, 1976

CAB—Rules of practice in economic proceedings; discretionary review. 38496; 9–10–76

DOT/FAA—Restricted areas; Valparaiso, Fla 29092; 7–15–76

Rules Going Into Effect Today

FCC—FM Broadcast stations; table of assignments: Henderson, Nev.; Pueblo, Colo.; Salisbury, Md..... 37580–37581; 9–7–76

Legal Services Corporation—Attorney hiring 38508; 9–10–76
Fee generating cases.. 38505; 9–10–76
Legal assistance to juveniles.... 38507; 9–10–76
Restrictions on actions collaterally attacking criminal convictions.. 38508; 9–10–76
Restrictions on legal assistance with respect to criminal proceedings. 38506; 9–10–76

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER E—VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS: ORGANISMS AND VECTORS

PART 114—PRODUCTION REQUIREMENTS FOR BIOLOGICAL PRODUCTS

Requirements for Expiration Date, and Disposal of Unsatisfactory Products and Byproducts

• *Purpose:* To restate the importance of the expiration date assigned to each serial or subserial. •

Statement of Considerations: "Expiration date" as defined in § 101.4(f) means a date designating the end of the period during which a biological product, when properly stored and handled, can be expected with reasonable certainty, to be efficacious. The criteria by which this date is determined is prescribed in § 114.13 or § 114.14.

Use of a biological product subsequent to the expiration date would be subjecting the animal to a product of unknown value because the conditions under which such a product has been maintained during the dating period are also unknown. Testing at this point would have to be on a 100 percent basis and would be impractical since the product would no longer be available for use after testing.

In a new § 114.12, the importance of the expiration date is emphasized. After the expiration date, the product shall be considered worthless and should be destroyed as provided in the revised § 114.15.

Pursuant to the authority contained in the Virus-Serum-Toxin Act of March 4, 1913 (21 U.S.C. 151–158) Part 114, Subchapter E, Chapter 1 of Title 9 of the Code of Federal Regulations is amended by making the following administrative changes:

Part 114 is amended by revising § 114.12 and § 114.15 to read:

§ 114.12 Expiration date required.

Each serial or subserial of biological product prepared in a licensed establishment shall be given an expiration date determined in accordance with the requirements provided in § 114.13 or § 114.14. A licensed biological product shall be considered worthless under the Virus-Serum-Toxin Act subsequent to the expiration date appearing on the label.

§ 114.15 Disposal of unsatisfactory products and byproducts.

All biological products found to be unsatisfactory for marketing, all biological products which have become worthless subsequent to the expiration date, all refuse, other materials deemed unsatisfactory for production purposes, all carcasses (part or whole) of production or test animals, and any undesirable byproducts of manufacture shall be disposed of as may be required by the Deputy Administrator.

(21 U.S.C. 151 and 154; 37 FR 38477; 38 FR 19141.)

These amendments clarify the administrative procedures used in the veterinary biologics control program administered in accordance with the Virus-Serum-Toxin Act. In order to be of maximum benefit, they must be made effective immediately.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning these amendments are impracticable and unnecessary, and good cause is found for making these amendments effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendments shall become effective October 12, 1976.

Done at Washington, D.C., this 7th day of October 1976.

J. K. ATWELL,
Acting Deputy Administrator,
Veterinary Services.

[FR Doc.76-29935 Filed 10-8-76;8:45 am]

Title 12—Banks and Banking

CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

PART 701—ORGANIZATION AND OPERATIONS OF FEDERAL CREDIT UNIONS

Filing of Annual Financial and Statistical Reports

On page 14792 of the April 7, 1976, edition of the FEDERAL REGISTER (41 FR 14792), a proposal to revise Part 701.13 (12 CFR 701.13) was published. The purpose of the proposal is to require the filing of the annual Financial and Statistical report on Form NCUA 5300 to the Central Office of the National Credit Union Administration, rather than to the Regional Offices. The proposed revision also combined redundant paragraphs (b) and (c). Interested persons were given until May 7, 1976, to submit written comments, suggestions, and objections regarding the proposed revision. As a result of the comments, the following change has been made:

§ 701.13 Financial and statistical and other reports.

The due date for filing the annual Financial and Statistical report on Form NCUA 5300 to the National Credit Union Administration has been changed from January 15 to January 31.

Accordingly, with the above change, the proposed § 701.13 is adopted as set forth below, effective immediately.

C. AUSTIN MONTGOMERY,
Administrator.

OCTOBER 4, 1976.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1014 (12 U.S.C. 1789).)

§ 701.13 Financial and statistical and other reports.

(a) Each operating Federal credit union shall file with the National Credit Union Administration on or before January 31 of each year an annual Financial and Statistical report on Form NCUA 5300 as of the previous December 31. Form NCUA 5300 is furnished to all Federal credit unions by the Administration, and copies may be obtained from any Regional Office.

(b) When it is deemed necessary or desirable and upon written notice from the Administrator or Regional Director, Federal credit unions shall file, in accordance with instructions contained in such notice as to time and place, such financial or other reports as of such date or dates as shall be prescribed in such notice.

[FR Doc.76-29846 Filed 10-8-76;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 76-WE-27]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone

• The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the description of the San Bernardino, California, (Norton AFB) control zone. •

The control zone is described in part by reference to the ILS outer marker. The United States Air Force has advised that the outer marker has been decommissioned. This will require an editorial change in the description of the control zone by substituting a reference to the Pettis NDB in lieu of the outer marker. Additionally, an editorial change is necessary to correct the reference to Redland, California to read, Redlands, California.

Since the amendment is editorial in nature, involves no change in airspace boundaries, and imposes no additional

V41I198 OCT 12 76 UMI

burden on any person, notice and public procedure thereon is unnecessary and the amendment may be effective in less than 30 days.

In consideration of the foregoing in § 71.171 (41 FR 355) the description of the San Bernardino, California (Norton AFB) control zone is amended in part as follows: Delete the reference "• • • of the OM, • • •" and substitute "• • • of Pettis NDB, • • •" and correct "Redland" to read "Redlands" in the text.

Effective date. This amendment shall be effective November 4, 1976.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c).)

Issued in Los Angeles, Calif., on September 30, 1976.

LYNN L. HINK,
Acting Director, Western Region.

[FR Doc.76-29765 Filed 10-8-76;8:45 am]

[Airspace Docket No. 76-GL-21]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration and Extension of VOR Airway; Correction

In FR Doc. 76-25671 appearing at page 37099 in the FEDERAL REGISTER of September 2, 1976, paragraph 2 of § 71.123 is corrected in the fourth line of that paragraph by correcting "108°" to "117°" immediately following the word "Manitoba," and immediately before the word "radials".

Issued in Washington, D.C., on September 30, 1976.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.76-29851 Filed 10-8-76;8:45 am]

[Airspace Docket No. 76-RM-14]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration and Extension of VOR Airway; Correction

In FR Doc. 76-23926 appearing at page 35059 in the FEDERAL REGISTER of August 19, 1976, the penultimate paragraph is corrected by deleting "Cherokee, Wyo.; Meeker, Colo.; Grand Junction, Colo.;" and substituting "From Grand Junction, Colo.; via Meeker, Colo.; Cherokee, Wyo.;" therefor.

Issued in Washington, D.C., on September 30, 1976.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.76-29852 Filed 10-8-76;8:45 am]

[Airspace Docket No. 76-SW-42]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate a transition area at Anahuac, Tex.

On August 12, 1976, a notice of proposed rule making was published in the FEDERAL REGISTER (41 FR 34077) stating the Federal Aviation Administration proposed to designate a transition area at Anahuac, Tex.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 30, 1976, as hereinafter set forth.

§ 71.181 (41 FR 440), the following transition area is added:

ANAHUAC, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Chambers County Airport (latitude 29°46'12" N., longitude 94°39'51" W.) and within 3 miles each side of the 137° bearing from the Chambers County RBN (latitude 29°46'23" N., longitude 94°39'47" W.) extending from the 5-mile-radius area to 8.5 miles southeast of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Fort Worth, Tex., on September 27, 1976.

PAUL J. BAKER,
Acting Director, Southwest Region.

[FR Doc.76-29854 Filed 10-8-76;8:45 am]

[Airspace Docket No. 76-WA-6]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Extension and Designation of Jet Routes

On June 1, 1976, a Notice of Proposed Rule Making (NPRM) was published in the FEDERAL REGISTER (41 FR 22095) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 75 of the Federal Aviation Regulations that would establish nine jet routes and extend five existing jet routes.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. We received one response to the NPRM in which the commentator posed no objection to the proposal.

In consideration of the foregoing, Part 75 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 30, 1976, as hereinafter set forth.

§ 75.100 (41 FR 704) is amended as follows:

In J-39 the title is deleted and in the "Dickinson, N. Dak., via" is deleted and "Mullan Pass, Idaho, via Great Falls, Mont.; Dickinson, N. Dak.;" is substituted therefor.

In J-136 the title is deleted and in the text "to Spokane, Wash." is deleted and "Spokane, Wash.; Mullan Pass, Idaho; INT Mullan Pass 101° and Billings, Mont., 301° radials; to Billings." is substituted therefor.

In J-151 the title is deleted and in the text "to Billings, Mont." is deleted and "Billings, Mont.; INT Billings 266° and Whitehall, Mont., 083° radials; to Whitehall." is substituted therefor.

In J-154 the title is deleted and in the text "Battle Mountain, Nev., via" is deleted and "Sacramento, Calif., via INT Sacramento 048° and Battle Mountain, Nev., 253° radials; Battle Mountain;" is substituted therefor.

In J-158 the title is deleted and in the text "to Malad City, Idaho." is deleted and "Malad City, Idaho; INT Malad City 087° and Casper, Wyo., 241° radials; Casper; Rapid City, S. Dak.; to Aberdeen, S. Dak." is substituted therefor.

Add:

J-196 From Bryce Canyon, Utah, via INT Bryce Canyon 048° T and Meeker, Colo., 247° T radials; to Meeker.

J-197 From Gunnison, Colo., via INT Gunnison 083° T and Goodland, Kans., 251° T radials; Goodland; Wolbach, Nebr.; to Sioux Falls, S. Dak.

J-198 From Linden, Calif., via INT Linden 063° T and Mina, Nev., 298° T radials; Mina; Wilson Creek, Nev.; INT Wilson Creek 075° T and Meeker, Colo., 247° T radials; to Meeker.

J-199 From Wilson Creek, Nev., via Delta, Utah; INT Delta 068° T and Meeker, Colo., 262° T radials; to Meeker.

J-200 From Linden, Calif., via INT Linden 021° T and Sacramento, Calif., 048° T radials; INT Sacramento 048° T and Battle Mountain, Nev., 253° T radials; to Battle Mountain.

J-201 From Myton, Utah, via INT Myton 056° T and Rock Springs, Wyo., 084° T radials; to Scottsbluff, Nebr.

J-202 From Fairfield, Utah, via INT Fairfield 026° T and Rock Springs, Wyo., 249° T radials; Rock Springs; to Casper, Wyo.

J-203 From Billings, Mont., via INT Billings 347° T and Great Falls, Mont., 092° T radials; to Great Falls.

J-204 From Dupree, S. Dak., via Miles City, Mont.; INT Miles City 295° T and Great Falls, Mont., 092° T radials; to Great Falls.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on September 30, 1976.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.76-29853 Filed 10-8-76;8:45 am]

[Docket No. 16195; Amdt. No. 1041]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPSs) that were recently adopted by the

Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS-230, 800 Independence Avenue, SW., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAPs, effective November 18, 1976.

Tallahassee, FL—Tallahassee Muni. Arpt., VOR Rwy 18, Amdt. 4
Douglas, GA—Douglas Muni. Arpt., VOR-A, Amdt. 1
Dublin, GA—Dublin Muni. Arpt., VOR Rwy 26, Amdt. 2

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 76–806]

PART 87—AVIATION SERVICES

Revised Detailed Operational Plan for Security Control of Non-Federal Air Navigation Aids

Adopted: September 28, 1976.

Released: October 8, 1976.

In the matter of adoption of a revised detailed operational plan for the security control of non-Federal air navigation aids and amendment of part 87, subpart Q of the Commission's rules.

Order.

1. The Commission has under consideration amendment of Part 87, Subpart Q of the rules and a revised Detailed Operational Plan for the Security Control of Non-Federal Air Navigation Aids, heretofore adopted by the Commission on March 1, 1972 (FCC 72–193 37 FR 5032, March 9, 1972).

2. The revised Detailed Operational Plan is now titled, "FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids". The FCC Support Plan prescribes the operation of FCC licensed air navigation aids under the Plan for the Security Control of Air Traffic and Air Navigation Aids (Short Title: SCATANA). SCATANA is implemented under declaration of an Air Defense Emergency and/or Defense Emergency or imminence thereof. Revision to the FCC Support Plan and Part 87, Subpart Q of the rules is mandatory due to revision of the SCATANA plan jointly adopted by the Department of Defense, Department of Transportation, and the Federal Communications Commission (see FR Vol. 41, No. 44, March 4, 1976, FR Doc. 76–6204).

3. The revised FCC Support Plan for the Security Control of non-Federal Air Navigation Aids received concurrence from the Department of Defense and the Federal Aviation Administration on August 12, 1976.

4. Authority for these rules amendments and adoption of the FCC Support Plan is set out in Executive Order 11490 and sections 1, 4(i), 4(o), and 303(r) of the Communications Act of 1934, as amended. We find that the prior notice and effective date provisions of the Administrative Procedure Act (5 U.S.C. 553) are inapplicable since this rulemaking involves a military function of the United States.

5. In view of the foregoing: *It is ordered*, That, effective November 1, 1976, Part 87, Subpart Q of the Commission's rules and regulations is amended as set forth below and the FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids is adopted as set forth in Appendix I below.

(Secs. 1, 4, 303, 48 Stat., as amended, 1064, 1066, 1082 (47 U.S.C. 151, 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
Secretary.

Part 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. In § 87.601, the last sentence of paragraph (b) is revised to read as follows:

§ 87.601 Scope and objective.

* * * * * *

(b) * * * It also provides for actions to be taken under the Plan for the Security Control of Air Traffic and Air Navigation Aids (Short Title: SCATANA) and the FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids to effect control of selected non-Federal VOR, VORTAC and TACAN Stations by appropriate military authorities during emergency situations resulting in the declaration of an Air Defense Emergency and/or Defense Emergency or imminence thereof.

* * * * * *

2. In § 87.602, the first sentence of paragraph (f) and the last phrase of the last sentence of paragraph (i) are revised and new paragraph (t) is added to read as follows:

§ 87.602 Definitions of Terms.

* * * * * *

(f) FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids. * * *

* * * * * *

(i) * * *, including the annexes and supplements to that plan and the FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids.

* * * * * *

(t) Appropriate Military Authorities. Within the NORAD area of responsibility—Commander in Chief North American Air Defense (CINCNORAD) and NORAD region commanders. CINCNORAD has delegated all actions associated with the appropriate military authority to NORAD region commanders. Outside the NORAD area of responsibility—the Commander in Chief, or his designated representative, of unified or specified commands from U.S. areas located within their area of responsibility.

3. In § 87.603, the last phrase of the last sentence is revised to read as follows:

§ 87.603 Aeronautical Emergency Communications System Authorization (AECSA).

* * * * * *

* * *, the AECS Plan and the FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids.

4. In § 87.606, the heading and text are revised to read as follows:

§ 87.606 Plan for the Security Control of Air Traffic and Air Navigation Aids (Short Title: SCATANA).

(a) The Plan for the Security Control of Air Traffic and Air Navigation Aids (SCATANA) has been promulgated in furtherance of the Federal Aviation Act of 1958, as amended, the Communications Act of 1934, as amended, and Executive Order 11490, as amended. SCATANA defines the responsibilities of the FCC for the security control of accurate non-Federal air navigation aids.

(b) Under the responsibilities defined in SCATANA, an FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids has been developed by the Commission. The FCC Support Plan defines responsibilities, procedures, and instructions in consonance with SCATANA which will effect control of accurate non-Federal air navigation aids when SCATANA is implemented. This control shall provide for effective utilization of such navigation aids by aircraft of military and civil agencies under the various emergency conditions for which SCATANA is implemented. The FCC Support Plan highlights those parts of SCATANA which deal specifically with accurate non-Federal air navigation aids and includes a list of all, FCC licensed, accurate air navigation aids. SCATANA and the FCC Support Plan applies to radio navigation stations authorized by the Commission in the following manner:

(1) Appropriate military authorities may impose, on non-Federal air navigation aids, any or all restrictions contained in SCATANA and the FCC Support Plan when an Air Defense Emergency and/or Defense Emergency exists or is imminent. The restrictions shall be imposed through appropriate Federal Aviation Administration (FAA) Air Route Traffic Control Centers (ARTCCs).

(2) As directed by the appropriate military authority, FAA ARTCCs will disseminate SCATANA implementation instructions, to be complied with by all licensees of accurate air navigation (VOR, VORTAC, or TACAN) stations, as follows:

(i) Shut down the above navigation aids in accordance with the appropriate military authority instructions. These instructions shall permit time to land/disperse airborne aircraft, and shall provide for the extension of such times when the air traffic situation dictates.

(ii) Aids which require more than five minutes control time shall be shut down as soon as possible, except when directed otherwise by the appropriate military authority, or unless such aids are essential for the regulation and control of existing air traffic.

(iii) Direct the control of air navigation aids to ensure that required aids, as indicated in flight plans, will be available for authorized aircraft flights.

(iv) When notice of the termination of the Defense Emergency or Air Defense Emergency declaration is issued by an appropriate military authority, ARTCCs shall notify licensees of the reduction or removal of SCATANA restrictions as specified by the appropriate military authority.

(3) Licensees of aeronautical radio navigation stations may voluntarily participate in SCATANA tests as requested by an ARTCC. SCATANA testing shall not interrupt the normal service of non-Federal air navigation aids.

5. In § 87.607, paragraph (b) is revised to read as follows:

§ 87.607 Emergency Operations.

* * * * * *

(b) Upon receipt of the Defense Emergency or Air Defense Emergency declaration, or as directed by the appropriate NORAD Region Commander when his Region is under attack, the licensees of selected non-Federal air navigation aids shall comply with the provisions of the Plan for the Security Control of Air Traffic and Air Navigation Aids and the FCC Support Plan for the Security Control of Non-Federal Air Navigation Aids.

* * * * * *

APPENDIX I

FCC SUPPORT PLAN FOR THE SECURITY CONTROL OF NON-FEDERAL AIR NAVIGATION AIDS

NOVEMBER 1, 1976.

This FCC Support Plan is referenced to the Plan for the Security Control of Air Traffic and Air Navigation Aids (Short Title: SCATANA). This FCC Support Plan supersedes the Detailed Operational Plan for the Security Control of Non-Federal Air Navigation Aids dated January 31, 1972.

AUTHORITY

This FCC Support Plan is promulgated in furtherance of the Federal Aviation Act of 1958, as amended, the Communications Act of 1934, as amended, and Executive Order 11490, as amended.

PURPOSE

This FCC Support Plan is referenced from the Plan for the Security Control of Air Traffic and Air Navigation Aids (Short Title: SCATANA). SCATANA defines the responsibilities of the Federal Aviation Administration (FAA), the Federal Communications Commission (FCC) and the appropriate military authorities for the security control of civil and military air traffic, and the control of Federal and non-Federal air navigation aids. This FCC Support Plan, under SCATANA; concerns the control of accurate non-Federal air navigation aids which include VHF Omnirange (VOR), VHF Omnirange/Tactical Air Navigation (VORTAC) and Tactical Air Navigation (TACAN) Stations. This FCC Support Plan supersedes: Detailed Operational Plan for the Security Control of Non-Federal Air Navigation Aids dated January 31, 1972.

SCOPE

This FCC Support Plan involves responsibilities, procedures and instructions in consonance with SCATANA which will effect control of non-Federal air navigation aids when SCATANA is implemented. This control shall provide for effective utilization of such navigation aids by aircraft of military and civil agencies under various emergency conditions for which SCATANA is implemented. This FCC Support Plan highlights those parts of SCATANA which deal with non-Federal air navigation aids and includes a list of all non-Federal air navigation aids. This plan is not applicable when Section III of the SCATANA Plan, Emergency Security Control of Air Traffic (ESCAT), is implemented. Activities involved in the control of non-Federal air navigation aids, under SCATANA implementation, include appropriate military authorities, Federal Aviation Administration (FAA) Air Route Traffic Control Centers (ARTCCs), and operators of non-Federal navigation aids including VOR, VORTAC, and TACAN stations.

NOTE: See SCATANA for explanation of terms used in this FCC Support Plan.

THE FCC SUPPORT PLAN

A. *Situation.* This FCC Support Plan is effected whenever SCATANA is implemented. Three types of situations may require the implementation of SCATANA.

1. In the first of these, an emergency has arisen which has resulted in the declaration of an Air Defense Emergency within the NORAD area. Under this condition SCATANA will be automatically implemented.

2. In the second situation, which applies only to NORAD, a NORAD region commander may direct implementation of SCATANA for his region when his region or an adjacent region is under attack and an Air Defense Emergency has not yet been declared.

3. In the third situation, an emergency has arisen which has resulted in the declaration of a Defense Emergency outside the NORAD area. Under this condition, SCATANA may be considered for implementation.

B. *Intention.* FAA ARTCCs shall exercise specific control over non-Federal VOR, VORTAC, and TACAN stations as described in this FCC Support Plan.

C. *Implementation.* 1. The appropriate military authority will direct the appropriate ARTCCs to implement SCATANA restrictions based on the emergency situation specified in paragraph A. above. Restrictions shall be specified in regard to special instructions concerning the control of navigation aids which permit their use for friendly aircraft operations. This includes continued operation, as long as the actual air defense situation permits, of those air navigation aids essential to support other major command contingency operations. The appropriate military authority shall revise or remove SCATANA restrictions to the control of air navigation aids as the tactical situation permits.

2. As directed by the appropriate military authority, ARTCCs shall disseminate SCATANA implementation instructions to operators of non-Federal VOR, VORTAC, and TACAN stations as follows:

a. Shut down the above navigation aids in accordance with the military authority instructions. These instructions shall permit time to land/disperse airborne aircraft, and shall provide for the extension of such times when the air traffic situation dictates.

b. Aids which require more than five minutes control time shall be shut down as soon as possible, except when directed otherwise by the appropriate military authority, or unless such aids are essential for the regulation and control of existing air traffic.

c. Direct the control of air navigational aids to ensure that required aids, as indicated in flight plans, will be available for authorized aircraft flights.

d. When directed to reduce or remove SCATANA restrictions, ARTCCs shall authorize resumption of air navigation aids as specified by the appropriate military authority.

NOTE: Appropriate military authority may take two meanings.

(1) For the NORAD area of responsibility, NORAD region commanders have been designated as appropriate military authority by

[1] Commissioners Fogarty and White not participating.

V41I198 OCT 12 76 UMI

the Commander in Chief North American Air Defense.

(2) Outside the NORAD area, the Commander in Chief, or his designated representative, of the unified or specified commands for U.S. areas located within their area of responsibility, is the appropriate military authority.

D. *Non-Federal VOR, VORTAC, and TACAN Lists.* Appendix A, lists all non-Federal VOR navigation aids. The FCC does not license VORTAC or TACAN stations as such, however, Appendix B lists comparative stations having both VOR and Distance Measuring Equipment (DME) at the same location.

E. *SCATANA Tests.* Licenses of non-Federal air navigation aids may voluntarily participate in SCATANA tests.

APPENDIX A.—*Nongovernment VOR stations*

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Bombay Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period October 13, 1976 through January 31, 1977.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public hunting of rails and gallinules, mourning doves, woodcock, crows and common snipe on Bombay Hook National Wildlife Refuge, Delaware, is permitted during the regular State seasons on the South Upland Hunting Area. This open area, comprising 169 acres, is delineated on a map available at the refuge headquarters, Smyrna, Delaware 19977, and from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable Federal and State regulations covering the hunting of rails and gallinules, mourning doves, woodcock, and common snipe.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1977.

HOWARD N. LARSEN,
Regional Director, United States Fish and Wildlife Service.

OCTOBER 4, 1976.

[FR Doc.76–29754 Filed 10–8–76;8:45 am]

PART 32—HUNTING

Bombay Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period November 1, 1976 through January 31, 1977.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public hunting of ducks, geese, and coots on the Bombay Hook National Wildlife Refuge, Delaware, is permitted on areas designated by signs as open to hunting including the South Waterfowl Hunting Area, the West Waterfowl Hunting Area, the Young Waterfowlers Area, and the South Upland Hunting Area. These open areas are delineated on maps available at the refuge headquarters, Smyrna, Delaware, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of ducks, geese, and coots subject to the following special conditions:

(1) Hunting is permitted on the West Waterfowl Hunting Area from one-half hour before sunrise to 12 noon local standard time, Tuesdays, Thursdays, and Saturdays during the goose season.

(2) Hunting in the South and West Waterfowl Areas and Young Waterfowlers Area shall be from existing numbered blinds. The possession of a loaded gun or shooting while outside of a blind is prohibited on these areas.

(3) Hunting is permitted in the South Waterfowl Hunting Area only on Monday, Wednesday, Friday, and Saturday, during the State duck season.

(4) The necessary permit to enter the South Waterfowl Hunting Area will be issued each hunting day by a ticket-lottery system at 1½ hours before legal shooting time at the checking station at Port Mahon. Hunters arriving after the lottery will be issued permits on a first-come, first-served basis. Permits will be surrendered at the checking station within one-half hour after sunset. The necessary permit to enter the West

V41I198 OCT 12 76 UMI

Waterfowl Hunting Area may be obtained by applying to the Refuge Manager for advance reservation. The permits for advance reservations will be canceled if the holder is not present one hour prior to the start of legal shooting time on the date of his reservation. These forfeited permits and permits not reserved by advance reservation will be awarded to other hunters by lottery on the morning of the hunt. All hunters will check out through the headquarters checking station prior to leaving the refuge.

(5) Each hunting permittee using the West Waterfowl Hunting Area will pay a recreation fee of $10.00 on the day of the hunt. A recreation fee of $2.00 per hunter will be charged on the South Waterfowl Hunting Area.

(6) Not more than four persons may occupy a blind at any one time on the West Waterfowl Hunting Area nor more than three on the South Waterfowl Hunting Area nor more than three on the South Waterfowl Hunting Area.

(7) The Young Waterfowlers Area will be open from one-half hour before sunrise to 12:00 noon local standard time on Saturdays and holidays to young hunters who present evidence of having completed the prescribed training program. Two youths, accompanied by an instructor who may not possess ammunition or possess or discharge a firearm, may use one blind.

(8) Hunters on all four areas are required to use steel shotshells in shotguns 12 gauge or larger. Hunters using shotguns 12 gauge or larger may not have in their possession lead shotshells. Lead shotshells may be used in shotguns smaller than 12 gauge. No Hunter may have in their possession or use in one day more than 10 shells on the West Waterfowl Hunting Area or 15 shells on the Young Waterfowlers Hunting Area.

(9) On Wednesdays, Fridays and Saturdays on the South Waterfowl Hunting Area and Tuesdays and Saturdays on the West Waterfowl Hunting Area, migratory waterfowl will be hunted with 12-gauge shotguns using steel shot. Ammunition will be provided by the refuge at a charge of not less than $0.20 per round. No person shall have in his possession lead shotshells during steel shot hunt days.

(10) Hunters, when requested by Federal or State enforcement officers, must display for inspection all game, hunting equipment, and ammunition.

The provisions of this special regulation supplement the regulations which govern hunting of wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1977.

HOWARD N. LARSEN,
Regional Director, United States Fish and Wildlife Service.

OCTOBER 4, 1976.

[FR Doc.76-29749 Filed 10-8-76;8:45 am]

PART 32—HUNTING

Prime Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period November 1, 1976 through January 31, 1977.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

DELAWARE

PRIME HOOK NATIONAL WILDLIFE REFUGE

Public hunting of ducks, geese, and coots on the Prime Hook National Wild-Waterfowl Hunting Area. This 1,180-life Refuge, Delaware, is permitted on the acre open area is delineated on maps available at the refuge headquarters, Milton, Delaware, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable Federal and State regulations covering the hunting of ducks, geese, and coots subject to the following special conditions:

(1) Permits will be issued by a ticket-lottery system at 2 hours before legal shooting time. Hunters arriving after the lottery will be issued permits on a first-come, first-served basis until 3:00 p.m. Permits will be surrendered at the checking station within one hour after sunset.

(2) Hunting shall be only from blinds at locations designated by refuge personnel. The possession of a loaded gun or shooting outside of a blind while hunting waterfowl and coots is prohibited. Three hunters per blind permitted.

(3) The Area is open each Monday, Wednesday, Friday, and Saturday, throughout the duck hunting season.

(4) Access to the waterfowl hunting area will be at designated boat access points.

(5) Steel shotshells are required for all shotguns 12 gauge or larger. Persons using shotguns 12 gauge or larger may not have in their possession lead shotshells. Lead shotshells may be used in shotguns smaller than 12 gauge.

(6) Hunters, when requested by Federal or State enforcement officers, must display for inspection all game, hunting equipment and ammunition.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32 and are effective through January 31, 1977.

HOWARD N. LARSEN,
Regional Director, United States Fish and Wildlife Service.

OCTOBER 4, 1976.

[FR Doc.76-29752 Filed 10-8-76;8:45 am]

PART 32—HUNTING

Bombay Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period October 13, 1976 through March 31, 1977.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public hunting of upland game on Bombay Hook National Wildlife Refuge, Delaware, is permitted during the regular State seasons on the South Upland Hunting Area. This open area, comprising 169 acres, is delineated on maps available at refuge headquarters, Smyrna, Delaware 19977, and from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through March 31, 1977.

HOWARD N. LARSEN,
Regional Director, U.S. Fish and Wildlife Service.

OCTOBER 4, 1976.

[FR Doc.76-29753 Filed 10-8-76;8:45 am]

PART 32—HUNTING

Erie National Wildlife Refuge, Pennsylvania

The following special regulation is issued and is effective during the period October 16, 1976 through March 15, 1977.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

PENNSYLVANIA

ERIE NATIONAL WILDLIFE REFUGE

Public hunting of hares, rabbits, woodchucks, raccoons, squirrels, grouse, quail, pheasants, skunks, opossums, and foxes is permitted on portions of the Erie National Wildlife Refuge, Pennsylvania. Copies of a map delineating the open hunting areas are available at refuge headquarters, Guys Mills, Pennsylvania, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable State regulations governing hunting of small game, furbearers, and foxes, subject to the following special condition:

(1) That portion of the refuge situated between Pennsylvania Routes 27 and 173 is closed to hunting with firearms from September 30, 1976 through November 25, 1976.

The provisions of this special regulation supplement the regulations governing hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through March 15, 1977.

HOWARD N. LARSEN,
Regional Director, U.S. Fish and Wildlife Service.

OCTOBER 4, 1976.

[FR Doc.76-29750 Filed 10-8-76;8:45 am]

PART 32—HUNTING

Prime Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period October 13, 1976 through February 28, 1977.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

DELAWARE

PRIME HOOK NATIONAL WILDLIFE REFUGE

Public hunting of upland game on Prime Hook National Wildlife Refuge, Delaware, is permitted only on the North Hunting Area. This open upland game hunting area, comprising approximately 2,320 acres, is delineated on maps available at refuge headquarters, Milton, Delaware 19968, and from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game subject to the following special condition:

(1) Hunting hours will be from one-half hour before sunrise to one-half hour after sunset.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through February 28, 1977.

HOWARD N. LARSEN,
Regional Director, United States Fish and Wildlife Service.

OCTOBER 4, 1976.

[FR Doc.76-29751 Filed 10-8-76;8:45 am]

Title 29—Labor

CHAPTER V—WAGE AND HOUR DIVISION, DEPARTMENT OF LABOR

PART 700—GOVERNMENT SERVICE INDUSTRY

Wage Order

Pursuant to sections 5, 6, and 8 of the Fair Labor Standards Act of 1938 (52 Stat. 1062, 1064, as amended (29 U.S.C. 205, 206, 208)), including the Fair Labor Standards Amendments of 1974 (Pub. L. 93-259; 84 Stat. 35), and Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and by means of Administrative Order No. 644 (41 FR 15085), the Secretary of Labor appointed and convened Industry Committee No. 134-A for Government Service, referred to the Committee the question of the minimum rate or rates of wages to be paid under section 6 of the Act to such employees, and gave notice of a hearing to be held by the Committee.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee has filed with the Administrator of the Wage and Hour Division of the Department of Labor a report containing its findings of fact and recommendations with respect to the matters referred to it. Accordingly, in exercise of his ministerial duty as required by section 8 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, and 29 CFR 511.18, the recommendations of Industry Committee 134-A dated June 22, 1976 are hereby published revising paragraphs 700.2 (b), (c) and (d) of Part 700, Title 29, Code of Federal Regulations. It should be noted that Industry Committee 134-A met and made its recommendations regarding the wage rates prior to the Supreme Court's decision in *"National League of Cities et al* v. *Usery,"* decided June 24, 1976. This wage order is published in accordance with statutory requirements and should not be construed as an opinion by the Secretary or the Department of Labor as to the applicability of the National League case to employees of the Commonwealth of Puerto Rico or of its political subdivisions.

Paragraph (a) of § 700.2 is also amended to reflect the statutory wage increases prescribed by Sections 6(b) and 6(c)(5) of the Act which are effective after December 31, 1976.

As amended, § 700.2 reads as follows:

§ 702.2 Wage rates.

(a) *Commonwealth government employees.* (1) The minimum rate for this classification is $2.20 an hour through December 31, 1976, and $2.30 an hour thereafter.

* * * * *

(b) *Municipal government employees.* (1) The minimum wage for this classification is $1.50 an hour through October 31, 1976; $1.90 an hour, effective November 1, 1976; and $2.00 an hour, effective July 1, 1977.

* * * * *

(c) *Right to Employment Administration employees.* (1) The minimum wage for this classification is $1.75 an hour through October 31, 1976; $1.85 an hour, effective November 1, 1976; and $1.95 an hour, effective July 1, 1977.

* * * * *

(d) *Puerto Rico Land Authority and Sugar Corporation of Puerto Rico employees.* * * *

(1) *Agricultural phase.* * * *

(i) *Sugarcane farms.* * * *

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5746, 34-12648, 35-19700, IC-9467, IA-539]

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

PART 202—INFORMAL AND OTHER PROCEDURES

Miscellaneous Amendments

The Securities and Exchange Commission is amending its regulations to provide a revised and updated listing of its regional and branch offices and also to update information regarding the processing of filings received by the Commission.

Materials listed in Appendix A of Subpart D of 17 CFR Part 200 may be examined in the Commission's Public Ref-

erence room at 1100 L Street, NW., Washington, D.C. Written requests for specific items should be addressed to the Public Reference Section, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

Subpart H of 17 CFR Part 200 is revised to indicate a change in reproduction fees in the Public Reference rooms in the Commission's Washington, D.C., New York, Los Angeles and Chicago offices.

The revision in 17 CFR Part 202 reflects certain organizational changes and responsibilities involving the submission and processing of filings with the Commission.

Since these changes relate only to corrections and information concerning internal procedures and do not affect substantial rights or liabilities, notice and public comment are unnecessary. As such, the amendments are effective on the date of issuance.

(80 Stat. 383, as amended, 31 Stat. 54, secs. 19, 23, 48 Stat. 85, 901, as amended, sec. 20, 49 Stat. 833, sec. 319, 53 Stat. 1173, secs. 38, 211, 54 Stat. 841, 855, U.S.C. 552, 15 U.S.C. 77s, 78w, 79t, 77sss, 80a-37, 80b-11, Pub. L. 93-519, sec. (f), 5 U.S.C. 552a(f), Pub. L. 94-29.)

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 30, 1976.

Part 200 of Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

1. Section 200.11 of Subpart A is amended by revising paragraph (b) as follows:

§ 200.11 Headquarters Office—Regional Office relationship.

* * * * *

(b) Regional Administrators of the Commission.

Region 1. New York, New Jersey—Regional Administrator, 26 Federal Plaza, New York, N.Y. 10007.

Region 2. Massachusetts, Connecticut, Rhode Island, Vermont, New Hampshire, Maine—Regional Administrator, 150 Causeway Street, Boston, Massachusetts 02114.

Region 3. Tennessee, Virgin Islands, Puerto Rico, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, and the part of Louisiana lying east of the Atchafalaya River—Regional Administrator, Suite 788, 1375 Peachtree Street, NE., Atlanta, Ga. 30309.

Region 4. Illinois, Indiana, Iowa, Kansas City (Kans.), Kentucky, Michigan, Minnesota, Missouri, Ohio, Wisconsin—Regional Administrator, Everett McKinley Dirksen Bldg., 219 South Dearborn Street, Room 1204, Chicago, Illinois 60604.

Region 5. Oklahoma, Arkansas, Texas, that part of Louisiana lying west of the Atchafalaya River, and Kansas (except Kansas City)—Regional Administrator, 503 U.S. Court House, 10th and Lamar Streets, Fort Worth, Texas 76102.

Region 6. Wyoming, Colorado, New Mexico, Nebraska, North Dakota, South Dakota, Utah—Regional Administrator, Two Park Central, Room 640, 1515 Arapahoe Street, Denver, Colorado 80202.

Region 7. California, Nevada, Arizona, Hawaii, Guam—Regional Administrator, 10960 Wilshire Boulevard, Suite 1710, Los Angeles, California 90024.

Region 8. Washington, Oregon, Idaho, Montana, Alaska—Regional Administrator, 3040 Federal Building, 915 Second Avenue, Seattle, Washington 98174.

Region 9. Pennsylvania, Maryland, Virginia, West Virginia, Delaware, District of Columbia—Regional Administrator, Ballston Centre Tower 3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

2. Section 200.80a is amended by revising Appendix A as follows:

§ 200.80a Appendix A—Documentary materials available to the public.

SECURITIES ACT OF 1933

Description	*Pursuant to section—*
Registration statement providing financial and other information concerning securities offered for public sale, filed under Regulation C (17 CFR 230.400 et seq.)	6

MISCELLANEOUS

Requests or petitions that a change in the Commission's rules, regulations or forms be made; comments on proposed rules, regulations or forms; issuance, amendment or repeal of rules, regulations or forms promulgated under the various Acts administered by the Commission.

Requests for no-action and interpretative letters and responses thereto.

Transcripts of proceedings in public hearings including testimony, exhibits received in evidence, intermediate decisions, oral arguments, motions, briefs, exceptions.

Commission findings, opinions, orders, rulings and notices issued for public release.

Final opinions of the Commission, including concurring and dissenting opinions, as well as orders made by the Commission in the adjudication of cases.

A record of the final votes of each member of the Commission in every Commission proceedings concluded after July 1, 1967.

Hearings and comments on proposed rules or statements of policy, etc., except where the writer requests that his comments not be made public.

Periodic reports filed by the International Bank for Reconstruction and Development under Regulation BW—Rules 1 to 4, section 15(a) of the Bretton Woods Agreement Act (17 CFR Part 285).

Periodic reports filed by the Inter-American Development Bank, pursuant to Regulation IA (17 CFR Part 286) adopted pursuant to section 11(a) of the Inter-American Bank Act.

Periodic reports filed by the Asian Development Bank, pursuant to Regulation AD (17 CFR Part 287) adopted pursuant to section 11(a) of the Asian Development Bank Act.

Copies of papers filed in court, and papers and documents received from courts, are primarily for the use of the Commission attorneys and other members of the staff. These may not always be complete and accurate and may contain nonpublic staff notations. However, in appropriate situations, with the approval of the Office of the General Counsel, examination of such material may be made or copies obtained as a matter of courtesy.

Statements of policy and interpretations which have been adopted by the Commission and are not published in the FEDERAL REGISTER.

Administrative staff manuals and instructions to the staff that affect a member of the public.

Reports by the Commission to the Congress as a whole.

3. Section 200.303 of Subpart H is amended by revising paragraph (a)(2) as follows:

§ 200.303 Times, places, and requirements for requests pertaining to individual records in a record system and for the identification of individuals making requests for access to the records pertaining to them.

* * * * *

4. Section 200.310, the fourth sentence is revised to read as follows:

§ 200.310 Fees.

* * * Records will be copied onto pages, from 8" x 10½" up to 8½" x 14", at the cost of 10 cents per page. Copying machines are provided in the public reference rooms in the Commission's Washington, D.C., New York, Los Angeles and Chicago offices, where the individual may make copies at the cost of 10 cents per page.

Part 202 of Chapter II of Title 17 of the Code of Federal Regulations is amended by revising §§ 202.3 and 202.7 to read as follows:

§ 202.3 Processing of filings.

(a) Registration statements, proxy statements, letters of notification, periodic reports, applications for qualification of indentures, and similar documents filed with the Commission under the Securities Act of 1933 and the Trust Indenture Act of 1939, and certain filings under the Securities Exchange Act of 1934 and the Public Utility Holding Company Act of 1935 are routed to the Division of Corporation Finance, which passes initially on the adequacy of disclosure and recommends the initial action to be taken. If the filing appears to afford inadequate disclosure, as for example through omission of material information or through violation of accepted accounting principles and practices, the usual practice is to bring the deficiency to the attention of the person who filed the document by letter from the Assistant Director assigned supervision over the particular filing, and to afford a reasonable opportunity to discuss the matter and make the necessary corrections. This informal procedure is not generally employed when the deficiencies appear to stem from careless disregard of the statutes and rules or a deliberate attempt to conceal or mislead or where the Commission deems formal proceedings necessary in the public interest. Where it appears that the filing affords adequate disclosure, acceleration of its effectiveness when appropriate normally will be granted. A similar procedure is followed with respect to filings under the Investment Company Act of 1940 and certain filings relating to investment companies under the Securities Act of 1933, the Securities Exchange Act of 1934, and the Trust Indenture Act of 1939, which are routed to the Division of Investment Management, and filings under the Public Utility Holding Company Act of 1935 which are routed to the Division of Corporate Regulation.

(b) Applications for registration as brokers, dealers, investment advisers, municipal securities dealers and transfer agents are submitted to the Office of Reports and Information Services where they are examined to determine whether all necessary information has been supplied and whether all required financial statements and other documents have been furnished in proper form. Defective applications may be returned with a request for correction or held until corrected before being accepted as a filing. The files of the Commission and other sources of information are considered to determine whether any person connected with the applicant appears to have engaged in activities which would warrant commencement of proceedings on the question of denial of registration. The staff confers with applicants and makes suggestions in appropriate cases for amendments and supplemental information. Where it appears appropriate in the public interest and where a basis therefor exists, denial proceedings may be instituted. Within 45 days of the date of the filing of a broker-dealer, investment adviser or municipal securities dealer application (or within such longer period as to which the applicant consents), the Commission shall (1) by order grant registration, or (2) institute proceedings to determine whether registration should be denied. An application for registration as a transfer agent shall become effective within 30 days after receipt of the application (or within such shorter period as the Commission may determine). The Office of Reports and Information Services is also responsible for the processing and substantive examination of statements of beneficial ownership of securities and changes in such ownership filed under the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, and the Investment Company Act of 1940, and for the examination of reports filed pursuant to § 230.144 of this chapter.

§ 202.7 Submittals.

All required statements, reports, applications, etc. must be filed with the principal office of the Commission except letters of notification filed pursuant to §§ 230.251 et seq. of this chapter, notices of proposed sale of securities pursuant to § 230.237 of this chapter, and reports by issuer of sales pursuant to § 230.240 of this chapter, under the Securities Act of 1933. Reports by exchange members, brokers and dealers required by § 240.17a–5 of this chapter under the Securities Exchange Act of 1934 must be filed with the appropriate regional office as provided in § 230.255(a) of this chapter under the Securities Act of 1933, and with the principal office of the Commission and the appropriate regional office as provided under § 240.17a–5(a) et seq. of this chapter under the Securities Exchange Act of 1934.

[Release No. 34–12843]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Brokers and Dealers Effecting Transactions in Municipal Securities

The Securities and Exchange Commission today announced the extension until January 1, 1977 of certain aspects of its financial responsibility and reporting program pertaining to transactions in municipal securities. The affected components of the program consist of the Commission's temporary amendments to Rule 15c3–1 under the Securities Exchange Act of 1934 (17 CFR 240.15c3–1) ("§ 240.15c3–1"), the uniform net capital rule, regarding certain receivables arising from municipal securities underwritings and undue concentrations of municipal securities.

NET CAPITAL TREATMENT OF CERTAIN UNDERWRITING RECEIVABLES

In its original form, § 240.15c3–1(c)(2)(iv)(C) required the deduction from net worth of all good faith deposits arising in connection with an underwriting and outstanding longer than eleven business days. Furthermore, profits derived from participation in an underwriting syndicate were treated as "unsecured receivables" which, pursuant to § 240.15c3–1(c)(2)(iv)(E), were deducted from net worth. These provisions were premised upon industry practices followed in the underwriting of corporate securities. However, as the Commission pointed out in Securities Exchange Act Release No. 11854 (Nov. 20, 1975) (40 FR 57786 (Dec. 12, 1975)) ("Release No. 11854"), municipal securities underwriting syndicates and joint accounts generally "operate on a much more protracted timetable than their corporate securities counterparts."[1] The Commission noted

V41 I198 OCT 12 76 UMI

that the duration and conduct of public offerings of municipal securities might be an appropriate matter for consideration by the Municipal Securities Rulemaking Board (the "Board"), and, as an interim measure, temporarily amended § 240.15c 3-1(c)(2)(iv)(C) to permit inclusion in net worth of receivables and good faith deposits arising from participation in municipal securities underwritings and outstanding not longer than ninety days from settlement of the underwriting with the issuer.[2]

In Securities Exchange Act Release No. 12482 (May 26, 1976) (41 FR 24114 (June 15, 1976)) ("Release No. 12482"), the Commission postponed the expiration of the temporary amendment to § 240.15c3-1(c)(2)(iv)(C) until October 1, 1976. On this occasion, the Commission noted that it had been apprised that the Board was developing regulations which would, inter alia, establish time limits within which managing underwriters must remit good faith deposits and distribute syndicate or joint account profits.[3] This referred to an exposure draft of a proposed Board Rule G–12 prescribing uniform rules of practice for municipal securities brokers and municipal securities dealers, which the Board circulated on April 22, 1976. In its draft form, proposed Rule G–12(i) requires the manager of a syndicate or similar account formed for the purchase of municipal securities from their issuer to return good faith deposits within two business days after settlement with the issuer. The draft of proposed Rule G–12(j) provides that final settlement of such a syndicate or account (presumably including distribution of profits arising therefrom) must occur no later than sixty days after delivery of all municipal securities by the syndicate or account manager to participants therein. The Board invited comment on its exposure draft during a period expiring on May 24, 1976; we understand that the Board is presently considering proposed Rule G–12 in light of comments received.

The Commission has determined that it is appropriate in the public interest to extend the temporary amendment to § 240.15c3–1(c)(2)(iv)(C) to afford the Board sufficient time to complete development of proposed Rule G–12, and to provide the Commission with an opportunity to consider whether it is appropriate to coordinate the net capital treatment of municipal securities underwriting receivables wtih such remittance standards as proposed Rule G–12 may finally embody. Accordingly, the Commission amends § 240.15c3–1(c)(2)(iv)(C) to delay the expiration of the temporary amendment thereto until January 1, 1977. The amended text of § 240.15c3–1(c)(2)(iv)(C) appears later in this release.

Undue Concentration of Municipal Securities

Section 240.15c3–1(c)(2)(vi)(M) essentially provides that a deduction from net worth equal to half the appropriate haircut shall be taken against long or short positions in the securities of an issuer of a single class or series, the market value of which positions exceeds ten percent of tentative net capital. A similar provision, § 240.15c3–1(f)(3)(iii), applies to computations under the alternative net capital requirement.

In Release No. 11854, the Commission exempted positions in municipal securities from the undue concentration provisions until June 1, 1976.[4] On this occasion, the Commission related the suggestions of certain commentators that these provisions might unduly penalize certain historically safe positioning practices of the municipal securities industry.[5] The Commission concluded that while it might not be appropriate to apply the existing undue concentration criteria to municipal securities, undue concentration requirements appropriate for these securities should be developed.[6] To that end, the Commission solicited public comment and impact studies concerning this matter.[7]

By May 1976, as the Commission noted in Release No. 12482,[8] interested members of the public had suggested several different solutions to the undue concentration question, but had not yet developed impact data indicating the contours of undue concentrations of municipal securities. Accordingly, the Commission continued the undue concentration exemption for municipal securities until October 1, 1976, and renewed its request for impact studies and other appropriate statistical compilations enabling the Commission to identify a point at which inventoried municipal securities become unduly concentrated.[9]

Since the issuance of Release No. 12482, certain interested members of the public have embarked upon extensive surveys and impact studies responsive to this and several other requests for data propounded in Release No. 12482. The Commission has been informed that these studies are expected to be completed not later than November 1, 1976. The Commission believes it is appropriate to continue the exemption of municipal securities from the undue concentration provisions of § 240.15c3–1 to permit mature consideration of this issue in the light of those statistical studies forthcoming from the public.[10] Accordingly, the Commission has determined to amend § 240.15c3–1(c)(2)(iv)(M) and (f)(3)(iii) to extend the temporary amendments thereto until January 1, 1977.

The text of the amendments to these provisions appears below.

Public Procedure

In Release No. 12482, the Commission invited public comment concerning several questions relating to the appropriate net capital requirements for brokers and dealers effecting transactions in municipal securities. The amendments to § 240.15c3–1 adopted herein are necessary to afford interested members of the public sufficient time to develop and transmit to the Commission information responsive to the Commission's solicitation of comment. The Commission finds, pursuant to 5 U.S.C. 553(b)(3)(B) (1970), that further notice and public procedure respecting these amendments is impracticable and unnecessary in the public interest. The Commission finds further that these amendments relieve regulatory restrictions within the meaning of 5 U.S.C. 553(d)(1) (1970), and may therefore become effective less than thirty days from their publication.

Statutory Basis and Competitive Considerations

Pursuant to the Securities Exchange Act of 1934, and particularly sections 15(c)(3) and 23(a) thereof, 15 U.S.C. 78o(c)(3), 78w, the Commission amends § 240.15c3–1 in Part 240 of Chapter II of Title 17 of the Code of Federal Regulations in the manner set forth below, effective immediately. The Commission finds that any burden imposed upon competition by the amendments is necessary and appropriate in furtherance of the purposes of the Act, and particularly to implement the Commission's mandate under section 15(c)(3) thereof, 15 U.S.C. 78o(c)(3), to establish minimum financial responsibility standards for all brokers and dealers.

[1] Securities Exchange Act Release No. 11854, at 9 (Nov. 20, 1975), 40 FR 57786, 57789 (Dec. 12, 1975) (hereinafter cited as Release No. 11854).

[2] Id. at 9–10, 40 FR at 57789.

[3] Securities Exchange Act Release No. 12482, at 13 (May 26, 1976), 41 FR 24114, 24116 (June 15, 1976) (hereinafter cited as Release No. 12482).

[4] Release No. 11854 at 12, 40 FR at 57790.

[5] Id.

[8] Release No. 12482 at 14–15, 41 FR at 24116–17.

[9] Id.

[10] The same considerations apply to the two other principal issues upon which comment was requested in Release No. 12482: the contours of a "ready market" for municipal securities, and the possible need to modify the treatment of certain debit items for purposes of § 240.15c3–1(f), the alternative net capital requirement. The temporary provisions dealing with these issues—an indefinite suspension of § 240.15c3–1(c)(2)(vii) as applied to municipal securities and two temporary amendments to § 240.15c-3–1(f) expiring January 1, 1977—supply the Commission with sufficient time to analyze and act upon data germane to these issues. However, these considerations do not apply to a temporary amendment to § 240.15c3-1(c)(1)(i) respecting overnight bank loans incurred by brokers and dealers effecting transactions solely in municipal securities, which has been extended twice before and which is currently scheduled to expire on October 1, 1976. In Release No. 12482, the Commission indicated that the most recent extension of this temporary amendment was intended solely to afford these brokers and dealers a transitional period during which they might familiarize themselves with the alternative net capital requirement. Release No. 12482 at 11, 41 FR at 24116. It appears to the Commission that this temporary amendment has served its purpose, and should now be permitted to lapse. The Commission notes that on and after October 1, 1976, brokers and dealers of this class not operating under the alternative net capital requirement may either include their overnight loans in aggregate indebtedness, or deduct, pursuant to § 240.15c3–1(c)(2)(xiii), 4 percent of such indebtedness from their net worth, if the indebtedness is collateralized by municipal (or exempted) securities (i) not carried long, or (ii) failed to deliver.

Text of Amendments to § 240.15c3–1

The text of the revised § 240.15c3–1(c)(2)(iv)(C) is as follows:

§ 240.15c3–1 Net capital requirements for brokers and dealers.

* * * * * * *

(c) * * *

(2) * * *

(iv) * * *

(C) Interest receivable, floor brokerage receivable, commissions receivable from other brokers or dealers (other than syndicate profits which shall be treated as required in paragraph (c)(2)(iv)(E) of this section), mutual fund concessions receivable and management fees receivable from registered investment companies, all of which receivables are outstanding longer than thirty (30) days from the date they arise; dividends receivable outstanding longer than thirty (30) days from the payable date; good faith deposits arising in connection with an underwriting, outstanding longer than eleven (11) business days from the settlement of the underwriting with the issuer; and, until January 1, 1977, receivables due from participation in municipal securities underwriting syndicates and municipal securities joint underwriting accounts which are outstanding longer than ninety (90) days from settlement of the underwriting with the issuer, and good faith deposits arising in connection with an underwriting of municipal securities, outstanding longer than ninety (90) days from settlement of the underwriting with the issuer;

* * * * * * *

In § 240.15c3–1, the last sentence of paragraphs (c)(2)(vi)(M) and (f)(3)(iii) is amended to read as follows:

* * * *Provided further*, That until January 1, 1977, this paragraph shall not apply to municipal securities.

By the Commission.

George A. Fitzsimmons,
Secretary.

September 29, 1976.

Title 7—Agriculture

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regulations, 1976 Crop Corn Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1976 Crop Corn Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop corn and operating provisions to carry out the 1976 crop corn loan and purchase program was published in the Federal Register (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that loan and purchase rates for 1976 crop corn on a national average will be increased to $1.25 per bushel. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued. Other operating provisions for the 1976 crop remain the same as those for the 1975 crop.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments thereto, and the 1970 and Subsequent Crops Corn Loan and Purchase Program Regulations, published at 35 FR 13969, and any amendments to such regulations are further supplemented for the 1976 crop of corn. 7 CFR § 1421.111 through § 1421.113 and the title of the subpart are revised to read as provided below, effective as to the 1976 crop of corn. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1976 Crop Corn Loan and Purchase Program

Sec.
1421.111 Availability.
1421.112 Maturity of loans.
1421.113 Loan and purchase rates, premiums and discounts.

Authority: Secs. 4, 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105, 401, 63 Stat. 1051, as amended, (7 U.S.C. 1441 note, 1421)

Subpart—1976 Crop Corn Loan and Purchase Program

§ 1421.111 Availability.

(a) *Loans.* A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible corn on or before May 31, 1977.

(b) *Purchases.* A producer desiring to offer eligible 1976 crop corn not under loan for purchase must execute and deliver to the county ASCS office on or before April 30, 1978, a Purchase Agreement (Form CCC–614) indicating the approximate quantity of 1976 crop corn he will sell to CCC. Delivery of the commodity to CCC will not be accepted before April 30, 1978.

§ 1421.112 Maturity of loans.

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

§ 1421.113 Loan and purchase rates, premiums and discounts.

County basic loan and purchase rates for corn and the schedule of premiums and discounts are contained in this section. Farm stored loans will be made at the basic rate for the county where the corn is stored, adjusted only for the weed control discount where applicable. The loan and purchase rate for warehouse-stored corn loans shall be the basic rate for the county where the corn is stored, adjusted by the premiums and discounts prescribed in paragraphs (b) and (c) of this section. Notwithstanding § 1421.22(c), settlement for corn delivered from other than approved warehouse storage shall be based on the basic rate for the county in which the producer's customary delivery point is located, and on the quality and quantity of the corn delivered as shown on the warehouse receipts and accompanying documents issued by an approved warehouse to which delivery is made, or if applicable, the quality and quantity delivered as shown on a form prescribed by CCC for this purpose.

(a) *Basic county rates.* Basic county rates for corn grading No. 2 and containing from 15.1 through 15.5 percent moisture are as follows:

The basic loan and purchase rates shall be adjusted as applicable by premiums and discounts as follows:

(b) *Premiums.* (1) Moisture.

	Cents per bushel
14.0 or less	+1½
14.1 through 14.5	+1
14.6 through 15.0	+ ½

(2) Broken corn and foreign material:

Percent: 2.0 or less	+1

The premiums in this subsection (b) shall not apply to sample grade corn.

(c) *Discounts.* (1) Class.

	Cents per bushel
Mixed	−2

(2) Test weight per bushel.

Pounds:	
53.0 through 53.9	−1
52.0 through 52.9	−2
51.0 through 51.9	−3
50.0 through 50.9	−4
49.0 through 49.9	−5

(3) Total damage.

Percent:	
5.1 through 6.0	−½
6.1 through 7.0	−1

(4) Heat damage.

Percent: 0.21 through 0.50	−½

(5) Broken corn and foreign material.

Percent: 3.1through 4.0	−10

(6) Weed control laws:

Where required by § 1421.25	−10

(7) *Other:* Amounts determined by CCC to represent market discounts for quality factors not specified above which affect the value of the corn such as (but not limited to) moisture, weevily, musty, sour, and rodent excreta. Such discounts will be established not later than the time delivery of corn to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Effective date: October 12, 1976.

Signed at Washington, D.C., on October 1, 1976.

SEELEY G. LODWICK,
Acting Executive Vice President,
Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1976 Crop Sorghum Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1976 Crop Sorghum Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop sorghum and operating provisions to carry out the 1976 crop sorghum loan and purchase program was published in the FEDERAL REGISTER (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that loan and purchase rates for 1976 crop sorghum on a national average will be increased to $2.13 per cwt. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued. Other operating provisions for the 1976 crop remain the same as those for the 1975 crop.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments thereto, and the 1970 and Subsequent Crops Sorghum Loan and Purchase Program Regulations, published at 35 FR 10745, and any amendments to such regulations are further supplemented for the 1976 crop of sorghum. 7 CFR § 1421.235 through § 1421.237 and the title of the subpart are revised to read as provided below, effective as to the 1976 crop of sorghum. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1976 Crop Sorghum Loan and Purchase Program

Sec.

1421.235 Availability.
1421.236 Maturity of loans.
1421.237 Loan and purchase rates and discounts.

AUTHORITY: Secs. 4, 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441 note, 1421)

Subpart—1976 Crop Sorghum Loan and Purchase Program

§ 1421.235 **Availability.**

(a) *Loans.* A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible sorghum on or before May 31, 1977.

(b) *Purchases.* A producer desiring to offer eligible 1976 crop sorghum not under loan for purchase must execute and deliver to the county ASCS office on or before April 30, 1978, a Purchase Agreement (Form CCC–614) indicating the approximate quantity of 1976 crop sorghum he will sell to CCC. Delivery of the commodity will not be accepted before April 30, 1978.

§ 1421.236 **Maturity of loans.**

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipts was issued.

§ 1421.237 **Loans and purchase rates and discounts.**

(a) *Basic rates (counties).* Basic county rates for loan and settlement purposes for sorghum grading U.S. No. 2 or better are established as follows:

(b) *Discounts.* The basic loan and purchase rates shall be adjusted as applicable by discounts as follows:

	Cents per bushel
(1) Class: Mixed sorghum	3
(2) Grade:	
U.S. No. 3 (not over 14 percent moisture)	3
U.S. No. 4 (not over 14 percent moisture)	5
Smutty	5
(3) Weed control law (where required by § 1421.25)	15

(4) *Other factors:* Amounts determined by CCC to represent market discounts for quality factors not specified above which affect the value of the sorghum, such as (but not limited to) moisture, heat damage, test weight, weevily, musty, sour, stones, weathered, discolored. Such discounts will be established not later than the time delivery of sorghum to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to maturity date.

NOTE.—Discounts are cumulative except only one grade discount shall be applied.

Effective date: October 12, 1976.

Signed at Washington, D.C., on: October 1, 1976.

SEELEY G. LODWICK,
Acting Executive Vice President,
Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1976 Crop Soybean Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1976 Crop Soybean Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop soybeans and operating provisions to carry out the 1976 crop soybean loan and purchase program was published in the FEDERAL REGISTER (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that the loan and purchase rates for 1976 crop soybeans on a national average will be $2.50 per bushel. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments thereto, and the 1970 and Subsequent Crops Soybean Loan and Purchase Program Regulations, published at 35 FR 13971 and any amendments to such regulations are further supplemented for the 1976 crop of soybeans. 7 CFR 1421.390 through § 1421.392 and the title of the subpart are revised

V41N198 OCT 12 76 UM

to read as provided below, effective as to the 1976 crop of soybeans.

Subpart—1976 Crop Soybean Loan and Purchase Program

Sec.
1421.390 Availability.
1421.391 Maturity of loans.
1421.392 Loans and purchase rates, premiums and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 301, 303, 401, 63 Stat. 1051, as amended (7 U.S.C. 1447, 1449, 1421).

§ 1421.390 Availability.

(a) *Loans.* A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible soybeans on or before May 31, 1977.

(b) *Purchases.* Producers desiring to offer eligible 1976 crop soybeans not under loan for purchase must execute and deliver to the county ASCS office on or before April 30, 1978, a purchase agreement (Form CCC–614) indicating the approximate quantity of 1976 crop soybeans they will sell to CCC.

§ 1421.391 Maturity of loans.

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

§ 1421.392 Loan and purchase rates, premiums and discounts.

County rates for soybeans and the schedule of premiums and discounts are contained in this section. Farm stored loans will be made at the basic rate for the county where the soybeans are stored, adjusted only for the weed control discount where applicable. The loan and purchase rate for warehouse stored soybean loans shall be the basic rate stored, adjusted by the premiums and discounts prescribed in paragraphs (b) and (c) of this section. Notwithstanding § 1421.22 (c), settlement for soybeans delivered from other than approved warehouse storage shall be based: (1) On the basic rate for the county in which the producer's customary delivery point is located, and (2) on the quality and quantity of the soybeans delivered as shown on the warehouse receipts and accompanying documents issued by an approved warehouse to which delivery is made, or if applicable, the quality and quantity delivered as shown on a form prescribed by CCC for this purpose.

(a) *Basic county loan and purchase rates.* Basic county rates for the classes Green or Yellow Soybeans containing 12.8 to 13 percent moisture and grading not lower than U.S. No. 2 on the factors of test weight, splits, and heat damage and U.S. No. 1 on all other factors are as follows:

Other factors. Amounts determined by CCC to represent market discounts for quality factors not specified above which affect the value of the soybeans, such as (but not limited to) moisture, musty, sour, and heating. Such discounts will be established not later than the time delivery of soybeans to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

[1] Not applicable to soybeans that grade "sample".

[2] Use the higher applicable discount.

Effective date: October 12, 1976.

Signed at Washington, D.C., on: October 1, 1976.

SEELEY G. LODWICK,
Acting Executive Vice President, Commodity Credit Corporation.

Title 49—Transportation

SUBTITLE A—OFFICE OF THE SECRETARY OF TRANSPORTATION

[OST Docket No. 1; Amdt. 1-121]

PART 1—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES

Further Amendments

The purpose of this amendment is to revoke the delegations to the Deputy Under Secretary for Budget and Program Review. This matter was inadvertently omitted from the document published in the FEDERAL REGISTER on Wednesday, October 6, 1976. That document, as here supplemented, reflects a reorganization of the Office of the Secretary of Transportation which transfers all functions of the Deputy Under Secretary for Budget and Program Review to the Deputy Under Secretary.

Since this amendment relates to Departmental management, procedures, and practices, notice and public procedure thereon are unnecessary and it may be made effective in fewer than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations is amended by revoking § 1.65, Delegations to the Deputy Under Secretary for Budget and Program Review.

(Sec. 9(e), Department of Transportation Act, 49 U.S.C. 1657(e).)

Effective date: This amendment is effective October 12, 1976.

Issued in Washington, D.C., on October 7, 1976.

WILLIAM T. COLEMAN, JR.,
Secretary of Transportation.

[FR Doc.76-29996 Filed 10-8-76;12:05 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[46 CFR Part 31]

[CGD 75-041]

TANK VESSELS

Loading Information

The Coast Guard is considering amending the regulations for tank vessels to require all tank vessels over 300 feet in length to have the loading information required for vessels subject to the load line regulations in Parts 42 and 45 of Title 46.

Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments to the Commandant (G-CMC/81), U.S. Coast Guard, Washington, D.C. 20590. Each person submitting a comment should include his name and address, identify this notice (CGD 75-041), and give reasons in support of his comment. Comments received before November 29, 1976 will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination in room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, SW, Washington, D.C. This proposal may be changed in light of comments received. No hearing is planned but one may be held at a time and place set in a later notice in the FEDERAL REGISTER if requested by an interested person desiring an opportunity to comment orally at a public hearing and raising a genuine issue.

The load line regulations in § 42.15-1 (a) and § 45.105(a) of Title 46 require that the master of every new vessel be supplied with sufficient information to enable him to arrange for the loading and ballasting of his vessel in a way that avoids the creation of unacceptable stresses in the vessel's structure. However, these regulations do not cover tank vessels operating solely on inland waters or on special service coastwise voyages. (The load line regulations in Part 44 of Title 46 are applicable to vessels engaged in special services on coastwise and interisland voyages.)

The Coast Guard has determined on the basis of a recent study that all tank vessels over 300 feet in length should have loading information available for use. This study consisted of a review of several recent barge designs. The study showed that several new barges have proportions similar to a T-2 tanker and that tank vessels with these proportions that are over 300 feet in length can be subject to unsafe stress levels if not properly loaded. Accordingly, this notice proposes to require the loading information on all tank vessels over 300 feet in length.

Casualties involving barges have occurred in recent years in which improper loading subsequently led to structural damage. Vessels in the casualties include the following:

(a) The 580 foot barge I.O.S. 3301 which broke almost completely in half at its berth at the Consolidated Oil Company Terminal, Port Jefferson, New York. (The casualty occurred in January, 1972. The Marine Board of Investigation concluded that distributing ballast only in tanks at the forward and aft ends of the barge, which left all of the tanks in the midlength empty, created an excessive longitudinal bending moment. The Board recommended that all rigidly connected tugbarge combinations be furnished with loading information.)

b. The 312 foot barge *Perth Amboy* which buckled while loading at Chevron Docks, Perth Amboy, New Jersey. (The casualty occurred in September, 1972. The barge was certificated for operation in lakes, bays, and sounds. The investigation report concluded that a contributing cause of the casualty was extremely high stress imposed on the barge by the loading pattern used at the time of casualty. The report recommended that all tank barges, both manned and unmanned, should have simplified instructions and restrictions concerning the distribution of cargo posted in accessible locations on board.)

In accordance with the foregoing, the Coast Guard proposes to amend Part 31 of Title 46, Code of Federal Regulations, by adding a new § 31.10-32 to read as follows:

§ 31.10-32 Loading information—TB/ALL.

Each tank vessel over 300 feet in length must have the loading information prescribed in either § 42.15-1(a) or § 45.105(a) of this chapter. For tank vessels subject to the Load Line Acts the information must be approved by the Commandant or by a recognized classification society that is approved by the Commandant. For tank vessels not subject to the Load Line Acts loading information must be approved by the Commandant. If the vessel is a tankship, the approved information must be provided to the master of the vessel. If the vessel is a tank barge, the information must be provided to the person in charge of handling the cargo during loading or offloading of the barge.

(46 U.S.C. 391(a); 49 U.S.C. 1655(b); 49 CFR 1.46.)

Dated: October 4, 1976.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard Chief, Office of Merchant Marine Safety.

Office of Hazardous Materials Operations

[49 CFR Part 171]

[Docket No. HM-22; Notice No. 76-8]

MATTER INCORPORATED BY REFERENCE

Proposed Rule Making

The Materials Transportation Bureau of the Department of Transportation is considering amending § 171.7(d)(1) of the Hazardous Materials Regulations to update the reference to the addenda to sections VIII (Division I) and IX of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code.

The Compressed Gas Association, Inc., has petitioned this Office to effect this change.

In consideration of the foregoing, it is proposed to amend paragraph (d)(1) of § 171.7 by changing the date December 31, 1975 to read "June 30, 1976."

The MTB has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Interested persons are invited to give their views on this proposal. Communications should identify the docket number and be submitted (five copies) to the Section of Dockets, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C. 20590. Communications received on or before November 10, 1976 will be considered before final action is taken on this proposal. All comments received will be available for examination by interested persons at the Office of Hazardous Materials Operations, Room 6500 Trans Point Building, 2100 Second Street, S.W., Washington, D.C. both before and after the closing date for comments.

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e) and paragraph (a)(4) of App. A to Part 102.)

Issued in Washington, D.C. on October 6, 1976.

ALAN I. ROBERTS,
Director, Office of Hazardous Materials Operations.

[FR Doc.76-29858 Filed 10-8-76;8:45 am]

[49 CFR Parts 171, 177]

[Docket No. HM-110; Notice No. 76-9]

VEHICLES CONTAINING HAZARDOUS MATERIALS

Repair and Maintenance

The Materials Transportation Bureau (MTB) is proposing to amend Title 49 of the Code of Federal Regulations by revising paragraph (d) (6) in § 171.7 and amending paragraphs (g) and (h) of § 177.854 that prescribe the conditions under which repair and maintenance may be performed on motor vehicles containing hazardous material. A previously published (39 FR 41741), but not effective, amendment to those provisions was revoked on June 30, 1976, by a July 8, 1976, FEDERAL REGISTER document (41 FR 27968). It was stated in the July 8 document that, "Reconsideration by the Materials Transportation Bureau confirms that the requirements of § 177.854 (g), as amended on December 2, 1976 (39 FR 41741), do not clearly articulate the safety precautions intended in every situation and are capable of being misconstrued in a manner which comprises, rather than promotes, the safe transportation of hazardous materials." Additionally, the July 8 document notified the public that this new proposal with respect to § 177.854(g) would be published.

In consideration of the foregoing, it is proposed to amend Parts 171 and 177 of Title 49 as follows:

1. In § 171.7 , paragraph (d) (6) (i) would be added to read as follows:

§ 171.7 Matter incorporated by reference.

(d) • • •

(6) • • •

(i) NFPA Pamphlet No. 70 is titled, "National Electrical Code," 1975 edition.

• • • • •

2. In § 177.854 paragraph (h) would be deleted; paragraph (g) would be revised to read as follows:

§ 177.854 Disabled vehicles and broken or leaking packages; repairs.

• • • • •

(g) *Repair and maintenance to vehicles containing certain hazardous materials.* (1) Except as authorized in paragraphs (g) (2) and (g) (3) of this section, no person may repair or perform maintenance on a motor vehicle containing a flammable liquid, combustible liquid, flammable gas, poisonous liquid, oxidizer, or explosive.

(2) Repair or maintenance on a vehicle containing any quantity of the hazardous material prescribed in paragraph (g) (1) of this section may be performed outside of a building if no heat, flame, or spark is used within 100 feet of the vehicle containing the hazardous materials.

(3) Repair or maintenance on a motor vehicle containing one or more of the hazardous materials prescribed in paragraph (g) (1) of this section may be performed inside of a building if no heat, flame, or spark is used in the same enclosed area of the building and the following conditions are met:

(i) The vehicle's product containment system and fuel system must be closed, and there must be no leakage;

(ii) No repair or maintenance may be performed on the product containment system, the product handling system, or the vehicle's fuel containment system;

(iii) All electrical equipment and tools used in the vehicle repair and maintenance area must be in compliance with the requirements of the National Electrical Code, NFPA No. 70, Article 511, 1975 edition;

(iv) A means is provided and a person, who is qualified to operate the vehicle, is available to remove the vehicle at the first indication of any product leakage or any other emergency situation;

(v) If there is flame type (e.g., furnace, boiler, or gas-fired heater) heating system equipment in the building, it must be turned off (including its pilot light) before the vehicle may be placed in the building, unless: (A) The heating system is located in a separate room which is sealed off from the area in which the vehicle is repaired or maintained; and

(B) The heating system draws air for combustion from a source which assures it has not been exposed to vapors from hazardous materials.

(vi) The vehicle must be removed immediately from the building upon completion of repairs or maintenance.

(h) [Deleted]

The proposals contained herein are not expected to impose any significant additional costs on the public sector, and may result in some cost reduction. An inflation impact statement is not required.

Interested persons are invited to give their views on these proposals. Communications should identify the docket number and be submitted (five copies) to the Section of Dockets, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C., 20590. Communications received on or before January 10, 1977 will be considered before final action is taken on these proposals. All comments received will be available for examination by interested persons in the Section of Dockets, Office of Hazardous Materials Operations, Room 6500, Trans Point Building, 2100 Second Street, S.W., Washington, D.C. both before and after the closing date for comments.

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e) and paragraph (a) (4) of App. A to Part 102.)

Issued in Washington, D.C. on October 5, 1976.

ALAN I. ROBERTS,
Director, Office of Hazardous Materials Operations.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20787 RM-2607]

FM BROADCAST STATIONS, TABLE OF ASSIGNMENTS; WEST MEMPHIS, ARKANSAS

Memorandum Opinion and Order Denying Petition for Rule Making

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (West Memphis, Arkansas.

Adopted: September 28, 1976.

Released: October 1, 1976.

1. The Commission here considers its Notice of Proposed Rule Making [1] which proposed the assignment of Channel 296A to West Memphis, Arkansas. The Notice was issued following receipt of a "Petition for Rule Making" filed on behalf of Christian Studies of Man and Society (hereinafter "Christian"). Other than the appearance by Christian, there have been no other expressions of interest in this proceeding.

2. Because our disposition of this matter is based on procedural grounds, we believe it important to recount the various filing dates and pleadings. To begin with, Christian has from the outset been represented in this matter by Washington counsel. On September 12, 1975, Christian, through its attorneys, filed a petition for rule making with the Commission proposing the West Memphis assignment. In the petition Christian indicated that immediately upon assignment of Channel 296A at West Memphis, it would apply for a construction permit in order to institute the new broadcast service. On October 21, 1975, Christian filed a "Supplemental Petition for Rule Making" enclosing a preclusion study requested by the Commission and a collection of letters from residents of West Memphis indicating support for the channel assignment. A "further Supplemental Petition for Rule Making" containing community data and additional supportive letters from individuals and businesses in West Memphis was filed on October 31, 1975. On November 10, 1975, the Commission, after reviewing the petition for its technical acceptability, issued a Public Notice [2] indicating that the petition had been filed. On January 21, 1976, Christian filed a "Motion for Issuance of a Report and Order" noting that no comments had been filed in response to what it described as the Notice of Proposed Rule Making. It therefore asked the Commission "to finalize the Notice of Proposed Rule Making and assign Channel 296A to West Memphis."

[1] 41 FR 17788, April 28, 1976.

[2] The Public Notice (Rept. No. 955) was issued pursuant to § 1.403 of the Commission's Rules. Under § 1.405, interested parties may file statements in support of or in opposition to the petition for a period of 30 days after issuance of the Public Notice.

3. In point of fact the Commission at that stage had issued a Public Notice of the filing of the petition: it had not issued a Notice of Proposed Rule Making. Such a document was released, however, on April 26, 1976, pursuant to § 1.412 of the Commission's Rules. In that Notice the Commission set forth Christian's proposal, described the community of West Memphis, outlined the petitioner's preclusion study, and formally proposed the assignment of Channel 296A to the community. More importantly for our purposes, there was included within the Notice an Appendix, paragraph 2 of which stated:

> The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

Christian failed to file comments or replies to comments within the time period specified in the Notice: indeed, there has been no further expression of interest by Christian since its January 21, 1976, pleading was filed, well in advance of the Notice.

4. The Commission will refrain from assigning FM channels to communities where there is no expression of continuing interest in the use of that channel and where the channel in question would lie fallow and unused if assigned. To assign a channel without an assurance of use would be contrary to the statutory mandate to assure the "efficient" use of the available radio spectrum.[3] Thus, in our Notices of Proposed Rule Making we require the petitioner and other interested parties to express in their comments a continuing interest in the operation of a station on the proposed channel. The Commission has not received such an expression in this proceeding.

5. The issue of petitioner's failure to respond to a Notice of Proposed Rule Making was before the Commission in the Memorandum Opinion and Order and Further Notice of Proposed Rule Making in Anamosa, Ia., Docket No. 19161, 46 F.C.C. 2d 520 (1974). There the petitioner who failed to respond to our Notice was filing *pro se*, i.e., he represented himself in the matter. Here, the petitioner who failed to respond was represented by counsel. In the Anamosa decision, supra, we declined to make the assignment indicating that although the public interest standard was paramount, procedural standards must also be observed in order for the Commission to exercise its regulatory responsibilities in a proper manner. 46 F.C.C. 2d at p. 521. We indicated that on occasion, deviations from those requirements could be warranted but that such requests for special relief must clearly explain the failure to comply with the applicable procedural requirements and also demonstrate compelling, indeed, overriding public interest reasons why the requested exception should be made.

[3] 47 U.S.C. 307(b).

6. Here, we have no continuing expression of interest in the assignment as requested by our Notice. Further, we have no attempt on the part of the petitioner to explain why our procedural requirements were not, and could not have been complied with. The Commission's procedural rules and regulations were adopted for the purpose of maintaining order and conformity in the interest of administrative efficiency. Without such rules, the public and other interested parties would find it difficult, if not impossible, to participate in these rulemaking proceedings. We conclude that the public interest in maintaining the credibility and integrity of those rules requires denial of the instant petition.

7. Accordingly, *it is ordered*, That the "Petition for Rule Making" filed on behalf of Christian Studies of Man and Society requesting the assignment of Channel 296A to West Memphis, Arkansas, is denied.

8. *It is further ordered*, That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[Docket No. 20401; RM-2363]

CLW BROADCASTERS, INC.

Petition for Special Relief

Adopted: September 28, 1976.

Released: October 1, 1976.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Jefferson City, Missouri).

1. The Commission has before it the "Petition of CLW Broadcasters, Inc. for Special Relief" in which it seeks reversal of the Commission's action refusing to assign Channel 269A to Jefferson City, Missouri. Included with its pleading was a copy of a petition for reconsideration said to have been sent to the Commission. There is no record that its petition was ever received.

2. The factual situation presented by this case is rather complicated, and it is necessary to take a moment to describe the sequence of events which led to the present state of affairs. A Notice of Proposed Rule Making, 40 FR 14946 (1975), was issued by the Commission in response to a petition from George Bryant seeking the assignment of FM Channel 269A to Jefferson City, Missouri, as its third FM assignment. The Notice observed that assigning a third channel to Jefferson City, as had been proposed, would exceed the population criteria applied to the making of FM channel assignments. The criteria specify assigning either one or two channels to communities which have a population under 50,000. Jefferson City's 1970 population [1] was 32,407. The petitioner properly stated that assignments have been made which represent exceptions to the population criteria. However, the Commission noted that the main reason given for making most such assignments was that the channel could not be used elsewhere. The Commission observed that this was not the case here, as the channel could instead be used to provide a third assignment to Columbia, Missouri (population 58,804), or a second assignment at Mexico, Missouri (population 11,807), or a first FM assignment at either California, Missouri (population 3,105), or Centralia, Missouri (population 3,618). Although another channel was shown to be available for use at California, availability of another channel to use to provide an assignment for Centralia remained at issue. The Notice also called upon the petitioner to affirm his intention to apply for a station if the channel were assigned and to build it promptly if authority to do so were granted.

[1] The population figures cited and the changes in population noted are derived from the U.S. Census Bureau data from 1970.

3. CLW Broadcasters entered the picture at that point as successor-in-interest to Bryant, and, through counsel,[2] requested an extension of time to file comments in response to the Notice. This extension was granted. A second request for extension was filed but was denied because the request had not been made within the time limits specified in the Commission's rules. Thereafter, comments were filed accompanied by a request that the lateness of the filing be excused. In the Report and Order, 40 FR 48525 (1976), which was issued, the Commission refused to make the assignment. Several reasons were cited for this decision. CLW Broadcasters was said to have been untimely in filing its comments, missing even the extended deadline it had suggested in its second extension request. Moreover, its reasons for filing late were found unpersuasive. Beyond this, the comments themselves were found to be inadequate to support the assignment as they did not evidence the necessary unequivocal intention to pursue use of the channel if it were assigned. The pertinent statement on this point was "CLW Broadcasters, *with offices in Chattanooga, Tennessee, is interested in forming* a group to apply • • •" (emphasis supplied). So far as was then known, no petition for reconsideration was filed.

4. Now, the Commission has received a petition for special relief which urges a reversal of this denial and the grant of a petition for reconsideration which had been prepared and in normal course of action was believed to have been sent.[3]

[2] Counsel then representing CLW Broadcasters earlier had represented Bryant. According to counsel, Bryant no longer had any interest in the proceeding.

[3] The affidavits offered to show that the petition (in letter form) was sent fall short of doing so as neither the writer nor the typist avers to having mailed the letter. Rather, indication is made that such would have been the expected practice. For our purpose, however, we are considering the matter without regard to any possible procedural deficiencies in the filing of the petition.

V41N198 OCT 12 76 UM

We need not deal with the question of the procedural circumstances of the filing as, after examination of the merits of the petition for reconsideration, we continue to believe that the Commission's action denying the proposed assignment was proper. Even with the material provided in the petition for reconsideration (or for that matter in the petition for special relief) there was neither an explanation of the failure to provide the information in a timely fashion or even, at these late dates, a filing of all the data which were needed. In effect, the petition for reconsideration did no more than state the necessary intention to put the channel to use. CLW Broadcasters urged us to place reliance on this statement so that the channel could be assigned without the need to begin again the rule making process at the Notice stage.

5. The decision not to assign the channel rested on several points. Putting aside the finding (one resting on more than semantics), that CLW Broadcasters had not stated its intent to proceed, there remain other, substantive, problems. These problems relate to the need to justify a third assignment to a community whose population is well below the 50,000 level ordinarily adhered to, a matter especially important in view of the possible uses of the channel elsewhere, which use of this assignment at Jefferson City would foreclose. Four communities that might otherwise make use of the channel are involved. Two of them, where no channel is now assigned, are small but have been shown to have another channel available, so they do not constitute an impediment to the proposal here. The same holds true for the third community, Mexico, which because of its relatively small size (11,807) does not necessarily warrant a second FM assignment. The fourth is Columbia, a city more than 50% larger than Jefferson City, and like Jefferson City, a community with two existing assignments.[4] The question, then, is whether under these circumstances the assignment as proposed is warranted. To answer that we need to consider various relevant matters.

6. In deciding whether to make an assignment in excess of the population criteria we look at several factors. First, in cases where the population has or soon will pass the cut-off level, it is not only unfair, it is pointless to use an out-of-date lower census figure as a basis for denial. Likewise, where the channel is not needed elsewhere and in fact cannot be used elsewhere, it is not nearly as important to insist on a compelling showing before exceeding the criteria. However, the petitioner in this case is not able to take advantage of either of these factors since, as mentioned in the Notice, the population of Jefferson City does not approach the cut-off and the channel could be used elsewhere. In fact, there appears to be ample reason to protect its possible future use at Columbia. Columbia is much larger, faster growing and has less service. Even though we do not have a Columbia proposal currently before us, we must conclude that there are not sufficient reasons to support use of the channel in Jefferson City. Rather than supporting the proposal, the facts regarding Jefferson City militate against the proposal. Statistics regarding increases in telephone and electric meters in this, the capital of Missouri, were mentioned. Population, too, was said to have increased, but the fact is that were it not for a sizeable annexation of territory during the period between the 1960 and the 1970 Census, the city would have shown a significant loss in population. Even with annexation this increase is only a modest one.[5] This case does not present the picture of a city soon to reach a population dividing line or one showing such vigorous growth as to warrant an exception to the criteria. No special circumstances are alleged, nor would the proposal lead to providing a first or second FM or aural service to any group of people. Lacking the requisite showing to support the proposal, we cannot agree that the assignment should be made, or the proceeding reopened.

7. Therefore, *it is Ordered*, That the Petitions of CLW Broadcasters, Inc. for Special Relief, and for Reconsideration ARE *Denied*, and the denial of the proposed assignment IS *Affirmed*.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc.76-29803 Filed 10-8-76;8:45 am]

[4] Jefferson City, it should be noted, has one Class C and one Class A channel, but Columbia has only two Class A channels. Jefferson City has two full-time AM stations, Columbia only one plus a daytime-only station.

[5] Annexation aside, Columbia showed a substantial gain in population between 1960 and 1970.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. DEPARTMENT OF DEFENSE

Corps of Engineers

GULF OF CATALINA, CALIFORNIA

Intent To Establish Guidelines for Permits for Exploratory Drilling Operations

Tracts leased December 11, 1975 by the U.S. Bureau of Land Management for offshore (Outer Continental Shelf) oil development in the Gulf of Santa Catalina generally fall within, or very near, the vessel traffic separation scheme established by the U.S. Coast Guard. Future leases in the same area may or may not result in additional tracts conflicting with the vessel traffic lanes which are part of this scheme. Exploratory drilling by the lessees on the Continental Shelf requires a permit from the Department of the Army under 43 USC 1333(f).

The Los Angeles District Engineer, charged with exercising the authority and responsibility of the Secretary of the Army for such permits, is responsible for considering navigational and national defense matters in processing applications for such permits. All other matters including environmental considerations are under the responsibility of the Department of the Interior.

In reviewing the navigational aspects of proposed offshore operations, the Los Angeles District has always relied on the U.S. Coast Guard Marine Safety Standards and has required permittees to comply with all Coast Guard regulations as well as to keep the responsible Coast Guard Commanders informed of all activities. The vessel traffic separation scheme in the Gulf of Santa Catalina has posed some unique problems due to a number of factors involving not only the probable location of the oil, depth of water and depth of the suspected formations but also the ship traffic conditions to and from the Ports of Los Angeles and Long Beach. It would be preferable to keep the traffic lanes free of all obstructions. However, exploration is not feasible in certain of the tracts without temporary intrusion by exploratory vessels. Accordingly, guidelines have been developed jointly by the Los Angeles District and the 11th Coast Guard District in consultation with the Bureau of Land Management and the U.S. Geological Survey. These guidelines were developed in consideration of the following specific conditions:

1. Relocation of the Gulf of Santa Catalina Traffic Separation Scheme or establishment of any Safety Fairway will not be considered until substantial exploratory work in the area has been accomplished.

2. The U.S. Coast Guard has a commitment to provide maximum notification to the worldwide maritime industry of any structures or vessels engaged in exploratory activity in or near the designated vessel traffic separation scheme. While such notification will be made and updated by electronic communications systems, it is important that it be included in the printed matter disseminated on a regular basis. 120 days is considered the minimum time required to assure that such printed notification is effectively provided to those navigating the waters affected.

3. While the U.S. Coast Guard recognizes that some exploratory work within the traffic lanes will be required, such activity must be minimized to preserve the integrity of the traffic separation scheme, and the safety it offers shipping.

4. The number of obstructions in the vessel traffic separation scheme will have a significant impact on the level of safety provided maritime traffic. Therefore, the number of obstacles within the traffic lanes and the ¼ mile buffer zones must be minimized.

5. All drilling within a single tract will be covered by a single permit.

Guidelines are as follows—1. For tracts where drilling is expected to be accomplished within the traffic separation scheme or within 2 miles of a traffic lane, permit applications shall be submitted at least 120 days in advance of such drilling, where practicable, in order to provide maximum opportunity for worldwide notice to maritime interests. Such applications shall include the location of any known sites and the estimated start and completion dates for each. Updated information on the plan shall be furnished as soon as available. One individual (and alternate) shall be designated by the applicant as responsible for maintaining close liaison with all involved agencies.

2. Where it is not feasible to perform exploration work from outside, permits will include the following conditions for drilling within the traffic lanes or ¼ mile buffer zones:

a. The exploratory vessel will, to the degree practicable, be sited near traffic lane boundaries.

b. Exploratory vessels within one traffic lane shall be separated by at least 8 nautical miles in the direction of the lane axis.

c. Exploratory vessels located within the traffic lanes shall not be within 3,000 yards in any direction from any other drilling vessel.

3. Exploratory rigs and vessels engaged in offshore development anchored outside vessel traffic lanes may have no cables, anchors, buoys or other associated equipment within the ¼ mile buffer zones at a depth of less than 100 feet.

Consideration will be given to any comments, suggestions or objections thereto which are submitted in writing to the Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314, Attention: DAEN-CWO-N on or before 10 November 1976. The contents of this notice are being published concurrently in a public notice by the Los Angeles District Engineer with a goal of establishing rules and regulations which will be published as proposed in accordance with established rulemaking procedures.

Dated: October 4, 1976.

MARVIN W. REES,
Colonel, Corps of Engineers, Executive Director of Civil Works.

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON THEATER NUCLEAR FORCES R. & D. REQUIREMENTS

Meeting

The Defense Science Board Task Force on Theater Nuclear Forces R. & D. Requirements will meet in closed session on 9, 10, and 11 November 1976 in the Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long range guidance in these areas to the Department of Defense.

The Task Force will provide an analysis of technology and systems applicable to theater nuclear forces and indicate promising solutions to the problem area for possible implementation within the Department of Defense.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Serial No. A-9697]

ARIZONA

Proposed Withdrawal and Reservation of Mineral Estate

The Department of the Army, United States Army Engineer District, Los Angeles, Post Office Box 2711, Los Angeles, California 90053, has filed an application, Serial Number A-9697, for withdrawal of the mineral estate in the following described lands:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 4 N., R. 2 E.,
Sec. 15, lots 1 to 24, inclusive;
Sec. 17, E½NE¼, NE¼NW¼NE¼, N½SE¼, SE¼SE¼.

The areas described aggregate 270 acres in Maricopa County.

The surface of the subject lands has been transferred out of Federal ownership with minerals reserved to the United States; it is proposed to withdraw the mineral estate from location and entry under the mining laws, including the mineral leasing laws.

The lands have been designated as the site of the Adobe Dam and will be used for the construction, operation, and maintenance of this Congressionally authorized flood control project and proposed recreational development. Withdrawal of the mineral estate is necessary for protection of the location of the dam site and appurtenances and the reservoir areas. Recreational development is proposed as a concurrent use. The intended using agency is the Flood Control District of Maricopa County, a political subdivision of the State of Arizona, 3325 West Durango Street, Phoenix, Arizona 85009.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal, may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

The Department's regulations provide that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate lands needed for purposes more essential than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant, a public hearing wil be held at a convenient time and place, which will be announced.

Dated: September 30, 1976.

E. F. SPANG,
Acting State Director.

OUTER CONTINENTAL SHELF OFFSHORE THE NORTH ATLANTIC STATES

Availability of Draft Environmental Impact Statement and Holding of Public Hearing Regarding Proposed Oil and Gas Lease Sale

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement relating to a proposed oil and gas lease sale of 206 tracts of submerged lands on the Outer Continental Shelf offshore the North Atlantic States (OCS Sale No. 42).

Single copies of the draft environmental statement can be obtained from the Office of the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, Six World Trade Center, Suite 600-D, New York, New York 10048 and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environmental statement will also be available for review in the following public libraries: New York Public Library, 5th Avenue and 42nd Street, New York City; Nassau Library System, Lower Concourse, Roosevelt Field, Garden City, New York; Suffolk Cooperative Library System, 627 North Sunrise Service Road, Bellport, New York; Trenton Free Public Library, 120 Academy Street, Trenton, New Jersey; Atlantic City Free Public Library, Illinois and Pacific Avenues, Atlantic City, New Jersey; Free Public Library of Elizabeth, 11 South Broad Street, Elizabeth, New Jersey; Hartford Public Library, 500 Main Street, Hartford, Connecticut; Bridgeport Public Library, 925 Broad Street, Bridgeport, Connecticut; New Haven Free Library, 133 Elm Street, New Haven, Connecticut; Providence Public Library, 150 Empire Street, Providence, Rhode Island; Newport Public Library, Aquidneck Park, Newport, Rhode Island; Boston Public Library, Copley Square, Boston, Massachusetts; Provincetown Public Library, 330 Commercial Street, Provincetown, Massachusetts; Falmouth Public Library, Main Street, Falmouth, Massachusetts; Fall River Public Library, 104 North Main Street, Fall River, Massachusetts; Concord Public Library, 45 Green Street, Concord, New Hampshire; Manchester City Library, Carpenter Memorial Building, 405 Pine Street, Manchester, New Hampshire; Lithgow Library, 1 Winthrop Street, Augusta, Maine; Portland Public Library, 619 Congress Street, Portland, Maine.

A public hearing will be held on December 7-10, 1976, at the Holiday Inn, 21 Atwells Avenue, Providence, Rhode Island, for the purpose of receiving comments regarding the North Atlantic OCS leasing proposal. The hearing will convene each day at 9 a.m. e.s.t., and is scheduled to adjourn at 9 p.m. (4:30 p.m. on December 10).

The hearing will provide the Secretary with additional information from both public and private sectors to help evaluate fully the potential effects of leasing oil and gas tracts offshore southeastern New England. In addition, the proceedings will give the Secretary the opportunity to receive further comments and views of concerned State and local agencies.

Interested individuals, representatives of organizations, and public officials who wish to testify at the hearing are requested to contact the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, at the above address by 5 p.m., November 24, 1976. Written comments from those unable to attend the hearing also should be addressed to the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, at the above address. The Department will accept written testimony and comments on the draft environmental statement until December 24, 1976. This should allow ample time for those unable to testify at the hearing to make their views known and for the submission of supplemental materials by those who presented oral testimony. Time limitations make it necessary to limit the length of oral presentations to ten (10) minutes. An oral statement may be supplemented, however, by a more complete written statement which may be submitted to the hearing officer at the time of presentation of the oral statement. Written statements presented in person at the hearing will be considered as part of the hearing record. To the extent that time is available after presentation of oral statements by those who have given advance notice, the hearing officer will give others present an opportunity to be heard.

After testimony and comments have baen received and analyzed, a final environmental statement will be prepared.

CURT BERKLUND,
Director, Land Management Bureau.

Approved:

STANLEY D. DOREMUS,
Deputy Assistant Secretary of the Interior.

National Park Service

NATIONAL REGISTER OF HISTORIC PLACES

Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before October 1, 1976. Pursuant to § 60.13(a) of 36 CFR Part 60, published in final form on January 9, 1976, written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the Keeper of the National Register, National Park Service, U.S. Department of the Interior, Washington, D.C. 20240. Written comments or a request for additional time to prepare comments should be submitted by October 22, 1976.

SOUTHEAST REGIONAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a combined meeting and field trip of the Southeast Regional Advisory Committee will be held on October 28-29, 1976, in Daytona Beach, and Canaveral National Seashore, Florida.

The purpose of the Southeast Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the Southeast Region of the National Park Service.

The members of the Advisory Committee are as follows:

Dr. Michael V. Gannon (Chairman), Gainesville, Florida
Dr. John M. King (Secretary), Jackson, Mississippi
Mrs. Ann Smith Bedsole, Mobile, Alabama
Mr. Tutt S. Bradford, Maryville, Tennessee
Dr. Arthur W. Cooper, Raleigh, North Carolina
Mr. Robert Gable, Frankfort, Kentucky
Mr. Charles Edward Lee, Columbia, South Carolina
Mrs. Jane Hurt Yarn, Atlanta, Georgia

The meeting will begin in a joint session with the Southeast Regional Super-

VOL 41 NO 198 OCT 12 1976 UM

intendents' Conference at 1:30 p.m. on October 28 at The Plaza Hotel, 600 North Atlantic Avenue, Daytona Beach, Florida. At 8:30 a.m. on October 29, the committee, with the Superintendents, will depart from The Plaza Hotel for a bus tour of Canaveral National Seashore.

The matters to be discussed at this meeting include a status report on new areas of the National Park System within the Southeast Region and the planning and operations of Canaveral National Seashore.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited and it is expected that not more than 25 persons will be able to attend. Space will not be available for members of the public on the bus tour. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact Paul C. Swartz, Chief, Cooperative Services Division, Southeast Regional Office, at 404–996–2520, extension 253. Minutes of the meeting will be available for public inspection approximately four weeks after the meeting at the Southeast Regional Office, 1895 Phoenix Boulevard, Atlanta, Georgia 30349.

Dated: September 28, 1976.

DAVID D. THOMPSON, Jr.,
Regional Director,
Southeast Region.

Office of Hearings and Appeals

[Docket No. M 76–336]

ABC COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), ABC Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine, located in Logan County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially construtced canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. The average height of the No. 1 Mine is 40 inches. The seam has irregular top and bottom.

2. The canopies pose hazards to the equipment operators and, because of poor operators' vision, to other employees in the mine.

3. The life of this mine is approximately 6 months.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

JAMES R. RICHARDS,
Director,
Office of Hearings and Appeals.

[FR Doc.76–29837 Filed 10–8–76;8:45 am]

[Docket No. M 76–400]

B AND J COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), B and J Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 4 Mine located in Letcher County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner feels that installing canopies on the haulage equipment in this mine would create a hazard to the equipment operators.

2. Petitioner's haulage equipment consists of one 12 BU Joy loading machine, one Paul's roof bolting machine, and one Kersey battery scoop.

3. The No. 4 Mine is in the Whitesburg seam which ranges from 30 to 34 inches in height. Petitioner is constantly running into ascending and descending grades in this seam, resulting in dips in the coalbed. Installation of canopies on the equipment limits the vision of the operators of the equipment, creating a hazard to them as well as to the other employees in the mine.

4. Petitioner feels that since the equipment operators' vision is limited and since their position in the decks is cramped with the canopies installed, that canopy installation could be a contributing factor in any accidents that may arise.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

JAMES R. RICHARDS,
Director, Office of
Hearings and Appeals.

[FR Doc.76–29838 Filed 10–8–76;8:45 am]

[Docket No. M 76–341]

BRUSHY FORK COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Brushy Fork Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 3, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. This petition is in reference to canopies on haulage equipment (mine tractors), loading machines, a roof bolting machine and a cutting machine.

2. This mine is in the Peach Orchard seam the thickness of which is not consistent due to rolls in the bottom and small hills inside the mine. The seam thickness is from 45 to 60 inches.

3. It would be impossible to remove this equipment to the outside without removing the canopies or placing the canopies at the lowest height in the mine. The mine tractor operators would be placed in danger due to the different heights of the coal. The canopies would hang up on roof bolts and headers due to any number of reasons, especially spilled coal lost in haulage.

4. Installing a canopy on a piece of equipment in low coal will reduce the vision of the operator of that particular piece of equipment to the point where he would be in danger and other workmen in the mine would be subject to injury from the moving equipment.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

JAMES R. RICHARDS,
Director,
Office of Hearings and Appeals.

[FR Doc.76–29839 Filed 10–8–76;8:45 am]

[Docket No. M 76–329]

JOEBONER ELKHORN COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Joeboner Elkhorn Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 11, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner operates the No. 11 Mine in the Clintwood seam of coal which averages 38 inches in height.

2. This seam has rolls in it which make it impossible for Petitioner to use canopies. With the height of Petitioner's equipment, it would not be feasible to use the canopy.

3. Petitioner's employees feel that the use of canopies would be dangerous because of reduced vision and because of the awkward position in which they must work if canopies are installed.

4. Petitioner cannot continue to operate this mine if canopies must be installed.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

JAMES R. RICHARDS,
Director,
Office of Hearings and Appeals.

[FR Doc.76–29840 Filed 10–8–76;8:45 am]

[Docket No. M 76–344]

RATLIFF BROTHERS COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Ratliff Brothers Coal Co. has filed a petition to modify the application of 30 CFR 75.1710 to its No. 5 Mine, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75–1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

V 41 1976 OCT 12 76 UM

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. * * *

The substance of Petitioner's statement is as follows:

1. Petitioner's equipment consists of two small mine tractors, two small roof bolters and one face drill.

2. Petitioner feels that installing canopies on this equipment creates a hazard to the equipment operators.

3. The equipment was not built for installation of the required type of canopy. Petitioner has installed canopies on its haulage equipment and has had the canopies hit the roof bolts in areas where it has installed runways over mud and water. Petitioner has had to replace roof bolts where header blocks were broken. Petitioner has tried to lower the canopies, but this results in a reduction in vision of the equipment operators.

4. Petitioner feels that because the canopies loosen roof bolts and reduce the vision of the equipment operators, that canopy installation could be a contributing factor in any accidents that may arise.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

[Docket No. M 76-397]

RHONDA COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Rhonda Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 4 Mine located in Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.-1710 is 30 CFR 75.1710-1 which in pertinent part provides:

* * * Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof face, or rib, or from rib and face rolls. The requirments of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. * * *

The substance of Petitioner's statement is as follows:

1. Petitioner mines coal in the Widow Kennedy coal seam which averages 28 to 50 inches in height.

2. The expected life of this mine is 5 to 6 years.

3. Petitioner feels that canopies cannot be installed on the equipment in this mine under present mining conditions. The equipment used in this mine already comes in contact with the roof at numerous locations due to irregularities in the mine floor. Installation of canopies on Petitioner's equipment would be contrary to good mining practices and also contrary to mandatory standards.

Petitioner complies with a very rigid roof control plan and has had no roof falls.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[Docket No. M 76-332]

SLATE BRANCH COAL CO., INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Slate Branch Coal Co., Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine, located in Mingo County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

* * * Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. * * *

The substance of Petitioner's statement is as follows:

1. The equipment in this mine operates in the height range of 30 to 40 inches. The coal height ranges from 42 to 48 inches.

2. Petitioner feels that if canopies or cabs were installed on its equipment a new hazard would be created because of the restricted vision and working area of the equipment operators. The equipment operators would be confined to working areas from which they could not escape quickly in case of fire, smoke or any unforeseen danger because they would be confined inside a canopy or cab without sufficient space to remove themselves or to be removed in case of danger.

3. Petitioner feels that since the equipment in use of this mine was approved by the United States Bureau of Mines without cabs or canopies, it should continue to be approved without revisions.

4. Petitioners feels that the construction of this equipment would not be substantial enough to support a canopy or cab due to the fact that the frame is too weak to support additional weight.

5. Petitioner feels that the canopies or cabs create a hazard to the miners because the coal seam rises and dips. The canopies or cabs could come in contact with the top or bottom of the coal seam damaging roof bolts, headers or ventilation devices. This damage could create additional hazards.

6. Installation of canopies or cabs, in the opinion of Petitioner and its miners, would create more hazards and accidents than the failure to install canopies or cabs would create.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.76-29843 Filed 10-8-76;8:45 am]

[Docket No. M. 76-342]

V-B COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), V-B Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its V-B Mine located in Letcher County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

* * * Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active working of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. * * *

The substance of Petitioner's statement is as follows:

1. Petitioner feels that installing canopies on the haulage equipment in this mine would create a hazard to the equipment operators.

2. Petitioner's haulage equipment consists of several Torkars. The model numbers of these Torkars are: 48-48, 48-43, 48-51-40, and 48-51-43. The cars range in height from 43 to 50 inches. These cars were manufactured in the early 1960's and were not designed for the installation of canopies.

3. The V-B Mine is in the Whitesburg seam which ranges from 48 to 84 inches in height. Petitioner is constantly running into ascending and descending grades in this seam, resulting in dips in the coalbed. Installation of canopies on the Torkars limits the vision of the operators of the equipment, creating a hazard to them as well as to the other employees in the mine.

4. Petitioner feels that since the shuttle car operators' vision is limited and since their position in the decks is cramped with the canopies installed, that canopy installation could be a contributing factor in any accidents that may arise.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before November 11, 1976.

Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: October 4, 1976.

TETON DAM FAILURE REVIEW GROUP

Public Hearing

Notice is hereby given that the Teton Dam Failure Review Group will hold work sessions beginning at 8:00 a.m. on October 13, 14 and 15, 1976, for the purpose of writing an interim report to the Secretary of the Interior.

The Review Group is a six-member interagency committee appointed by the Secretary of the Interior to investigate the causes of the Teton Dam failure, to review policies and procedures for dam construction, and to recommend, if appropriate, measures to prevent failure of existing dams, those under construction, and those to be built in the future.

The sessions will be held in Conference Room 1410 at the Bureau of Reclamation's Engineering and Research Center, Federal Center, Denver, Colorado. They are open to the public.

DENNIS N. SACHS,
Deputy Assistant Secretary.

Forest Service

WHITE MOUNTAIN NATIONAL FOREST ADVISORY COMMITTEE

Two-Year Renewal

The Assistant Secretary for Conservation, Research, and Education has renewed the White Mountain National Forest Advisory Committee for an addi-

tional 2-year period ending October 15, 1978.

This is a local Forest Service advisory committee established by the Chief of the Forest Service on October 15, 1970, to advise the Forest Supervisor of the White Mountain National Forest in Laconia, New Hampshire, about policies, programs, and plans affecting management of the National Forest.

The Assistant Secretary has determined that continuation of this committee is necessary and in the public interest in connection with the duties imposed on the Department by law.

ROBERT W. LONG,
Acting Secretary.

FORT BERTHOLD INDIAN LANDS

Feed Grain Donations

Pursuant to the authority set forth in Section 407 of the Agricultural Act of 1949 as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Fort Berthold Indian Lands in North Dakota has been materially increased and become acute because of severe and prolonged drought creating a serious shortage of livestock feeds. This reservation is designated for Indian use and is utilized by members of the Indian tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation for livestock feed for such needy members of the tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of this tribe to be acute distress areas and authorize the donation of feed grain owned by the Commodity Credit Corporation to livestockmen who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the tribe utilizing such lands. These donations by the Commodity Credit Corporation may commence upon signature of this notice and shall be made available through the duration of the existing emergency or to such other time as may be stated in a notice issued by the Department of Agriculture.

Signed at Washington, D.C. on October 5, 1976.

JOHN A. KNEBEL,
Acting Secretary.

Packers and Stockyards Administration

LAFAYETTE COUNTY LIVESTOCK AUCTION LEWISVILLE, ARKANSAS, ET AL.

Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports, Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in Section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

AR-155—Lafayette County Livestock Auction, Lewisville, Arkansas.
CA-172—Hastie Livestock Auction, El Cajon, California.
IA-253—Woodbury County Livestock Auction Co., Inc., Lawton, Iowa.
MT-119—Billings Livestock Comm. Co., Inc., Billings, Montana.
NM-117—Artesia Livestock Auction, Inc., Artesia, New Mexico.
TN-174—Kingsport Livestock Auction Corporation, Kingsport, Tennessee.
TX-314—Floresville Livestock Commission Company, Floresville, Texas.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in Section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards Administration, United States Department of Agriculture, Washington, D.C. 20250, on or before October 27, 1976.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 4th day of October, 1976.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch Livestock Marketing Division.

[FR Doc.76-29796 Filed 10-8-76;8:45 am]

DEPARTMENT OF COMMERCE

Bureau of the Census

SPECIAL CENSUSES

Local and State Governments

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. The content of a special census is ordinarily limited to questions on relationship to the head of the household, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the Decennial Census.

Summary results of special censuses are published semiannually in the "Current Population Reports"—Series P-28, prepared by the Bureau of the Census. For each area which has a special census population of 50,000 or more, a separate publication showing data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by tracts.

The data shown in the following table are the results of special censuses conducted since December 31, 1975, for which tabulations were completed between September 1, 1976, and September 30, 1976.

Dated: October 5, 1976.

ROBERT L. HAGAN,
Acting Director, Bureau of the Census.

BUREAU OF THE CENSUS ADVISORY COMMITTEE

Termination

Pursuant to section 14 of the Federal Advisory Committee Act (5 U.S.C. Appendix I, (Supp. V, 1975)), notice is hereby given that the Census Advisory Committee on Privacy and Confidentiality is terminated upon the publication of this notice in the FEDERAL REGISTER.

This Committee was established in 1971 to advise the Director, Bureau of the Census, on policy and procedure concerning the purpose and scope of census inquiries and on all aspects of privacy and confidentiality as they relate to the statistical work of the Bureau.

The decision to terminate this Committee has been made for three principal reasons: First, all agencies of the Federal Government must now give systematic attention to privacy issues because of the Privacy Act, which established the Privacy Protection Study Commission to provide a focal point for the development of information policies and fair information practices. Second, the other advisory committees to the Bureau of the Census address themselves to issues concerning the confidentiality of information, the integrity and objectivity of data collection, and the propriety of census and survey inquiries with respect to the right of privacy. Third, in accordance with the Federal Advisory Committee Act, the Census Bureau must use its resources for committee activities as efficiently as possible. The termination of the Census Advisory Committee on Privacy and Confidentiality is a clear instance where the Bureau can conserve its resources and still be assured of receiving valuable and independent advice on privacy and confidentiality.

Dated: October 6, 1976.

ROBERT L. HAGAN,
Acting Director, Bureau of the Census.

Maritime Administration

[Docket No. S-516]

FREDERICKSBURG SHIPPING CO.

Application

Notice is hereby given that application has been filed under the Merchant Marine Act, 1936, as amended (the Act) for operating-differential subsidy on the S.S. *Fredericksburg* to engage in bulk carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire on December 31, 1976, or upon completion of a voyage in progress on that date.

Inasmuch as the applicant, and/or related persons or firms, employ or may employ ships in the domestic intercoastal or coastwise service, written permission of the Maritime Administration under section 805(a) of the Act will be required if its application for operating-differential subsidy is to be granted.

The written permission requested by Fredericksburg is identical to the written permission granted under section 805(a) to Margate Shipping Company, Chestnut Shipping Company, Charles Kurz & Co., Inc., Keystone Shipping Co. and Keystone Tankship Corporation, affiliates of Fredericksburg, on May 24, 1976, and is as follows:

For affiliated or associated companies to operate up to a total of 31 U.S. flag vessels in the transport of liquid bulk cargoes within and between the following U.S. coastal areas, with free interchange of vessels among these areas, and with the maximum number of vessels to be employed in the areas at any one time specified:

	Number of vessels
U.S. Gulf-Atlantic coastwise	17
U.S. Gulf-Atlantic-Puerto Rico	2
U.S. Atlantic-Gulf intercoastal (including Alaska and Hawaii)	10
Pacific coast-Alaska-Hawaii	15

Such written permission is now required under section 805(a) notwithstanding the fact that a voyage in the proposed service on which the vessel engaged in domestic intercoastal or coastwise trade would not be eligible for subsidy.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) and desiring to submit comments or views concerning the application must, by close of business on October 18, 1976 file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to

V41 1998 OCT 12 76 UM

warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties withstanding to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

Dated: October 6, 1976.

By order of the Assistant Secretary for Maritime Affairs.

JAMES S. DAWSON, JR.,
Secretary.

National Bureau of Standards

FEDERAL INFORMATION PROCESSING STANDARDS COORDINATING AND ADVISORY COMMITTEE

Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that the Federal Information Processing Standards Coordinating and Advisory Committee (FIPSCAC) will hold a meeting from 9:00 a.m. to 1:00 p.m. on Thursday, November 18, 1976, in Dining Room C, Administration Building, of the National Bureau of Standards, in Gaithersburg, Maryland.

The purpose of the meeting is to review the actions of the Federal Information Processing Standards (FIPS) Task Groups and to consider other matters relating to Federal Information Processing Standards.

The meeting will be open to the public. Members of the public may file written statements, and, to the extent time permits, present oral statements at the meeting. Additional information may be obtained from Robert E. Rountree, Jr., Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, DC 20234 (phone 301-921-3157).

Dated: October 5, 1976.

ERNEST AMBLER,
Acting Director.

OFFICE OF MANAGEMENT AND BUDGET

COMMISSION ON EXECUTIVE, LEGISLATIVE, AND JUDICIAL SALARIES

Public Meeting

Pursuant to Public Law No. 92-463, notice is hereby given of a meeting of the Commission on Executive, Legislative, and Judicial Salaries to be held in Room 2008, New Executive Office Building, 726 Jackson Place NW., Washington, D.C., on October 26, 1976 at 10:00 a.m.

The meeting will be open to public observation and participation. The purpose of the meeting is to hear reports on the status of the special assignments discussed at the October 12, 1976 meeting. These assignments were in the areas of executive, legislative and judicial pay comparability, benefits attributed thereto, and the effect of compensation on the hiring, retention and departure of federal executives, legislators and judges.

Anyone wishing to participate or attend this meeting should contact the Commission on Executive, Legislative, and Judicial Salaries; Suite 801, 1750 K Street NW., Washington, D.C. 20036, telephone number (202) 634-1650.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 76N-0292; DESI 6811]

CERTAIN SINGLE-ENTITY AND COMBINATION PRODUCTS CONTAINING ISONIAZID

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

In a notice (DESI 6811), published in the FEDERAL REGISTER of September 26, 1969 (34 FR 14856), the Food and Drug Administration announced its conclusions that the single-entity and combination drug products containing isoniazid described below are effective for the treatment of tuberculosis. The single-entity drug products containing isoniazid were also classified as possibly effective for certain other indications. Pursuant to the notice, no person submitted data in support of these possibly effective indications, and they were reclassified to lacking substantial evidence of effectiveness in a notice published in the FEDERAL REGISTER of October 7, 1971 (36 FR 19520). This notice offers an opportunity for hearing concerning the indications that were reclassified in the October 7, 1971 notice to lacking substantial evidence of effectiveness, and states the conditions for marketing both the single-entity and combination drugs for the indications regarded as effective. The effective indications have been modified since the publication of the September 26, 1969 notice. Persons who wish to request a hearing may do so on or before November 11, 1976.

1. NDA 8-486; Niconyl (isoniazid) Tablets; Parke, Davis & Co., Joseph Campau at the River, Detroit, MI 48232.
2. NDA 8-499; Isoniazid Tablets; Eli Lilly & Co., Box 618, Indianapolis, IN 46206.
3. NDA 8-424; Tyvid (isoniazid) Tablets; Merrell-National Laboratories, Division, Richardson-Merrell, Cincinnati, OH 45215.
4. NDA 8-391; Cotinazin (isoniazid) Tablets; Pfizer Laboratories, Division Pfizer, Inc., 235 E. 42d St., New York, NY 10017.
5. NDA 8-532; Nicodrin (isoniazid) Tablets; Gold Leaf Pharmacal Co., Inc., Division of Ormont Drug and Chemical Co., Inc., Englewood, NJ 07631.
6. NDA 8-535; Zonazide (isoniazid) Tablets; Richlyn Laboratories, Inc., 3725 Castor Ave., Philadelphia, PA 19124.
7. NDA 8-678; Supercidin (isoniazid) Tablets; The Vitarine Co., Inc., 227-15 N. Conduit Ave., Springfield Gardens, NY 11413.
8. NDA 9-678; Isoniazid Tablets; Vitamix Pharmaceuticals, Inc., 5051 Lancaster Ave., Philadelphia, PA 19131.
9. NDA 8-807; Isoniazid Tablets; Barnes-Hind Laboratories, Inc., Subsidiary Barnes-Hind Pharmaceuticals, Inc., 895 Kifer Rd., Sunnyvale, CA 94086.
10. NDA 9-153; Isoniazid Tablets; Stanley Drug Products, Inc., 232 Southeast Oak St., P.O. Box 3108, Portland, OR 97208.
11. NDA 8-662; Nydrazid (isoniazid) Injection; Squibb Pharmaceutical Co., E. R. Squibb & Sons, Inc., Box 4000, Princeton, NJ 08540.
12. NDA 8-392; Nydrazid (isoniazid) Tablets and Syrup; Squibb Pharmaceutical Co.
13. NDA 8-500; Isoniazid Tablets; American Pharmaceutical Co., P.O. Box 448, Passaic, NJ 07055.
14. NDA 8-428; Isoniazid Tablets; Panray Division, Ormont Drug and Chemical Co., Inc., P.O. Box 150, Englewood, NJ 07631.
15. NDA 8-885; Puran (isoniazid); Pure Laboratories, Inc., 50 Intervale Rd., Parsippany, NJ 07054.
16. NDA 9-466; Sodium Para Aminosalicylate with Isoniazid; Richlyn Laboratories, Inc.
17. NDA 8-891; Buffered Parasal-INH Tablets (aminosalicylic acid and isoniazid); Panray.

The following drug products were neither submitted for review by the National Academy of Sciences-National Research Council nor included in the September 26, 1969 notice, but the conclusions described in this notice apply to them:

1. NDA 8-390; Rimifon (isoniazid) Tablets; Roche Laboratories, Division of Hoffmann-LaRoche, Inc., Nutley, NJ 07110.
2. That part of NDA 8-420 pertaining to Rimifon (isoniazid) Syrup; Roche Laboratories.
3. That part of NDA 8-420 pertaining to Rimifon (isoniazid) Injection; Roche Laboratories.
4. NDA 8-558; Niadrin (isoniazid) Tablets; Endo Laboratories, Inc., 1000 Stewart Ave., Garden City, NY 11530.
5. NDA 8-567; Teebaconin (isoniazid) Tablets; CMC Research Division, Consolidated Midland Corp., 195 E. Main St., Box 74, Brewster, NY 10509.
6. NDA 8-608; Isoniazid Tablets; Strong Cobb Arner, Inc., 11700 Shaker Blvd., Cleveland, OH 44120.
7. NDA 9-220; Isopacin Tablets (isoniazid and sodium aminosalicylate); CMC Research Division, Consolidated Midland Corp.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20852.

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indications listed in the labeling conditions below. The drugs lack substantial evidence of effectiveness for the possibly effective indications which were reclassified in the October 7, 1971 notice.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* As a single active entity, the drug is in injectable form suitable for parenteral administration, or in syrup or tablet form suitable for oral administration. The combination of isoniazid with aminosalicylic acid or its sodium salt is in tablet form suitable for oral administration.

2. *Labeling conditions.* a. The label bears the statement,

Caution: Federal law prohibits dispensing without prescription.

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indications are as follows:

ISONIAZID

For all forms of tuberculosis in which organisms are susceptible.

For preventive therapy for the following groups, in order of priority:

1. Household members and other close associates of persons with recently diagnosed tuberculous disease.
2. Positive tuberculin skin test reactors with findings on the chest roentgenogram consistent with nonprogressive tuberculous disease, in whom there are neither positive bacteriologic findings nor a history of adequate chemotherapy.
3. Newly infected persons.
4. Positive tuberculin skin test reactors in the following special clinical situations: Prolonged therapy with adrenocorticosteroids; Immunosuppressive therapy; Some hematologic and reticuloendothelial diseases, such as leukemia or Hodgkin's disease; Diabetes mellitus; Silicosis; After gastrectomy.
5. Other positive tuberculin reactors under 35 years of age.

The risk of hepatitis must be weighed against the risk of tuberculosis in positive tuberculin reactors over the age of 35. However, the use of isoniazid is recommended for those with the additional risk factors listed above (1-4) and on an individual basis in situations where there is likelihood of serious consequences to contacts who may become infected.

ISONIAZID IN COMBINATION WITH AMINOSALICYLIC ACID OR SODIUM AMINOSALICYLATE

For the treatment of tuberculosis in which organisms are susceptible, and when the patient has been titrated on the individual components and it has therefore been established that this fixed dosage meets the foregoing needs.

This fixed-dosage combination drug is *not* recommended for initial therapy of tuberculosis or for preventive therapy.

3. *Marketing status of approved products.* Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that the holder of the application submits the following if he has not previously done so:

a. On or before December 13, 1976, (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

b. In addition, for combination products containing isoniazid with aminosalicylic acid or sodium aminosalicylate, on or before April 12, 1977, data to show that the aminosalicylic acid or sodium aminosalicylate is biologically available in the formulation marketed.

4. *Marketing status of all other products.* a. Approval of an abbreviated new drug application must be obtained prior to marketing such product. The application shall contain the information specified in 21 CFR 314.1(f) and in addition, for combination products containing isoniazid with aminosalicylic acid or sodium aminosalicylate, shall include data of the kind required for this drug at the time of submission of the application to show that the aminosalicylic acid or sodium aminosalicylate is biologically available in the formulation proposed for marketing.

b. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

C. *Notice of opportunity for hearing.* On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111 (a)(5), and for the combination products 21 CFR 300.50, demonstrating the effectiveness of the drug(s) for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice.

Notice is given to the holder(s) of the new drug application(s), and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) and all amendments and supplements thereto providing for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application(s) supplemented; in accord with this notice, to delete the claim(s) lacking substantial evidence of effectiveness.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201 (p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby given an opportunity for a hearing to show why approval of the new drug application(s) providing for the claim(s) involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and all identical, related, or similar drug products.

If an applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before November 11, 1976, a written notice of appearance and request for hearing, and (2) on or before December 13, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for

hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk (address given below) during working hours, Monday through Friday.

Communications forwarded in response to this notice should be identified with the reference number DESI 6811, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852.

Supplements (identify with NDA number): Division of Anti-Infective Drug Products, (HFD–140), Rm. 12B–45, Bureau of Drugs.

Original abbreviated new drug applications (identify as such): Division of Generic Drug Monographs (HFD–530), Bureau of Drugs.

Request for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC–20), Rm. 4–65.

Requests for the report of the National Academy of Sciences—National Research Council: Public Records and Document Center (HFC–18), Rm. 4–62.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD–101), Bureau of Drugs.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.31) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)).

Dated: October 1, 1976.

CARL M. LEVENTHAL,
Acting Director, Bureau of Drugs.

BOARD OF SCIENTIFIC COUNSELORS

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Dental Research, National Institutes of Health, Bethesda, Md., on December 13, 1976, in Building 30, Conference Room 117.

The entire meeting will be open to the public from 9:00 a.m. to adjournment, to discuss the research direction and activities of the laboratories of the National Institute of Dental Research. Attendance by the public will be limited to space available.

Dr. Marie U. Nylen, Acting Director of Intramural Research, National Institute of Dental Research, National Institutes of Health, Building 30, Room 132, Bethesda, Md. 20014, (telephone 301–496–1483) will provide summaries of meetings, rosters of committee members, and substantive program information.

Dated: October 4, 1976.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

Office of Child Support Enforcement

AUDIT AND PENALTY WORKSHOPS

Meetings

Notice is hereby given by the Director, Office of Child Support Enforcement (OCSE) that a series of 4 workshops will be conducted to discuss the requirement for an annual audit of each State's child support enforcement program and the possible penalty of 5 percent of a State's title IV–A reimbursement.

A Notice of Proposed Rulemaking, published in the FEDERAL REGISTER on October 1, 1976, 41 FR 43414, proposed a new 45 CFR Part 305 that describes the audit OCSE will conduct and sets the date for the first audit. The proposed regulations also define "effective program" for purposes of the audit and establish the criteria that the audit will use to determine program effectiveness. Finally, the proposed regulation provides that if a State is found by the Secretary to have failed to have an effective program, the penalty will be imposed.

The workshops are being held to explain and discuss the statutory basis, the audit procedure and criteria and to receive comments and recommendations from representatives of States, counties, cities and other interested groups or individuals.

Those who wish to participate are requested to register with the appropriate OCSE Regional Office at least 3 days prior to the meeting date by either writing or telephoning the contact person listed below. It is possible that participation may have to be limited to the first 100 individuals registering with the Regional Offices due to limited meeting facilities.

The workshops are scheduled as follows:

Date and time	Location	Contact person
Oct. 18, 1976, 9 a.m. to 4 p.m.	Federal Bldg., Room 13450, 450 Golden Gate Ave., San Francisco, Calif. 94102.	Mr. Benjamin Barsky, telephone: 415–556–6384 or Mr. Richard Lewis, telephone: 415–556–5176, 50 Fulton St., Federal Office Bldg., San Francisco, Calif. 94102.
Oct. 20, 1976, 9 a.m. to 4 p.m.	Southern Hotel, South High and East Main, Columbus, Ohio.	Mr. William Kelsay or Ms. Kathryn Beck, Office of Child Support Enforcement, 300 South Wacker Dr., 30th Floor, Chicago, Ill. 60606, telephone: 312–353–1591.
Oct. 21, 1976, 9 a.m. to 4 p.m.	Sheraton-Biltmore Hotel, 817 West Peachtree St., NE., Atlanta, Ga. 30383.	Mr. Charles Post or Ms. Marjorie Bates, Office of Child Support Enforcement, 507th St., NE., Atlanta, Ga. 30323, telephone: 404–526–3064.
Nov. 1, 1976, 10 a.m. to 5 p.m.	William J. Green, Jr., Federal Bldg., Room 3306/3310, 600 Arch St., Philadelphia, Pa. 19106.	Mr. Daniel Fascione or Mrs. Donna Fischer, Office of Child Support Enforcement, P.O. Box 7760, 3535 Market St., Philadelphia, Pa. 19101, telephone: 215–596–1305.

Individuals who do not attend the workshop have the opportunity to comment on the proposed regulations by forwarding comments to the Director, Office of Child Support Enforcement, Department of Health, Education, and Welfare, P.O. Box 2366, Washington, D.C. 20013. Consideration will be given to all comments received by November 1, 1976.

Dated: October 5, 1976.

LOIS B. HAYS,
Deputy Director, Office of Child Support Enforcement.

[FR Doc.76–29773 Filed 10–8–76;8:45 am]

Office of Education

ILLINOIS

Acceptance of Application for Appeal

Notice is hereby given that, pursuant to the Notice establishing the Title I Audit Hearing Board (37 FR 23002, October 27, 1972, as amended by 41 FR 28568, July 12, 1976), an application for an appeal before the Board has been received from the State of Illinois and it has met the jurisdictional requirements of Section 5 of the Notice establishing the Board.

The appeal involves the allowability of specified expenditures of funds for programs under Title I of the ESEA during Fiscal Years 1969 through 1972 which are alleged to have supplanted rather than supplemented State and local funds. The Audit Control Number is 50006–05. The local education agency involved is the Chicago Board of Education and the sum of money involved is $51,100.

The prehearing conference will be held at 10:30 a.m. on November 4, 1976, in Room 4173, 400 Maryland Avenue, SW., Washington, D.C.

Section 7(c) of the Notice setting up the board provides:

(c) Intervention by third parties. (1) Interested third parties may, upon application to the Board Chairman, intervene in proceedings conducted under this notice. Such application must indicate to the satisfaction of the Board Chairman that the intervener has information relative to the specific issues raised by the final audit determination and that such information will be useful to the Hearing Panel in resolving those issues.

(2) When third parties are given leave to intervene in accordance with subparagraph (1) above, such parties shall be afforded the same opportunities as other parties to present written materials, to participate in informal conferences, to call witnesses, to cross-examine other witnesses, and to be represented by counsel.

All such applications for intervention will be considered if received on or before October 29, 1976.

(20 U.S.C. 241a, 1232c.)

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. Appendix 1), that the next meeting of the Full Council of the National Advisory Council on Indian Education will be held October 27, 28, 29, 1976, FOB 6, Room 4173, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

The National Advisory Council on Indian Education is established under section 442 of the Indian Education Act, Title IV of Pub. L. 92–318, (20 U.S.C. 1221g). The Council, among other things, is directed to:

(1) Submit to the Commissioner a list of nominees for the position of Deputy Commissioner of Indian Education;

(2) Advise the Commissioner of Education with respect to the administration (including the development of regulations and of administrative practices and policies) of any program in which Indian children or adults participate from which they can benefit, including Title III of the Act of September 30, 1950 (Pub. L. 81–874) and Section 810, Title VIII of the Elementary and Secondary Education Act of 1965 (as added by Title IV of Pub. L. 92–318), and with respect to adequate funding thereof;

(3) Review applications for assistance under Title III of the Act of September 30, 1950 (Pub. L. 81–874), section 810 of Title VIII of the Elementary and Secondary Education Act of 1965 and section 314 of the Adult Education Act (as added by Title IV of Pub. L. 92–318), and make recommendations to the Commissioner with respect to their approval;

(4) Evaluate programs and projects carried out under any program of the Department of Health, Education, and Welfare in which Indian children or adults can participate or from which they can benefit, and disseminate the results of such evaluations;

(5) Provide technical assistance to local educational agencies and to Indian educational agencies, institutions, and organizations to assist them in improving the education of Indian children;

(6) Assist the Commissioner in developing criteria and regulations for the administration and evaluation of grants made under section 303(b) of the Act of September 30, 1950 (Pub. L. 81–874) as added by Title IV, Part A, of Pub. L. 92–318; and

(7) Submit to the Congress not later than March 31 of each year a report on its activities, which shall include recommendations it may deem necessary for the improvement of Federal education programs in which Indian children and adults participate, or from which they can benefit, which report shall include a statement of the Council's recommendations to the Commissioner with respect to the funding of any such programs.

The meeting on October 27, 28, 29, 1976, will be open to the public beginning at 9 a.m. and ending 5 p.m. each day. This meeting will be held at FOB, 6, Room 4173.

The proposed agenda includes:

(1) Executive director's report.
(2) Action on previous meeting minutes.
(3) New council members' orientation.
(4) Election of council officers.
(5) Selection of council committees.
(6) Approval of NACIE FY '77 budget.
(7) Special reports.
(8) Plans for future NACIE activities.
(9) Regular council business.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on Indian Education located at 425 13th Street, N.W., Room 326, Washington, D.C. 20004.

Signed at Washington, D.C., on October 6, 1976.

LINCOLN C. WHITE,
Executive Director, National Advisory Council on Indian Education.

Social Security Administration

ATTORNEY ADVISOR TO THE COMMISSIONER OF SOCIAL SECURITY

Authority Delegation

Section 1878 of the Social Security Act, as amended (the Act), codified at 42 U.S.C. 1395oo, provides for the establishment of a Provider Reimbursement Review Board (the Board), to hear appeals by providers of services under the Medicare program who are dissatisfied with final cost reimbursement determinations by their fiscal intermediaries, or are not provided with such determinations on a timely basis. Subsection (f)(1) of section 1878 provides that a decision of the Board shall be final unless the Secretary of Health, Education, and Welfare (the Secretary)—on his own motion and within 60 days after the provider of services is notified of the Board's decision—reverses, affirms or modifies the Board's decision. The Secretary has delegated to the Commissioner of Social Security (the Commissioner) authority to administer the Medicare program established by title XVIII of the Act, with authority to redelegate (33 FR 5836–37, dated April 16, 1968). That authority includes review of decisions by the Board. A position as Attorney Advisor to the Commissioner was recently established for the purpose of recommending initiation of the "own motion review" process; evaluating cases under "own motion review," and recommending appropriate action for the disposition of such cases by the Commissioner. This position was organizationally located in

V41 1976 OCT 12 UM

the Social Security Administration's Office of Management and Administration, for purposes of general administrative support (41 FR 18900, dated May 7, 1976).

On November 7, 1969 (34 FR 18049–50), the Assistant Secretary for Administration and Management of the Department of Health, Education, and Welfare (HEW) redelegated to the Commissioner, with authority to further redelegate, authority to certify true copies of any books, records, papers or other documents on file within the Social Security Administration; to certify extracts from such material; to certify that true copies are true copies of the entire file; to certify the complete original record; to certify the nonexistence of records on file; and authority to cause the HEW Seal to be affixed to such certifications.

Notice is hereby given that the Commissioner has further redelegated the following authorities to the position of Attorney Advisor to the Commissioner:

1. Authority to certify true copies of any records, papers or other documents, as required for judicial review of cases under section 1878 of the Act (provider reimbursement review cases);
2. Authority to certify extracts from such material;
3. Authority to certify that true copies of such material are true copies of the entire file;
4. Authority to certify the nonexistence of such material;
5. Authority to certify the complete original record; and
6. Authority to cause the HEW Seal to be affixed to such certifications.

These further redelegations in no way impinge upon any present or future certification and/or HEW Seal affixation authorities vested with the Provider Reimbursement Review Board. The further redelegations to the Attorney Advisor specified above are effective as of October 12, 1976. The Attorney Advisor may not redelegate such authority.

Dated: October 1, 1976.

J. B. CARDWELL,
Commissioner of Social Security.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 76 190]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Termination of Approval Notice

1. Certain laws and regulations (46 CFR Ch. I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been terminated as herein described during the period from July 29, 1976 to August 26, 1976 (List No. 19–76). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75–1 to 2.75–50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of Title 46, United Streets Code, section 1333 of Title 43, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to those approvals (49 CFR 1.46 (b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR Parts 160 to 164.

3. Notwithstanding the termination of approval listed in this document, the equipment affected may be used as long as it remains in good and serviceable condition.

BUOYS, LIFE, RING, UNICELLULAR PLASTIC

The Mermatec, Inc., 11525 Sorrento Valley Road, San Diego, California 92121, Approval Nos. 160.050/42/0, 160.050/43/0 and 160.050/44/0 expired and were terminated effective August 26, 1976.

The Atlantic-Pacific Manufacturing Corporation, 124 Atlantic Avenue, Brooklyn, New York 11201, Approval No. 160.050/62/0 expired and was terminated effective August 10, 1976.

BACKFIRE FLAME CONTROL, GASOLINE ENGINES; FLAME ARRESTERS; FOR MERCHANT VESSELS AND MOTORBOATS

The Greenwich Marine Engines, Division Hekma Advanced Mach. Company, Palmer Point, Cos Cob, Connecticut 06807, Approval No. 162.041/77/1 expired and was terminated effective August 11, 1976.

BULKHEAD PANELS FOR MERCHANT VESSELS

The TAC Construction Materials Ltd., Building & Insulation Division, P.O. Box 22, Trafford Park, Manchester M17 1RU, England no longer manufactures certain bulkhead panels and Approval No. 164.008/55/0 was therefore terminated effective July 29, 1976.

Dated: October 5, 1976.

H. G. LYONS,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

[FAA Order 1050.10]

FAA FACILITIES

Prevention, Control, and Abatement of Environmental Pollution

The Federal Aviation Administration on September 28, 1976, promulgated Agency Order 1050.10: Prevention, Control, and Abatement of Environmental Pollution at FAA Facilities. This order establishes agency policies, procedures, and functional responsibilities in complying with both the intent and environmental pollution standards of Executive Order 11752, issued December 17, 1973 (FR Doc. 73–26869 Filed 12–19–73; 12:45 p.m.) as it applies to FAA facilities. The purpose of publishing Order 1050.10 in the FEDERAL REGISTER is to inform interested persons of the FAA's continuing effort to protect and enhance the quality of air, water, and land resources, as they may be affected by agency facilities or their operation.

Issued in Washington, D.C., on October 4, 1976.

CHARLES R. FOSTER,
Director of Environmental Quality.

DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

[Order 10510]

Prevention, Control, and Abatement of Environmental Pollution at FAA Facilities

SEPTEMBER 28, 1976.

1. *Purpose.* This order establishes agency policies, procedures, and responsibilities pertaining to the prevention, control, and abatement of environmental pollution at or from Federal Aviation Administration (FAA) facilities.

2. *Distribution.* This order is distributed to the division level in Washington, to the branch level in the regions and centers, with a minimum distribution to all field offices and facilities.

3. *Cancellation.* Order 6900.4, FAA Plans for Meeting Mandate of National Environmental Policy Act (NEPA) of 1969 (52 U.S.C. 4321), is canceled.

4. *Background.* This order is issued pursuant to the authority of environmental pollution and reporting requirements as set forth in Executive Order (E.O.) 11752, Prevention, Control, and Abatement of Environmental Pollution at Federal Facilities, and the Office of Management and Budget (OMB) Circular A–106, Reporting Requirements in Connection With the Prevention, Control, and Abatement of Environment Pollution at Existing Federal Facilities, respectively.

5. *Definitions.*—a. *Facilities,* as defined in E.O. 11752, means buildings, installations, structures, land, public works, equipment, aircraft, vessels, and other vehicles and property owned by, constructed or manufactured for the purpose of leasing to, the Federal Government. This order includes agency aircraft as a "facility;" however, the noise and exhaust pollutants of these aircraft are governed by the standards, rules and regulations made applicable under FAA Order 4040.9, "General Manual for Operation of FAA Aircraft."

b. *State, Interstate and Local Agencies* refer respectively to agencies designated by the Governor of a State; established by two or more states; authorized by a city, county or local government; or established by two or more counties or municipalities located in the same state or in different states. These agencies have responsibilities, powers or duties to enforce laws or ordinances pertaining to the prevention, control, and abatement of environmental pollution.

c. *Cost,* means the amount of funds required for designing and constructing necessary environmental control measures. These environmental costs include the capital costs of structure and equipment, irrespective of the appropriation chargeable, but exclude annual maintenance and operating costs.

d. *Responsible Official,* for the purposes of this order, is the Director of the Service, Office, Region or Center having jurisdiction over the area in which the facility is located, or from which its operational use is controlled.

6. *Policy.* FAA shall comply with the environmental pollution control standards set forth in E.O. 11752, regarding the design, construction, management, operation, and maintenance of its facilities, in cooperation with state and local governments. Additionally, the FAA shall, through compliance with pollution control requirements, provide leadership in the nationwide effort to improve and protect the quality of the Nation's environment.

7. *Scope.* This order covers the current environmental pollution control requirements for the quality of air, water, and land resources at or from FAA facilities.

8. *Responsibilities*—a. *The Office of Environmental Quality* (AEQ), under the direction of the Associate Administrator for Policy Development and Review, is responsible for preparing, recommending, and coordinating agency directives, policies and procedures for facility compliance with pollution control requirements. AEQ shall:

(1) Serve as agency focal point for environmental pollution control requirements.

(2) Receive, summarize and, as required, distribute facility environmental pollution control plans and reports.

(3) Consult with and, as appropriate, advise responsible officials in the implementation of this order.

b. *The Office of Budget* (ABU). (1) Shall set forth, in the annual call for estimates, documentation for budget submissions regarding environmentally related actions necessary to comply with this order.

(2) Serve as the central liaison point in the agency for annual budgetary estimates or programming matters requiring coordination with or submission to the Office of the Secretary of Transportation (OST), OMB, or Congressional Committees, and for the integration of environmental funding requirements with other requirements of the agency.

c. *Office and Service Directors* are responsible for ensuring compliance with the policies, procedures, and environmental pollution control requirements of this order for all facility actions originating in headquarters. Specific responsibilities for these actions are the same as for those facility actions originating in the regions and centers and are listed under paragraph 8(d) (1) through (10). In addition, headquarters services are responsible for providing advice and, as appropriate, assistance to their field counterparts to ensure compliance with this order.

d. *Regional and Center Directors* shall be responsible for the following actions regarding environmental pollution control at or from facilities under their jurisdiction:

(1) Designating an official to contact for matters relating to facility environmental pollution control.

(2) Ensuring that the applicable environmental pollution requirements in paragraph 9 are met on a continuing basis.

(3) Cooperating with the Environmental Protection Agency (EPA), state, interstate, and local agencies in prevention, control, and abatement of environmental pollution and, in accordance with guidelines issued by EPA, providing AEQ with such information as is necessary to determine compliance with applicable requirements.

(4) Submitting reports to AEQ, as required, regarding environmental pollution abatement plans and schedules on new and existing facilities as may be necessary to meet the applicable requirements specified in paragraph 9.

(5) Considering the environmental impact in the initial stages of planning for each new facility or modification of an existing facility in accordance with NEPA.

(6) In executing the environmental pollution abatement plan and schedule (8d(4)), budget requests for the design and construction of new facilities or for the modification of existing facilities should include funds, in accordance with the guidelines as outlined in the annual call for estimates, for such measures as may be necessary to meet the applicable requirements of paragraph 9. These environmental costs shall reflect the most efficient alternative for meeting the applicable pollution control requirements.

(7) Consulting, as appropriate, with EPA, regional offices, state, interstate, and local agencies concerning the best techniques and methods available for the prevention, control, and abatement of environmental pollution.

(8) Requiring the lessor of a facility, as appropriate, to be responsible for compliance with the environmental pollution control requirements applicable to that facility.

(9) Ensuring that facilities constructed and/or operated outside the United States shall be in compliance with the environmental pollution control requirements of general applicability in the host country or jurisdiction concerned.

(10) Obtaining current statutes, directives, orders, circulars, or other documents including compliance and reporting procedural guidelines which involve pollution control requirements.

9. *Pollution control requirements.* All FAA facilities shall be designed, constructed, managed, operated and maintained so as to conform to the following requirements.

a. Federal, state, interstate and local air quality standards and emission limitations adopted in accordance with or effective under the provisions of the Clean Air Act, as amended (42 U.S.C. 18 et seq).

b. Federal, state, interstate, and local water quality standards and effluent limitations respecting the discharge or runoff of pollutants adopted in accordance with or effective under the provisions of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq).

c. Through consultation and cooperation with state and local agencies, the substantive aspects of state and local air and water quality implementation plans. However, compliance does not include administrative procedural requirements, such as obtaining permits.

d. Federal regulations and guidelines on the dumping of material into ocean waters, adopted in accordance with the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1431 et seq), and the Federal Water Pollution Control Act, as amended.

e. EPA guidelines for solid waste recovery, collection, storage, separation, and disposal systems, pursuant to the Solid Waste Disposal Act, as amended (42 U.S.C. 3251 et seq).

f. Federal noise emission standards for products adopted in accordance with provisions of the Noise Control Act of 1972 (42 U.S.C. 4901 et seq), and state, interstate, and local standards for control and abatement of environmental noise.

g. Federal guidance on radiation and generally applicable environmental radiation standards promulgated or recommended by the EPA and adopted in accordance with the Atomic Energy Act, as amended (42 U.S.C. 2011 et seq), and rules, regulations, requirements, and guidelines on discharges of radioactivity as prescribed by the Atomic Energy Commission, or the Nuclear Regulatory Commission.

h. Federal regulations and guidelines on the manufacture, transportation, purchase, use, storage, and disposal of pesticides promulgated pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by the Federal Environmental Pesticide Control Act of 1972 (7 U.S.C. 136 et seq).

10 *Special requirements.* Environmental pollution control requirements, as specified in paragraph 9, may not exist for a particular geographic area or type/class of facility. In those instances, EPA, in consultation with appropriate Federal, state, interstate, and local agencies, may issue requirements. Responsible officials shall comply with these environmental pollution control requirements, once they are promulgated and published in the FEDERAL REGISTER.

11. *Exemptions.* Certain FAA facilities or uses thereof may be exempt from complying with the environmental pollution control requirements, if it is determined that the facility or uses thereof are in the interest of national security, or in extraordinary cases, where it is in the paramount interest of the United States. Procedural guidance on the exemption process is to be prepared and issued by EPA. When an agency facility is considered for exemption by the responsible official, consultation with and concurrence by EPA is required. A copy of the proposed exemption is to be sent to AEQ at the same time it is submitted to EPA. Should EPA not agree to the exemption, the exemption determination is then subject to the approval of OMB. A formal request for such approval is to be submitted, by the responsible official, to AEQ for forwarding to OMB through the Office of the Assistant Secretary for Administration (TAD). EPA has sole responsibility for approval of exemptions under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by the Federal Environmental Pesticide Control Act of 1972.

12. *Guidance and reporting.* Guidance, including procedures and reporting, regarding facility compliance with environmental pollution control requirements is issued by EPA. This guidance, due to its development process, periodic revisions, and expansion of coverage may change. To insure continuing compliance with the requirements of this order, the responsible official shall obtain directly from EPA guidance applicable to the facility or its use. Specific responsibilities of EPA are included in Appendix 1, Environmental Protection Agency Responsibilities.

a. *Pollution Control Plans.* An agency plan covering facility compliance shall be developed and reported to OMB in accordance with the procedures prescribed by EPA on a semiannual basis. Responsible officials shall submit reports to AEQ by November 30 and May 31.

b. *Facility Exemptions.* AEQ shall, in coordination with ABU, report to OMB through TAD, by January 15 following the end of each calendar year, agency facilities determined to be exempt from environmental pollution control requirements. Responsible officials shall submit to AEQ by December 15 all facility exemption determinations for the year, justification for each exemption, a summary of the coordination with EPA and, as appropriate, state and local agencies, and report distribution.

c. *Air Pollutant Emissions.* The responsible official shall develop and submit to EPA and state air pollution agencies, in addition to AEQ, facility emissions data, which determine facility compliance with source air pollution standards. After submitting this report, a new report shall be submitted only where the data previously reported does not accurately describe current operations.

J. W. COCHRAN,
Acting Administrator.

APPENDIX 1—ENVIRONMENTAL PROTECTION AGENCY RESPONSIBILITIES

The EPA, under E.O. 11752, is the control agency regarding Federal facilities' compli-

V41N198 OCT 12 76 UM

ance with pollution control requirements. This Appendix identifies those areas of EPA responsibility, as set forth in E.O. 11752, in the prevention, control, and abatement of environmental pollution at Federal facilities. These include:

1. Providing technical advice and assistance to the responsible officials of the agency, regarding compliance with the pollution control requirements.

2. Maintaining a review of agency facility compliance.

3. Providing liaison to assure agency actions taken are coordinated with state, interstate, and local programs.

4. Mediation of any conflicts between the agency and state, interstate, or local authorities, in matters affecting compliance with pollution control requirements.

5. Developing, in coordination and consultation with responsible agency officials:

a. Common procedures for Federal compliance with pollution control requirements.

b. Regulations and guidelines as necessary to facilitate compliance implementation.

c. Framework for coordination and cooperation among the agency, EPA, and the state, interstate, and local agencies.

6. Maintaining a continual review of the implementation of E.O. 11752.

7. Reporting to the President on the progress of the agency in showing facility compliance.

Office of Hazardous Materials Operations

HAZARDOUS MATERIALS REGULATIONS

Exemptions

NOTICE OF GRANTS AND DENIALS OF APPLICATIONS FOR EXEMPTIONS

In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted August 1976. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

Grants

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
1479-P	DOT-E 1479	Hercules, Inc., Wilmington, Del.	49 CFR 173.315(a)(1)	To become a party to exemption 1479. (See application Nos. 75-133, 75-179, 76-312.) (Mode 1.)
2326-X	DOT-E 2326	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.	49 CFR 173.77	To ship certain high explosives in a 1-gal or smaller size tape-sealed cardboard carton, adequately cushioned and overpacked in a DOT specification 12H fiberboard box. (Mode 1.)
3744-X	DOT-E 3744	Lehigh Valley Chemical Co., Easton, Pa.	49 CFR 173.266 (b)(7)	To become a party to exemption 3744. (See application Nos. 76-173, 76-190, and 76-185.) (Modes 1 and 2.)
76-298 4390-X	DOT-E 4390	MCB Manufacturing Chemists, Norwood, Ohio; Eastman Kodak Co., Rochester, N.Y.; Lehigh Valley Chemical Co., Easton, Pa.	49 pt. 173; 46 CFR 146.21-100 145.23-100, 146.25-200, 146.27-100.	To ship certain hazardous materials in a non-DOT specification 6½-gal capacity glass carboy overpacked in a polystyrene case. (Modes 1 and 2.)
76-93	DOT-E 4988	Advanced Instruments, Inc., Needham Heights, Mass.	49 CFR 173.124 (a)(3).	To amend E4988 to provide for shipment by cargo vessel also. (Modes 1, 2, 3, and 4.)
5456-P	DOT-E 5456	Monsanto Co., St. Louis, Mo.	49 CFR 173.245, 173.247, 173.263, 173.266, 173.269, 173.272, 173.349.	To become a party to exemption 5456. (See application No. 75-175.) (Modes 1, 2, and 3.)
5701-X	DOT-E 5701	IMC Chemical Group, Inc., Allentown, Pa.	49 CFR 173.93(e)	To ship certain class B explosives in composite polyethylene/metal drum packagings. (Modes 1 and 2.)
6151-P	DOT-E 6151	Residex Corp., Clark N.J.	49 CFR 173.302(a)(4), 173.304((a)(1) 173.306(c).	To become a party to exemption 6151. (See application No. 74-142.) (Modes 1 and 2.)
6464-P	DOT-E 6464	Fall River Gas Co., Fall River, Mass.	49 CFR 172.101, 173.315(a).	To become a party to exemption 6464. (See application Nos. 76-160, 76-316, 76-328, and 76-114.) (Mode 1.)
6671-X 7434-N	DOT-E 6671	Dow Chemical Co., Midland, Mich.; Natico, Inc., Chicago, Ill.	49 CFR 173.1 pt. 173, Subparts C, E and G; § 177.834.	To ship certain hazardous materials in defective prescribed packaging overpacked in metal drums. (Modes 1 and 2.)
6765-X	DOT-E 6765	Lincoln Welding Supply Co., Lincoln, Neb.	49 CFR 173.315(a)(1)	To ship certain nonflammable liquefied gases in a non-DOT specification truck-mountable, cargo tank fabricated from type 304 stainless steel. (Mode 1.)
6870-P	DOT-E 6870	Goodyear Atomic Corp., Piketon, Ohio; Nuclear Fuel Services, Inc., Erwin, Tenn.	49 CFR 177.842(b)	To become a party to exemption 6870. (See application Nos. 76-147 and 76-308.) (Mode 1.)
6941-X	DOT-E 6941	Mobay Chemical Corp., Pittsburgh, Pa.	49 CFR 173.346(a)-(12).	To ship toluene diisocyanate in tank motor vehicles having cargo tanks that comply with the design and constructional requirements of DOT specification MC-304 or MC-307 except for bottom outlet valves. (Mode 1.)

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
76-216	DOT-E 6078	North Texas LPG Corp., Houston, Tex.	49 CFR 173.315(a)(1), (c)(1).	To provide more latitude in the origination and destination points of compressed gas shipments in a MC-331 tank motor vehicle. (Mode 1.)
7027-X	DOT-E 7027	Borden Chemical, Columbus, Ohio.	49 CFR 173.358, 173.359.	To ship parathion and other class B poisonous liquids in 2 non-DOT specification ASME portable tanks. (Mode 1.)
7045-X	DOT-E 7045	Eastman Kodak Co., Rochester, N.Y.	49 CFR 173.242(c), 173.245(a)(18).	To authorize other persons to reship packages pursuant to sec. 173.22a. (Modes 1, 2, and 3.)
7076-X	DOT-E 7076	LaMotte Chemical Products Co., Chestertown, Md.	49 CFR 173.286(b)	To ship chemical kits containing corrosive liquid packed with nonhazardous articles. (Modes 1 and 2.)
7231-X	DOT-E 7231	American Cyanamid Co., Wayne, N.J.	49 CFR 173.245(a)	To authorize an additional corrosive liquid, n.o.s. in a collapsible rubber container named "SEALD TANK." (Mode 1.)
76-292	DOT-E 7275	Express Airways, Inc., Mojave, Calif.	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1).	To transport class A, B, and C explosives that are not permitted for shipment by air, or are in quantities greater than those prescribed for shipment by air, in 49 CFR pt. 172 through 178. (Mode 4.)
76-367	DOT-E 7281	RMI Titanium Co., Ashtabula, Ohio.	49 CFR 173.208(b)	To ship titanium metal powder, dry in a DOT specification 17C drum. (Mode 1.)
76-369	DOT-E 7284	Virginia Chemical Co., Portsmouth, Va.	49 CFR 173.249(a)(6)	To ship alkaline corrosive liquids, n.o.s. in a DOT specification MC-303 cargo tank. (Mode 1.)
76-382	DOT-E 7286	Liquid Carbonic Corp., Chicago, Ill.	49 CFR 173.34(e)(15)(i).	To ship compressed gases in DOT specification 3A or 3AA cylinders, and cylinders marked 1CC-3, 3A, or 3AA over 35 yr old that are retested every 10 yr. (Modes 1, 2, 3, 4, and 5.)
7422-N	DOT-E 7422	Chemetron Corp., Holland, Mich.	49 CFR 173.28(m), 173.365(a)(2).	To ship sodium arsenate, solid in reconditioned 55-gal DOT specification 17H steel drums having polyethylene liner. (Mode 1.)
7426-N	DOT-E 7426	Martin Marietta Chemicals, Charlotte, N.C.	49 CFR 173.245(a)(29), (31).	To ship a corrosive liquid, n.o.s. in MC-303 or MC-306 tank motor vehicles. (Mode 1.)
7442-N	DOT-E 7442	JSR America, Inc., New York, N.Y.	46 CFR 90.05-35, 98.33-3.	To ship tertiary dodecyl mercaptan in a non-DOT specification portable tank. (Mode 3.)

Emergency exemptions

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
APPLICATION RECEIVED AND GRANTED				
E-6299	DOT-E 6299	Abbott Welding Supply Co., Inc., Olean, N.Y.	49 CFR 173.315(a)(1)	To transport nonflammable compressed gases in a non-DOT specification portable tank. (Mode 1.).
APPLICATION RECEIVED AND DENIED				
EE-7509	Denied, Aug. 6, 1976.	Vicksburg Chemical Co., Vicksburg, Miss.	49 CFR 173.271	To ship thiophosphoryl chloride in DOT specification MC-312 cargo tank made of type 316 stainless steel. (Mode 1.)
EE-7510	Denied, Aug. 12, 1976.	Glidden-Durkee, Division of SCM Corp., Cleveland, Ohio.	49 CFR 173.948	To ship camphene in 55-gal closed-head polycthylene drums. (Mode 3.)

DENIALS

75-109—Request by Pennwalt Corporation, Philadelphia, Pa.—To ship chlorine in non-DOT specification containers built to the Chlorine Institute's (CI) proposed Specification 220A500W, denied August 24, 1976.

76-112, 76-113—Request by American Hoescht Corporation, Somerville, N.J.—To ship various hazardous materials in foreign made steel drums comparable to DOT-17E or 37A drums except for thinner wall or heads, denied August 3, 1976.

5062-X—Request by The Dow Chemical Company, Freeport, Tex.—To authorize the use of outer jackets made from fiberglass reinforced plastic, and to authorize extrapolation of holding time, denied, August 12, 1976.

6519-X—Request by Hercules Inc., Wilmington, Del.—To cancel DOT-E 6519 because of no foreseeable future application, canceled August 25, 1976.

7223-P—Request by Frontier Airlines, Inc., Denver, Colo.—To extend FAA Exemption 2127 authorizing shipments of company-owned electric storage batteries in an inaccessible cargo pit or bin, denied August 30, 1976.

7437-X—Request by Air Products and Chemicals, Inc., Allentown, Pa.—To renew U.S. Coast Guard Special Permit No. 28-69 which authorized the shipment of packages of flammable and non-flammable compressed gases in the same sea container, denied August 24, 1976.

7478-N—Request by Power-Pak Products, Inc., Spartenburg, S.C.—To qualify fire extinguishers of 1300 cubic inches capacity under 49 CFR 173.306(c), denied August 31, 1976.

ALAN I. ROBERTS,
Director, Office of Hazardous Materials Operations.

CIVIL AERONAUTICS BOARD

[Order 76-10-23; Docket 28456]

EASTERN AIR LINES, INC.

Order Setting Application for Hearing in Expedited Procedures

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of October 1976.

On October 31, 1975, Eastern Air Lines filed an application, pursuant to Subpart N of Part 302 of the Board's Procedural Regulations, for amendment of its certificate of public convenience and necessity for Route 5 so as to permit it to operate turnaround nonstop service between Pittsburgh and Atlanta.[1]

By Order 76-3-108, March 16, 1976, the Board set Eastern's application for further proceedings under Subpart N and directed Eastern to file additional exhibit material. Supplemental and revised exhibits were then filed by Eastern.

An answer in support of Eastern's application was filed by the Pittsburgh Airport Advisory Committee. United Air Lines also filed on answer, requesting that Eastern's application be dismissed or that a hearing be held. In support of its request, United states, inter alia, that removal of condition (5) (b) will not result in additional benefits to the local Pittsburgh-Atlanta market, but will result in diversion of $2 million of United's estimated 1977 revenues. Eastern filed a reply controverting United's arguments.

Upon consideration of the pleadings and all the relevant facts, we have determined that there is a sufficient basis for setting Eastern's application in Docket 28456 for hearing.

Accordingly, it is ordered That: The application of Eastern Air Lines, Inc., Docket 28456, be and it hereby is set for hearing before an administrative law judge of the Board at a time and place to be hereinafter designated, as the orderly administration of the Board's docket permits.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-29864 Filed 10-8-76;8:45 am]

[1] Condition (5) (b) of Eastern's cetrificate for Route 5 currently requires all Pittsburgh-Atlanta flights to originate or terminate at either Toronto or a point in Jamaica.

V 41 N 198 OCT 12 76 UM

[Docket No. 24339; Order 76-10-24]

HAZARDOUS MATERIALS

Order Regarding Transportation by Air Carriers

In the matter of acceptance and transport of hazardous materials by various air carriers, dockets 24339, 27090, 27148, 27380, 27382, 27428, 27488, 27494, 27495, 27509, 27518, 27519, 27520, 27521, 27527, 27537, 27545, 27546, 27549, 27554, 27560, 27588, 27655, 27806, 27956, 28180.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of October, 1976.

By Order 75-11-31 adopted November 11, 1975, the Board acted on a number of matters relating to the refusal of various air carriers to accept and transport hazardous materials, requiring inter alia, that certain carriers cancel their tariff provisions refusing acceptance of hazardous materials.[1] Subsequently, the Board issued Order 75-11-92, dated November 24, 1975, which stayed the effectiveness of Order 75-11-31 insofar as it required cancellation of these tariff provisions until 15 days after issuance by the United States Court of Appeals for the District of Columbia of its mandate in "Delta Air Lines, et al. v. Civil Aeronautics Board," Nos. 74-1984, et al.

On August 30, 1976, the U.S. Court of Appeals issued its mandate in this proceeding. In accordance with the Court's decision, we will vacate the requirement in Order 75-11-31 that the tariff provisions refusing to accept hazardous materials be canceled.[2]

Accordingly, it is ordered, That: 1. Ordering Paragraph 5 of Order 75-11-31 be, and it hereby is, vacated.

2. The motion of the Petitioning Carriers filed herein is hereby dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-29861 Filed 10-8-76;8:45 am]

[Order 76-9-154; Docket 27573; Agreement C.A.B. 26139]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Cargo Rates

Issued under delegated authority September 29, 1976.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above C.A.B. agreement number.

The agreement would amend the resolution establishing bulk unitization charges between areas 2 and 3 (Europe and Asia) by including Brisbane, reflecting direct London-Brisbane service. Consistent with our prior approval, we will approve the agreement insofar as the charges established under this resolution are combinable with charges to/from the United States and thus have indirect application in air transportation as defined by the Act.

Pursuant to authority duly delegated by the Board in the Board's Regulations 14 CFR 385.14, it is not found that Resolution JT23(Mail 54) 535 which is incorporated in Agreement C.A.B. 26139, and which has indirect application in air transportation as defined by the Act, is adverse to the public interest or in violation of the Act.

Accordingly, it is ordered That: Agreement C.A.B. 26139 be and hereby is approved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-29862 Filed 10-8-76;8:45 am]

[Order 76-10-26; Docket 27813; Agreement C.A.B. 26098]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

North/Central Pacific Proportional Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 6th day of October, 1976.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement, submitted on September 13, 1976, was adopted by mail vote and has been assigned the above C.A.B. agreement number.

The agreement would reinstate at previous, lower levels certain proportional fares used in conjunction with specified group inclusive-tour and affinity group 70/100 fares to construct through fares between U.S. points and points in the Far East over the North/Central Pacific. The IATA carriers contend that this is in response to the fact that a non-IATA carrier has not implemented certain of the recently-approved increases in proportional fares for the above fare categories.[1] We will approve the agreement inasmuch as it appears to be necessitated by competitive considerations.

Pursuant to the Federal Aviation Act of 1958 and particularly sections 102, 204 (a), and 412 thereof, the Board does not find Resolution JT31(Mail 57) 015b, incorporated in Agreement C.A.B. 26098, to be adverse to the public interest or in violation of the Act.

Accordingly, it is ordered, That: Agreement C.A.B. 26098 be and hereby is approved.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76-29863 Filed 10-8-76;8:45 am]

[Order 76-10-25; Docket 29517]

PAN AMERICAN WORLD AIRWAYS, INC.

Order Denying Petition for Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of October, 1976.

On July 13, 1976, Pan American World Airways, Inc. (Pan American) filed a petition for reconsideration of Order 76-6-162 which affirmed the staff's rejection of Pan American's tariff filing to establish 30/120-day excursion fares and individual return GIT fares for traffic originating in Taipei, Hong Kong, and Bangkok. Although Section 385.54 of the Board's Organization Regulations does not provide for the petition for reconsideration filed by Pan American, we will consider the matter on its merits.

Pan American filed tariff provisions[1] with the Board on March 17, 1976, proposing to establish the above-cited fares for effectiveness May 1, 1976. Under date of April 9, 1976, the Board's staff rejected the tariff filing under delegated authority[2] because of Pan American's failure to submit in support of its filing the justification required by section 221.165 of the Board's Economic Regulations. Pan American petitioned the Board to review the staff action, and upon review the Board affirmed the rejection. The instant petition is for reconsideration of the order affirming the staff's rejection.

In support of its petition, Pan American states (1) that the Board lacks authority to reject its tariff; (2) that, contrary to the position of the Board, the issues raised cannot be adequately addressed by the Board's Bureau of Enforcement; and (3) that the Board's conclusion that the illegal fares cannot be verified without Board enforcement action is clearly erroneous. Elaborating upon its first point, Pan American contends that the Board's affirmation of the rejection amounted to a substantive determination that the fares should not be permitted, and that the recent decision in *"Delta Air Lines, Inc. v. Civil Aeronautics Board,"* Civil No. 74-1984 (D.C. Cir., June 22, 1976), established that the Board lacks authority to reject on substantive policy grounds. Pan American's petition contains several other assertions as to the substantive merits of its rejected tariff.

The simple fact of the matter is that Pan American's tariff was not filed in compliance with the Board's Economic Regulations, specifically with section 221.165 thereof. As specifically pointed out in both Rejection Notice No. B-3408 and Order 76-6-162, the abbreviated justification permitted for tariffs filed to "meet competition" is applicable only to those relatively clear-cut cases where the "competitive" fares are contained in, and thus clearly identifiable from, a properly cited, lawfully filed tariff. Such abbreviated justification requirements do not apply, and were never intended to apply, to filings such as Pan American's which present significantly more difficult and complex questions.

Since Pan American's filing did not meet the requirements of a filing to meet competition as specified in paragraph (d) of § 221.165, the full justificatioan requirements set forth in paragraphs (a), (b), and (c) of section 221.165 were clearly applicable. The filing did not fully meet such requirements, specifically those set forth in paragraphs (b) and (c) of section 221.165. If the Board is to deal in a substantive manner with filings which raise difficult and complex questions, it is entitled to the information and justification in support of such filings required by its regulations.

Upon consideration of the foregoing, the Board finds that Pan American's petition should be denied.

Accordingly, it is ordered, That: The petition of Pan American World Airways, Inc. in Docket 29517 for reconsideration of Order 76-6-162 be and it hereby is denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

CIVIL RIGHTS COMMISSION

ILLINOIS ADVISORY COMMITTEES ET AL.

Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a conference of the Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin Advisory Committees (SAC) to this Commission will convene at 5:00 pm. and end at 1:00 pm. on October 28, 1976, and will reconvene at 9:00 am. and end at 7:00 pm. on October 29, 1976, and the final meeting will convene at 9:30 am. and end at 1:00 pm. on October 30, 1976.

Persons wishing to attend this conference should contact the Committee Chairpersons, or the Mid-Western Regional Office of the Commission, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois 60604.

The purpose of this conference is to discuss the Commission organization; review and discuss current programs and projects and plan for future SAC projects.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., October 5, 1976.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.76-29736 Filed 10-8-76;8:45 am]

KANSAS ADVISORY COMMITTEE

Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Kansas Advisory Committee (SAC) to this Commission will convene at 9:30 a.m. and end at 12:30 p.m. on November 6, 1976, at the Ramada Inn East, Apollo Room, 8300 East Kellogg, Wichita, Kansas.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Central States Regional Office of the Commission, Old Federal Office Bldg., Room 3103, 911 Walnut Street, Kansas City, Missouri 64106.

The purpose of this meeting is to discuss school desegregation in Kansas City; prison subcommittee activities; tour-State Employment Study; Program planning.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., October 4, 1976.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. 76-5]

UPS 'N DOWNS, INC. ET AL.

In the Matter of UPS 'N DOWNS, INC., a corporation, SUSAN IVES OF N.J., INC., a wholly owned subsidiary, SUSAN IVES OF N.Y., LTD., a wholly owned subsidiary, PROVING GROUND, INC., a wholly owned subsidiary, and Burton B. Brous, individually and as an officer of said corporations.

Hearing

The Commission's Staff, having on May 10, 1976, filed a Notice of Enforcement in the above entitled proceeding charging Respondents with having violated certain provisions of the Federal Trade Commission and the Flammable Fabrics Acts and the rules and regulations promulgated thereunder, including the Standard for the Flammability of Clothing Textiles (CS 191-53), by having sold, or delivered after sale, or shipped in commerce, articles of wearing apparel known as Michael Milea Sportswear Tops, styles MP 408, 409, 410 and 425 which were not manufactured in conformance with all the requirements of CS 191-53, and;

The Staff, having proposed the issuance of an Order directing Respondents, inter alia (1) to cease and desist from manufacturing, selling, importing, and transporting any product, fabric or related material which fails to conform to the requirements of the applicable standards issued under the Flammable Fabrics Act; (2) to conform to the provisions of the Flammable Fabrics Act and the regulations and standards thereunder; (3) to give public notice to all customers who purchased said Michael Milea Sportswear tops, that those articles do not comply with the Standard, may be dangerously flammable and that said customers may return the sportswear tops for replacement or complete refund of the purchase price at the otpion of Respondents; and

Respondents, having on June 1, 1976, filed a general denial of the allegations in the Notice of Enforcement, and having further alleged that all Michael Milea Sportswear tops obtained by the Commission's Staff from Respondents have been tested by the Commission and found to conform with the Flammability Standards CS 191-53.

A telephone prehearing conference in this case was held on Friday, July 19, 1976. The hearing is scheduled to commence on Monday, October 18, 1976, in the Consumer Product Safety Commission New York Area Office, 6th Floor, Vesey Street, No. 6 World Trade Center, New York, New York 10048, at 10:00 a.m., edst.

The docket in this case is available in the Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street, N.W., Washington, D.C. 20207.

Dated: OCTOBER 5, 1976.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30120A; FRL 629-4]

NALCO CHEMICAL CO.

Receipt of Application to Register a Pesticide Product Containi g New Active Ingredient; Correction

On August 20, 1976, the Environmental Protection Agency (EPA) gave notice (41 FR 35216) that Nalco Chemical Co., PO Box 87, Sugar Land TX 77487, had submitted an application to register the pesticide product VISCO 3990 OIL AND WATER-FLOOD OR SALTWATER DISPOSAL SYSTEM, BACTERIA DISPOSAL SYSTEM, BACTERIA CONTROL CHEMICAL AND CORROSION INHIBITOR (EPA File Symbol 10349-RL), containing 5.0% of the active ingredient Hexachlorodimethylsulfone. Hexachlorodimethylsulfone was identified as a new active ingredient which had not been included in any previously registered pesticide products.

It has been brought to our attention that Hexachlorodimethylsulfone is a synonym for the active ingredient Bis (trichloromethyl) sulfone which is currently included in registered pesticide products. Consequently, the August. 20 FEDERAL REGISTER notice was published in error.

Dated: October 5, 1976.

FMC CORP.

[FRL 629-5; PF50]

Filing of Pesticide Petition

FMC Corporation, 100 Niagara St., Middleport NY 14105, has submitted a petition (PP 6F1701) to the Environmental Protection Agency (EPA) which proposes that 40 CFR 180.254 be amended by establishing a tolerance for the combined residues of the insecticide carbofuran (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-N-methylcarbamate) and its carbamate metabolite 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-N-methylcarbamate, and the phenolic metabolites 2,3-dihydro-2-dimethyl-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol, and 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiol in or on the raw agricultural commodity peanuts at 5 parts per million.

On May 6, 1976, the EPA announced receipt of a related petition (FAP 5H5132) from FMC Corporation which proposed that 21 CFR 561 be amended to include a feed additive tolerance of 24 ppm for residues of the insecticide carbofuran and its metabolites, of which no more than 3 ppm are carbamates, in the fatty acids derived from peanut soapstock, reflecting residues of 8 ppm, of which no more than 1 ppm is carbamates, in alkaline peanut soapstock.

Interested persons are invited to submit written comments on this petition to the FEDERAL REGISTER Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning this petition may be directed to Product Manager (PM) 12, Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone (202) 755-9315. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the FEDERAL REGISTER Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: October 5, 1976.

[FRL 629-6; OPP—33000/467]

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration oif section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ["Interim Policy Statement"]. On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 [P.L. 94-140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, S.W., Washington DC 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (C) desires to assert a claim under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, & 13—202/755-9315
PM 21 & 22—202/426-2454
PM 24—202/755-2196
PM 31—202/426-2635
PM 33—202/755-9041
PM 15, 16, & 17—202/426-9425
PM 23—202/755-1397
PM 25—202/426-2632
PM 32—202/426-9486
PM 34—202/426-9490

The Interim Policy Statement requires that claims for compensation be filed on or before December 13, 1976. With the exception of 2(c) applications not subject to the new Section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made on or before November 11, 1976.

Dated: October 5, 1976.

JOHN B. RITCH, Jr.,
Director, Registration Division.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19256; FCC 76–902]

RCA GLOBAL COMMUNICATIONS, INC., ET AL.

Terminating Proceeding

APPEARANCES

Carl J. Cangelosi, on behalf of RCA Global Communications, Inc.; William F. Finnegan, on behalf of ITT World Communications Inc.; Ernest Brod and Alexander van Eyck, on behalf of Western Union International, Inc. and Cable & Wireless/Western Union International, Inc.; Robert L. Palmer, on behalf of TRT Telecommunications Corp.; Kenneth Gross, on behalf of Western Union Telegraph Co.; Stanford B. Weinstein and Roger J. Hertz, on behalf of the Chief, Common Carrier Bureau.

DECISION

Adopted: September 28, 1976.

Released: October 5, 1976.

In the matter of RCA Global Communicatons, Inc., ITT World Communications Inc., Western Union International, Inc., Cable & Wireless/Western Union International, Inc., TRT Telecommunications Corp., Revisions of their respective telex tariffs introducing store/forward facilities for deferred delivery and multiple address, Docket No. 19256.

PRELIMINARY STATEMENT

1. This case comes to us on exceptions, filed by The Western Union Telegraph Company (WU), to the Recommended Decision (RD) of the Chief, Common Carrier Bureau, released March 9, 1976. WU's exceptions to the RD, together with a brief in support of the exceptions, were filed on April 15, 1976;[1] an untimely reply, dated May 18, 1976, was filed by Western Union International, Inc. (WUI).[2]

2. In his RD, the Chief, Common Carrier Bureau concluded that: (1) The deferred telex (DT) and multiple address (MA) offerings of the respondent International Record Carriers (IRCs) are optional convenience features which are integral to basic international telex service; the costs of which may properly be regarded as part of the overall costs of the service; and (2) the IRCs therefore would not be required to charge separately for the DT and MA features. Accordingly, he concluded that DT and MA, as presently tariffed, are not unjust or unreasonable pursuant to section 201(b) of the Communications Act, 47 U.S.C. 201(b), nor unjustly discriminatory pursuant to section 202(a), 47 U.S.C. 202(a).

[1] Pursuant to § 0.303 of the Commission's rules, WU was granted an extension of that time provided in § 1.276(a) of the rules, in order to file its exceptions and brief, on or before April 15, 1976.

[2] Since we deny WU's exceptions and WUI's reply was filed late, that reply will not be considered herein.

WU'S EXCEPTIONS

3. WU excepts to five findings, that are as follows:

(1) The costs of DT and MA may properly be regarded as part of the overall costs of providing basic telex service (RD, paragraph 29);

(2) The burden on telex customers who do not use DT and MA services would appear to be minimal (RD, paragraph 29) (discussed below at paragraph 5);

(3) DT and MA services do not create the possibility of cross-subsidy by other services (RD, paragraph 29);

(4) DT and MA do not violate section 202(a) of the Act (RD, paragraph 26); and

(5) DT and MA, as presently offered, are not unjust and unreasonable under section 201(b) of the Act (RD, paragraph 32).

WU's basic contention in these exceptions is that an offering of DT and MA without separate charge is unjust, unreasonable, and discriminatory, since the costs incurred for these offerings are indirectly borne by customers who have no need for them. WU maintains that because telex service was provided for many years prior to the advent of DT and MA, these offerings are neither essential to nor a part of basic telex service.

4. *Exceptions 1, 3–5.* We are not persuaded by the record herein or WU's arguments, that the inclusion of these services in basic telex service, without an additional charge, is unreasonable or discriminatory per se, or that the DT and MA offerings are being cross-subsidized by other IRC services. However, as discussed below, we decline to adopt any determination as to the reasonableness of the subject tariffs, without better information as to usage and costs. We believe that in light of the reports which we require herein, coupled with information presently being gathered as to the IRCs' overall financial condition,[3] we will be better able to determine whether or not a separate charge should be imposed for the DT and MA offerings.

[3] See In the Matter of Preliminary Audit and Study of Operations of International Carriers, Docket 20778, FCC 76–396, 59 FCC 2d —— (released May 7, 1976).

5. *Exception 2.* Exception is taken to the finding that the burden on international telex customers who do not use the DT and MA offerings "would appear to be minimal." In support thereof, WU has merely asserted that a $1 million additional expenditure for these offerings, per se, constitutes something more than de minimis discrimination. This assertion alone is unpersuasive; there must be some indication of a substantial inequitable disparity in the amount of customer usage of these offerings as compared to total telex customers. There has been no evidence submitted to show that customer usage of DT and MA is so small in contrast to the total telex customer base as to constitute more than de minimis discrimination.[4]

6. While we agree with the RD that the costs of providing DT and MA may burden each international telex customer only minimally, we believe that the more significant question is whether or not these features are used by such a high percentage of telex customers that these features are integral to basic telex service. If they are not so widely used, then they must be tariffed as separate services. Since the record does not indicate the extent of usage of these services, and since the actual costs of providing DT and MA cannot be ascertained from the record, we are ordering the IRCs to provide us with the semi-annual usage and cost reports recommended in the RD (paragraph 33) for a test period of two years, as follows:

1. Total DT and MA input volume for the half year.
2. Total telex volume for the same period.
3. Total of DT and MA messages actually delivered during the same period.
4. Total revenues attributable to DT and MA during the same period.
5. Total costs incurred by DT and MA during the same period.

7. Accordingly, *it is ordered,* That WU's exceptions are denied.

8. *It is further ordered,* That RCA Global Communications, Inc., ITT World Communications Inc., Western Union International, Inc., Cable and Wireless/Western Union International, Inc., and TRT Telecommunications Corp., submit semi-annual reports on usage, revenue and costs, as provided in paragraph 6 above.

9. *It is further ordered,* pursuant to section 205 of the Communications Act, 47 U.S.C. 205 (1970), that each party to this proceeding desirous of continuing these or similar offerings beyond the two-year expiration date prescribed herein, must submit, effective on not less than ninety days notice, a tariff filing continuing the offering of these features, accompanied by full justification as required by § 61.38 of our rules along with a full explanation of the terms, conditions and rates under which DT and MA should be offered.

10. *It is further ordered,* That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,[5]

VINCENT J. MULLINS,
Secretary.

[FR Doc.76–29804 Filed 10–8–76;8:45 am]

[4] As indicated in para. 6 infra, we shall require the submission of semiannual reports. That data submitted on customer usage is to indicate the total number of customers using basic telex service and that portion of those customers who actually resort to the use of the DT and MA offerings considered herein.

[5] Commissioners Hooks, Fogarty and White not participating.

[Docket No. 20938; FCC 76–901]

RADIO TELEPHONE INDUSTRIES INC., ET AL.

Memorandum Opinion and Order Designating Matter for Hearing

Adopted: September 28, 1976.

Released: September 30, 1976.

Radio Telephone Industries, Inc., et al., Complainants, Docket No. 20938, v. Mahaffey Message Relay, Inc., Defendant, File Nos. TS 76–209, 76–965, 76–1244.

1. We have before us for consideration informal complaints by Radio Telephone Industries, Inc. (RTI), Mr. Larry Short and Mr. Douglas Wagnon of Memphis, Tennessee, filed pursuant to section 208 of the Communications Act of 1934, as amended, and § 1.717 of our Rules and Regulations. The complaints are directed against Mahaffey Message Relay, Inc. (Mahaffey), also of Memphis, Tennessee, a Commission licensee of four common carrier radio stations in the Domestic Public Land Mobile Radio Service (DPLMRS). Short and Wagnon are customers of RTI, an independent vendor of two-way radios. Tariff charges and conditions of service for the services Mahaffey provides have been filed with the Tennessee Public Service Commission (TPSC). Mahaffey has interconnected its facilities with the landline telephone system and is listed as a connecting carrier in AT&T's Tariff F.C.C. No. 257 for purposes of interstate communications.

2. The complaints generally allege that a vertically integrated monopoly exists in which Mahaffey requires that terminal equipment owned by its customers be installed and maintained by Mahaffey Communications Company, a family-owned company,[1] in violation of sections 202 and 313 of the Communica-

[1] Mahaffey is fully owned by John Mahaffey and his wife. Mahaffey Communications Company is a service agency providing maintenance of communications equipment used in radio common carrier operations and is owned by John Mahaffey's father.

V41N198 OCT 12 76 UMI

tions Act.[2] Specifically, RTI alleges that Mahaffey refused Wagnon a letter of intent to provide him radiotelephone service. Wagnon rented a four channel mobile radiotelephone from RTI and applied to Mahaffey for dispatch service to be used in connection with his welding business. He informed Mahaffey of his intention to apply to this Commission for an individual license rather than operate under the Mahaffey blanket license and requested a letter of intent to attach to his application as required by our rules. Wagnon also informed Mahaffey that he did not want to pay Mahaffey to duplicate maintenance service which was included in the monthly charge paid RTI for equipment leased from RTI. Larry Short alleges that he too was denied a letter of intent by Mahaffey because he did not wish to receive maintenance service from a presently Mahaffey-approved service agency.

3. In refusing to supply Wagnon and Short with service on the maintenance terms they requested, Mahaffey relies on the following provisions of its tariff (Paragraph B-12 of Mahaffey's Tariff TPSC No. 2):

> Equipment provided by Licensee will be maintained and repaired by Licensee, subject to the charges specified in Part D of this tariff. The subscriber will be responsible for damages to or loss of apparatus installed by Licensee when caused by the subscriber's negligence, but for normal wear and tear. The subscriber may not rearrange, disconnect, remove, or attempt to repair any equipment owned and installed by Licensee or permit others to do so. *Equipment provided by the subscribers shall be maintained on a regular basis pursuant to contract with an organization or person furnishing maintenance service whose qualifications have been approved by Licensee.* (Emphasis added.)

Mahaffey admits that a mobile unit served by one of its base stations need not be maintained by it or any Mahaffey-controlled organization. However, Mahaffey relies on § 21.514 of our rules which requires a DPLMRS licensee of a base station to maintain effective operational control over all units with which the licensee communicates,[3] and contends that paragraph B-12 of its tariff permits it to restrict maintenance to shops which it has inspected and approved. The only Mahaffey-approved service agencies are Mahaffey Communications Company and Logan Lesh Electronics in Memphis.[4] Mahaffey denies that it has behaved in an anticompetitive or discriminatory manner. It states that a letter of intent will be supplied promptly, upon application, provided space on the system is available, and the prospective customer agrees to comply with Mahaffey's TPSC tariff. Mahaffey contends that since neither Wagnon nor Short agreed to comply with the tariff regulations for maintenance, it did not issue letters of intent.

DISCUSSION

4. Section 21.14(b) of our rules (47 CFR 21.14(b)) provides for the licensing of customer-owned mobile telephones either under a blanket authorization of a carrier, or individually to a subscriber for mobile service. A subscriber may therefore operate under the carrier's blanket authorization or apply to the Commission for his own license. To be licensed, himself, the subscriber must show that he has made appropriate arrangements with a carrier for the service requested.[5] He may demonstrate this by a "letter of intent" from an authorized official of the carrier to provide the service within a specified service area.

5. Mahaffey is subject to regulation by the TPSC and therefore is not required to file tariffs with us even though several of its stations have reliable service areas extending beyond state borders.[6] However, it is well established that we have jurisdiction with respect to any interstate, non-exchange calls placed by users of mobile telephones and transmitted through interconnection of a mobile system with the telephone network.[7] As a connecting carrier Mahaffey is subject to sections 201 through 205 of the Act.[8] Thus, our jurisdiction extends to any charge, practice, classification or regulation of Mahaffey affecting a subscriber's right to make beneficial use of his mobile telephone in interstate communications.[9] In addition, we are properly concerned with any allegations of anticompetitive conduct by a radio common carrier which we license. However, since we are unaware of any antitrust proceedings pending against Mahaffey, it does not appear that section 313(a) is applicable here.

6. In Memphis Radio Telephone Co., Inc. v. Mahaffey Message Relay, Inc., 49 FCC 2d 258 (1974), we held that refusal to supply minimum technical data necessary to qualify a service shop as a licensee-approved service agency did not itself constitute a violation of our rules, the Act, or any Commission policy, absent any additional allegation of fact which might serve to demonstrate how the rules or the Act were violated or in what manner the public interest was adversely affected by the licensee's actions. We pointed out that § 21.514(a) requires Mahaffey, as a licensee of base stations, to maintain effective operational control over those units which operate pursuant to its blanket authorizations, including the maintenance of those units. Although the point was not there in issue, § 21.514 (a) also requires Mahaffey to likewise maintain effective operational control over individually licensed units operating through its facilities, notwithstanding

---

[2] Section 201(a) of the Act provides that it shall be the duty of every common carrier engaged in interstate or foreign communications by wire or radio to furnish such communication upon reasonable request therefor.

Section 202(a) of the Act provides as follows:

It shall be unlawful for any common carrier to make any unjust or unreasonable discrimination in charges, practices, classifications, regulations, facilities, or services for or in connection with like communication service, directly or indirectly, by means or device, or to make or give any undue or unreasonable preference or advantage to any particular person, class of persons, or locality, or to subject any particular person, class of persons, or locality to any undue or unreasonable prejudice or disadvantage.

Section 313(a) of the Act provides, in part:

All laws of the United States relating to unlawful restraints and monopolies and to combinations, contracts, or agreements in restraint of trade are hereby declared to be applicable to the manufacture and sale of and to trade in radio apparatus and devices entering into or affecting interstate or foreign commerce and to interstate or foreign radio communications • • •

[3] Section 21.514 provides:

(a) The licensee of a base station in this service shall be responsible for exercising effective operational control over all mobile units with which it communicates. The proper installation and maintenance of such mobile units shall be the responsibility of the respective licensees thereof.

(b) A mobile unit normally associated with and licensed to a specified base station will be deemed, when communicating with a different base station pursuant to legally effective tariff provisions, to be temporarily associated with and licensed to such different base station shall, for such temporary period, assume the same licensee responsibility for such mobile unit as if such unit were regularly licensed to it.

[4] The record does not show what manufacturers' equipment Logan Lesh Electronics is qualified to maintain.

[5] 47 CFR 21.15(1)(3) provides:

In the Domestic Public Land Mobile Radio Service each application shall contain, as appropriate, the following information:

(3) An application for land or airborne mobile units to be licensed in the name of a person who is not the licensee of the base station with which the mobile units will be associated in the Domestic Public Land Mobile Radio Service shall be accompanied by the information indicated in § 21.13(a) and 21.13(c) together with an affirmative showing that:

(ii) Definite arrangements have been made for the requested number of mobile units to obtain communication service, upon the frequencies requested, through the base station specifically identified in application;

(iii) Specific arrangements, the details of which should be set forth, have been made for installation, technical service and maintenance of the mobile units by licensed first- or second-class radio operators; • • •

[6] See Mobile Tariff Filings, 53 FCC 2d 579 (1975).

[7] See Chastain et. al. v. AT&T, 42 FCC 2d 314, 318 (1973); 43 FCC 2d 1079 (1973), Reconsideration denied, 49 FCC 2d 749 (1974).

[8] Section 2(b) of the Act provides in pertinent part:

Subject to the provisions of section 301 nothing in this Act shall be construed to apply or to give the Commission jurisdiction with respect to • • • (2) any carrier engaged in interstate or foreign communication solely through physical connection with the facilities of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier • • • except that *sections 201 through 205 of this Act, both inclusive, shall, except as otherwise provided therein, apply to carriers described in clauses* (2), (3), *and* (4). (emphasis added).

[9] See *Hush-A-Phone* v. *U.S.*, 238 F. 2d 266 (1956); *Carterfone*, 13 FCC 2d 420 (1968); 14 FCC 2d 571 (1968); *AT&T, et al.*, 53 FCC 2d 473 (1975); (54 FCC 2d 303 (1975); affirmed, Case No. 75-1617, United States Court of Appeals for the District of Columbia, April 30, 1976.

the duty of the licensees of those units to insure that their units are properly installed and maintained. The requirements imposed upon both a licensee of a base station and a licensee of an individual mobile units are designed to compliment each other and provide for overall operational control of the system. Where the licensee of a base station chooses to fulfill its obligation under § 21.514(a) by requiring installation and maintenance of units operating over it to be done by approved service agencies, the responsibility of the individual licensee of a mobile unit to insure proper installation and maintenance of his equipment remains, but is limited to obtaining such service from those agencies approved by the base station licensee.

7. However, a base station licensee may not rely on § 21.514(a) to justify anticompetitive conduct. A connecting carrier such as Mahaffey may not deny a reasonable request for communications service because of a potential subscriber's refusal to comply with a charge, practice, classification, or regulation which is unjust or unreasonably discriminatory.[10] See Chastain et al., supra. Mahaffey's response to the instant complaint and additional inquiries of our staff present question not raised in Memphis Radio Telephone as to whether it has engaged in a pattern of anticompetitive conduct in violation of sections 201(a) and 202(a) of the Act. Although, Mahaffey requires maintenance shops seeking its approval to fully demonstrate a present ability to maintain licensee equipment in strict accordance with Part 21 of our rules, it admits that approval of maintenance shops meeting this standard is not automatic and that additional maintenance facilities are added only when needed as gauged by customer satisfaction with existing service.[11] Moreover, Mahaffey admits that it received at least two requests from service agencies other than Memphis Radio Telephone Company, Inc., for approval as an authorized maintenance service outlet, but made no premises inspections as it claims to have before approval of Mahaffey Communications and Logan Lesh.[12] Mahaffey declined to act upon one such request because of its judgment that no need existed for approving another service agency.[13] A request from a second service agency was never acted upon because it allegedly was misdirected to Edwin K. Mahaffey, the owner of Mahaffey Communications Company and not a principal of Mahaffey Message Relay, Inc.[14]

8. Neither our rules, nor our decision in Memphis Radio Telephone specifically authorize a base station licensee to deny recognition of competing maintenance shops as licensee-approved on its judgment that there is no customer-need for such facility or facilities. The purpose of § 21.214(a) is to insure the technical integrity of the communications system. Operational control requires that all units communicating with the base station function in such a manner so as not to interfere with each other's operation or with other communications systems. Whether there is a market demand for additional facilities is irrelevant to this consideration, Mahaffey readily concedes that a mobile unit served by one of its base stations need not be maintained by it or by any Mahaffey-controlled organization. Thus, approval of maintenance facilities for purposes of compliance with our rules must be based upon reasonable standards of technical capability requiring applicants to be able to properly maintain mobile units operating on the system and not upon arbitrary determinations by the base station licensees as to customer demand for additional approved maintenance facilities.

9. Mahaffey's policies and practices concerning maintenance service therefore may adversely affect a subscriber's right to make beneficial use of his mobile telephone in interstate communication. We are presented here with questions as to whether Mahaffey has denied reasonable requests for service in violation of section 201(a) of the Act in denying service to both Wagnon and Short because they preferred maintenance from RTI and its agency,[15] or subjected Wagnon and Short to undue and unreasonable prejudice and engaged in anticompetitive and unreasonably discriminatory practices against competing maintenance shops contrary to section 202(a) of the Act. Substantial questions also are raised as to whether Mahaffey has engaged in anticompetitive conduct against competing equipment vendors and, if so, whether Mahaffey should be ordered to show cause why its licenses should not be revoked.[16]

10. In view of the foregoing: *It is ordered*, That pursuant to the provisions of sections 4(i), 4(j), 201, 202, 208 and 409 of the Communications Act of 1934, as amended, That this matter is hereby designated for hearing on the following issues:

(1) To determine the facts and circumstances surrounding Mahaffey's refusal to furnish communications service to Mr. Douglas Wagnon;

(2) To determine the facts and circumstances surrounding Mahaffey's refusal to furnish communications service to Mr. Larry Short;

(3) To determine the technical and other standards required by Mahaffey for approval as a maintenance shop;

(4) To determine Mahaffey's requirements for maintaining effective operational control of the mobile units with which it communicates;

(5) To determine the facts and circumstances surrounding Mahaffey's disposition of the request of Majestic Communications, Inc. for approval as a service agency;

(6) To determine the facts and circumstances surrounding Mahaffey's disposition of the request of General Electronics, Inc. for approval as a service agency;

(7) To determine whether Mahaffey's failure to furnish communication service to person wishing to use customer-provided equipment denied reasonable requests for service in violation of Section 201(a) of the Act;

(8) To determine whether Mahaffey unjustly or unreasonably discriminated against persons wishing to use customer-provided equipment in violation of section 202(a) of the Act;

(9) To determine whether the Commission should order Mahaffey to show cause why its licenses should not be revoked;

11. *It is further ordered*, That the hearing in this proceeding shall be held before an Administrative Law Judge at a time and place to be specified by subsequent order;[17] and that such Administrative Law Judge shall upon closing of the record, prepare and issue an initial decision, which shall be subject to the submittal of exceptions and requests for oral argument as provided in §§ 1.276 and 1.277 of the Commission's rules (47 CFR 1.276 and 1.277), after which the Commission shall issue its decision as provided in § 1.282 of the Commission's rules (47 CFR 1.282).

12. *It is further ordered*, That Radio Telephone Industries, Inc., Mr. Larry Short, Mr. Douglas Wagon, Mahaffey Message Relay, Inc., and the Chief, Common Carrier Bureau, are made parties to this proceeding.

13. *It is further ordered*, That the parties herein may avail themselves of an

---

[10] We are informed by the TPSC that a basis for its approval of Mahaffey's Tariff TPSC No. 2 was Mahaffey's understanding of the requirements of § 21.514(a) and our decision in Memphis Radio Telephone.

[11] We are informed by the TPSC that paragraph B-12 of Mahaffey's tariff allows Mahaffey to approve maintenance facilities on the basis of ascertainment of need for additional such facilities.

[12] It appears that Mahaffey approved Mahaffey Communications Company and Logan Lesh maintenance shops in 1968 and 1972, respectively. Mahaffey states that arrangements were made in person and no documents were exchanged between it and the approved shops.

[13] On November 17, 1973, Majestic Communications, Inc. of Memphis formally requested recognition as a Mahaffey-approved service agency.

[14] On June 19, 1975 and July 2, 1975, General Electronics, Inc. of Memphis formally requested recognition as a Mahaffey-approved service agency and information concerning any standards Mahaffey required an agency to meet for such approval. Although the letters were specifically directed to Edwin Mahaffey, they were in fact addressed to Mahaffey Message Relay, Inc. and not Mahaffey Communications Company. Both occupy the same building.

[15] It is not clear whether maintenance was to be performed by RTI directly or indirectly through another firm.

[16] Requests to intervene by equipment vendors having an interest in this proceeding, such as Majestic Communications, Inc., or General Electronics, Inc., will be entertained if made pursuant to our rules.

[17] This proceeding shall be assigned to the Administrative Law Judge assiged to preside in Docket Nos. 20871 and 20872. Any request for consolidation of this proceeding with that in those Dockets shall be directed to the presiding Administrative Law Judge.

V41N198 OCT 12 76 UMI

opportunity to be heard by filing with the Commission pursuant to § 1.221(e) of the rules within twenty (20) days of the release date of this Memorandum Opinion and Order, a written notice stating an intention to appear on the date set for hearing and present evidence on the issues specified.

FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

CONSTRUCTION ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) notice is hereby given that the Construction Advisory Committee will meet Wednesday, October 27, 1976, at 10 a.m., Room 5041B, FEA Headquarters, 12th and Pennsylvania Avenue, NW., Washington, D.C.

The Committee was established to advise the Administrator, FEA, with respect to the interests and problems of the construction industry as they relate to the policy and implementation of programs to meet the current and continuing national energy shortage.

The agenda for the meeting is as follows:

1. Subcommittee Caucuses (9:30).
2. Opening Remarks by Robert A. Georgine, President, Building and Construction Trades Department, AFL-CIO, and Harry P. Taylor, President, Council of Construction Employers.
3. Energy Policy and Conservation Act of 1975 (EPCA) as it pertains to the construction industry.
   a. Energy Conservation and Construction Design.
   b. Mortgage Lending for Major Construction Projects as related to Energy Conservation.
4. Report of the Energy Conservation Subcommittee (Robert Higgins, Chairman).
5. Report of the Construction Labor Availability Subcommittee (Martin J. Ward, Chairman).
6. Report of the Construction Materials Subcommittee (Walter M. Kardy, Chairman).
7. Progress Reports from the other Construction Advisory Subcommittees.
8. Discussion of the continuance of existing Subcommittees.
   a. Discussion of changes or additions to the existing Subcommittees.
   b. Committee Administrative/Operations Discussion.
   c. Discussion Leader, Co-Chairman Robert A. Georgine.

Subcommittees may meet informally in Washington, D.C. the preceding evening, at the discretion of the Subcommittee Chairmen; the meetings will be open to the public. For further information on Subcommittee activities, call Lois G. Weeks, Director, Advisory Committee Management at (202) 961-7022.

The Committee meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform the Director, Advisory Committee Management, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection in the Freedom of Information Office, Room 2107, Federal Energy Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C.

Issued at Washington, D.C., on October 6, 1976.

MICHAEL F. BUTLER,
General Counsel.

[1] Commissioners Fogarty and White not participating.

FEDERAL MARITIME COMMISSION

KNUTSEN LINE J/S

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before October 22, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated herinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Herbert Bals, President, Bakke Steamship Corporation, 650 California Street, San Francisco, California 94108

Notice of the filing of Agreement No. 7623-6 was published in the FEDERAL REGISTER of August 5, 1976, (Vol. 41, No. 152, Page 32784).

Agreement No. 7623-6 was refiled on September 27, 1976 to further amend the scope of the Knutsen Line joint service agreement by (1) adding Korea as a country served within the U.S. foreign commerce, and (2) deleting the foreign to foreign trade presently contained in the agreement.

By Order of the Federal Maritime Commission.

Dated: October 6, 1976.

FRANCIS C. HURNEY,
Secretary.

[No. 76-56]

McALLISTER BROTHERS, INC. v. NORFOLK & WESTERN RAILWAY CO.

Filing of Complaint

OCTOBER 5, 1976.

Notice is hereby given that a complaint filed by McAllister Brothers, Inc. against Norfolk and Western Railway Company was served October 5, 1976. The complaint alleges that respondent has entered into an exclusive agreement with a tugboat operator for the performance of all docking and undocking of vessels at its Norfolk terminal facilities in violation of sections 16 and 17 of the Shipping Act, 1916.

Hearing in this matter shall commence on or before April 5, 1977.

FRANCIS C. HURNEY,
Secretary.

FEDERAL MEDIATION AND CONCILIATION SERVICE

ARBITRATION SERVICES ADVISORY COMMITTEE

Meeting

Notice is hereby given that the Federal Mediation and Conciliation Service Arbitration Services Advisory Committee, in accordance with section 10 of the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), will meet on Thursday, October 28 and Friday, October 29, 1976 at 9:30 a.m. in the National office at 2100 K Street, Room 608, Washington, D.C.

The agenda is as follows:

1. Criteria for publication of arbitration awards.
2. Arbitrator fees for cancellation, postponement, continuance and stay of hearing.
3. Considerations outside the Agreement and evidence relative to award and decision in private and public sector cases.
4. Boards of Inquiry volume and factfinder availability.

This meeting shall be open to the public.

Communications regarding this meeting should be addressed to:

Mr. John Canestraight, Assistant Director, Office of Arbitration Services, Federal Mediation and Conciliation Service, Washington, D.C. 20427.

Signed at Washington, D.C., this fourth day of October 1976.

JAMES F. SCEARCE,
National Director.

FEDERAL POWER COMMISSION

[Docket No. RP76-10 (PGA76-4)]

ARKANSAS LOUISIANA GAS CO.

Revised Tariff Sheets

OCTOBER 4, 1976.

Take notice that on September 27, 1976, Arkansas Louisiana Gas Company (ARKLA) tendered for filing Sixth Revised Sheet No. 185 in its Rate Schedule X-26, FPC Gas Tariff Original Volume No. 3. Arkla states that this tariff sheet is also filed in accordance with the special provisions of Opinion No. 770 in Docket No. RM75-14.

Arkla states that it has combined the one-time adjustment authorized to be collected from October 27, 1976 in FPC Opinion No. 770 with its regular PGA filing effective on November 1, 1976 and has proposed to cover both filings with a single tariff sheet publication in order to make both adjustments effective on the regular November 1, 1976 tariff change date.

Arkla states that copies of the revised tariff sheet and supporting data are being mailed to Arkla's jurisdictional customers and other interested parties effected by the tariff change.

Any person desiring to be heard or to protest said filing should file a Petition to Intervene or Protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practiec and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29628 Filed 10-8-76;8:45 am]

[Docket No. RP75-8 (PGA 76-8)]

COMMERCIAL PIPELINE CO., INC.

PGA Filing

OCTOBER 4, 1976.

Take notice that on September 23, 1976, Commercial Pipeline Company, Inc. (Commercial) tendered for filing Fifteenth Revised Sheets No. 3A reflecting Purchased Gas Adjustments and effective dates as set out below:

Sheet No.	Current adjustments	Cumulative adjustments	Effective date
3A fifteenth revised.	0.0062	0.4142	Oct. 27, 1976

Commercial states that these revisions track precisely similar revisions in the tariff of Cities Service Gas Company, its sole supplier. Commercial requests waiver of notice to the extent required to permit said tariff sheets to become effective as proposed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. R-427]

CONNECTICUT LIGHT AND POWER CO.

Order Accepting and Approving Settlement Agreement

OCTOBER 5, 1976.

By joint motion filed August 6, 1976, the Connecticut Light and Power Company (CL&P) and the Connecticut Municipalities[1] moved that a Settlement Agreement (Settlement) attached to the motion, be approved and the proceeding herein be terminated. For the reasons hereinafter stated, the Commission will approve the Settlement and terminate the proceeding.

Public notice of the filing of the argeement was issued August 24, 1976, with comments due on or before September 1, 1976. No comments were received.

The controversy in this proceeding relates to amounts owed to CL&P under the fuel cost adjustment clause during 1971 and 1972 and claimed offsets to those amounts during the same period. Several court proceedings are involved in addition to the proceeding in the instant docket. The settlement provides that $254,513 will be paid by the municipalities to CL&P, as set out in a schedule attached to the settlement, in full satisfaction of all claims, counterclaims, and recoupment claims arising from the controversies between the parties. Interest will be paid at the rate of 7% per annum from the date of payment to October 10, 1974, and thereafter at the rate of 9% per annum. The payment will be deducted from refunds due to municipalities pursuant to Opinion No. 761, Connecticut Light and Power Company, issued April 28, 1976. The instant case is presently pending before the Commission on exceptions to the Initial Decision issued January 28, 1976. Commission review of the proposed settlement agreement indicates that it provides for an appropriate resolution of the controversy herein. Therefore, we shall approve the settlement and terminate the proceeding.

The Commission finds. The settlement agreement filed herein is in the public interest and should be approved.

The Commission orders. (A) The settlement agreement filed by CL&P and Municipalities, incorporated herein by reference, is hereby approved and adopted, and the proceedings herein are terminated.

(B) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by Commission, its Staff, CL&P, or the Connecticut Municipalities in any proceedings now pending or hereinafter instituted by or against CL&P or any other person or party.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29807 Filed 10-8-76;8:45 am]

[Docket No. RP72-157 (PGA76-9)]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FPC Gas Tariff

OCTOBER 4, 1976.

Take notice that Consolidated Gas Supply Corporation (Consolidated), on September 27, 1976, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1, pursuant to its PGA clause for rates to be effective October 27, 1976. Consolidated states that the proposed rate increase would generate $181.6 million annually in additional jurisdictional revenues.

Consolidated states that the PGA filing is a result of Opinion No. 770 issued by the Federal Power Commission on July 27, 1976.

Consolidated is requesting a waiver of any of the Commission's Rules and Regulations in order to permit the proposed rates to go into effect on October 27, 1976.

Consolidated states that copies of this filing were served upon Consolidated's jurisdictional customers, as well as interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in

[1] Groton, Jewett City, Norwich, the Second and Third Taxing Districts of the City of Norwalk, and Wallingford.

V41I198 OCT 12 76 UMI

accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29810 Filed 10-8-76;8:45 am]

[Docket No. RI76-156]

ELMS BROTHERS AND CO.

Petition for Special Relief

OCTOBER 4, 1976.

Take notice that on September 20, 1976, Elms Brothers and Company, 234 East Greene Street, Waynesburg, Pennsylvania 15370, filed a petition for special relief in Docket No. RI76-156 pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76).

Petitioner seeks authorization to charge 41 cents per Mcf for the sale of gas to Columbia Gas Transmission Corporation in consideration for the completion of remedial work on a well located in Grey Township, Greene County, Pennsylvania. The subject gas is currently being sold at the rate of 29 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 26, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29815 Filed 10-8-76;8:45 am]

[Docket No. RP72-138 (PGA76-4)]

FLORIDA GAS TRANSMISSION CO.

Proposed Changes in Rates and Charges Under Purchased Gas Adjustment Provision

OCTOBER 4, 1976.

Take notice that on September 27, 1976, Florida Gas Transmission Company (Florida Gas), P.O. Box 44, Winter Park, Florida 32790, tendered for filing Twelfth Revised Sheet No. 3-A to its FPC Gas Tariff, Original Volume No. 1, containing changes in the resale rates in its Rate Schedules G and I for effectiveness on October 27, 1976.

According to Florida Gas, the proposed changes in rate result from producer rate increases filed on or before August 26, 1976 reflecting the new national rates for sales of natural gas dedicated to interstate commerce on and after January 1, 1973, for the period January 1, 1975, to December 31, 1976, as established by Opinion No. 770, issued July 27, 1976 (Docket No. RM75-14). Florida Gas further states that its filing is being made in accordance with the purchased gas adjustment provision in its tariff (Section 15, General Terms and Conditions) and the authority of Opinion No. 770 (mimeo. ed. at pp. 131 and 161) permitting a special rate increase to track the increased rates established therein together with a surcharge to permit recovery of producer increases attributable to Opinion No. 770 and incurred prior to the effectiveness of the revised rates proposed in its filing. Florida Gas states that the surcharge included in the proposed rates has been determined in accordance with the order issued September 22, 1976 modifying Opinion No. 770. The annual increase in jurisdictional revenues under the new PGA amounts to approximately $17 million and the surcharge increase amounts to $2.7 million.

Florida Gas states that copy of its filing has been served on all customers purchasing gas under its FPC Gas Tariff, Original Volume No. 1 and the Florida Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 14, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29830 Filed 10-8-76;8:45 am]

Electric Rates: Primary Jurisdiction

[Docket No. ER76-733]

GULF POWER CO.

Order Accepting for Filing a Proposed Supplement and Granting Intervention

OCTOBER 4, 1976.

On June 28, 1976, Gulf Power Company (Gulf Power) filed for a new delivery point for service by Gulf Power to Gulf Coast Electric Cooperative, Inc. (Gulf Coast) at Gaskin in Bay County, Florida.[1] Public notice of this filing was issued on July 28, 1976, with comments, protests or petitions to intervene due on or before August 16, 1976. Alabama Electric Cooperative, Inc. and Gulf Coast (collectively, Cooperatives) filed a Petition to Intervene, Protest and Motion that Gulf Power Company's FPC Electric Tariff Supplement be Modified. Gulf Power filed on August 31, 1976, an Answer to Cooperatives' August 16, 1976, Protest, Petition and Motion. The Cooperatives filed a Motion For Leave to File Reply and Reply to Gulf Power Company's Answer on September 8, 1976. For the reasons hereinafter stated, the Commission shall grant the petition to intervene and establish an effective date for the supplement.

The Cooperatives' pleading states that they have a direct and substantial interest in this case which will not be represented adequately by other parties. The Commission believes that good cause has been shown to allow the Cooperatives to intervene in this proceeding.

The Cooperatives protest and move to modify the tendered supplement to make the effective date June 17, 1976, instead of June 1, 1976. The Cooperatives' motion is supported by extensive materials regarding the negotiations leading up to the execution of the agreement and the subsequent construction of facilities. The point of this material is the Cooperatives' allegation that Gulf Power is "precluded by its own actions from asserting that the charges under the FPC electric tariff supplement applicable to the Gaskin Substation shall be paid for any period prior to June 17." Gulf Power's Answer claims that the language of the supplement was unambiguous and that the Cooperatives "have not shown any basis in law or fact for the equitable reformation of the contract which they seek from this Commission."

A primary duty of the Commission under the Federal Power Act is to assure the rates charged are just and reasonable. In fulfilling this duty, the Commission must follow the basic principle of regulation that the rates charged should be related directly to the service rendered. Under this tendered supplement, the "obligation to pay" is concurrent with and dependent upon the "obligation to serve." Although the supplement states that the commencement date of service would be June 1, 1976, it is not disputed by either party that transfer to the Gaskin delivery point was actually made on June 17, 1976. For purposes of the proper rate treatment, the Commission believes that the Cooperatives should begin to pay rates under the supplement as of June 17, 1976, the date on which service commenced at Gaskin delivery point. This rate action follows the regulatory tenet

[1] Designated as Supplement to Service Agreement under FPC Electric Tariff, Original Volume No. 1.

that rates should be related directly to service. In taking this action, the Commission is setting the effective date as a matter of proper rate regulation which is within our authority under the Federal Power Act. The Commission does not believe this rate treatment modifies the existing contract or the parties' duties and obligations under it.

The parties urge the Commission to decide on the basis of their written pleadings the issue concerning liability under the supplement for failure to deliver service prior to June 17. The Commission believes this is a contractual dispute which should be resolved in the proper court rather than here. Agency action is unwarranted under the doctrine of primary jurisdiction in cases of concurrent jurisdiction where the litigation deals with a single event which requires no continuing supervision by the regulatory agency and when the issue is peripheral to the principal litigation. *"Mississippi Power & Light Company* v. *United Gas Pipe Line Co.,"* 532 F. 2d 412, (C.A. 4 1976).

The Commission's review of the instant case indicates that the issue of contractual liability between Gulf Power and the Cooperatives for failure to deliver service prior to June 17 is most likely a single event which will not require our continuing supervision. Furtherfore, the decision here on the proper effective date for rate purposes is a sufficiently clear determination of the Commission's duty to determine just and reasonable rates to aid the proper court in its determination of the contractual liability. The supplement itself is written in simple contract terms which require no further expert explanation by the Commission for a court to determine its proper meaning. Our primary concern is the proper rate which has been resolved here. This concern is peripheral to the main litigation here—the determination of which party is contractually liable for the failure to deliver service prior to June 17. Resolution of this issue would involve the Commission in determining the legal significance under the applicable law of the negotiations and other dealings described in the pleadings. Deciding what is the applicable law and then what is the significance of the parties' actions under this law are not matters generally within the Commission's expertise, but are matters better left to courts which deal regularly in similar contractual disputes. Accordingly, the Commission declines to rule on contractual liability for the period prior to June 17. The parties should seek recourse for this matter in a court having jurisdiction over them and their dispute.

The Commission finds: (1) Good cause exists to grant the Cooperatives' Petition to Intervene.

(2) The proposed supplement should be accepted for filing and given an effective date of June 17, 1976 for rate purposes.

The Commission orders: (A) Gulf Power's proposed supplement is hereby accepted for filing and given an effective date for rate purposes of June 17, 1976.

(B) The Cooperatives are hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and Provided further, That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(C) The Commission Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29820 Filed 10-8-76;8:45 am]

[Docket Nos. RI74-188, et al.]

INDEPENDENT OIL & GAS ASSOCIATION OF WEST VIRGINIA, ET AL.

Order Granting Special Relief

OCTOBER 4, 1976.

On June 17, 1976, Independent Oil & Gas Association of West Virginia (IOGA) filed a supplemental petition in Docket Nos. RI74-188 and RI75-21 requesting that twenty-one of its members be permitted to collect the settlement rates approved by the Commission in said dockets on March 19 and 22, 1976, respectively. IOGA states that the twenty-one small producers would be eligible to receive the relief accorded but for the untimeliness of their participation in the proceedings. Petitioner further states that inclusion of the producers supplementally will not affect the validity of the underlying cost data or analysis relied upon in the proceedings.

IOGA also requests that the Commission reopen the proceedings in Docket Nos. RI74-188 and RI75-21 for a limited period of time to permit certain additional small producers in West Virginia to submit petitions to intervene.

On May 6 and June 9, 1976, respectively, Mark One Limited (Mark One) and Wise Oil Company No. 2 (Wise No. 2), pursuant to Section 1.12 of the Commission's Rules of Practice and Procedure, filed motions in Docket Nos. CS76-803 and CS76-854, respectively, requesting authorization to collect the settlement rates approved by the Commission on March 22, 1976, in Docket No. RI75-21.[1]

In support of its motion, Mark One avers that it is a newly created partnership engaged in the business of oil and gas exploration and development in West Virginia and other areas. It insists that it has at least as great a need for the IOGA settlement rates as many of the over 300 small producers currently receiving special relief treatment under the settlement agreement. Mark One further argues that the sole reason that it was not a party to the IOGA proceeding is that the partnership was not in existence at the time the settlement agreement was being prepared.

Wise No. 2 states that it is engaged in the exploration for and development of oil and gas reserves in various areas of the country, including the State of West Virginia. It contends that as a new small producer entrant in the Appalachian area which has applied for membership in IOGA it should be entitled to receive the settlement rates approved by the Commission in Docket No. RI75-21.

Additionally, we have received letters from other small producers in West Virginia who seek Commission authorization to collect the IOGA settlement rates.

Virtually all of the small producers in West Virginia became parties to the IOGA proceedings and adduced revelant evidence therein. As a result, we believe that the cost data developed in those proceedings are representative of the costs incurred by those small producers in West Virginia, few in number, who did not become parties to the proceedings. Such data are also representative of the costs which will be incurred by new small producers. For this reason we conclude that it is in the public interest to make the IOGA settlement rates for both "flowing" and "new" gas applicable to all producers selling gas produced in West Virginia under small producer certificates.

The Commission finds: The IOGA settlement rates for both "flowing" and "new" gas should be made applicable to all producers selling gas produced in West Virginia under small producer certificates.

The Commission orders: All producers selling gas produced in West Virginia under small producer certificates are hereby authorized to collect the settlement rates for both "flowing" and "new" gas approved by the Commission in Docket Nos. RI74-188 and RI75-21.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

Electric Rates

[Docket No. ER76-817]

INDIANAPOLIS POWER AND LIGHT CO.

Order Accepting for Filing and Suspending Proposed Tariff Sheets, Denying Request for Waiver, and Establishing Procedures

OCTOBER 4, 1976.

On July 29, 1976, Indianapolis Power and Light Company (IP&L) tendered for filing proposed tariff revisions[1] providing for increased rates for service to Boone County and Morgan County Rural Electric Membership Corporations (REMCs). The proposed rates would result in in-

[1] Mark One filed an application for a small producer certificate on May 6, 1976. Wise No. 2 filed its application on May 27, 1976. Pursuant to Order No. 428 a small producer certificate will be effective as of the date of filing the application.

V41 1998 OCT 12 76 UM

creased revenues of $220,300 (16.38%) for the twelve-month period following the proposed effective date of October 23, 1976. For the reasons stated below, the Commission shall accept for filing and suspend IP&L's tariff sheets for one day until October 24, 1976.

In the transmittal letter accompanying its filing, IP&L states that the REMCs concur in the instant filing, as evidenced by Certificates of Concurrence executed by the respective managers of Boone County and Morgan County REMCs.

Public notice of the instant filing was issued on August 6, 1976, with comments, protests, or petitions to intervene due on or before August 25, 1976. No responses were received.

IP&L's filing did not include testimony and exhibits as required by § 35.13(5)(i) of the Commission's Regulations. IP&L has requested waiver of the requirement to prefile testimony and exhibits, in the anticipation that no hearing would be required in view of the fact that the REMCs have submitted certificates of concurrence in the filing.

The stated purpose of § 35.13(5)(i) is to avoid delays in the processing of rate filing. Inasmuch as the instant order suspends IP&L's filing and establishes prehearing procedures, this stated purpose is pertinent to the instant proceeding. The Commission shall therefore deny IP&L's request for waiver of § 35.13(5)(i) and shall direct the Company to comply with such regulation.

Commission review of IP&L's revised tariff sheets indicates that the increased rates proposed therein have not been shown to be just and reasonable and may be unjust, unreasonable, or otherwise unlawful. Accordingly, the tariff sheets shall be accepted for filing and suspended for one day until October 24, 1976, when they may be placed into effect, subject to refund.

The Commission finds: (1) Good cause exists to accept for filing the revised tariff sheets filed on July 29, 1976, by IP&L and to suspend their use for one day until October 24, 1976, when they may be permitted to become effective, subject to refund, pending the outcome of a hearing and decision thereon.

(2) Good cause exists to deny IP&L's request for waiver of § 35.13(5)(i) of the Commission's Regulations under the Federal Power Act, and to require IP&L to file, within 30 days of the issuance of this order, testimony and exhibits in compliance with such regulation.

The Commission orders: (A) Pending a hearing and decision as to the lawfulness of the rates and charges proposed therein, the revised tariff sheets filed on July 29, 1976, by IP&L are hereby accepted for filing and suspended from operation for one day, to become effective October 24, 1976, subject to refund.

(B) IP&L's request for waiver of § 35.13(5)(i) of the Commission's Regulations is hereby denied. IP&L is hereby directed to file, within 30 days of the issuance of this order, testimony and exhibits in compliance with such regulation.

(C) Pursuant to the authority of the Federal Power Act, particularly §§ 205 and 206 thereof, and the Commission's Rules and Regulations, a hearing shall be held concerning the justness and reasonableness of the proposed rate increase.

(D) The Commission Staff shall prepare and serve top sheets on all parties on or before March 1, 1977, for the purposes of settlement (See Administrative Order No. 157).

(E) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall convene a settlement conference in this proceeding on a date certain within 10 days after the service of top sheets by the Staff, in a hearing or conference room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Said Presiding Administrative Law Judge is hereby authorized to establish all procedural dates and to rule upon all motions (with the exceptions of petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Rules of Practice and Procedure.

(F) IP&L shall file monthly with the Commission the report on billing determinants and revenues collected under the presently effective rates and the proposed increased rates filed herein, as required by § 35.19a of the Commission's Regulations, 18 CFR 35.19a.

(G) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER76-184]

KANSAS CITY POWER & LIGHT CO.

Order Approving Settlement Agreement

OCTOBER 4, 1976.

On August 2, 1976, the Kansas City Power & Light Company (KCPL) tendered for filing a proposed Settlement Agreement dated July 19, 1976. The proposed Agreement would resolve all issues in this proceeding with the exception of one concerning cost allocation which has been reserved for hearing and decision. For the reasons stated herein, the Commission shall approve the proposed Settlement Agreement.

By an order issued January 30, 1976, the Commission accepted and suspended until March 2, 1976, the proposed rate increase filed herein by KCPL to its wholesale customers in the amount of $997,352 in annual revenues, based upon its cost of service and wholesale firm power sales during the twelve-month test period ended June 30, 1975.

Public notice of the filing of the Settlement Agreement was issued August 13, 1976, with comments thereon due on or before August 27, 1976. Comments were filed in support of the Agreement by the Commission Staff on August 26, 1976.

The proposed Settlement Agreement provides for an increase in KCPL's annual revenues of $796,087, based on sales during the 12-month test period ended June 30, 1975. The major elements of the Agreement include the following:

(1) The issue as to whether for cost allocation purposes KCPL's 161/69/34/12 kv stepdown transformation facilities and 69 kv and 34 kv line facilities should be (a) "rolled-in" and included as a portion of KCPL's "Power Source Facilities," or (b) assigned and allocated as a portion of KCPL's "Local Facilities" is reserved for hearing and decision.

(2) Except with respect to the outcome of the reserved issue, KCPL agrees that it will not initiate, pursuant to section 205(d) of the Federal Power Act, a general rate increase applicable to its Wholesale Firm Power Service by filing with the Commission prior to December 31, 1976, increased new schedules for rates and charges applicable thereto.

The Commission's review of the proposed Agreement indicates that it reflects a just and reasonable resolution of the issues in this proceeding, and provides for cost-based rates. Accordingly, we find the proposed Agreement is just and reasonable and in the public interest, and should be accepted. The Commission notes that KCPL filed contemporaneously with Settlement Agreement and attached as Appendix B thereto revised tariff sheets reflecting the rates, terms and conditions of the Agreement. These revised tariff sheets shall be accepted for filing to become effective March 2, 1976.

With respect to those issues reserved for hearing, we emphasize that nothing herein shall be construed as limiting the rights of the parties to this proceeding regarding the further convening of conferences or offers of settlement pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure.

The Commission finds: Good cause exists to accept and approve the proposed Settlement Agreement.

The Commission orders: (A) The Settlement Agreement, incorporated herein by reference, is hereby accepted and approved.

(B) The revised tariff sheets appearing as Appendix B to the Settlement Agreement are hereby accepted for filing to become effective March 2, 1976.

(C) Within 30 days of the issuance of this order, KCPL shall refund, with interest computed at a rate of 9% per annum, all amounts collected in excess of the proposed per settlement rates.

(D) Within 15 days after refunds are made according to ordering paragraph (C) herein, KCPL shall file with the Commission a refund report showing monthly billing determinants and revenues under its prior, present, and settlement rates, and showing the monthly settlement rate increase, the monthly rate refund, the monthly interest computation, with a summary of all such information for the total refund period.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, the Staff or any other party or person affected by this order in any proceeding now pending or hereinafter instituted by or against KCPL or any other person or party.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER76-204]

KENTUCKY POWER CO.

Filing of Revised Rate Schedules

OCTOBER 4, 1976.

Take notice that on August 16, 1976, Kentucky Power Company (Kentucky) tendered for filing revised rate schedules in purported compliance with an "Order Approving Settlement Agreement" issued July 21, 1976, in the above-captioned proceeding. Kentucky states that the revised rate schedules are supplements to its FPC Rate Schedule Nos. 12 and 13 applicable for service to Vanceburg, Kentucky, and Olive Hill, Kentucky, respectively.

Kentucky states that copies of the filing have been served upon Vanceburg an Olive Hill.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 26, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29826 Filed 10-8-76;8:45 am]

[Docket No. CI76-762]

McGOLDRICK JOINT VENTURE NO. 1-73

Application

OCTOBER 4, 1976.

Take notice that on September 13, 1976, McGoldrick Joint Venture No. 1-73 (Applicant), 610 Beck Building, Shreveport, Louisiana 71101, filed in Docket No. CI76-762 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale of natural gas in interstate commerce to United Gas Pipe Line Company (United) from the Leatherman Creek Field, Claiborne Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant entered into a contract with United dated August 27, 1976, for the resale of natural gas by Applicant to United from the Leatherman Creek Field, Claiborne Parish, Louisiana for a term of one year beginning on the date deliveries of gas commence thereunder. Applicant proposes to sell approximately 450,000 Mcf of gas per month at $1.50 per Mcf at 15.025 psia.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before October 12, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP73-43 (PGA76-4)]

MID LOUISIANA GAS CO.

Proposed Change in Rates

OCTOBER 4, 1976.

Take notice that Mid Louisiana Gas Company (Mid Louisiana), on September 27, 1976, tendered for filing as a part of First Revised Volume No. 1 of its FPC Gas Tariff, Twenty-Third Revised Sheet No. 3a.

Mid Louisiana states that the purpose of the filing is to reflect a Purchased Gas Cost Current Adjustment to Mid Louisiana's Rate Schedules G-1, SG-1, I-1 and E-1 to reflect the impact of Commission Opinion No. 770 in Docket No. RM75-14; that the revised tariff sheet is proposed to be effective October 27, 1976; and that the filing is being made in accordance with Section 19 of Mid Louisiana's FPC Gas Tariff and Commission Opinion No. 770; and that copies of the filing were served on interested customers and state commissions. The annual increase in jurisdictional revenues amounts to approximately $5.7 million with an additional increase under the surcharge adjustment of approximately $0.5 million.

Any person desiring to be heard or to protest said application should file a petition to intervene or protests with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 14, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP76–4]

NATIONAL FUEL GAS SUPPLY CORP.

Proposed PGA Rate Adjustment

OCTOBER 4, 1976.

Take notice that on Sept. 3, 1976 National Fuel Gas Supply Corporation (National) tendered for filing as part of its FPC Gas Tariff, Original Volume No. 1, Fifth Substitute Seventh Revised Sheet No. 4, proposed to be effective October 1, 1976.

National states that the sole purpose of this revised tariff sheet is to adjust National's rates pursuant to the PGA provisions in Section 17 of the General Terms and Conditions. National further states that such tariff sheet reflects an adjustment in National's rates of (2.77¢) per MCF on Fifth Substitute Seventh Revised Sheet No. 4.

It is stated that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Acting Secretary.

[FR Doc.76–29822 Filed 10–8–76;8:45 am]

[Docket No. CP76–528]

NATURAL GAS PIPELINE CO. OF AMERICA

Application

OCTOBER 1, 1976.

Take notice that on September 17, 1976, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP76–528 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and delivery of natural gas for Panhandle Eastern Pipe Line Company (Panhandle) for a ten-year period, the construction and operation of facilities to effectuate such transportation service, and the construction and operation of facilities required to effectuate a proposed transportation service by Panhandle for Applicant, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to transport 3,300 Mcf of natural gas per day on a firm basis and up to 2,000 Mcf per day on a best efforts basis to be produced from the Kirtley Well located in Beckham County, Oklahoma, for Panhandle. It is stated that the location of these reserves are at a distance from Panhandle's existing facilities and would require Panhandle to construct extensive facilities in order to take said gas into its system. Applicant has an existing gathering line in close proximity to the Kirtley Well, and has agreed to transport and redeliver the gas to Panhandle. Under this agreement, it is shown, Panhandle would deliver natural gas to Applicant at a point of delivery located in Section 24, Township 10 North, Range 25 West, Beckham County, Oklahoma (Kirtley receipt point), and Applicant would redeliver equivalent volumes to Panhandle at the proposed Beckham redelivery point and/or at existing points of interconnection located in Section 18, Township 17 North, Range 17 West, Dewey County, Oklahoma (Dewey redelivery point), and in Section 16, Township 30 South, Range 25 West, Clark County, Kansas (Clark redelivery point).

Applicant asserts that it would be required to construct and operate a tap connection on its existing facilities in Section 15, Township 10 North, Range 21 West, Beckham County, Oklahoma, to receive gas for transportation from Panhandle, at an estimated cost of $4,000. Initially, it is said, deliveries would be made at the Clark and Dewey points on a best efforts basis until the proposed Beckham delivery point is in service. Subsequently, during the period November through February, redelivery would be made at the Beckham point on a firm basis except when Applicant is injecting into its Sayre field storage, the application shows. Further, the application indicates that during the period March through October and at any time injections into Sayre are taking place, redelivery would be made on a firm basis at the Clark redelivery point, and the Dewey point would be used for redelivery on a best efforts basis. It is stated that Panhandle has the option to install compression which would permit the use of the Beckham redelivery point on a year-round firm basis.

Applicant proposes to charge 3.39 cents per Mcf of gas at 14.73 psia for best efforts deliveries at the Dewey point and 1.0 cent and 6.26 cents per Mcf for firm deliveries at the Beckham and Clark redelivery points, respectively. It is stated that Applicant would retain 3 percent of the volumes transported for fuel use.

It is stated that Applicant has requested Panhandle to deliver 75,000 Mcf of gas per day on a firm basis during the November through February winter period, 1976–1977 and 1977–78, and on a best efforts basis during the period March through October, 1977. It is shown that Panhandle would also transport and redeliver on a best efforts basis an additional 25,000 Mcf per day during the period November 1, 1976 through February, 1978, and subsequently, Panhandle would transport and redeliver up to 100,000 Mcf of gas per day on a best efforts basis to Applicant. Applicant would make deliveries under this arrangement at the proposed Beckham County delivery point and Panhandle would make redeliveries at the Clark redelivery point, it is indicated.

It is stated that in reviewing the projected operation of its pipeline system south of its main transmission Compressor Station No. 103, Applicant has determined that it would have a short-term capacity deficiency of at least 75,000 Mcf per day on a peak day basis during the 1976–77 and 1977–78 winter heating seasons. Applicant asserts that section of its transmission system between its Compressor Station No. 156 and Station No. 103, and Station No. 156 and Station No. 111 would be at full capacity, and that the projected total net inputs into these segments of Applicant's system for the 1976–77 and 1977–78 period are in excess of Applicant's present system capacity, resulting in reduction of approximately 75,000 Mcf per day in withdrawal rates below the certificated withdrawal capacity of Applicant's Sayre storage facility. It is indicated that Applicant has reviewed various alternatives to relieve this capacity deficiency and has determined that the most manageable and practical proposal available to Applicant is the subject transportation arrangement with Panhandle.

To effectuate this agreement, Applicant proposes to construct and operate approximately 7.8 miles of 16-inch pipeline and other miscellaneous facilities in Beckham County, Oklahoma, at an estimated cost of $796,000 to permit Applicant to deliver its gas for transportation and redelivery by Panhandle. It is shown that estimated costs of construction would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 20, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76–29823 Filed 10–8–76;8:45 am]

[Docket No. RP73–48 (PGA76–5a)]

NORTHERN NATURAL GAS CO., PEOPLES NATURAL GAS DIVISION

Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

OCTOBER 4, 1976.

Take notice that Peoples Natural Gas Division of Northern Natural Gas Company (Northern) on September 22, 1976, tendered for filing Substitute Thirteenth Revised Sheet No. 3a of its F.P.C. Gas Tariff, Original Volume No. 4. Northern states that the proposed change to become effective October 1, 1976, would increase the rate per Mcf to jurisdictional customers by 4.85¢ per Mcf. Northern states that this increase reflects a revised increase in rates by Colorado Interstate Gas Company to become effective October 1, 1976, resulting from a general rate increase filing at Docket RP76–76, and a Purchased Gas Adjustment. Northern states that Colorado Interstate is the pipeline supplier to Peoples for sales made under Volume No. 4.

Northern states that copies of the filing were served upon the Gas Utility Customers and interested State Commissions.

Northern requests waiver of the Commission's Regulation to allow an effective date of October 1, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 18, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP76–104 (PGA 76–2)]

PACIFIC INTERSTATE TRANSMISSION CO.

Proposed Changes in FPC Gas Tariff Pursuant to Purchased Gas Cost Adjustment Provision

OCTOBER 4, 1976.

Take notice that Pacific Interstate Transmission Company (Pacific Interstate) on September 27, 1976 tendered for filing as part of its FPC Gas Tariff, Original Volume No. 2, the following sheets:

Third revised sheet No. 4.
Second revised sheet No. 5.

The proposed effective date of both of these tendered tariff sheets and the rates reflected thereon is October 27, 1976.

Pacific Interstate states that the tariff sheets listed above are issued pursuant to the Purchased Gas Cost Adjustment (PGCA) Provision as set forth in Section 16 of the General Terms and Conditions of its FPC Gas Tariff, Original Volume No. 2, and to provisions of Opinion No. 770 and the Order Modifying Opinion No. 770.

Pacific Interstate states that the change in its rates incorporated in the tendered tariff sheets reflect a Gas Cost Adjustment to recover an annual increase in jurisdictional revenues of $291,417 and a special Surcharge Adjustment to recover costs of $516,559, that both adjustments are related solely to producer filings tendered on or before August 26, 1976, pursuant to provisions of Opinion No. 770, and that it has selected the option of collecting the special Surcharge Adjustment over the twelve months commencing October 27, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP73–48 (PGA 76–4)]

NORTHERN NATURAL GAS CO.

Refund Report

OCTOBER 4, 1976.

Take notice that on September 20, 1976, Peoples Natural Gas Division of Northern Natural Gas Company (Peoples Division) tendered for filing a Refund Report reflecting refunds made by Peoples Division as a result of a reduction in rates by its pipeline supplier, Colorado Interstate Gas Company (CIG), effective for the period June 1, 1976 to June 30, 1976. The refund by Peoples Division affected customers served under its F.P.C. Gas Tariff, Original Volume No. 4.

Peoples Division states that copies of the filing were served upon each of the Gas Utility Customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file with the Commission and are available for public inspection.

[Docket No. RP71–11 (PGA 76–5)]

TENNESSEE NATURAL GAS LINES, INC.

Tariff Change

OCTOBER 4, 1976.

Take notice that on September 27, 1976, Tennessee Natural Gas Lines, Inc. (Tennessee Natural) tendered for filing proposed changes to First Revised Volume No. 1 of its FPC Gas Tariff to be effective on October 27, 1976, consisting of the followign revised tariff sheets:

First Substitute Sixteenth Revised Sheet No. PGA–1; and
First Substitute and Eleventh Revised Sheet No. PGA–2.

V41 I198 OCT 12 76 UMI

Tennessee Natural states that the purpose of the instant filing is to make a PGA rate adjustment pursuant to the purchased gas adjustment provisions of Rate Schedules G–1 and SWS–1 of its FPS Gas Tariff and to the Commission's "Order Modifying Opinion No. 770" issued September 22, 1976 in Docket No. RM75–14, to reflect a PGA rate change of its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco, Inc., filed on September 27, 1976, and proposed to become effective on October 27, 1976, pursuant to the aforesaid Order of the Commission.

Tennessee Natural states that copies of the filing have been mailed to its jurisdictional customer and the affected state regulatory commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party just file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. RP65–59 and RP73–65]

TEXAS EASTERN TRANSMISSION CORP.

Order Directing Release of Refunds and Approving Refund Plan

OCTOBER 5, 1976.

On September 5, 1975, Columbia Gas Transmission Corporation (Columbia), the legal successor to The Ohio Fuel Gas Company (Ohio Fuel), filed a petition for an order releasing refunds held in escrow by Texas Eastern Transmission Corporation (Texas Eastern) for the account of Ohio Fuel. Texas Eastern held the refunds in escrow under an agreement dated January 25, 1967, pursuant to the Commission's order of January 11, 1967, in Docket No. RP65–59. The refunds being held by Texas Eastern amount to $826,490.14 plus earned interest applicable to the period from October 1, 1965, through November 30, 1966.

Columbia proposes to flow through such refunds by crediting the Deferred Purchase Gas Cost Account, rather than according to the refund procedures approved in the settlement agreement in Docket No. RP66–7. Accordingly, Columbia asks for waiver of the obligation under those refund procedures to invest said refund amounts if held for more than 90 days in short term government securities and to apportion the interest earned thereon to the jurisdictional customers upon distribution. Columbia proposes to flow through to its customers formerly supplied by Ohio Fuel $767,029.20 plus earned interest applicable to the period from October 1, 1965, through October 31, 1966. Columbia proposes to retain refunds of $59,460.94 plus earned interest for the month of November 1966 because its rates effective November 1, 1966, reflected the reduced rates of Texas Eastern which are the basis for the refund.

Notice of Columbia's petition was issued September 17, 1975, with comments, protests, and petitions to intervene due on or before October 1, 1975. None have been received.

The Commission will direct Texas Eastern to release to Columbia the refunds held in escrow. Furthermore, since no opposition to Columbia's refund plan has been received, the Commission will approve Columbia's proposal to flow through the refunds, except amounts attributable to November 1966, by crediting the Deferred Purchase Gas Cost Account rather than according to the refund procedures approved in the settlement agreement in Docket No. RP66–7.

The Commission finds. It is necessary and proper in the public interest and in carrying out the provisions of the Natural Gas Act that Texas Eastern be directed to release the refunds held in escrow for the account of Ohio Fuel and that Columbia flow through said refunds in accordance with Columbia's petition filed September 5, 1975, as hereinafter ordered.

The Commission orders. (A) Within 30 days of the issuance of this order, Texas Eastern is hereby directed to release to Columbia the refunds amounting to $826,490.14, plus earned interest, held in escrow for the account of Ohio Fuel, in accordance with the Texas Eastern escrow agreement dated January 25, 1967, pursuant to the Commission's order of January 11, 1967, in Docket No. RP65–59, applicable to the period of October 1, 1965, through November 30, 1966.

(B) Within 15 days after the release of said refunds to Columbia, Texas Eastern will file with the Commission a report of the amount of refunds and earned interest disbursed to Columbia.

(C) Columbia's refund plan in its petition filed September 5, 1975, is hereby approved; the refund procedures approved in the settlement agreement in Docket No. RP66–7 are waived as requested, and Columbia will upon release of the refunds to it by Texas Eastern credit its Deferred Purchase Gas Cost Account in the amount of $767,029.20 plus earned interest and flow through such amounts to its customers formerly supplied by Ohio Fuel in its next PGA filing.

(D) Within 15 days after the receipt of the refunds from Texas Eastern, Columbia will file with the Commission a report of the amount of refunds and earned interest credited to the Deferred Purchase Gas Cost Account for the account of its customers formerly supplied by Ohio Fuel.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29832 Filed 10-8-76;8:45 am]

[Docket No. CP76–531]

TEXAS GAS TRANSMISSION CORP.

Application

OCTOBER 1, 1976.

Take notice that on September 20, 1976, Texas Gas Transmission Corporation (Applicant), P.O. Box 1160, Owensboro, Kentucky 42301, filed in Docket No. CP76–531 an application pursuant to section 7(c) of the Natural Gas Act and section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation of natural gas for Consolidated Aluminum Corporation (Consolidated), an existing industrial customer of Jackson Utility Division, City of Jackson, Tennessee (Jackson), one of Texas Gas' resale customers, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to transport on an interruptible basis for two years up to 1,400 Mcf of gas per day. It is stated that Consolidated has entered into a contract with Franks Petroleum, Inc. (Franks), for the purchase of natural gas to be produced from certain leasehold interests presently owned or controlled by Franks in Midland Field, Acadia Parish, Louisiana. Such natural gas would be delivered to Applicant at the existing facilities of Applicant and Columbia Gulf Transmission Company (Columbia Gulf) at Columbia Gulf's Rayne, Louisiana, compressor station located in Acadia Parish, Louisiana, or at other mutually acceptable points of interconnection between Applicant and Columbia Gulf, as set forth in Applicant's gas rate schedule X–51, it is said. Further, it is indicated that Applicant would simultaneously redeliver volumes of natural gas up to 1,400 Mcf on a peak day, up to 1,000 Mcf on an average day, and up to 511,000 Mcf on an annual basis to an existing point of delivery with Jackson for the account of Consolidated. It is stated that in no event would Applicant be obligated to deliver on any day an aggregate amount of more than the contract demand of 34,370 Mcf through all points of delivery of Applicant to Jackson.

Applicant proposes to charge 15.81 cents per Mcf at 14.73 psia and would retain 5.2 percent of the gas transported as makeup for compressor fuel and line loss.

It is stated that since the volumes to be transported under this and any similar transportation agreements with customers of distributors themselves and the distribution customers' scheduled daily deliveries, would not exceed the contract entitlement of the distributors from Applicant, there exists sufficient pipeline capacity to perform the service on a peak day, average day and annual basis.

Applicant asserts that if the natural gas is not sold to Consolidated, then it would be sold to an interstate pipeline or to a direct consumer located in Louisiana, and therefore Applicant does not consider the subject natural gas to be available to it for purchase.

The application states that the gas to be transported would be used for fuel in the Consolidated Aluminum Corporation plant in Jackson, Tennessee. The Jackson plant operates an ingot casting facility, hot and cold rolling mills, a coil coating (paint) line, and a foil rolling facility, it is shown, and the primary products from this plant are painted coil which goes into construction and appliance end uses and aluminum foil which goes into electrical, food packaging and container industries.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 20, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP73–3 (PGA76–4)]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Tariff Filing

OCTOBER 4, 1976.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) on September 27, 1976 tendered for filing two revised tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1 with a proposed effective date of October 27, 1976. Transco states that the revised tariff sheets reflect a special "tracking" rate increase of 36.4¢ per Mcf in Transco's CD, G, OG, E, PS, S–2 and ACQ rate schedules pursuant to Ordering Paragraph (D) of Opinion No. 770, as modified by Ordering Paragraph (A) of Order issued September 22, 1976 in said Opinion together with a reduction of 6.0¢ per Mcf due to the elimination of the Deferred Adjustment made effective May 2, 1976 under a PGA filing. Also, Transco states that the special "tracking" increase is based solely on those producer increases filed on or before August 26, 1976, to be effective July 27, 1976, and October 1, 1976, pursuant to Opinion No. 770.

Transco further states that the 36.4¢ consists of an increase in the current gas cost of 26.5¢ per Mcf plus a surcharge of 9.9¢ per Mcf, which surcharge is designed to recover, over the twelve month period commencing October 27, 1976, the estimated costs incurred during the period July 27, 1976, through October 26, 1976, together with carrying charges at 9% per annum, as provided in the Commission's Order of September 22, 1976, in Docket No. RM75–14. Transco further states that the estimated increase in purchased gas cost resulting from the producer rate increases filed on or before August 26, 1976, to be effective July 27, 1976, and October 1, 1976, pursuant to Opinion No. 770 is $184,666,752. Transco further states that the surcharge amounts to $51,351,113, plus $2,537,655 for carrying charges.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29809 Filed 10-8-76;8:45 am]

TRANSWESTERN PIPELINE CO.

Proposed Changes in FPC Gas Tariff

OCTOBER 4, 1976.

Take notice that Transwestern Pipeline Company (Transwestern) on September 27, 1976, tendered for filing as part of its FPC Gas Tariff, Second Revised Volume No. 1, the following sheets:

Fifth Revised Sheet No. 5
Fifth Revised Sheet No. 6

These sheets are being issued pursuant to Ordering Paragraph (D) of the Commission's Opinion No. 770 issued July 27, 1976 in Docket No. RM75–14 and Order Modifying Opinion No. 770 issued September 22, 1976. The increase in rates is based upon the Opinion No. 770 increases in Transwestern's cost of purchased gas including a special surcharge designed to recover over the twelve-month period, October 27, 1976–October 26, 1977, the cost associated with Opinion No. 770 increases prior to October 27, 1976 with carrying charges at nine percent. The proposed effective date of the above tariff sheets is October 27, 1976.

The annualized amount of claimed purchased gas cost increases under Opinion No. 770 is $96,369,691. The proposed surcharge to recover unrecovered purchased gas costs is $14,562,570. Carrying charges on the unrecovered purchased gas costs are $671,592. The total amount claimed is $111,603,853.

Copies of the filing were served upon the Company's jurisdictional customers and the interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 15, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29827 Filed 10-8-76;8:45 am]

[Docket No. RP73–35 (PGA76–4)]

TRUNKLINE GAS CO.

Change in Tariff

OCTOBER 4, 1976.

Take notice that on September 24, 1976, Trunkline Gas Company (Trunkline) tendered for filing Seventeenth Revised Sheet No. 3–A to its FPC Gas Tariff, Original Volume No. 1, such sheet proposed to be effective November 1, 1976.

V41 I198 OCT 12 76 UMI

The Company submits that this revised sheet is filed in accordance with Paragraph (D) of the Commission's Opinion No. 770 issued July 27, 1976, as modified by FPC order issued September 22, 1976, and pursuant to the provisions of the General Terms and Conditions of Trunkline's FPC Gas Tariff. The filing provides for increased annual jurisdictional revenues of approximately $140 million under the PGA increase and a surcharge adjustment of approximately $37 million.

Trunkline states that the revised tariff sheet reflects only those increases in purchase gas costs as authorized by the Commission in Opinion No. 770 to be effective July 27, 1976. No other increases in purchase gas costs are included in the filing. In accordance with the Commission's order of September 22, 1976, Trunkline has elected to file for a surcharge (including a nine (9) percent carrying charge) to recover costs incurred as a result of Opinion No. 770 from July 27, 1976 to November 1, 1976, such surcharge to be effective for the twelve (12) month period commencing November 1, 1976. Trunkline shall maintain a separate account relating to such surcharge amounts and any imbalance in the account at the end of the twelve (12) month period shall be transferred to the Deferred Purchased Gas Cost Account maintained in accordance with § 18.3 of the General Terms and Conditions of Trunkline's tariff.

The Company submits that the purchased gas cost increases by reason of Opinion No. 770 rates effective July 27, 1976, which Trunkline has included in its rates herein, have been calculated on the basis of producer filings with Commission. To the extent that the amounts filed by the producers are subject to refund, the related amounts included in Trunkline's rates shall also be subject to refund in accordance with Section 18.5 of the General Terms and Conditions of Trunkline's tariff.

Copies of this filing were served on Trunkline's jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 14, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29829 Filed 10-8-76;8:45 am]

[Docket No. RP76-109]

UTAH GAS SERVICE CO.

Order Accepting and Approving Settlement Agreement

OCTOBER 4, 1976.

On August 5, 1976, Utah Gas Service Company (Utah Gas) filed a Stipulation and Agreement in settlement of the rate proceeding in the captioned docket. The Commission finds that the Agreement is in the public interest and accepts and approves it.

The instant docket was initiated when Utah Gas tendered for filing on June 4, 1976, a revised tariff sheet[1] reflecting an increase in the cost of natural gas being sold by Utah Gas to Northwest Pipeline Corporation (Northwest) in accordance with a Gas Purchase Agreement dated September 19, 1973, as amended. In its filing Utah Gas stated that the proposed change in rate was attributable entirely to an increase from $0.10 per Mcf to $0.3256 per Mcf in the transportation charge, a component of the base rate. In support of this claim, Utah Gas submitted a cost of service study related to the jurisdictional plant (the Altonah-Jensen Pipeline) based on actual operations for the twelve months ended February 29, 1976, adjusted for known and measurable changes that it will incure during the subsequent nine months.[2]

By order issued July 2, 1976, the Commission accepted for filing and suspended Utah Gas' rate filing for one day, to become effective July 5, 1976, subject to refund. Northwest filed a petition to intervene, which was granted by Commission order issued August 19, 1976.

A settlement conference held July 27, 1976, and attended by representatives of Utah Gas and of the Commission Staff resulted in a proposed settlement agreement dispositive of all issues in the proceeding. Utah's proposed rate, as filed June 4, 1976, is $1.05245 per Mcf, which is comprised of: (1) a base rate of $0.61715 per Mcf (purchased gas costs of $0.5072 per Mcf, gathering charge of $0.00995 per Mcf, and transportation charge of $0.10 per Mcf); (2) purchased gas adjustment rate of $0.2097 per Mcf; and (3) an increase of $0.2256 per Mcf in the transportation rate. The settlement agreement provides for a change in the requested transportation rate from $0.3256 per Mcf to $0.3019 per Mcf, resulting in an overall proposed settlement rate of $1.02875. Utah Gas agrees to refund, with interest at 9%, amounts collected in excess of the settlement rate.

Notice of Utah Gas' filing of the proposed Stipulation and Agreement was issued August 13, 1976, with responses and protests due on or before August 26, 1976. On August 26 the Commission Staff filed comments in support of the Agreement, stating that the proposed settlement rate is not in excess of the just and reasonable rate. Northwest filed a letter on August 20, stating it has no objection to the settlement.

Review of the record in these proceedings, including the settlement agreement itself, the filings, documents and pleadings submitted, demonstrates that the proposed rates are supported by cost evidence and are just and reasonable, and that the settlement agreement represents a reasonable resolution of the issues. Accordingly, approvel and adoption of the Agreement are in the public interest.

In conjunction with acceptance and approval of the subject Agreement, the Commission shall require Utah Gas to tender for filing revised tariff sheets reflecting the terms of the settlement agreement.

The Commission finds: The Stipulation and Agreement filed in the instant docket on August 5, 1976, by Utah Gas is supported by cost evidence and should be accepted and approved as hereinafter conditioned and ordered.

The Commission orders: (A) The Stipulation and Agreement filed on August 5, 1976, in this proceeding is hereby accepted, incorporated herein by reference, and approved effective July 5, 1976, subject to the following conditions.

(B) Utah Gas shall file within 30 days of the issuance of this order a revised tariff sheet to reflect the settlement rate specified in the Stipulation and Agreement approved herein.

(C) Within 30 days of issuance of this order, Utah Gas shall refund to Northwest all amounts collected since July 5, 1976, in excess of the settlement rate level, together with interest calculated at nine percent per annum.

(D) Utah Gas shall file with the Commission a report within 15 days after the refunds described in paragraph (C), supra, have been made. Such report shall show, for the entire refund period, monthly billing determinants and revenues under prior, present and settlement rates. The report shall also show monthly interest computation, together with a summary of such information for the entire refund period.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, Utah Gas, Northwest, or any other party or person affected by this order in any proceedings now pending or hereafter instituted by or against Utah Gas, Northwest, or any other person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.76-29821 Filed 10-8-76;8:45 am]

[1] Third Revised Sheet No. 18A to Utah's FPC Gas Tariff, Original Volume No. 1, Rate Schedule X-1.

[2] The only adjustment was an increase in rate of return from 9.0% to 10.6%, based on a total capatalization of $3,082,020, comprised of 65.5% debt and 34.5% equity (with a 15% return on equity).

[Docket No. RP76-41]

VALLEY GAS TRANSMISSION, INC.

Order Approving Stipulation and Agreement

OCTOBER 5, 1976.

On July 2, 1976, Presiding Administrative Law Judge William L. Ellis certified to the Commission a proposed Stipulation and Agreement of Settlement (Stipulation) which would dispose of all issues in the above-captioned proceeding. For the reasons set forth below, the Commission shall accept and approve the Stipulation.

Proceedings in this docket were initiated on November 21, 1975, when Valley Gas Transmission, Inc. (Valley) tendered for filing revised tariff sheets[1] to Original Volume No. 1 of its FPC Gas Tariff. The purpose of these tariff sheets was to effectuate a rate increase pursuant to a cost of service tariff for the gathering service which Valley renders to Tennessee Gas Pipeline Company, United Gas Pipe Line Company, and National Fuel Gas Supply Corporation. Valley also filed, in the alternative, a tariff sheet[2] reflecting a rate increase for the subject gathering service without the cost of service tariff provisions. Valley requested a January 1, 1976, effective date for the proposed rate increase.

By order issued December 31, 1975, the Commission deferred action on the cost of service tariff sheets but accepted for filing and suspended until January 2, 1976, the alternate tariff sheet. The Commission concluded that the cost of service tariff sheets should be treated as pro forma tariff sheets and should be the subject of a hearing to determine their appropriateness. The Commission further found that any determination with respect to such pro forma sheets should be made effective prospectively only. Finally, the Commission granted the petitions to intervene filed by National Fuel Gas Supply Corporation and the Public Service Commission of the State of New York.[3]

The major elements of the proposed Stipulation are as follows:

(1) The gathering charge discussed hereinabove shall be reduced from 11.36 cents per Mcf proposed by Valley to 10.93 cents per Mcf as proposed by the Commission's Staff.

(2) The 10.93 cents gathering charge reflects an overall rate of return of 9.94 percent including a 13.0 percent return on common equity.

(3) Valley shall not file with the Commission any increase in the subject gathering charge prior to December 1, 1977, provided, however, that Valley shall have the right to file such an increase prior to December 1, 1977, if at any time prior to said date Valley's books show that over any consecutive 12-month period beginning after April 18, 1976, Valley has not earned the 9.94 percent overall rate of return provided in the Stipulation.

(4) Valley shall withdraw its proposed cost of service tariff sheets.

(5) Within 10 days after a Commission order approving the Stipulation becomes final and non-appealable, Valley shall file revised tariff sheets incorporating a 10.93 cents per Mcf gathering charge to be effective as of January 2, 1976.

(6) Following Commission acceptance of the revised tariff sheets referred to in paragraph (5), supra, Valley shall make refunds to those customers affected by the instant filing by means of credits to the next billing statements rendered by Valley. Interest on such refund amounts shall be calculated at the rate of nine percent per annum.

(7) Neither Valley, the Commission Staff nor any other party shall be deemed to have consented to any ratemaking principles underlying or supposed to underlie the agreed-upon gathering charge.

At a hearing held before Presiding Judge Ellis on June 30, 1976, counsel for Valley, National Fuel Gas Supply Corporation, and the Commission Staff indicated their support for the Stipulation. No other parties were represented.

Public notice of the Presiding Judge's certification of the Stipulation was issued on September 1, 1976, providing that any comments should be filed on or before September 13, 1976. No responses have been received.

The Commission's review of the proposed Stipulation leads to the conclusion that it reflects a just and reasonable resolution of the issues in this proceeding. Accordingly, the Stipulation shall be incorporated herein by reference, accepted and approved.

The Commission finds: Good cause exists to incorporate herein by reference, accept and approve the Stipulation and Agreement of Settlement certified to the Commission in this proceeding on July 2, 1976.

The Commission orders: (A) The Stipulation and Agreement of Settlement certified to the Commission in this proceeding on July 2, 1976, is incorporated herein by reference, accepted and approved.

(B) Within 10 days after this order becomes final and non-appealable, Valley shall file revised tariff sheets incorporating a 10.93 cents per Mcf gathering charge to be effective as of January 2, 1976.

(C) As provided for by the terms of the settlement, immediately following Commission acceptance of the revised tariff sheets referred to in ordering paragraph (B), supra, Valley shall make refunds to affected customers of all amounts collected in excess of the gathering charge approved herein. Such refunds shall be made in accordance with the terms of the Stipulation discussed hereinabove, and shall bear interest at the rate of nine percent per annum.

(D) Within 15 days after refunds are made in accordance with ordering paragraph (C), supra, Valley shall file a refund report with the Commission and shall serve a copy thereof upon all affected customers. Such report shall show monthly billing determinants and revenues under the proposed and settlement rates, the monthly interest computation, and a summary of all such information for the entire refund period.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, the Staff or any other person or party affected by this order in any proceeding now pending or hereinafter instituted by or against Valley or any other person or party.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[2] Alternate Sixth Revised Sheet No. 2A.

[3] By order issued February 12, 1976, the Commission granted the late petition to intervene of Tennessee Gas Pipeline Company.

[Docket No. ER76-882]

WISCONSIN POWER & LIGHT CO.

Order Accepting in Part and Rejecting in Part Revised Contract Terms, Granting Intervention, and Denying Motion To Consolidate

SEPTEMBER 29, 1976.

On August 30, 1976, the Wisconsin Power & Light Company, (WPL) tendered for filing revised rate schedules of its five cooperative, thirty-two municipal and two investor-owned wholesale customers.[1] WPL states that the instant filing is made to incorporate in each of the affected rate schedules the necessary statement regarding unilateral rate change applications in compliance with FPC Order Nos. 541 and 541-A, and requests an effective date of August 1, 1976. For the reasons hereinafter stated, the Commission shall accept the revised schedules as to thirty-three of the abovementioned customers, but reject the revised schedules as to the remaning six customers.

Each of the revised rate schedules provide for the inclusion of language permitting unilateral rate change filings by WPL, as follows:

> Nothing contained herein shall be construed as affecting in any way the right of the party furnishing service under this rate schedule to unilaterally make application to the Federal Power Commission for a change in rate, charges, classification; or service, or any rule, regulation, or contract relating thereto, under Section 205 of the Federal Power Act and pursuant to the Commission's Rules and Regulations promulgated thereunder.

The proposed rate schedules are also revised to decrease from ten years to five years the initial term for new contracts

[1] See Attachment A for designations of those rate schedules which will be accepted for filing.

V 41 198 OCT 12 76 UMI

necessitated by an increase in customer demand over the stated contract demand pursuant to the terms of the purchase agreement.

Notice of the filing in Docket No. ER 76–882 was issued on September 14, 1976, with comments, protests, or petitions to intervene due on or before September 22, 1976. On September 14, 1976, a petition to intervene and motion to consolidate with Docket No. ER76–331 was filed by the Municipal Wholesale Power Group (Municipals), WPL's W–3 wholesale customers. Municipals question whether the insertion of the proposed unilateral rate change language is intended to change the existing contractual rights of the parties to preclude negotiation of specific protective rate change provisions. Inasmuch as the Municipals, WPL, and the rural electric cooperatives affected by the subject filing are all parties to the proceedings in Docket No. ER76–331, Municipals request consolidation of this filing with Docket No. ER76–331 in order to resolve any questions relating to the revised contract language.

On November 21, 1975, the Commission issued its Order No. 541 in Docket No. RM74–15 which amended § 35.1 of its Regulations under the Federal Power Act, 18 CFR 35.1, by redesignating the existing subsection (d) as subsection (e) and by adding a new subsection (d). This new subsection required that, effective March 1, 1976, certain rate schedules filed with the Commission[2] must expressly indicate whether or not service was to be rendered under a "fixed rate contract" by including one of two provisions in the tendered rate schedule. By order issued June 29, 1976[3], however, Order No. 541 was amended in the following manner:

> Accordingly, we have concluded that paragraph (d) of § 35.1 should be amended to provide (1) that all rate schedules filed on or after August 1, 1976, shall contain the first boilerplate provision with respect to such portions of the schedule where it is the intent of the parties to give the supplier the unrestricted right to file unilateral rate changes; (2) that all rate schedules filed on or after August 1, 1976, shall contain the first boilerplate provisions with respect to such portions of the schedule where it is the intent of the parties to withhold from the supplier the right to file any unilateral rate changes; and (3) the parties are free to file rate schedules which contain neither boilerplate provisions, or which have certain provisions subject to neither boilerplate provision. (mimeo, pg. 8)

The Commission's review of WPL's proposed filing indicates that it conforms with the requirements of Order No. 541–A, supra. We shall therefore accept the revised rate schedules to become effective as to thirty-three of WPL's customers as of August 1, 1976.

With respect to six of WPL's wholesale customers,[4] however, the Commission found their existing contracts with WPL to be fixed rate in its order of December 31, 1975, in Docket No. ER76–331. The Commission therefore rejected WPL's proposed rate change therein as it would have applied to those customers, without prejudice to WPL's right to timely file such rate changes upon expiration or cancellation of the existing contracts. The same rationale applies with respect to the instant filing. Inasmuch as the six contract at issue herein have been found to be fixed rate, the proposed revisions are clearly inappropriate until such time as these contracts expire or are cancelled. We shall therefore reject WPL's instant proposed revised rate schedules as to these customers without prejudice to WPL's right to timely file such changes upon expiration or cancellation of the existing contracts.

With respect to Municipals' request for consolidation with the proceedings in Docket No. ER76–331 in order to resolve questions concerning the possible infringement of existing contractual rights caused by the present filing, we find that the proposed language does not substantively alter the contractual rights of the parties under the existing contracts. We further find that our acceptance of the instant filing, in part, will not preclude negotiation of specific protective rate provisions, a concern raised by Municipals.

Good cause has therefore not been shown to consolidate this matter with the proceedings in Docket No. ER76–331, and Municipals' request will be denied.

The Commission finds. (1) Good cause has been shown to accept WPL's proposed revised rate schedules as they apply to thirty-three of WPL's wholesale customers, as of August 1, 1976.

(2) Good cause has been shown to reject WPL's proposed rate schedules as to six of WPL's wholesale customers.

(3) Good cause has not been shown to consolidate the instant docket with the proceedings in Docket No. ER76–331.

The Commission orders. (A) WPL's proposed revised rate schedules as designated in Appendix A attached hereto are accepted for filing to become effective August 1, 1976.

(B) WPL's proposed revised rate schedules applicable to the Pioneer Power & Light Company, Cross Plains Electric Company, and the Cities of Stoughton, Columbus, Princeton and Shullsburg are hereby rejected without prejudice to WPL's right to timely file such schedules upon expiration or cancellation of their existing contracts.

(C) The above-named petitioners are hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in their petition to intervene; and *Provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(D) Municipals' motion for consolidation with Docket No. ER76–331 is hereby denied.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on October 4, 1976. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before November 1, 1976, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, Room 5216, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–376–5425.

FEDERAL ENERGY ADMINISTRATION

The FEA requests an extension to change clearance of Form FEA–G318–M–0, Underground Gas Storage Report. This report enables the FEA and the FPC to maintain a better and more current picture of natural gas supply in the United States. This report is mandatory under Pub. L. 93–275, The Federal Energy Administration Act of 1974; as amended by the Energy Conservation and Production Act of 1976, Pub. L. 94–385. Reports must be filed within five days after the first and fifteenth day of the months December through March; and the first day of the months April through November. FEA estimates the number of respondents to be 47 and the estimated reporting burden to be four hours per response.

The FEA requests an extension to change clearance of Form FEA–P302–M–1, Petroleum Industry Monthly Report for Product Prices. This is a monthly report which collects refined petroleum products information inclusive of prices, sales volumes and cost pass through data and must be filed by Gas Plant Operators, Petroleum Refiners and Large Reseller/Retailers. This report is mandatory under Pub. L. 93–275, Federal Energy Administration Act of 1974; and Pub. L. 93–159. The Emergency Petroleum Allocation Act of 1973 as amended by Pub. L. 94–163, The Energy Policy and Conservation Act of 1975; and Pub. L. 94–385, The Energy Conservation and Production Act of 1976. FEA estimates potential respondents to be approximately 47 and the burden to average 100 hours per response. The average burden estimate per response has been reduced from 220 to 100 hours due to decontrol.

JOHN M. LOVELADY,
Acting Assistant Director, Regulatory Reports Review.
